The idea is an American one purely, and is a great one, but not in the least inconsistent with all the other acts of the loyal States during the war. Our armies, our navy, our hospital and sanitary commissions have been achievements on the same grand scale. And there is wealth enough in the country to justify the attempt. Fortunes of collossal size are heaped up in this country in a few years time. We are astounded to perceive the enormous incomes enjoyed by families who

make not the least show or pretension. Few of these know what to do with their money which accumulates on their hands, and they could spare the sum named without the slightest inconvenience. It seems to us that if the subject was thoroughly discussed and pushed in the right quarters, the desired result might be secured within a year's time. The only amendment to the proposition we have yet noticed is that smaller sums should be received, as hundreds of thousands of patriotic persons worth ten thousand dollars, would be quite ready to contribute one or two hundred dollars even of their principal for the same great object.

Having thus done our duty to the country by promulgating it, and to the noble men who originated it, we leave the further consideration of the subject with our readers.

Gold within the last week has been as low as 138. The recent fall of the capital of South Carolina, and the evacuation of its principal and long defiant seaport have reached the knowledge of the gold speculators, and the logic of facts has been too forcible even for the most ingenious theorists.

We again assert the opinion, that the country is radically strong and sound, and that an able financier at the head of the Treasury under the great successes of our armies, and with the people ready to back him up to the full extent of their means, would have comparatively an easy task to put our finances in the most stable position. As yet there is no positive indication of the coming man.

As a favorable circumstance connected with this view of the subject, we notice the fall in foreign exchange, which is more than 2½ per cent. below par. This is an unusual circumstance of late years in our commercial history. According to prevailing theories this fact should cause large receipts of specie from abroad; gold being worth that difference here, more than in England should come in under the law of demand and supply. For at present rates of exchange a pound sterling will bring more in New York than it does in London, and those who wish to ship it have to submit to a loss of 2 per cent., or thereabouts to move it.

It appears that our exports during the present year have been of the value of $32,204,167, against $18,861,525 of imports, which nominally leaves a balance of trade in our favor of $18,342,642, and which even if reduced to a gold standard is still largely in our favor.

It is also well understood that large orders are constantly arriving on foreign account for our 5-20's and 10-40's, which actually bring several per cent. more abroad than in New York.

The 7-30's are also doing well under the efficient handling of Jay Cooke & Co., and as all our securities must eventually be paid in coin, on the principle that paper and coin are certain to be equalized when we resume specie payments, we can see no reason why the 7-30's should not become the popular favorite, as its interest is so much greater, at least with American capitalists. We observe that the circulation of our city associated banks on the 18th inst., was but $2,682,319, against $5,908,394 on the 20th of the same month in 1864, and the specie was $20,682,319, against $22,623,918, at the two periods respectively. The deposits are largely on the increase being $186,365,126, against $168,391,985, respectively. Money is plentiful, with the usual difference made between first class and ordinary commercial paper.

Governments are improving, and will doubtless continue to do so.

The price of cotton is watched with much interest. The quotations on Monday were according to quality from 69 to 86 cents per lb. We think a very heavy fall in price is imminent. Our latest accounts from India state that the breadth of ground planted with cotton the past year has been full 50 per cent greater than the previous year, and that as greater care is taken in the cultivation the crop is more valuable. It is even asserted as a consequence, that yarns of such fineness are now produced from it, that "on the whole the cloth prepared from it has been pronounced superior in durability, and equal in other respects to that produced from Upland American." This is the opinion of an East Indian Expert, Mr. Hume, as recently given in an official communication to a Revenue Board. The same authority asserts that the price hereafter is not likely to fall below an average of 6d sterling per lb., and that the Southern States can never again obtain a supremacy in the foreign market. It is noticeable that the article abroad has declined recently as much as 18 cents per lb.

The Bank of England as late as the 5th of February held in specie a balance of £14,461,224. Capitalists were calling in their money and Consols continued to show signs of weakness. The Manchester spinners, were very much discouraged by the downward course of the market, and were quite gloomy over the prospect of serious losses. And well they may be. A fixed capital of fifty millions is engaged in the manufacturing of cotton in England, operating *thirty millions* of spindles, and employing 400,000 hands. But the number of persons indirectly engaged in the manufacture is estimated at 3,600,000! In the beginning of the last century the importation of cotton into Great Britain was not two millions of pounds, in 1861 it was 820 millions.

The news by the last steamer from Liverpool is indicative of a marked disposition on the part of the British Government to maintain the most friendly relations with this country. At the same time it is to be regretted that the London *Times* which may be considered as almost a part of the Government continues to discredit as much as possible our ability to meet our financial engagements. Thus it asserts the Treasury will be short of gold to meet its future interest, and will have to go into the market to get a supply and thus enhance the premium. A cotemporary refutes this statement in the clearest manner.

The customs revenue in 1863 was in sterling £13,800,000
In 1864 20,450,000
1865 to June 30 14,000,000
Total for 3 years £48,250,000

The total interest paid and payable for the same period up to June 30, 1865, is but £26,150,000. Also have been paid off in gold during the same time, Demand gold bearing Treasury notes, Principal of stock of 1842, do., 1850, in all £13,000,000 —Leaving a gold balance of £9,100,000.

So that the Government has not only paid its interest in gold, but has paid principal besides to the extent of $65,000,000 during the same time. Not only this, but it has been able abundantly to dispose of some of its surplus gold, for currency at a large premium, say in New York £4,500,000, and in London £1,000,000, and yet on the 30th of June next, after fulfilling all its engagements it will still have in gold in the Treasury $18,000,000. Nothing can be more clear than this proof of the stability of our financial resources in relation to our funded debt. If the *Times* is amenable to justice, it should correct its mistatements.

The condition of the stock market may be reported as improving. Governments are in large request and advancing. The Railway market is also better and some of its securities are quite strong.

The last weeks exports of domestic produce were heavy, viz., $5,163,465 against $2,963,866, the same week last year. In the above amount is included 1,105 bales of cotton of the value of $433,583. The Boston imports for the week ending 17th were $219,190.

The balance in the Sub-Treasury in this city on Tuesday, was $25,260,857 53.

The fall in gold is noted in our usual quotations.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois coupon 6s, 1879, 98; Louisiana 6s, 60; Connecticut 6s, 100; Cleveland and Toledo dividend bonds 1865, 101½; McGregor Western 1st mort., 70; Brooklyn 6s Water Loan, 105; Central Coal, 46; Wyoming Valley Coal, 58; Fontinac Lead, 59¼; Smith and Parmalee Gold, 6½; Columbia Marine Insurance Co., old stock, 157; do., new, 148½; Metropolitan Fire Insurance Co., 140¼; Central National Bank, 105; Shoe and Leather Bank, 108; 4th National Bank, 102; Importers' and Traders' Bank, 108; Bank of Commerce, 110; Metropolitan Bank, 120; Marine Bank, 160; Fulton Bank, 172½; Merchants Bank, 117; Bank of Utica, N. Y., 100; Corn Exchange Bank, 110; Hanover Bank, 103½; Tradesmans Bank, 122; Bank of North America, 108½; Bank of America, 140; Am. Ex. Bank, 122.

Philadelphia.—Pittsburg 6s, 75; Girard College horse R. R., 25; Union Canal Interest bonds, 25; Clinton Coal, 1⅛; Coal Ridge Imp. Co., 18; Locust Mt. Coal, 49⅛; Big Mt., 5⅛; Green Mt., 4; Swatara Falls, 5; Penn. Mining, 10; Keystone, Zinc, 2; Manuf. and Mech. Bank, 81½; Mechanics' Bank, 80; Philadelphia Bank, 143; Bank of North America, 195; Commercial Bank, 62; Atlas Oil, 1.44; Briggs, 4; Bruner, 1.31; Big Tank, 2; Bull Creek, 2⅛; Caldwell, 6⅛; Corn Pl., 5⅝; Crescent City, 1½; Cow Creek, 1¾; Cherry Run, 30; Densmore, 6; Dalzell, 8¾; Duncard Creek, 1; Davis, 1¼; Egbert, 3½; Excelsior, 1¼; Eldorado, 1⅞; Franklin, 2⅛; Germania, 0.94; Hyde Farm, 4¼; Hibbard, 1¾; Howe's Eddy, 1⅛; Junction, 3; Krotzer, 1½; Logan, 1½; McClintock, 6⅛; Mineral, 2¼; Mingo, 3½; Maple Shade, 24¾; McElheny 5; McCrea and C. R., 1¼; Noble and Delamater, 6⅛; Oil Creek and C. R., 5½; Olmstead, 2⅞; Organic, ⅞; Plumbly Farm, 1½; Perry, 3½; Petro. Central, 2⅞; Phila. and Oil Creek, 6½; Pittsburg and O. Third National Bank of the City of New York.

This institution has increased its capital to one million of dollars, and has very judiciously chosen J. F. D. Lanier, Esq., its President. This is an admirable arrangement in all respects. Mr. Lanier has been a leading banker and financier in this city for fifteen years, always enjoying a high reputation for ability and probity. More than this, he has distinguished himself for his prompt support of State credit, particularly in regard to Indiana, whose financial honor he upheld in 1864, when he generously and boldly advanced the back interest on its debt to the extent of nearly half a million of dollars, and for which he received the grateful thanks of Governor Morton. Such liberal-minded and wise financiers are a credit to the times and their country, and the Third National Bank, under such large and liberal views, and so sagacious a manager, cannot fail to become a leading institution in this great metropolis.

Columbia and Port Deposit Railroad.

The Smyrna (Del.) *Times* says that "the Columbia and Port Deposit Railroad Company are petitioning the Delaware Legislature for the privilege to enter the State and terminate at some point on the Delaware bay or river. It is understood that it will run from Port Deposit through the fertile regions of Cecil county, Md., and connect with the Smyrna and Bombay Hook Railroad at Smyrna, if the latter can obtain a charter, of which there is little doubt, as the bill has already passed the House with but one dissenting voice, and unless something unforeseen turns up, there is little doubt of its passage through the Senate."

☞ The Franklin Branch of the Atlantic and Great Western Railway has been completed to Oil City.

Railroads in New Jersey.

A number of railroad projects have already been brought before the Legislature of New Jersey. Among others, is a bill to charter the Passaic Valley and Peapack Railroad Company, with a capital stock of $1,200,000, for the purpose of constructing a railroad from some point in Union, or Essex, near the village of New Providence, to Peapack, in Somerset county, with the privilege of extending the same into the counties of Warren or Hunterdon. Also, a supplement to the charter of the Morris and Essex Railroad Company, authorizing it to construct a road from Bloomfield to Denville. Also, a bill to incorporate the Elizabeth Horse Railroad, which provides for the construction of a track from the Port to Elizabeth City.

Pittsfield and North Adams Railroad.

The annual meeting of the stockholders of this corporation was held at the office of the Western Railroad Corporation in Boston, on the 8th inst. The following gentlemen were chosen Directors: Chester W. Chapin of Springfield, James D. Colt of Pittsfield, Robert Campbell of Pittsfield, Stephen Fairbanks of Boston, Josiah Stickney of Boston.

☞ The Grand Trunk Railway Company are to extend their track from Sarnia, on Lake Huron, through to Chicago. The extension will run from Port Huron, opposite Sarnia, to Owasso, 90 miles; from thence to Lansing, 22 miles; from Lansing to Battle Creek, 42 miles, and from the latter place to Chicago, 166 miles—making the whole distance 322 miles, which, added to the main line, will render it continuous from Chicago to Portland, on the Atlantic, 1,105 miles, and connect by the Vermont Central with Boston and New York.

☞ It is reported that the Pennsylvania Coal Company have closed a contract with the Erie Railway, by which the latter makes a profit upon the coal it moves equal to the tolls charged upon the Delaware and Hudson Canal, which is full $3 per ton at the present value of coal. It is also stated that the Erie Railway Company have bought the charter of the Buffalo and Pittsburg Railroad Company, and have finished two or three sections of the road, one of which extends into the heart of the coal fields of McKean County.

Eastern Coal Trade.

The tide water region of the Middle Atlantic States is supplied with anthracite and other descriptions of coal chiefly from eastern Pennsylvania, and to a less amount from the Broad Top Mountain and the Cumberland (Md.) regions. The total product of these sources is now probably not less than 12,500,000 great tons annually.

The principal railroads and canals of Pennsylvania, New Jersey and Maryland supply the means of transportation from the mines to the depots established on the tide waters of the Chesapeake, Delaware and Hudson Rivers, and the kills separating Staten Island from the main land of New Jersey, on which the Delaware, Lackawanna and Western Railroad Company have constructed immense works. The other tide water places of deposit are Baltimore, (Locust Point,) on the Chesapeake, Newcastle and Philadelphia, (Richmond,) on the Delaware, Jersey City opposite New York, and Rondout on the Hudson, the outlet of the Delaware and Hudson

Canal. Large quantities of coal are also transported to the lakes both by railroad and canal.

ANTHRACITE.

The following table exhibits the product of the several anthracite regions for the two years 1863 and 1864:

	1863.	1864.
Schuylkill Region—		
By Schuylkill Canal	854,556	1,000,500
By Phil. and Reading R. R.	2,849,408	2,763,374
	3,703,964	3,763,874
Pine Grove	203,991	204,000
Shamokin	274,936	333,478
Total Schuylkill Region.	4,182,891	4,301,352
Lehigh Region—		
By Lehigh Canal	699,558	758,087
By Lehigh Valley Railroad	1,195,155	1,295,419
Total Lehigh Region	1,894,713	2,053,506
Wyoming and Lackawanna Region—		
By Del. and Hudson Canal	828,151	848,076
By Penn. Coal Railroad	661,955	759,544
By Wyoming Canal	585,249	536,088
By Del. Lack. and W. R. R.	1,223,166	1,302,457
Tot. Wyoming & Lack. Region	3,777,447	4,083,503

Recapitulating the above by regions the following is the aggregate result:

Schuylkill Region	4,182,891	4,301,352
Lehigh Region	1,894,713	2,053,506
Wyoming and Lackawanna	3,777,447	4,082,503
Aggregate anthracite.	9,855,051	10,438,361

SEMI-ANTHRACITE AND BITUMINOUS COAL.

The product of the semi-anthracite and bituminous coal regions, including Cumberland in Maryland, was for the same years as follows:

	1863.	1864.
Lykens Valley	141,282	129,973
Treverton	62,000	66,000
Broad Top Mountain	305,678	386,645
Blossburg	226,183	353,124
Barclay	54,116	62,000
Total semi-anthr. and bitum.	789,259	997,742
Cumberland Region	748,345	665,605
Aggregate	1,537,604	1,663,347
	11,392,655	12,101,708

The total of all descriptions mined in the above regions will thus be as follows:

	1863.	1864.
Anthracite	9,855,051	10,438,361
Semi-anthracite & bitumin's.	1,537,604	1,663,347
Grand total	11,392,604	12,101,708

Central Pacific Railroad.

A short time ago the Attorney-General commenced an action to enjoin the State Treasurer from paying the interest on the Pacific Railroad bonds, issued under the laws of last winter, $52,500 of which fell due on the 1st inst. The object was to test the constitutionality of the law, the enemies of the enterprise having industriously circulated reports that it was invalid. The District Court held it to be constitutional, refused to grant the injunction, and dismissed the complaint. An appeal was promptly taken, and yesterday the Supreme Court entered an order affirming the judgment of the District Court in those respects, but modified other portions which are unimportant. This decision settles the question of the law and the liability of the State to pay the interest for twenty years on $1,500,000 of these bonds, in gold coin. This large amount of bonds is now readily available to the company, as the decision will make them equal in value to State bonds and they will probably sell for as high a price. The money is in the Treasury to pay the first semi-annual installment of interest and will be paid today. We are informed that the company has given orders to increase the force of laborers to 2,000, and to push the work as rapidly as possible. Long before these bonds can be exhausted the company will receive the $1,264,000 due them from the National Government, so that the work will undoubtedly progress without delay during the present year.

This decision secures to the railroad not only these State bonds, as good, but gives an increased value to them, and will carry with it the $600,000 from our city and soon the large amount from the National Treasury also, so that in a short time the Pacific Railroad Company will have a cash capital in their vaults of millions to work with.

On the day following the rendering of this decision the company drew from the State Treasury $51,555, which amount is the first semi-annual installment of interest on all bonds, amounting to 1,473, of $1,000 each.—*Sacramento Union, Feb.* 8.

Railroad Earnings--Weekly.

The earnings of the Chicago and Northwestern Railway for the 2d week of Feb., were. $123,740 76
Corresponding week of 1864 ..... 78,677 83

Increase 57.27 per cent..... $45,062 93

The earnings of the Michigan Central Railroad for the 2d week in Feb., 1865 ..... $67,094 00
Corresponding week of previous year.. 63,690 00

Increase $3,404 00

The earnings of the Grand Trunk Railway for the week ending Feb. 11, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$22,206 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	76,798 00
Total	$102,128 00
Corresponding week, 1864	107,789 00
Decrease	$5,661 00

The earnings of the Toledo and Wabash Railroad Company for the first week of Feb., 1865, were $35,435 60
Corresponding week of previous year. 20,931 71

Increase $14,503 89

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending February 7, 1865, were:

	1865.	1864.
Passengers	$2,680 10	$1,817 81

☞ The exports of Petroleum from Pittsburg, by the Pennsylvania railroad during the year 1864, amounted to 545,761 barrels.

Carriers.—Liability for Passenger's Luggage.—Special Contract.

The recent case of Stewart *vs.* The London and Northwestern Railway Company, was an action in which the complaint stated that the plaintiff became and was received by the defendants as a passenger on their railway, to be carried and conveyed by them, together with the luggage, the same being his ordinary luggage, from Liverpool to London, in England, and from thence back to Liverpool, by a certain train each way of the defendants for reward to them in that behalf, the said luggage to be delivered by them to the plaintiff at Liverpool, upon his return and arrival there by the said train from London to Liverpool. And that the defendants did not carry and convey the said luggage to Liverpool, and deliver the same there to the plaintiff, on his arriving there by the said last mentioned train, and the same remains and still is undelivered to him, although all things happened, &c., whereby, &c.

There was also an allegation of conversion. The answer denied the contract; and averred that the plaintiff did not become, nor was he received by the defendants as a passenger on their railway to be carried and conveyed, together with his said luggage as alleged; it also denied the breach; and to the remainder of the complaint it contained a general denial.

Issue was thereupon joined.

The action was tried in the Borough Passage Court at Liverpool, on the 5th of April last, before an assessor, when it appeared that the plaintiff purchased in September, 1862, for 17*s.* 6*d.* (At the office of one Marcus, who had made arrangements with the defendants for excursion trains,) a first class return ticket from Liverpool to London. This ticket was headed, "L. and N. W. Railway, Marcus' train, 1863." On the first half was printed "*Ticket as per bill,*" and on the back of each half was the following notice: "Forfeited if transferred. *This ticket is issued subject to the conditions contained in the company's time and excursion bills,* and if used for any other train or station, the ticket will be forfeited and the full fare charged."

The small excursion hand bills (issued with the tickets) contained, among other notices the following one: "Luggage under 60 lb., free, *at passenger's own risk.*"

The plaintiff said he had not seen the small hand bills, though he did observe large posters at the station, containing the general arrangements of the trains, and referring for further particulars to the small bills.

On his return journey the plaintiff's portmanteau (which was legibly addressed with plaintiff's name and residence,) containing ordinary passenger's luggage, was lost, after having been taken from him at the London station by one of the company's servants; and he sought to recover from the defendants the value of the portmanteau and its contents.

The jury found that the plaintiff had not seen the small hand bills, and the Judge directed a verdict for the defendants, with leave to the plaintiff to move the Court to enter the verdict for plaintiff for 39*l.* 14*s.*, the amount sought to be recovered.

The plaintiff's counsel now moved accordingly.

POLLOCK, C. B.—We are all of opinion that this

case is not within the Traffic Act, and that no rule ought to be granted. There is a rule in the English law, that every man must be taken to know that which he has the means of knowing, whether he has availed himself of those means or not. Now as to this ticket, the plaintiff must be supposed to have read it. If he did not choose to consult the hand bill, that is his fault not the fault of the company. The bill points out the terms upon which these particular and special trains are to run, and one of the conditions is—"luggage under 60 lb., is free;" but if taken free, it is to be "at the passenger's own risk." If it be sent as goods to be carried in the ordinary way under the custom of England, for carriers to be liable, that is a different matter.

The plaintiff's ignorance then, was of his own creation, and the luggage was lost in a place where he has agreed to take the risk himself. Under the circumstances, the railway company are not liable, and on that ground there should be no rule.

If the question were whether this was a matter within the carrier's liability by the common law, I should think it was not. Richards *vs.* The London, Brighton and South Coast Railway Company, (7 Com. B. Rep., 839; *s. c.*, 18 Law J. Rep., N. S. C. P., 251,) is certainly an authority (which I was not aware of,) that the luggage of a passenger is in the same condition as goods sent by a carrier, but I am not convinced by it, or disposed to defer to it; and, notwithstanding the authority of Mr. Justice Story to the same effect, I am still of opinion that a carrier undertakes no responsibility in respect of the goods of a passenger beyond that which he undertakes with respect to the passenger himself.

Bramwell, B.—I am of opinion that this rule ought to be refused, notwithstanding the ingenious points brought before us. A man takes a ticket, on the back of which is printed that it is "issued subject to the conditions contained in the company's bills." Now, first of all, he says, "I did not know what was on it; and then he comes to claim the benefit of his own carelessness. He certainly had notice that there was something for him to inquire into; and if he had chosen to inquire he might have informed himself. He has luggage under 60 lb., and that being at his own risk, he pays for his journey from Liverpool to London and back, about one-fourth of the price that he would have paid if he had gone by an ordinary train. That is the plain bargain he makes; and then afterwards he says, "though I have agreed that my luggage shall be taken at my own risk, I want to make the defendants pay for it." On what possible ground can he do that? All the sense of the thing, it appears to me, is entirely against him.

A case was cited to show that, in the ordinary case of a passenger's luggage, the obligation of the railway company is that of a common carrier. That was a very hard case, and it differed from this; for this is not the ordinary case where a passenger pays for the place he occupies, and his luggage is taken upon the terms of the act of parliament; here the luggage was taken on special terms, and the Railway Traffic Act does not apply, nor is there any question of reasonableness or unreasonableness.

Again, it is said that the railway company is bound to take a certain quantity of luggage. Yes, when the railway company is charging the ordinary fare; but when they are making a difference in the fare, and taking a man with a certain amount of luggage on special terms, on which he is content to be conveyed, he must abide by those terms.

Another objection made is, that "to be carried *at the passenger's own risk*," must mean where there is no negligence on the part of the defendants or their servants. I cannot see that there is any distinction which is not in the words themselves. It is as though the defendants said, "We will not be responsible for any loss or damage to luggage;" and if a man chooses to agree to those terms, he must stand on them altogether; it is absurd to say that he can withdraw from them; and make the company pay for his loss.

Pigott, B.—I look upon this as a special contract, and I see no reason why the parties should not be competent to enter into it. With regard to excursion trains, a large number of people take the benefit of them, and the company do not incur the risk of common carriers. This is a risk merely as to passenger's luggage. Surely, it is reasonable to say, "If we carry you at the low rate we do, you must take care of your own luggage." And if a man enters into such a contract I do not see why that contract should not bind him. I think, therefore, there should be no rule.

Rule refused.

British Joint Stock Companies.

During the year ending December 31, 1864, 282 new joint stock companies were organized in Great Britain, with an aggregate capital of £155,887,500, and 48 existing companies made additional issues of stock to the amount of £35,315,000, viz:

	New.		Additional.	
	No.	Capital.	No.	Capital.
Banking	19	£25,600,000	26	£22,005,000
Financ'l & disc.	26	28,150,000	7	7,425,000
Manuf. & trad'g.	78	38,195,000	2	800,000
Railway	10	12,510,000	2	2,500,000
Insurance	11	9,200,000	2	1,290,000
Shipping	21	14,800,000	2	625,000
Hotel	22	1,990,000	1	30,000
Mining	11	4,189,500	—	—
Gas	6	1,280,000	1	50,000
Miscellaneous	48	9,973,000	5	590,000
Total	282	£155,887,500	48	£35,315,000
				115,887,500
Additional capital				£191,202,500

☞ The total value of the exports from Portland for the month of January was $964,267. The following figures are the footings of the trade returns of Portland during the years 1863 and 1864:

	1863.	1864.
Exports foreign merchandise.	$1,140,855	1,838,751
Exports domestic produce	3,984,828	3,824,594
Total exports	$5,125,713	5,663,345
Excess in 1864 over 1863		$537,632
	1863.	1864.
Imports foreign merchandise.	$3,417,226	3,018,063
Decrease imports in 1864		$399,163

☞ Several hundred acres of cotton are to be planted in Los Angelos County, California, this year. Specimens grown in that county last year have been sent to France, and the report comes back that it will bring the same price as the short silk cotton of the United States $63 (in gold) per 100 pounds, if cleared of the seed and well prepared.

Valuation of Massachusetts.

The State Valuation Committee have completed their estimate of the value of property in the several counties and cities in the State. The following is the result:

Counties:	Valuation.	Polls.	Proportion on each $1,000.
Suffolk	$387,276,700	36,371	$348.14
Essex	90,393,466	36,467	95.24
Middlesex	155,324,723	49,739	157.20
Worcester	80,957,772	39,580	88.76
Hampden	33,253,177	15 652	30.16
Hampshire	20,510,994	8,927	21.94
Berkshire	27,937,444	12,541	30.07
Franklin	13,048,119	7,648	14.84
Norfolk	95,097,794	25,270	93.66
Bristol	59,464,668	20,590	60.96
Plymouth	27,952,058	16,075	31.86
Barnstable	14,276,198	8,170	16.24
Dukes	2,188,985	1,100	2.41
Nantucket	2,152,558	1,180	2.42
Total.	$1,009,829,656	279,314	$1,000

The valuation of the several cities in the State, the number of polls, and the amount of State tax to be paid on each $1,000 levied, are as follows:

Cities:	Valuation.	Polls.	Proportion on each $1,000.
Boston	$378,303,357	32,992	$338.81
Worcester	19,701,244	7,287	20.44
Chelsea	7,706,745	2,959	8.04
Cambridge	25,897,970	6,294	25.21
Charlestown	16,292,544	5,790	18.48
Lowell	20,980,041	5,736	24.79
Springfield	13,822,212	5,794	14.24
Lawrence	11,240,191	3,692	11.48
Lynn	10,053,309	3,712	10.44
Newburyport	7,659,960	2,534	7.80
Salem	16,192,357	4,354	15.97
Fall River	12,632,419	4,312	12.92
New Bedford	20.525,790	4,572	19.78
Taunton	8,463,074	3,288	8.085

Roxbury has 4,966 polls, and is assessed $22 75 on each $1,000 of State tax.

Pittsburg Passenger Railroads.

The Citizens' Passenger Railway earned during the year $100,380 88, paid out, including $8,000 for dividends and $18,000 for construction, $122,827 92; carried 1,896,857 passengers, killed three persons and injured four. The Birmingham Passenger Railway earned $58,005 96, paid for operating the road, $42,022 56, on dividend $2,000, carried 1,160,995 passengers, killed three persons and injured one. The Manchester road earned during the year $67,930, paid for operating the road, taxes, etc., $70,382 72, carried 1,554,088 passengers, and injured but two persons. The Oakland road earned $37,004 90, paid out in the shape of expenses, $30,395, declared no dividends, carried 642,974 passengers, and injured but one person. These figures show our passenger railways to be anything but money making concerns just now, and we do not wonder that the stockholders are keen for a raise in the fare.—*Pittsburg Chronicle.*

☞ The Halifax (N. S.) *Express* says that the survey and plans of the Intercolonial Railway have been completed, and were forwarded by the last steamer to Canada, via Boston. A number of Engineers who were employed on the survey also left on the same conveyance; and Sanford Fleming, Esq., the Chief, would follow in a day or two.

☞ From the annual report of the Hazleton Coal Company we learn that the gross income for the year was $305,251. The charges against these receipts for all purposes were $95,393, leaving in net profits $209,858, out of which was paid in dividends twelve per cent. in cash, leaving a handsome surplus. There is little of the stock of this company on the market.

Wealth and Resources of New Mexico.

The rumor founded on great probability of the annexation of a large mineral territory on the Pacific, by the *Soidisant* Emperor of Mexico to the Emperor of France, gives new importance to the territory of New Mexico. We naturally inquire after its resources and wealth, enjoying as it does a topographical importance in connection with our new neighbors. It lies just north of Texas and Chibuhaha, east of Arizona and west of the Indian Territory, with an area of 77,008,641 square miles, and a population by the most recent accounts, of 82,979 inhabitants. In those respects it compares favorably with some of our largest territories, and is drained by the great river Rio Grande emptying into the Gulf of Mexico.

It contains 11 counties all having Spanish names, each with a principal town. The County of San Miguel has the largest population, about 13,600. The habits and manners of the people are Spanish, in conformity with their descent, and they appear contented with the change of their institutions. Santa Fe the capital is situated near the Rio del Norte 1,131 miles from the city of Mexico, and is the seat of a considerable traffic from the United States. It contains nearly 5,000 inhabitants. There are other principal towns with a population varying from 21,00 to 300 inhabitants.

Agriculture is conducted on a moderate scale, there being cultivated farms to the extent of 149,415 acres, but the uncultivated land comprises 1,177,055 acres. The value of these farms was at the last census estimated at, $1,826,470, and the implements of husbandry employed upon them $194,005.

The live stock consisted of 19,119 horses, 11,255 asses and mules, 84,460 milch cows, 26,104 working oxen, 29,228 other cattle, 836,459 sheep, and 9,489 swine. The whole value of this stock was estimated at $4,386,084.

The animal products were as follows: Butter 18,188 lbs., cheese 37,859 lbs., wool 479,245 lbs., and the value of animals slaughtered $309,168.

The cereal crops were wheat 446,975 bushels, rye 1,900 bushels, Indian corn 710,605 bushels, oats 7,491 bushels, barley 6,099 bushels.

The commercial crops consisted of 7,000 lbs., of tobacco and a few pounds of hops.

The miscellaneous crops were:

Peas and beans, bushels	38,584
Irish potatoes "	5,354
Sweet " "	180
Wine, gallons	8,201
Hay, tons	1,103
Sorghum molasses gallons	3,369

The value of the orchard products was $91,701, of market gardens, $17,640, and of home made manufactures $26,396.

It appears there are 86 manufacturing establishments employing $2,081,900 of capital consuming annually $432,000 of raw material, and producing fabrics of the value of $1,165,000. The principal articles produced are copper, 650 tons of the value of $415,000. Flour and meal $374,190, lumber $65,150, and spirits (85,325 gallons) $22,425. The whole value of the real and personal property of the territory was estimated at $20,813,768.

It is believed that New Mexico is destined to become a valuble part of our Country, as it possesses valuable minerals, already partially produced, with an inviting climate, and much fertile soil. It is also thought that when the Pacific Railroad is constructed there will be a branch tending southward, over which Northern Mexico will receive its entire supplies of foreign goods, in preference to receiving them by the coast.

The Santa Fe trade with the United States has for many years up to the time of the war, been on the increase. It commenced in 1804, and was opened by a person of the name of Pursley, who while wandering in the unexplored regions west of the Mississippi, heard of those Mexican settlements from some Indians and was by them shown the way, being the first American who visited them. Another story is however told of similar effect, in relation to a merchant of Kaskaskia named Morrison, who dispatched an agent to trade at Santa Fe. In 1806 Gen. Pike, then a captain went on an exploring expedition up the Arkansas, and after crossing to the Rio del Norte, with a small party of 15, he erected a small fortification, supposing he was in the territory of the United States. He was taken prisoner by the Mexicans who believed his intentions were hostile, but was afterwards released and sent to the United States. The interesting narrative which he published of his expedition, at once caused public attention to be turned towards New Mexico. In 1812 an expedition under the auspices of Messrs. McKnight, Beard, Chambers and some other Americans set out for Santa Fe for the purpose of trading. But they were arrested as spies, their goods were confiscated, and they were retained as prisoners in the Country for nine years, until the accession of Iturbide to the Mexican throne. In 1821 other parties ventured into the country to trade and were very successful. Others the next year followed their example, and from that time to the present there has been a regular trade with the United States. The articles transported to Santa Fe consist of cotton and woollen goods, tobacco, spirits, jewelry, &c., for which the returns are principally made in specie and bullion. Transportation is effected either in covered wagons drawn by horses, or by pack mules. The usual starting place is Independence on the Missouri river 379 miles above St. Louis; the distance traversed is 877 miles, occupying twelve weeks or more. The amount of merchandize sold at Santa Fe in 1843 was $450,000. In 1846 the transactions were as follows:

No. of mule wagons employed	175
" mules	1,700
" ox wagons	200
" oxen	2,000
" men employed	500
Value of goods 1st cost	$937,000
" wagons	75,000
" 1,750 mules	70,000
" 2,000 oxen	35,000
Wages of men for the trip	75,000
Expenses, freight, insurance to Independence 10 per cent	93,750
Harness for mules and horses	15,000
Provisions, bacon, flour, &c., on the trip out of 500 men at $20 each	10,000
Small outfit	50,000
	$1,351,250
Net profits estimated at	$400,000

When the trade first commenced the profits were always 100 per cent. but as it increased, a net profit of 30 or 40 per cent was the usual one calculated on.

Since the discovery of gold on the Pacific, and the formation of new states and territories in that direction, business and population have changed the whole face of the Country to a civilized aspect. The Pacific Railroad and its branches will penetrate where cavarans once tracked their way, and a vast commerce will rise up all over those wonderful plains.

☞ The Meadville and Oil City branch of the Atlantic and Great Western Railway is now nearly completed, and trains will be running regularly on it in a few days.

J. F. D. LANIER, President, of Winslow, Lanier & Co. C. V. CULVER, Vice-Prest. of Culver, Penn & Co.
C. N. JORDAN, Cashier.

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.....$1,000,000.

DESIGNATED DEPOSITORY of the UNITED STATES AND AUTHORIZED AGENT OF THE TREASURY.

No. 5 NASSAU ST., Feb. 17, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates, with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, together with a portion of their correspondents, being persons of well-known standing and large pecuniary means, have become the owners of most of its Capital Stock, and assume its control and management, Mr. C. V. CULVER retaining all his interest, and accepting the Vice-Presidency.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.
C. N. JORDAN, Cashier. 3m 8

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO RAILWAY CO., PITTSBURG, Feb. 14, 1865.

THE ANNUAL MEETING OF THE STOCK and Bondholders of this company for election of Directors and such other business as may come before it, will be held at the office of the said company, in the City of Pittsburg, on the THIRD WEDNESDAY (15th) of MARCH, A.D., 1865, at 10 o'clock A. M.

The Stock and Bond Transfer Books of the company, at their office, in the City of Pittsburg, and at the office of the Transfer Agency, in the City of New York, will be closed until the 17th day of March thereafter.

W. H. BARNES, Secretary.

New York, Saturday, March 4, 1865.

Security from Railroad Accidents.

Within a few months past the public have been shocked by the very frequent occurrence of disastrous accidents upon our railroads, and the inquiry is anxiously made whether there is not within the reach of American skill and ingenuity some remedy for this continued injury to life and limb.

It is ascertained that these accidents are directly attributable to the following causes:

Jamming between cars, which happens alike to the men employed in coupling them to make up a train, or to passengers passing from one to the other when the train is in motion, and falling between the platforms.

Collisions, either when two trains meet, or the cars of the same train going in the same direction, run into each other or telescope as it is called; the expression being borrowed from the familiar example of the tubes of a telescope sliding into each other.

Broken rails and misplaced switches, which require from us no particular explanation, being intelligible from the statement itself.

Jumping the rail, most usually occurring to the locomotives rather than to the cars, owing to some yielding of the track from the horizontal or rectilinear, produced by decayed ties, or sinking of the road bed and failure of the ballasting.

Accidental uncoupling of cars, leaving some of them behind the train, owing to the pin or bolt which confines the connecting link in its place or rest, becoming bent and thus working up and out of its seat, by the friction and working of the link through which it passes and holds.

Broken axles, tires and trucks, chiefly owing to defective iron and bad workmanship. These last require no particular explanation, being very generally understood.

Now then if any contrivance can be found which will provide a remedy for all, or certainly for most of these accidents, it is due to the public, and is the interest of railway companies, that it should be known and adopted. And it so happens that an American Railroad Engineer after many years study and personal attention to the subject, Col. Miller, late of the State of Wisconsin, confirmed by the testimony and opinions of others equally as skillful and as experienced as himself, has made the discovery that by a particular but very simple method of couplers and interlocking buffers, that is, of connecting cars and yet of resisting their shocks on each other in case of collision, all danger may be reduced to its minimum amount, if it is not even what we suppose it to be, absolute security. To understand the precise form of his arrangements would perhaps require a reference to the models, to cars already in use upon this plan, or to elaborate drawings. But our readers may form a general idea of them from our present description.

Col. Miller adopts the following plan. The cars are connected underneath, by the draught bar which is below the platform in the usual way, though by him it is of greater length than is now customary. It is constructed of heavy wood, to which strong iron facings are shrunk like the tire of a wheel by cooling, after the wood is placed within it. This bar has at the inner end the usual spring adjusted to the beams under the car running longitudinally, to permit a rebound so as to lessen a blow. At the other end, it has a peculiarly shaped head, which has some slight resemblance to the head of a surgeon's lancet. This meets from the car in front of it a similar arrangement projecting backwards, so that when they close upon each other, like the heads of two hammers pulling against each other they thus take a firm hold or grip, and remain so until separated by the turn of a wheel such as is seen upon the ends of cars to control the brakes, or else when they automatically separate themselves according to a very simple principle adopted by Col. Miller, and infallible in its operation in all cases when it is most necessary to act. So that when two cars are to be coupled they hitch themselves by contact merely; there is in fact no space between the platforms to allow the attendant to stand between them, and no necessity for his doing so. Next when it is desired to uncouple, the turning of the wheels on the platform instantaneously disengages the coupling heads and they part from each other. Nor is this process affected by the speed of the train, its passage round a curve, nor the usual difference of the level of the outer rails in the curve itself. This facility of coupling and uncoupling not only removes all the usual danger attending it, but gives great facilities for the movement of trains at depot stations and repairing yards.

The other great application of this principle of Col. Miller's is the connection of the platforms when the cars are together by two iron or steel interlocking buffers of a peculiar yet simple form which easily fit one in and upon the other and disengage as easily, with the least deviation from the line of motion. Yet at the same time they are so rigid in their lateral vertical position as to prevent all lateral independent motion of the cars, and leave a more than usual amount of vertical freedom. When the one meets the other they both become one, and remain so while the draught bar and coupler below grips the corresponding one in front of it. This principle applied through the train on every car gives the whole a uniformity of connection and of stability. This novel effect is perhaps one of the most valuable safeguards ever applied to the railway system, and is creditable to the philosophic mind of the inventor.

Incidental to these arrangements, indeed making a part of them, is Col. Miller's construction of the platforms themselves. His couplers allow them to come together as close as 6 inches or nearer, and the platforms themselves are on the

same plane, and are in fact supported by the longitudinal sills of the cars themselves. So that in case of a collision the whole resistance of these beams is given to the platforms. But at present under the prevailing system of car construction they have no such aid at all. On the contrary they lie on a different plane, and act as knife blades cutting through the car in front and destroying everything in their way, while at the same time the draught bar, as usually placed, if broken off, drops or rises as the case may be, and is converted into a lever and lifts or plunges at an angle unto the car preceding it, and destroys its poise upon the truck throwing it off with terrific force. By the plan of Col. Miller, any platform is in the first place so near the next that no person can possibly fall between them, and next in case of a collision neither will break any quicker than the sills of the cars themselves. Nor can any telescoping take place for the platforms are not in such a position as to permit it. One cannot slide upon or below the other.

There is another incidental protection to passengers obtained by the plan we have thus far endeavored to describe. Not only does the brakeman by the turning of a small wheel and pinion instantly uncouple the cars, but it is also contrived in the simplest manner, that should an engine or a car run off or overturn; that act or motion of itself unfastens the coupling by throwing it into an angle which changes their connection or bearings on each other. So also the coupling is set free, at pleasure, by the form of its own head, which at any particular angle, also disengages itself. In passing a given curve with a known quantity of radius, the coupling may be adjusted so as to disconnect automatically whenever there is sufficient deviation from its line, and this adjustment can be arranged beforehand during the construction of the interlocker and be permanent.

It will thus be seen that Col. Miller's plans of interlocking and coupling, though both acting independently and yet harmoniously give every protection against the consequences of collision, absolutely prevent telescoping, or even the swaying of a train when in motion; facilitate the making up and dividing a train, prevent the possibility of accidents to attendants while engaged in yards or stations for that purpose, or accidents from falls between platforms when in motion, from broken rails, and in short, make railway traveling as safe as it is possible to be made.

All we have here said is supported by actual experiment. In the months of September and October last, cars were run on the Chicago and Northwestern Railroad, and the southern division of the Milwaukee and Prairie du Chien Railway, with Col. Miller's invention. This crucial experiment was tried under the rigid scrutiny of the most skilful railroad engineers, mechanics, conductors and directors connected with those roads. The result was a complete success, the proof of which is given under their own hands. So also the press of Wisconsin has added its testimonials in its favor, and Col. Miller advised by all these interests has come to this city to explain his plans and invite their adoption here, where the greatest amount of railroad influence is concentrated, and public attention may be quickest arrested.

His improvements are not costly, they can be manufactured in parts by themselves, and adjusted to cars new or old, and operate with cars having the old couplings as well, with the greatest readiness, and without regard to the difference in height of the cars themselves. It is to be hoped that this brief explanation will awaken the interest of the public in the subject, and that it will require our railway companies to look into them and adopt these important improvements.

All previous plans to interlock and couple cars have failed in rendering them secure, and the time has come, as the constant repetition of railway disasters admonishes us, that some absolute change shall be made in the particulars mentioned to restore confidence to travelers, now almost entirely forfeited.

In conclusion we would remark, that our opinions on the subject of Col. Miller's invention are not of sudden growth. The readers of the JOURNAL on turning back to its files will perceive that for more than two years past we have spoken favorably of his system of couplers and interlockers, describing them from time to time, as we understood the principle from general description, and giving him our good wishes for his success. What we have now said has been the result of a personal inspection of his models, his drawings, and his patent with the benefit of his own verbal explanations.

The New Territory of Wyoming.

Mr. Ashley's bill for the organization of the new territory of Wyoming, now pending in the House of Representatives, defines the boundaries of the proposed territory as follows: Beginning at the intersection of the twenty-fifth degree of longitude west from Washington with the forty-first degree of north latitude, thence west to the thirty-third degree of longitude and north to the crest of the Rocky Mountains, and running northwesterly along this crest to the intersection of the thirty-third degree of longitude with forty-four degrees thirty minutes north latitude; thence due west to the thirty-fourth degree of longitude; then due north to the forty-fifth degree of latitude, and then due east to the twenty-fifth degree of longitude, running south to the place of beginning. In other words, Wyoming is bounded on the north by Idaho and Dacotah; on the south by Colorado and Utah; on the east by Nebraska; on the west by Utah and Idaho. It is carved out of Idaho, Dacotah and Nebraska; Idaho losing a part of its southeasterly territory, Dacotah its southwesterly portion, and Nebraska a slice of its western half.

Nevada having become a State, Wyoming will form the tenth territory; the others being Arizona, Colorado, Dacotah, Idaho, Montana, Nebraska, New Mexico, Utah and Washington. Here are ten new States in process of formation, all of which will in a few years take their place in the Union.

☞ In the Maryland Legislature on the 26th ult. Mr. Smith, of Alleghany obtained leave to report a bill to authorize the Baltimore and Ohio Railroad Company to build a railroad from a point of its road within the State of Maryland between Knoxville and the Monocacy junction, through the counties of Frederick and Montgomery, to the boundary line of the District of Columbia, so as to make a direct connection with the city of Washington.

Pennsylvania Railroad.

The Eighteenth Annual meeting of the stockholders of this company was held in Philadelphia on the 21st ult., at which the following Report of the Directors, for the year ending December 31, 1864, was presented:

OFFICE PENNSYLVANIA RAILROAD CO.,
PHILADELPHIA, Feb. 18, 1865.

To the Stockholders of the Pennsylvania Railroad Company:

The following condensed statements will exhibit the earnings and expenses connected with the operation of the company's works during 1864:

EARNINGS.

From passengers, first class	$3,239,990 77
" emigrants "	94,904 37
" United States troops	511,773 88
" " mails	76,830 16
" expresses—under contract	75,900 00
" extra express freight	269,511 12
" general freight	10,361,999 32
" miscellaneous sources	128,148 04
Total earnings	$14,759,057 66

EXPENSES.

Conducting transportation:		
Ordinary expendit'es.	$2,624,816 58	
Erection of passenger and freight stations and extension of existing buildings	406,614 79	
		3,031,531 37
Motive power:		
Ordinary repairs and renewals, including nineteen new engines, costing $331,845 83, charged to this account to meet depreciation, &c., also erection of machine shops at West Philadelphia	$2,536,666 79	
Additional tools and shop machinery, chiefly outfit of Philadelphia & Erie Railroad	105,693 56	
Addit'nal locomotives purchased for Philadelphia and Erie Railroad, &c.	613,691 97	
		3,256,052 32
Maintenance of cars:		
Ordinary repairs and renewals, including erection of cars shops at West Philadelphia	$853,929 12	
Additional freight cars	928,792 07	
Additional pass. cars	222,271 85	
		2,004,993 04
Maintenance of road:		
Ordinary repairs of railway and renewal of structures.	$2,057,547 85	
Additional 2d track and sidings	191,220 28	
		2,248,768 13
General expenses		152,599 88
Total expenditures connected with the business of the Pennsylvania Railroad, including additions to the facilities for transportation on its own road and that of the railroads it operates		$10,693,944 19

RECAPITULATION.

Gross earnings		$14,759,057 65
Total ordinary exp.	$8,225,659 67	
Total extraordinary expenses	2,468,284 52	
		10,693,944 19
Leaving balance		$4,065,113 47

The gross revenues of the line for 1864 are equal to $41,226 per mile of main line of roads (358 miles,) and exceed in the aggregate those of 1863, $2,867,644 71.

This increase is $1,059,358 36 upon passengers and emigrants; $1,231 96 upon United States mails; $1,759,737 35 upon ordinary, and $82,282 30 on express freights.

A decrease occurs in miscellaneous receipts of $32,045 96, and in United States troops of $2,919 30.

The whole number of passengers carried over the road during the year was 2,366,213, and the average distance traveled by each passenger sixty-two miles.

The number of tons of freight moved (including 179,497 tons of fuel and other materials transported for the company) was 2,764,876, embracing 1,086,779 tons of coal.

The increase in the coal traffic is 183,580 tons, and the whole tonnage of the road exceeds that of last year 310,550 tons.

The ordinary expenditures for working and maintaining the company's roads were $8,225,659 67, which is equal to 55 7-10 per cent. of its revenues, or 72 4-10 per cent., including all the expenditures made for work done on its own line and the outfit of the Philadelphia and Erie Railroad.

The earnings of the company's canals were:

From Susquehanna Division	$253,787 57
" Juniata "	29,532 76
" Western "	12,174 72
" Miscellaneous sources	13,120 18
Total earnings	$308,615 23

—against $287,156 52 in 1863.

The cost of maintaining, enlarging and operating the canals was:

Susquehanna Division	$153,794 93	
Juniata "	126,560 02	
Western "	30,200 57	
		310,555 32
Showing a loss on the canals during 1864 of		$1,940 09

The loss upon the canals during the previous year was $75,217 80.

In consequence of the original faulty location and construction, and the neglect of these works by their original proprietor, they have not yielded results equal to our anticipation. It is believed, however, that they will become eventually a source of considerable net profit. The company has expended upon their maintenance and improvement, since they came into their possession (seven years and five months,) $1,606,365 22, and received $1,701,811 34 in tolls for their use.

The low charges necessarily maintained for coal upon the railway of the company has prevented the transfer of that commodity—the only one of importance available for its support to any material extent—to its canal, except when shipped to points not reached by the road or its connections.

The earnings of the Philadelphia and Erie Railroad in 1864 were:

From passengers	$479,822 44
" troops	31,389 18
" freights	545,037 45
" express matter	16,345 16
" mails	14,390 03
" miscellaneous sources	44,163 72
Total earnings	$1,131,147 98

The operating expenses during the same time were:

Conducting transp.	$217 245 96	
Motive power	234,698 75	
Maintenance of way	351,163 21	
Maintenance of cars	32,485 91	
Thirty per cent. due on lease to meet interest on bonds, taxes, &c.,	335,708 95	
		1,174,302 78
Showing a loss in operating the line of		$43,154 80

The line was not opened for business until the 17th of October last, the beginning of the inclement season of the mountainous region it traverses, and then with an incomplete track, insufficient sidings and shops to meet the wants of the transportation department; hence its operations have been conducted at much extra cost, and have necessarily been confined to the accommodation of its local traffic. The result of the year's business is therefore no evidence of what may be expected hereafter from this great work. The whole line is still incomplete, and very little of its superstructure is founded upon ballast, so essential to the maintenance of the track in good condition under a heavy transportation.

The whole revenues of the Pennsylvania Railroad Company for its several lines are as follows:

From the Pennsylvania Railroad and branches	$14,759,057 66
From the Pennsylvania Canal	308,615 23
" Philadelphia & Erie R.R.	1,131,147 98
Total	$16,198,820 87
Of the net profits of the company for the year there has been applied to the payment of two semi-annual dividends of five per cent	$1,523,637 00
To dividends to Harrisburg and Lancaster Railroad Co., and interest on the company's debt	1,113,024 03
Taxes upon dividends and coupons	323,609 90
Total	$2,960,270 93

The remainder, $1,104,842 54, has been appropriated to the construction of other roads, to represent which the company holds their bonds.

The semi-annual dividends, in order to afford time to make up the dividend books, will be paid hereafter on the 30th days of May and November, instead of the 15th, as heretofore.

The surplus net profits of the company mentioned in our last annual report as applicable to the railways, commenced under an expectation of receiving its financial aid, and considered necessary to the full development of the traffic of this company, have equalled anticipations, but the cost of these works, for reasons that are familiar to all, has largely exceeded the estimate then made. From an analysis of these expenditures it appears that it now requires about three dollars to perform the office of one dollar in 1861. The rate of wages has not increased in this ratio, but it seems to be a general principle that as the remuneration of labor is increased, its character and product decreases. This state of things could be met by increased charges upon transportation during their continuance as compensation for the depreciation of the currency, if the legal rates were not limited; but, under existing circumstances, the stoppage of all improvements that have not progressed to an extent that true economy will justify their early completion is the only remedy left. At the present prices for work, the prospective profits for the construction of new railways must be large to induce capital to enter into their construction.

The cash capital required to carry on the operations of the company, invested in materials for repairs of its road and machinery, and balances in the hands of Agents and Treasurer, amounted at the close of the year to the large sum of $2,878,847 57—$1,072,683 99 more than at the same time the previous year, which is chiefly due to the enhanced cost of everything entering into the construction of railways and their equipment.

The estimates of the Philadelphia and Erie Railroad Company for the expenditures on construction account in 1864, for the reasons already mentioned, have fallen much below the cost of the work undertaken, while the political condition of the country has prevented the sale of the sterling bonds received from that company for these outlays upon satisfactory terms. All of the dollar bonds purchased under the contract and lease of that road have been sold. Of the £600,000 sterling bonds purchased, £248,800 have been placed in the sinking fund in exchange for Pittsburg, Fort Wayne and Chicago Railway Company's bonds, since sold, and £40,200 have been disposed of, leaving on hand and in London £311,000. These bonds have the guarantee of this company, and in view of the unusually large basis upon which they are founded, constitute as safe an investment of capital as can be made.

The expenditures required upon the Philadelphia and Erie line to place it in a condition to accommodate a business sufficient to meet the expectations of the company are still very large. The advances for this work during the year, exclusive of rolling stock and shop machinery, have been:

Construction account	$1,806,800 29
Materials on hand for construction and repairs	468,764 09
	$2,275,564 38

which is in excess of the securities purchased by this company under its contract with the Philadelphia and Erie Railroad Company, $889,598 69, exclusive of material account ($468,764 09,) a portion of which will be applied to working the road.

To cover these expenditures, which are increasing monthly, and complete its line, that company is asking of the Legislature the privilege of increasing its mortgage indebtedness $3,000,000, all of which will be necessary for the completion of the requisite additional sidings, shops, wharves, passenger and freight stations, to meet the demands of its anticipated traffic.

Of the securities received from the Steubenville and Indiana Railroad Company, under its reorganization, for aid extended to that company, and for advances made towards the completion of the line east of Steubenville, there remains in the hands of the Treasurer, for sale, $1,305,000. These bonds are all first class securities, and will be disposed of, as the market will absorb them, to meet expenditures in 1865.

The investments made by this company in the stock and bonds of the Pittsburg, Fort Wayne and Chicago Railway Company to insure its completion have all been sold, except 1,200 shares of its stock and $200,000 of its third mortgage bonds, at a considerable advance upon their cost. The interest of the company in the Bedford Railroad and in the New Castle (Lawrence County) Railroad, received for aid extended towards the completion of these works, has also been disposed of upon satisfactory terms.

A shorter and an independent connection between the western terminus of the Pennsylvania Railroad and the metropolis of Ohio and its capital has always been deemed to be of the highest importance to this company. The several attempts to secure such a line have heretofore failed; on one route from a misdirection of the means provided for the object, and on the other from absence of legislation across the tongue of land accidentally thrown into a State interested in promoting the success of rival roads. These political impediments have finally yielded to the independence of Western Virginia, but too late to avail ourselves of the favorable condition of the labor market at the commencement of the existing war to enable the work to be pressed with vigor. Its construction has progressed steadily since the contracts have been recommenced, but at a largely increased cost upon the estimates heretofore submitted. The line will not be ready for use before the ensuing summer.

The delay in the progress of the work has also thrown its completion into a period when the negotiation of the securities applicable to it has become difficult, and the task of supplying the funds required to prevent the work from stopping has necessarily fallen upon this company, in addition to the heavy expenditures it had previously voluntarily assumed to secure so important a connection by extending its own road to the south side of the Monongahela River.

The financial condition of the Steubenville and Indiana Railroad Company, which was originally involved in embarrassment by a failure to complete the line between Pittsburg and Steubenville, has been successfully reorganized and its line ex-

tended from Newark to Columbus (thirty-three miles) by the purchase upon reasonable terms of a one half undivided interest in the Central Ohio Railroad and its property at and between those places, thus making the line complete between Steubenville and Columbus, and when the line across the State of West Virginia is opened it will form a continuous railway, operated under one control, from the latter city to Pittsburg—a distance of one hundred and ninety-six miles.

Of the securities received from the Steubenville and Indiana Railroad Company for assistance heretofore extended to that company, and to effect its reorganization, there remains in the hands of the Treasurer, for sale, $1,305,000 first mortgage bonds, of which $775,000 bear seven per cent. interest per annum. The Western Pennsylvania and the other commutation roads, except the Pittsburg and Steubenville, have been brought into productive use, and it is believed that they will all eventually pay interest upon the amounts contributed to their construction, which from reasons given in our last report has exceeded more than two-fold the requirements of the law.

The construction of the Connecting Railway, chartered to join the Pennsylvania Railway in West Philadelphia with the Philadelphia and Trenton Road at Frankford—a distance of seven miles—has been commenced, and will be pushed to completion as rapidly as circumstances will permit. The right of way—one of the chief elements of its cost—has been mostly secured. This connection will bring the line from New York to Harrisburg and the West, *via* Philadelphia, within 12 miles of the same distance as *via* Allentown, and will doubtless return to this end of our road much of the travel which the delays and obstructions in passing through this city have driven to other channels.

It is impossible, in the present condition of the currency and labor market, to estimate with any precision what the demands upon the Treasury may be for completing the lines already in progress under our auspices. The cost in currency has already exceeded the estimates upon which they were undertaken.

For the Philadelphia and Erie Road there will be required, during this year, to place it in a condition to earn an interest upon its debt, not less than $1,250,000, in addition to $889.598 69 standing upon our books against that Company on the first of January last, after exhausting its First Mortgage Bonds.

For the line between Pittsburgh and Steubenville the sum of $800,000, and to extend the Pennsylvania Railroad to the Delaware river to meet the demands of the oil trade, which will probably be excluded by law from the present Delaware terminus, the further sum of $250,000, to which must be added for additional outfit for the Philadelphia and Erie and our own road $1,200,000, making in all $3,500,000 which may be met, with but a small addition to our surplus earnings, if the result of the year's business should equal that of the past.

Notwithstanding our unremitting efforts to secure the best rails that are made, each succeeding year adds its testimony to those preceding it of the want of a better material than that now used. In addition to their rapid destruction from ordinary wear is added the risk to the trains from their frequent breakage. To obviate this our new rails have been increased in depth to an extent (4¼ inches) that will give them thirty per cent. additional vertical strength, which it is believed will, with increased care in the selection of ores and the manufacture of the rails, prevent further damage from this source. The steel rails introduced upon the road show no evidence of wear, but their great cost at present precludes their general introduction. The manufacture of rails with a steeled wearing surface, referred to in our last annual report, has not proved successful upon a scale that would render it of practical value.

The management of your railways for the last two years has been attended with unprecedented difficulties. A continually increasing business had to be met by a decreasing supply of experienced men to work them, to which, during the past year, there has been added an indiscriminate drain upon our forces to fill the armies and man the military railways of the Government. For a time it was impossible to procure for our trains even raw recruits in sufficient numbers.

The superintendence of long lines of railways having a large mixed business, involving as it does the safety of the traveler, is, in ordinary times, a trust of great delicacy and responsibility; but when added to the usual risks, there is the necessity of introducing into important posts untried men, and the frequent changes that this involves to secure those that are responsible, the strain upon the endurance of the officers and faithful employees of the Company becomes as harassing and unpleasant as it is destructive to the machinery of the road.

To the difficulties mentioned we have had also to encounter accidents arising from the inferior workmanship and materials that the great demand for locomotives and cars has introduced, which there is no practical means of obviating, when all that could be produced has heretofore been insufficient to meet the demands of the Government and the Railway Companies.

The Board, with a view to prevent the increased capital of the Company, from representing property acquired at the present inflated values, have charged the large additions made during 1862, 1863 and 1864 to the equipment of the road, to the length of double track, to the warehouses, passenger stations, shops and engine houses, since the suspension of specie payments, to the running expenses of the road. These have amounted in the aggregate to $5,337,866 65—a sum which, it is believed, will more than preserve the property of the Company represented upon its books at its specie value.

For information in greater detail in relation to the operations of the Company's works the shareholders are referred to the reports of Enoch Lewis, General Superintendent; W. H. Wilson, Chief Engineer; John P. Laird, Superintendent of Motive Power and Machinery on the Pennsylvania Railroad; Thomas T. Wierman, Chief Engineer of the Canals, and Joseph D. Potts, General Manager of the Philadelphia and Erie Railroad, and John A. Wilson, its Chief Engineer. These officers and their assistants, notwithstanding the unusual difficulties attending the operations of their respective Departments during the year, have fulfilled the duties confided to them in a manner entirely satisfactory to the Board of Directors.

By order of the Board.

J. Edgar Thomson.
President.

GENERAL ACCOUNTS.

Capital Stock, as authorized by resolution of the Board		$20,000,000 00
Less amount unissued		130,940 00
		$19,869,060 00
Bond Account ($16,684,840) viz:		
First Mort. 6 per cent. Dollar Bonds, payable in 1880		4,980,000 00
Second Mortgage 6 per cent. Dollar Bonds payable in 1875		2,621,000 00
Second Mortgage 6 per cent. Sterling Bonds, payable in 1875		2,283,840 00
Bonds due the State of Pennsylvania, bearing 5 per cent. interest		6,800,000 00
Mortgages and Ground Rents on Real Estate		144,284 32
Total Shareholders' Capital and Funded Debt of Company		$36,698,184 32
Accounts payable, including Pay Rolls for Dec., 1864.	$1,956,828 91	
Bills payable	408,335 71	
Dividend due to stockholders unpaid	28,296 00	
		2,393,460 62
Contingent fund		1,000,000 00
Balance		3,428,691 39
		$43,520,336 33

Cost of Road, including Engineering, Land Damages, Fencing, Machine Shops, Engine Houses, Station and Warehouses, Car Sheds, Water Stations, Foremen and Tool Houses, & Shop Machinery from Harrisburg to Pittsburg, and Station and Warehouses on the Philadelphia Division		$17,341,336 75
Less profits of Road, after paying interest to Stockholders up to November 1, 1855, credited to cost of construction, as required by charter		589,185 79
		$16,752,150 96
Amount paid State of Pennsylvania for Philadelphia and Columbia Railroad	$6,500,000 00	
Amount paid State of Penn. for Canals & Portage Railroad	1,000,000 00	
	$7,500,000 00	
The above division being made upon their presumed relative value.		
Less payment made of debt to State for purchase of Main Line and charged to profit and loss	700,000 00	
		6,800,000 00
Equipment of Road, consisting of Locomotives, Freight, Road and Passenger Cars		3,385,315 15
Cost of Real Estate of Company		2,769,706 52
Cost of Telegraph Line		45,264 28
Extension of Penn. R. R. to Steubenville and Pittsburg Railroad.		685,249 33
Extension of Penn. R. R. to Delaware River and Gas Works including Wharves and Grain Elevator.		587,205 14
Total cost of Company's Roads, Canals and their appendages		$31,024,891 38
Amount of First Mort. Bonds of the Pittsburg and Steubenville Railroad Company		353,000 00
1555 Sterling Bonds, of £200 Sterling each, of the Philadelphia and Erie Railroad Company, remaining on hand, exclusive of 1244 Bonds in Sink'g Fund, purchased under the stipulations of the lease of that road		1,334,901 11
8939 Shares of Stock of the Steubenville and Indiana Railroad Co.		130,696 00
530 Bonds of the Steubenville and Indiana R. R. Co., 6 per cent.		482,651 52
775 Bonds of the Steubenville and Indiana R. R. Co., 7 per cent.		775,000 00
Amount of other Bonds and Stocks of Municipal and Railroad Corporations		2,881,862 89
Amount of Bills and Accounts Receivable		1,850,976 55
Amount due from other Roads		192,054 52
Amount to debit of Sinking Fund.		1,615,754 79
Amount of Fuel and Materials on hand for Shops, Repairs to Locomotives and Cars, and Maintenance of Way		1,277,380 52
Amount advanced to purchase Materials and Fuel to construct and operate the Philadelphia and Erie Railroad		468,764 09
Balances in hands of Agents		762,075 98

Legal expenses	6,663 18	27,628 04
Taxes, California	8,113 49	.....
Taxes, Pennsylvania	.....	15,255 90
Balance due from California agencies, estimating quicksilver on hand 31st Dec., 1864	419,949 60	.....
Balance, cash in Treasurer's hands, 31st Jan., 1865	20,425 00	136,803 29
	$2,087,551 11	$816,557 79

	Received in—Gold.	Currency.
By 11,045 flasks quicksilver sold by Alsop & Co.	$435,122 12	$.....
4,513 flasks quicksilver sold by S. F. Butterworth	187,547 23	.....
3,606 flasks quicksilver sold for currency	.....	171,539 04
7,376 flasks quicksilver consigned through Alsop & Co	290,461 23	.....
17,903 flasks quicksilver, invoice value of other consignments	762,208 03	.....
2,493 flasks quicksilver on hand at San Francisco, $40	99,720 00	.....
	$1,775,058 61	$171,539 04
Proceeds of 745 gold mortgage bonds	144,000 00	595,018 75
Bills payable, (not matured,) given on account of contract for purchases of real estate & mining rights	100,012 50	50,000 00
Gold certificates, (given on account of old settlements,) maturing May 1, 1865	68,480 00	.....
	$2,087,551 11	$816,557 79

Working Account.

	Gold.	Currency.
Value of product, as per general financial statement	$1,775,058 61	$171,539 04
Current expenses, viz:		
Mining expenses and materials	$645,046 94	$.....
General exp., freight and insurance	19,131 53	23,740 18
Interest on bonds and general account	59,267 24	29,884 15
Legal expenses	6,663 18	27,628 04
Taxes, California and Pennsylvania	8,113 49	15,255 90
Total current expenses	$738,222 38	$96,508 27
Profits for 14 months	$1,036,836 23	$75,030 77

Finances of Missouri.

The following table, prepared by the committee on finance at the late Missouri State Convention, shows the financial condition of that State:

Bonds issued for State purposes		$602,000
State bonds issued to railroads (including guaranteed bonds)		23,701,000
Revenue bonds issued in 1861 (9 per cent.) now due		431,000
Interest due on bonds issued to railroads January 1, 1865		5,008,240
Money borrowed by Governor Gamble to purchase arms		150,000
Amount of defense warrants outstanding December 1st, 1864		244,279
Amount of Union military bonds outstanding December 1st, 1864		1,771,030
Amount due militia for active service estimated by Governor Hall		1,000,000
		$32,907,549
Issue to Hannibal and St. Joseph Railroad	$3,000,000	
Paid on bonds issued for State purposes	200,000	
		3,200,000
Total, with the above deduction to Hannibal and St. Joseph Railroad		$29,707,549

Of the above there is now due by the State on her own account:

Balance of bonds due issued for State purposes	$402,000
Revenue bonds issued in 1861	431,000
Money borrowed by Governor Gamble	150,000
Defense warrants	244,279
Union military bonds	1,771,030
Due militia for active service, estimated	1,000,000
Total, exclusive of interest	$3,998,309

The credit of $3,000,000 to the Hannibal and St. Joseph Railroad is a nominal credit, as the road has punctually paid the interest on the same, but the State's liability is yet $3,000,000.

California State Educational Report.

The following is an abstract of the Report of the State Superintendent of Public Instruction for the fiscal years ending August 31, 1863 and 1864:

Number of boys between 4 and 18 years of age	39,700	44,301
Number of girls between 4 and 18 years of age	38,335	42,527
Total number of white children between 4 and 18 years	78,055	86,831
White children under 4 years	39,081	41,323
Youths between 18 and 21 years	4,129	4,443
Whole number of children under 21 years	121,265	132,769
Number of children born in California under 21 years	74,835	80,714
Attending public schools	29,416	34,175
Attending private schools	9,158	11,359
Number between 6 and 18 years not attending any school	20,062	20,847

The balance on hand at the commencement of the past fiscal year was $104,889 42, which, together with funds received from the State, city and county taxes, rate bills (as reported by Trustees), and from miscellaneous sources, swelled the total amount of receipts for the year ending August 31st, to $756,999, showing an increase of $175,943 23 over the receipts of 1863. The disbursements for the same period reached $655,198 86, making an increase of $171,791 37 over those of 1863. The average amount collected from all sources for each school child was $8 70; in 1863 it was $7 44—showing a gain of $1 26. Whole number of teachers employed, 1,079. The total amount of teachers' salaries paid during the year was $44,101 01, being an increase of $82,762 99 over the previous year. The balance on hand on the 31st of September, 1864, was $101,800 14. Value of school houses, 937,371 73, being a gain of $388,899 73 over the same style of property of the year 1863. Number of schools: High schools, 5; Grammer, 44; Ungraded, 424; Intermediate, 39; Primary, 321. Total number August 31, 1864, 833; number August 31, 1863, 754; increase in 1864, 79.

Pacific Railroad Bill.

In the U. S. Senate, on the 1st inst., a bill in relation to the Pacific Railroad was taken up and passed. It provides as follows:

That section two of the Act of July, 1865, shall be modified and amended as to allow the Central Pacific Railroad Company and the Western Pacific Railroad Company of California, the Union Pacific Railroad Company, and all other companies provided for in said act, to issue their six per centum thirty years bonds the interest payable in lawful money of the United States, upon their separate roads, and the said companies are hereby authorized to issue respectively their bonds to the extent of one hundred millions of dollars in advance of a continuous completed line from Sacramento.

Sec. 2. That the assignment made by the Central Pacific Railroad Company of California to the Western Pacific Railroad Company of said State of their right to construct all that portion of said railroad and telegraph from San Jose to the City of Sacramento is hereby ratified and confirmed to the said Western Pacific Railroad Company, with all the privileges and benefits of the several Acts of Congress relating thereto and subject to all the conditions thereof; provided, that the time within which the said Western Pacific Railroad Company shall be required to construct the first 20 miles of their road, shall be one year from the 1st day of July, 1865, and that the entire road shall be completed from San Jose to Sacramento, connecting at the latter point with the said Central Pacific Railroad, within four years thereafter.

Personal.

At a meeting of the Board of Directors of the Atlantic and Great Western Railway Company of New York and Ohio, held at Meadville, on the 25th of January, S. S. L'Hommedieu, Esq., was elected President of said companies *vice* James Robb, Esq., resigned. Mr. L'Hommedieu was also constituted Chairman of the Central Board of Management of the Lines composing the Atlantic and Great Western Railway. At the same time D. McLaren, Esq., was appointed Superintendent of the entire Line, *vice* H. F. Sweetzer, Esq., resigned.

Mr. John S. Beggs has been appointed Superintendent of the Western Division of the Erie Railway, in place of Mr. H. G. Brooks, appointed Superintendent of Motive Power and Machinery.

Mr. L. H. Tupper has resigned the office of Superintendent of the Rensselaer and Saratoga Railroad, and Mr. Isaac V. Baker has been appointed to the place.

Messrs. Robinson & Ogden, bankers and agents of the 7-30 loan, have opened an office at No. 694 Broadway, where they will receive subscriptions for any amount from 9 A. M. to 9 P. M.

Troy and Greenfield Railroad.

A report was presented in the Massachusetts Legislature, on the 18th ult., from the committee of the last Legislature on the railroad and tunnel, with a statement of the condition and progress of the work upon the Hoosac tunnel and the means necessary for its further prosecution. Laid on the table and ordered to be printed.

American Railroad Journal.

Saturday, March 4, 1865.

Stock Exchange and Money Market.

There is an effort making in certain quarters to impress the theory on the public mind, that a sudden fall in the premium on gold will be injurious to the country. A leading journal, and the circular of a well known Banking and Stock house, have both united in inculcating or rather attempting to inculcate this idea. We confess we consider this attempt injurious and unjust. The great masses of the people are seriously affected by the prices they are compelled to pay for the necessaries of life. When meat is sold at 300 per cent. above gold prices, or prices as they were before the war, it is not very agreeable to them to be told, when gold is but 100 per cent. above par, that they must continue to pay 800 per cent for food lest somebody else may be hurt.

We cannot admit that the buyers and sellers of merchandize must be protected by a continuance of high prices, while the public are continually suffering. There can be no change too sudden which brings back an equality of right between consumer and producer, nor the return from a depreciated to a sound currency. Yet the theory and the attempt alluded to, find a strong support in many quarters, especially among speculators of all descriptions, who find in the unsettled character of paper money, chances of profit they never had before. It is a singular circumstance that for a considerable time after the war had been going on, the prices of goods were quite honestly ganged by the rise and fall of the premium. But now that the fall has for some months been established, prices for a large number of necessary articles have actually advanced, and there seems no intention of reducing them on the part of the holders. On the contrary these very persons are found sustaining the gold market for their own purposes, and it is their interest in fact to keep up the premium and to submit to occasional losses at the Board, when they can make them up by asking the same for their goods as they did six months ago when the premium was 50 per cent higher. Beyond all doubt this system of tactics prevails to a much greater extent than is generally supposed.

Our readers may have noticed that we have on some former occasions alluded to a singular discrepancy in the prices of commodities as affected by the increase of our paper currency; that some have not been at all increased, holding abou the same range as ever, while others enormously have been. We have several times named the articles themselves. This condition of things could not and cannot be well explained by the mere fact of the large issue of paper money.

Mr. Tooke the British author of the History of prices, a very high and universally admitted authority in political economy, combatted the idea. Mr. Craik to whom we owe a most valuable account of British Commerce, in commenting upon the opinions of Mr. Tooke on this subject, says "no demonstration in economical science can be more complete than that which has been given in the admirable work to which we so often have had occasion to refer, of the groundlessness of the notion so clamorously maintained by a certain set of politicians or political economists that the great rise of prices experienced throughout a portion of this space (alluding to the specie suspension for twenty four years in England) was the effect of the state of circulation. He has shown there was no parallelism whatever between the amount of the issues of the Bank during the suspension, and the course of prices, which they were supposed to have affected or determined. Prices sometimes fell under this state of currency, *while the Bank was extending its issues*, and at other times rose while it was *contracting* them. But what is still more decisive is the fact, that for the most part, *neither the rise nor fall* of prices was general, but while one class of commodities became dearer, another class at the same time became cheaper. Nor was there in point of fact either generally or in any particular region of prices, such a rise or *steadily maintained elevation* as the theory assumes to have produced by the increase of the Bank issues. The fact appears to be that it is only a certain amount of currency, whatever be its de-

scription, *whether it be in specie or in paper*, which a country can be made to maintain at any particular time; money in whatever form is merely a commodity of which the community at any particular moment wants only so much, and will not be forced to employ or absorb, or as we should say in the case of any other commodity, to consume a larger quantity." This is the opinion of some of our ablest writers on this subject, and if we recollect that the rate of interest has ruled, and still rules as high as it did before the war, that many valuable securities are sold in the market at prices lower than at the beginning of the war, and that real estate and houses, outside of our great commercial centres where speculation is in full career are as low as they were in 1860, we find the opinions of Mr. Tooke and Mr. Craik are not very far from the truth. We see that legal tenders have been always favorites with the public, that they have been hoarded, that they often have been at a premium, and so scarce even with our Banks that they have been refused even on the checks of the very depositors who had flattered themselves, that they were always subject to their draft. In this view of well known facts we may see that this inflation of our own currency, is not only not the cause of many of our inconveniences, but is much more within practical control than some persons would like to make us believe; that the clamor against it ignores the necessity of our condition as it did in England, and may be replied to in the same way and with as much if not more reason. We see therefore no reason to charge more upon our present system than it deserves, nor is it fair to attribute more evils to its existence than truth requires. On the contrary here as in England we may look to many other causes for the movements in the gold market, the condition of foreign exchange, and the great discrepancies in the prices, and variations in prices of other commodities.

If England was not ruined by 24 years of suspended specie payments, we do not think we shall be by four or five.

At any rate our theory is that the approaching close of the war will give immediate opportunity for the retirement of the legal tenders, the return to specie payments by the National Banks and others, and the sooner the better for all but speculators. These fortunately are not the majority of the people, or we should soon cease to be a producing and industrial nation.

It is a curious circumstance in connection with this part of our subject, that a recent pamphlet from the pen of the Hon. Isaac Buchanan late President of the Colonial Executive Council of Canada, contains some remarkable passages in relation to the point we have been considering. He says:

"I have no doubt that, taught by experience, the Americans will retain paper money, and value it as their finest, as most patriotic institution, and as of itself ample remuneration to American Industry for all the blood and treasure spent in the war."

Again he remarks: "In the excessive issues of paper money in the United States, I see no more argument against paper money than there would be against eating bread in moderation, because some man had injured himself by eating too much of this good thing. And when on this subject I would state my firm conviction that it is not the excessive issues of greenbacks to which much of the depreciation of these as compared to gold is owing. I have all along seen that there is a cause for the *appreciation of gold*, altogether apart from the *depreciation of the paper money*."

This last statement precisely accords with the recorded experience of the British writers already quoted.

A curious revelation has recently been made in Boston in relation to the present condition, and value of the fancy stock companies of that city. It appears from official statements that the total amount of capital stock sworn to have been paid in, in 56 different enterprises, for mining gold, copper and coal was $17,380,000. In November last the cash value had depreciated to the sum of $1,624,400. Seven of the Companies have lost all their capital, and nine alone out of the remainder paid taxes, amounting to but $5,268 62. This is suggestive to prudent people to avoid a line of speculation in certain fancies no matter how promising may be the programme.

The Money Market has been easy during the week at the usual rates. Government securities have been firm and in good demand. Gold has been kept at near 200 under the influence of rumors of probable disaster to Gen. Sherman, the efforts of a certain portion of the press to prevent a decline, and a thorough combination even among small dealers to keep up the price even at an occasional loss.

In the meantime the receipts of gold at the Sub-Treasury are ample and in excess of any demand upon it. It is supposed that even the May dividends on the 5-20's will be paid in advance. The receipts of coin in February at the Custom House were as much as 4½ millions. It is no wonder in view of this ample ability of the Treasury, and the continuation of our splendid military successes, there is an increasing confidence in Government securities. Indeed the 5-20's of the old issue readily bring 111½, and the 6s of 1867 130 to 133. The 10-40s are also above par 2⅛, and the new issues of the 5-20s 110 and rising We can congratulate our numerous readers on the continent of Europe, (for the JOURNAL has a circulation among the largest and most influential Banking Houses there) on the handsome profits they have made by their investments in American Governments, and their intelligent confidence in the spirit of our people, and the stability of their resources. They will see that our assurances and predictions were worthy of all credit, and those who have acted under our advice will have made princely gains on their investments.

Exchange has got down to 7 and a fraction per cent., and but little in demand. Our exports are very large and act as exchanges, and if the supposed laws of trade were infallible, and as arbitrary as some writers maintain, we do not see why at the present rate of exchange specie does not flow in upon us at once, for it is worth more here than it is in Europe. The amount of these exports for the week ending 28th February at this port was $2,919,574, and the specie almost nothing.

The balance in the Sub-Treasury in this city on Tuesday, was $30,040,657.

The railway market was stronger the last week. Money is easy.

The general opinion prevails, that Mr. McCullough is to be the new Secretary of the Treasury, as it is well known that he is for limiting the use of paper money to its real sphere and functions, we may expect to see an immediate adoption of measures, in which retrenchment and reduction in the currency will be prominent.

We observe that one at least of our leading journals favors the idea of paying off the National debt by a popular subscription.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Robinson & Ogden.

The adveriement of this Banking house, which appears on the last page of the JOURNAL, will we trust attract the attention of all those persons who have occasion to buy or sell Government, State and other securities, or wish to invest in Railway shares or bonds.

The business of Messrs. ROBINSON & OGDEN, has rapidly increased, as we from the first believed it would. Indeed they have been compelled to enlarge their office facilities at No. 4 Broad street, to meet that increase, which by their personal attention, their assiduity, promptness and regard for the interests of their customers, all based on the possession of ample means, has taken the largest magnitude in range and amount.

Baltimore City Passenger Railway.

The Senate of the State of Maryland has passed a bill unanimously to amend the charter of the Baltimore City Passenger Railway Company. This gives permission to the company to establish a general centre in Holiday street, and to charge a general fare of 6 cents, until specie payments are resumed by the Baltimore Banks, when it is to be reduced to 5 cents. This bill is a just concession, in view of the fact, that the company is accommodating the public at a large annual loss. In one branch of the Baltimore City Council it was also resolved to ask of the Legislature to defer the disposition of the 1 cent park tax on each passenger, to the Council itself. This fund was intended to be applied to the purchase and establishment of a public park in Baltimore. The bill before the Legislature continues the collection and retains the application of the fund in its original force, but the City Council seems disposed to yield this point also.

American Watch Company.

We give in another column the advertisement of this Company, which manufactures a large variety of watches, that are rapidly and deservedly taking the place of the French and Swiss, being equal in workmanship, and superior as time-keepers. The prices of these articles are extremely moderate, and there is no branch of American industry more *in time* or more deserving of commendation.

Air-Line Road to Washington,

The Baltimore and Ohio Railroad Co., though their President, John W. Garrett, Esq., has addressed a long and able remonstrance to the House of Representatives against the bill now before it, authorizing the Northern Railway Company and its assigns to construct a road from a point in its line between the Borough of York and the city of Baltimore to the city of Washington, and shows how much better the facility desired of communicatiou between the northwest and west, and the capital, might be obtained by the withdrawal of the opposition of the Pennsylvania Railroad Company, to the exercise of its rights by the Pittsburg and Connellsville Railroad Company. We regret we cannot find place for this valuable document. This project is what is called the "Air-Line," intended in fact to open direct communication between Washington and New York, but it is believed the near approach of the end of the Session of Congress will prevent its adoption.

Another Central Railroad.

We learn from the Utica papers, that a proposition has been brought before the Common Council of that city, asking for its consent to the use of its streets by a new railway organization which intends a road north from Utica to Syracuse, there to connect with the railroad to Oswego; also a road from Utica to Schenectady, there to connect with the road now being constructed thence to Athens. The Utica *Herald* says the companies are organized, have filed their articles of association, maps, &c., and have already numerous applications for stock in advance of the opening of the books. It claims that the distance between Utica and Syracuse will be shortened 7 miles, between Utica and Schenectady 2 miles, and between Schenectady and New York many more. The petition was granted. The principal Directors are: E. M. Gilbert, D. N. Crouse, N. F. Vedder, Jas. K. Hitchcock, Ward Hunt, Daniel Crouse, Isaac Maynard, A. E. Culver, Thomas Foster, Geo. Westcott, L. A. Warnick. E. M. Gilbert, Esq., of Utica, is President of the Schenectady and Utica Company, and C. T. Longstreet, Esq., of the Utica and Syracuse Company.

☞ The following gentlemen have been elected directors of the New Almaden Mining Company for the ensuing year: S. G. Arnold, S. L. M. Barlow, William Bond, John A. Collier, R. H. Crittenden, James Eldridge, John Elliott, George J. Forrest, Thomas A. Scott, Howell L. Williams, and E. Waller. The statement of the profits of the company for 1864, (and November, 1863, when they came into possession,) is given in another column.

Railroad Earnings--Weekly.

The earnings of the Chicago and Northwestern Railway for the 3d week of Feb., were $125,248 76
Corresponding week of 1864 ..... 67,376 55

Increase 85.89 per cent..... $57,872 21

The earnings of the Michigan Central Railroad for the 3d week in Feb., 1865 ..... $65,523 00
Corresponding week of previous year.. 64,584 00

Increase $939 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in February, 1865, were $52,937 00
Corresponding week of previous year.. 36,663 00

Increase..... $16,274 00

The earnings of the Grand Trunk Railway for the week ending Feb. 18, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$22,983 00
Express, freight, mails and sundries .	3,124 00
Freight and live stock	64,319 00
Total	$90,426 00
Corresponding week, 1864	80,216 00
Decrease	$10,210 00

The earnings of the Marietta and Cincinnati Railroad for the 3d week in February:

	1865.	1864.
Passengers	$11,298 40	$7,044 43
Freight	9,503 51	9,261 74
Mail, express & telegraph	1,194 33	937 58
Total	$21,996 24	$17,243 75
Total this month to date .	$60,094 70	$51,781 82
Total for the fiscal year, commencing 1st Jan...	158,206 90	116,588 22

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending February 23, 1865, were:

	1865.	1864.
Passengers.....	$2,727 39	$2,021 27
Freight	6,488 12	5,477 76
Express	162 80	104 16
Mails.....	296 58	296 58
Total.....	$9,674 89	$7,899 77

Receipts from January 1 to Feb. 21:

1865	$71,993 74
1864	54,527 38
Increase.....	$17,466 36

Interest and Dividends.

The coupons of the second mortgage bonds of the Cleveland and Pittsburg Railroad Company, due March 1st, 1865, will be paid at the American National Bank, No. 74 Broadway.

The coupons on the bonds of the Peninsula Railroad Company, due March 1, will be paid at the transfer office of the Chicago and Northwestern Railroad Company, No. 8 Wall street.

The Locust Dale Coal Company have declared a second semi-annual dividend of 5 per cent.

The Eagle Hill Mutual Coal Company, Boston, has declared a monthly dividend of 2 per cent., payable March 1.

The Stout Coal Company will pay, March 15th, a quarterly dividend of six per cent.

☞ Mr. George Francis Train has taken out patents for horse railways in Russia, Sweden, Denmark, Prussia, Austria, France and Spain. The Geneva and Copenhagen lines are reported to be a great success.

Journal of Railroad Law.

PUBLIC NUISANCE.—FOOTWAY CANAL.—CONSTRUCTION OF STATUTE.

The late case of Binks, administrator &c., against The South Yorkshire Railway and River Dun Company, was an action by the plaintiff, as father and administrator of Benjamin Binks. The complaint alleged that the defendants were possessed of land near to and adjoining an ancient common and public footway, and had made and constructed and were possessed of a certain hole, ditch, cut and canal in and upon the said land, and adjoining and close to and by the side of the said ancient and common and public footway, and being wholly unfenced, unguarded and unlighted by day or by night, and then containing a large quantity of water; that the existence of the said hole, ditch, cut and canal so being in and upon the land so adjoining the said ancient and common and public footway, and so being wholly unfenced, unguarded and unlighted by day or by night, and so containing a large quantity of water, was dangerous to any person passing along the footway, either by night or day, even if ordinary care were employed by such person, and was a nuisance to the said ancient, and common and public footway, and to all persons using the same, and the defendants, by reason of the premises and of their possession of the said land, ought to have sufficiently guarded, fenced off, railed in and lighted the said hole, ditch, cut and canal, so as to prevent damage or injury to person or persons lawfully passing in and along the footway; yet the defendants while they were so possessed of the land, and of the hole, ditch, cut and canal as aforesaid, wrongfully and contrary to their duty in that behalf, permitted and suffered the land and the hole, ditch, cut and canal to be and continue, and the same were before and at the time of the death of said Benjamin Binks, so wholly unguarded, not fenced off or railed in, and without any light, that by reason of the premises, and by reason of the existence of the hole, ditch, cut and canal in and upon the land and adjoining the ancient and common and public footway, so wholly unfenced, unguarded and unlighted as aforesaid by day or by night, and containing a large quantity of water as aforesaid and by reason of the want of proper and sufficient guarding, fencing off and raling in and lighting of the hole, ditch, cut and canal as aforesaid, the said Benjamin Binks, who was lawfully passing in and upon the footway, lost his way, missed his path, slipped and fell into the hole, ditch, cut and canal, and was thereby killed, &c.

The defendants, after pleading a general denial, alleged that they were not possessed of the land near to or adjoining the ancient common and public footway; that the defendants had not made and constructed, nor were they possessed of, the hole, ditch, cut and canal in or upon the land of the defendants, adjoining or close to or by the side of the ancient, common and public footway, that the existence of the hole, ditch, cut and canal so being on their land was not dangerous to any person passing along the footway, either by night or by day, nor was it a nuisance to the ancient and common and public footway, nor to all persons using the same; that it was not the duty of the defendants to have so sufficiently guarded, fenced off, railed in and lighted the hole, ditch, cut and canal as to prevent damage or injury to any person or persons lawfully passing along the same.

On the trial it appeared that the deceased was 16 years old, earning 6s. a week as an apprentice, and was also employed by a tradesman to go errands, for which he received from 2s. 6d. to 4s. a week. On the 6th of March, 1861, he was sent on one of these errands to "The Holmes." He started by the 7 o'clock train from the Rotherham, but through some mistake, instead of getting out at "The Holmes," he went on to Brightside, and, not having sufficient money, to pay his fare back, he set off to walk to "The Holmes" along a footpath, the night being wet and dark. The deceased had reached "Jordan cottages," by the side of a canal of which the defendants were proprietors, and, after resting there a short time he resumed his journey, and had proceeded along the footpath mentioned in the pleadings but shortly afterwards fell into the canal and was drowned. This footpath is an ancient footpath from Sheffield to Rotherham. From Jordan Dam to half way towards the "The Holmes" it follows the margin of a goit or ditch, as to which there was no evidence when it was made. There was a slight breadth of grass beyond the footpath and the goit or ditch. The defendants constructed their canal in 1834, under the powers of an act of Parliament, and afterwards made a towing path about eight feet wide. In the first instance there was grass land between the footpath and the towing path all the way from Jordan Dam to "The Holmes," the width of the grass varying from nothing to four o five yards. Soon after the canal was opened the tenant of the land beyond Jordan Dam asked permission to cart up the bank along the canal or strip of land between the towing path and footpath; this was conceded by the defendants upon a payment of 2s. 6d. a year, and they also received 1d. for every cart belonging to other persons who used the road. This use of the road destroyed the grass between the footpath and the towing path; and the defendants for the purpose of repairing the road and footpath, had covered the surface of both with ashes or cinders. At the place where the body of the deceased was found, the footpath was close to the goit or ditch. The whole space between the goit or ditch and the canal was about 22 or 24 feet wide, the towing path being 6 feet wide, the footpath 3 or 4 feet wide, and the remaining space about 14 or 15 feet wide, being between the footpath and the towing path; the surface of that space was the same, so that the footpath was undistinguishable from the road. The canal was unfenced and unprotected.

By consent, a verdict was entered for the plaintiff, with 60*l.* damages, leave being reserved to the defendants to move to enter a nonsuit, if the court should be of opinion that there was no evidence on which the jury could properly find a verdict for the plaintiff.

The defendants' counsel obtained a rule accordingly, which was afterwards argued, and judgment given.

The plaintiffs counsel showed cause and the defendants' counsel were heard in support of the rule.

WIGHTMAN, J.—I am of opinion that this rule should be made absolute. Here the canal is said to be adjoining a common and public footway. In truth it was not, it was at the distance of several

feet—about 24. It is true that there was no fence, properly so called, between the public highway and the canal, to prevent persons passing from the former to the latter, and it seems that from circumstances, the distinction between the pathway and the intermediate space has become obliterated.

Now I adopt the view taken by the Court of Common Pleas in Hounsell *vs.* Smyth, 7 C. B. N. S. 731, and in particular that part of the judgment of Keating J., in which he says, "To throw upon the owners the obligation of fencing this excavation in their waste land adjoining the roads, it ought to be shown that the excavation was so near to the roads as to be dangerous to persons lawfully using them." And Williams, J., observes, "No right is alleged: it is merely stated that the owners allowed all persons who choose to do so for recreation or for business, to go upon the waste without complaint, that they were not churlish enough to interfere with any person who went there. One who thus uses the waste has no right to complain of an excavation he finds there. He must take the permission with its concomitant conditions, and, it may be, perils."

There can be no question that here the public have been permitted without objection, to pass over the intermediate space between the road and this dangerous canal; but no right in them to pass over it is alleged, they have at most only a mere permission, and those who take that permission, must take it with all chances of meeting with accidents. The defendants were not under any obligation to fence the highway against the canal, which was not shown to be so near as to be dangerous to a person using the road in the regular line.

Blackburn, J.—I am of the same opinion. Hardcastle *vs.* The South Yorkshire Railway and River Dun Company, 4 H. & N. 67, is an authority in point, where it was held, in considered judgment of the court, that an excavation into which a party falls must be adjoining to a public way, in order to render the owner of the land liable for the mischief. The Lord Chief Baron, in delivering judgment says, "When an excavation is made adjoining to a public way, so that a person walking upon it might by making a false step, or being affected with sudden giddiness, or, in the case of a horse or carriage way, might, by the sudden starting of a horse, be thrown into the excavation, it is reasonable that the person making such excavation should be liable for the consequences. * * * We think that the proper and true test of legal liability is, whether the excavation be *substantially* adjoining the way, and it would be very dangerous if it were otherwise, if in every case it was to be left as a fact to the jury, whether the excavation were sufficiently near to the highway to be dangerous."

I do not say whether that decision is right or wrong: in either event we are bound by it in this Court; and it is not a question for the jury, but for the judge, was the excavation substantially adjoining the way. I do not think it is possible, on the evidence here, to say that this canal was adjoining the highway originally. There was an intervening breadth of towing path, of about 9 feet, and a strip of grass which was agreed to be a marked and real distinction.

In order to distinguish this case from that to which I have referred, it was argued that such alterations had been made in the towing path that they obliterated the distinction between it and the footway, and so rendered it not noticeable, especially at night, and consequently dangerous. But I do not think that that amounts to making the canal adjoin the footway, if it did not do so before.

There may possibly be cases where the owner of land adjoining a way, may by his acts, induce the public to go near to an excavation in his land so as to get into danger; in which case it would be the same thing whether the way were a highway or not. But that should be distinctly proved, whereas the only evidence adduced here amounts to nothing of the kind.

Mellor, J.—Hardcastle *vs.* The South Yorkshire Railway and River Dun Company, explaining as it does Barnes *vs.* Ward, 9, C. B. 392, is rightly decided, and I think the only difference between that case and the present is, that the judgment there assumes that the going off the towing path would be a trespass, here perhaps trespass would not be maintainable. The persons here who say that they are not trespassers by going out of the footway, must take their licence with its dangers.

There was therefore no evidence to go to the jury, and this rule must be made absolute.

Rule absolute.

Wealth and Resources of Nevada.

This the last newly admitted territory into the fraternity of the United States, lies between California and Utah, containing 54,690,560 acres of land, and 60,000 inhabitants. In square miles the area is 85,454. In 1860 the population was but 6,857. It has thus increased from natural causes much more than the Mormon Territory alongside of it, to populate which emissaries for almost 20 years have been busy all over Europe and the United States, offering inducements to emigrants, of a character condemned by the moral sense of all Christian nations.

Nevada in 1860 was divided into three principal counties, Carson City, Humboldt, and St. Mary's, afterwards increased to nine. Its sudden growth is entirely owing to the extent of its mineral wealth, which is being developed on an enormous scale. In the erection of quartz crushing mills capital to the extent of $5,000,000 has been expended, five millions more in opening the mines themselves, and five millions more in the construction of wagon roads, which last have paid on the sum invested from 40 to 80 per cent. per annum. In 1863 the tolls on a part were more than $200,000. The freight itself on goods and merchandise from California reached the enormous sum the same year of three millions of dollars, requiring the use of 3,000 teams of oxen and horses, besides pack mules and trains. To show the enterprise of the people, we have only to state that in the convention called to frame the State constitution, it was agreed to lend its credit to the Pacific Union Railroad to the extent of three millions of dollars.

The principal mines of Nevada are the Esmeralda 100 miles S. E. of Virginia City; the Humboldt 160 miles N. E., the Silver Mountain 60 miles S., the Peavine 30 miles N., the Reese River 170 miles E. N. E., the Cortes 70 miles N., and the San Antonio 100 miles S. of Austin in the Reese River region. There are also numerous other places where great mineral wealth has been discovered. But in the production of silver Nevada excels all the other States and territories, being equal in productive power to Mexico itself.

There are 100 quartz mills in full operation in Nevada, of from 5 to 40 stamps, costing from $10 to $100,000 each. The Gould & Curry mill and its appurtenances have cost $1,200,000, and it is a very remunerating property, its shares or interests being represented in feet, in which way it is sold in the market bringing an enormous price. Each stamper will crush a ton of rock in 24 hours, and it is estimated that 1,000 tons are thus daily crushed. The ore producing at least $50 per ton, gives a result of $50,000 daily, and this again for the year, would be upwards of fifteen millions of dollars.

As this mining industry is constantly increasing, it is expected that in a few years Nevada will lead California in the production of her mines. There are 20 chief places of which the best known in the East are Carson City, the capital, with a population in 1860 of 2,500, Washoe City, Ophir, Humboldt City and Virginia, the most populous and advanced of them all. In 1860 it had a population of 3,000, and is now said to contain 20,000! It has already the comforts and conveniences of an old settled city, streets well paved and lighted, churches, public institutions of various kinds, water, and daily newspapers.

Nothing can be more in contrast than the American mining towns, when compared with those of Mexico. The latter remain in the rudest condition, while the former at once give early evidence of enterprise, wealth and refinement. We cannot as yet foresee what Nevada will be, when the Pacific Railroad traverses it from East to West, and gives its outlet to the Pacific and Atlantic. The silver yet to be brought to light, and pass into the currency of the Nation, or into plate and articles of luxury cannot yet be computed in value, but there is no doubt that a population of some millions will in the course of less time than a generation, be fully sustained in crushing these silver rocks of Nevada and turning them into coin.

In this respect we may safely say Nevada will be without a parallel, either in history, or geology, in ancient or modern times. The great diversity of our States in climate and products is very remarkable, and very advantageous. Other countries have their peculiarities, but none so marked or so wonderful as our own. Nevada may be considered as the Silver State, destined hereafter to furnish the world with its second most precious metal, and in quantities which throw all other mining countries in this respect entirely in the shade.

Hoosac Tunnel Bonds.

An interesting trial has recently come off in the Supreme Judicial Court of Massachusetts, in which the following point was at issue. The Treasurer of the State, in issuing bonds for work done on the Troy and Greenfield Railroad at the Hoosac Tunnel to the contractor Col. Haupt, by mistake calculated the value of the pound sterling in the bonds at $4.44, instead of $4.84, the latter being the established value. This gave Mr. Haupt an advantage. For on receiving £114,500 in bonds on his contract, it was charged to him as only $508,888 in U. S. currency. Whereas it was

claimed the real equivalent of sterling was much greater, being in fact $4.91, and the bonds should have been charged at $562,195, making in fact an over payment of $53,307, which with interest amounted in January, 1865, to $58,251. The decision in the case was, that the pound sterling should have been calculated at $4.84, and that therefore there had been an over payment of $45,-292, without interest. The opinion of Judge Hoar was a learned one, embracing the whole principle of the currencies, exchange and mistakes in calculations and payments of money on contracts, which we have not room for.

California Quicksilver.

The receipts of the Almaden Mine (the only one worked to any extent) during the year 1864 was 42,820 flasks.

The exports of quicksilver to the different countries in the years named have been as follows:

	1861.	1862.	1863.	1864.
N. Y. & Boston	600	2,265	95	1,495
Great Britain	2,500	1,500	1,062	1,609
Mexico	12,061	14,778	11,590	7,483
China	13,788	8,725	8,889	18,908
Peru	2,804	3,439	3,376	4,300
Chile	2,059	1,746	500	2,674
Central America	110	40	40	30
Japan	50	25	—	262
Australia	1,850	800	300	109
Panama	57	424	120	45
Victoria, V. I	116	5	42	21
Total—flasks	35,995	33,747	26,014	36,918

The exports from 1853 to 1864 have been as follows:

	Flasks.		Flasks.
1853	18,800	1859	3,399
1854	20,963	1860	9,448
1855	27,165	1861	35,995
1856	23,740	1862	33,747
1857	27,262	1863	26,014
1858	24,142	1864	36,918

Petroleum as an Illuminator.

As regards the economy of petroleum in preference to other illuminating agents, there is no question. These can be appreciated by comparing it with those in common use, and for this purpose Prof. Weethee has prepared the following table which illustrates the intensity of light emitted by each and the cost of the various burners—thus:

	Intensity of light.	Quantity of light from an equal measure.	Cost of an equal quantity of light.
Coal oil (petroleum	13.70	2.60	$4 00
Camphene	5.00	1.30	4 95
Whale oil	2.40	.85	12 00
Sperm oil	2.00	.95	26 00
Lard oil	1.50	.74	17 00
Burning fluid	.75	.30	29 34

Railroad from Monroe to Dubuque.

The business men of Milwaukee are turning their attention to the necessity and advantage of a direct connection between their city and Dunleith, or some other point on the Mississippi opposite Dubuque, *via* Monroe, the present terminus of the Southern line of the Milwaukee and Prairie du Chien Railway from Janesville West. The idea is favored by the fact that four lines have been projected through the State of Iowa, from east to west, and they are already partially completed. The most northern of these bisects the northern half of the State, and when completed will connect Dubuque with Sioux City on the Missouri river. It is now completed to Cedar Falls, 100 miles from Dubuque. From Cedar Falls a road is projected northward to intersect the McGregor Western Railway, at Austin, in Minnesota, and so on to Minneapolis. At Farley, 22 miles from Dubuque, the Dubuque and Southwestern Railroad branches off in a southwesterly direction, and is completed to within four miles of Cedar Rapids, a distance of 52 miles from Farley, or 74 miles from Dubuque. "It will be seen," says the Milwaukee *Wisconsin*, from which the above is obtained, "that with these roads completed, Dubuque will command the greater portion of the trade of Northwestern Iowa. The value of this trade, within a few years hence, can scarcely be estimated. Even now upon the short lines of road, above mentioned, there are nearly 1,000,000 bushels of grain awaiting shipment, exclusive of that which is yet in the hands of farmers, on the route, and exclusive of some 200,000 bushels in the warehouses of Dubuque. This blockade of grain is a serious clog upon the business of that city; hence her business men are clamorous for a better outlet to the lakes than they now have. They are also equally clamorous that that outlet should be opened up by railroad connection with Milwaukee. As the most of our readers are aware, this connection can be accomplished by constructing some sixty or seventy miles of road from Monroe to the river opposite Dubuque. This road is already chartered, and its completion has long been promised. By its speedy completion, Milwaukee would secure almost a monopoly of the trade of Northern Iowa; for this would be the most direct route to the lakes. But this is not all; the opening of this road would be of vast benefit to the southwestern portion of the state, give an outlet to the mineral region, which has long been needed. The lead trade would then in the main come to our city."

☞ The lease of the McGregor Western Railway to the Milwaukee and Prairie du Chien Railway Company, has been assented to by a majority of each class of stockholders in the latter company, and by the bondholders of the McGregor Western. The lease will be executed this week. This arrangement is greatly for the benefit of both roads, and will enable the Prairie du Chien, by controlling the business of the McGregor Western over its own line, to add very largely to its earnings.

☞ The *Globe* states that the Cobourg and Peterboro' Railway, which has been unused for the past two years, is about to be revived, the stock and bondholders having succeeded in electing a Board of Directors who have the interest of the road at heart.

☞ A new railroad to the oil regions of Pennsylvania is in contemplation. It is projected, if a charter can be obtained, to construct a track from Titusville, in Crawford County, to Union direct.

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO RAILWAY CO., PITTSBURG, Feb. 14, 1865.

THE ANNUAL MEETING OF THE STOCK and Bondholders of this company for election of Directors and such other business as may come before it, will be held at the office of the said company, in the City of Pittsburg, on the THIRD WEDNESDAY (15th) of MARCH, A.D., 1865, at 10 o'clock A. M.

The Stock and Bond Transfer Books of the company, at their office, in the City of Pittsburg, and at the office of the Transfer Agency, in the City of New York, will be closed until the 17th day of March thereafter.

W. H. BARNES, Secretary.

Clark, Dodge & Co.,

BANKERS AND AGENTS

FOR THE UNITED STATES 7.30 LOAN

NO. 51 WALL STREET,

Have all denominations of 7-30 Notes on hand for immediate delivery. 3m-9

J. F. D. LANIER, President, of Winslow, Lanier & Co. C. V. CULVER, Vice-Prest. of Culver, Penn & Co.
C. N. JORDAN, Cashier.

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.....$1,000,000.

DESIGNATED DEPOSITORY of the UNITED STATES

AND AUTHORIZED AGENT OF THE TREASURY.

No. 5 NASSAU ST., Feb. 17, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, together with a portion of their correspondents, being persons of well-known standing and large pecuniary means, have become the owners of most of its Capital Stock, and assume its control and management, Mr. C. V. CULVER retaining all his interest, and accepting the Vice-Presidency.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.
C. N. JORDAN, Cashier. 3m-8

American Railroad Journal.

New York, Saturday, March 11, 1865.

Wealth and Resources of Idaho,

On the 13th of March, 1863, by act of Congress the territory of Idaho was created. The boundaries were fixed as follows:

"Beginning at a point in the middle channel of the Snake River, where the northern boundary of Oregon intersects the same; then follow down said channel of Snake River to a point opposite the mouth of the Kooskooskia, or Clear Water River; thence due north to the forty-ninth parallel of latitude; thence east along said parallel to the twenty-seventh degree of longitude west of Washington, thence south along said degree of longitude to the northern boundary of Colorado Territory; thence west along said boundary to the thirty-third degree of longitude west of Washington; thence north along said degree to the forty-second parallel of latitude; thence west along said boundary to place of beginning."

It contains 62,525,828 acres of land, and in 1864 it had a population of 20,000 inhabitants. It is shaped like a triangle, its hypothenuse, its Eastern line being an irregular curve. Its northern boundary is British Columbia, its western, Oregon and Washington, its eastern, Montana and Dakotah, and its southern, Nevada and Utah.

...e having been published as yet no statistical accounts of it since it became a territory, we are unable to give with any minuteness or perhaps accuracy such details as we have hitherto furnished of the other territories we have noticed in the JOURNAL. We therefore adopt a general description as recently given by a traveler in a letter to a cotemporary. Mining is the principal pursuit of the inhabitants. Agriculture is, however, sure to follow.

Though a goodly portion of the territory is said to have been explored by miners in quest of the "color," only a very small portion has been worked, and these take two grand divisional heads, under the designations of Bois and Beaver Head mines. Fort Bois is almost close to the western boundary of the territory, and has a cluster of diggings within a circuit of forty miles, respectively:—Bois City, Placerville, Centreville, Pioneer and Bannock City, on the north branches of the Bois River. Bannock City is the chief place of business—*i. e.*, it is the largest in dimensions at the present time; but, as cities grow up nearly as quickly as did the historical gourd of Jonah of Nineveh, this may be no landmark in a very few months more. Its latitude is about forty-three degrees thirty minutes north, the longitude one hundred and fifteen degrees west. The distance direct from the Pacific Ocean is three hundred and fifty miles, but twice that distance as traveled along the Snake and Columbia Rivers to the Pacific shore. Lewiston, a little west and about four hundred miles north of Bannock City, has been selected by Governor Wallace as the chief city or federal city of the territory.

Mining is profitable generally speaking; a day's work producing according to circumstances from $7 to $50 per day. The best results obtained by a gang of 8 men has been $1,000 per day.

Away east by north some three hundred miles from the Bois mines another clustering of diggings is to be seen, under the general classification of the Beaver Head mines. At the first discovery of gold in that region the general public heard of Bannock City frequently; but, as Bois has a Bannock City also, the Beaver Head mines has been accepted as the name the least likely to be confounded with its more western neighbors. The cities here are Nevada, Virginia, Centreville and Bannock; Fort Owen, in Bitter Root Valley, Deer Lodge and other small trading posts are in that neighborhood. The development of this mining country seems to extend in a northeasterly direction to the junction of the three forks of the Missouri at Gallatin. A hundred and eighty miles further, the mountaineer reaches Fort Benton, "where the mighty Missouri rolls down to the sea." Up to this point, boats of light draught have been able to bring goods from St. Louis, in seasons when the water was plentiful, and no doubt before another rush of immigrants the enterprising merchants will be prepared to send up the river an immense amount of everything necessary to develop and build up a new country. There are fortunes in that business beyond anything picked up in the diggings, save to the fortunate few who, in a streak of luck, make fortunes in a day.

Two expresses run between Salt Lake City and the mines at Bois and Beaver Head every week. The distance to the former is four hundred and eighty miles, and to the latter four hundred miles. When they have got everything in order and the nearest routes explored, bridged, &c., a hundred miles will be deducted from the present Bois route. The Post Office Department offered to put on weekly mail service, from the 1st of January, 1864, between Salt Lake and Fort Benton, passing through the Beaver Head mines, or if accepted at the contract office, from Fort Bridger to Fort Benton. The route will be unquestionably between Salt Lake City and Beaver Head. The stages are daily crowded with passengers for California, and from the Washoe mines; and the general excitement has been as great at Reese River as the highest pitch of California in 1849.

Up to our last accounts the supplies for the miners were principally obtained from Utah.

Common Schools of Maine.

From the recent report of the Superintendent, it appears that the number of school children in the State at the close of 1864, was 235,249, being an increase of 474 over the year previous; the number of school districts, 4,120; of school houses, 4,035; of houses built within the year, 77, at a cost of $111,385. The aggregate expenditure for school purposes was $887,100.

Baltimore and Ohio Railroad.

The only reports published by this company, in relation to its affairs since the outbreak of the rebellion are those having reference to the fiscal years 1861 and 1862; and these were not presented to the stockholders until the annual meetings in November 1863 and 1864, in both instances two years later than is usual. We are thus, and yet two years behind the time in all relating to this important thoroughfare, and probably shall have to be satisfied with delayed reports so long as the war continues to be waged.

The cause of this delay in making the usual annual statements of the transactions of the company, and the results as to money return, is obvious. For a greater part of the time elapsed since the war was inaugurated the road has been either partially or wholly in possession of the enemy, and after each raid or occupation the repairs of the damages perpetrated have occupied still longer periods. The transactions growing out of these exigencies, and other matters which the reports explain could not be accounted for as in ordinary years, and created the necessity of delaying the proper statements until full returns could be obtained. Under these circumstances we cannot wonder that two years are requisite to clear up the affairs of the next previous one.

It is a matter of congratulation, however, that the company amid so much to discourage and so much interruption of business should have been able to declare the usual dividends to the stockholders, and fulfill all its engagements to the sinking funds for the redemption of its bonds. These duties it has nobly done, and in this has shown what the results of years, when peace again visits the land, will be to those whose fortunes are invested in the property.

The President's reports, being a general resume of the year's business we have already published in the pages of the JOURNAL—that for 1861, in the number for Nov. 21, 1863, and that for 1862 in the number for Dec. 3, 1864; and to these we refer our readers for the history of the two years. These reports however, contain no details such as are found in the department returns, and of course were unsatisfactory to parties desirous of detailed information. Having lately received the full reports for the two years heretofore spoken of, we propose again to go over the ground occupied by them, and give the figures which until lately were not in our possession.

The road operated by the company comprises three distinct parts, the main stem or the Baltimore and Ohio Railroad proper; the Washington Branch Railroad, two-thirds of the stock of which is owned by the Baltimore and Ohio Company, and the Northwestern Virginia Railroad which at the date of these reports was under lease to the Baltimore and Ohio Company, and in which it possessed large financial interests.

The length of these several lines is as follows:

Baltimore and Ohio Railroad	397.6 miles.
Washington Branch Railroad	80.0 "
Northwestern Virginia Railroad	103.5 "
Total length of road	513.1 "

Previous to the rebellion the stock of engines and cars on the roads was ample. During its progress, however, the distruction of these by the enemy has been immense, and our own government has in several instances further reduced the number by impressing them for service on other lines. Nevertheless the energies of the company have been employed successfully in replacing these drawbacks, and in refurnishing the road to meet the heavy demands on its capacity.

The stock of engines on hand at the end of the fiscal year 1862 numbered 221, of which 33 were passenger engines, 145 coal and tonnage, and 43 ballasting, etc. Of this number 123 had been rebuilt or repaired in the two years, and the places of those destroyed or withdrawn had been supplied by new engines.

The number of passenger, freight and coal cars is in proportion with the number of engines and ample for present necessities.

The mileage of engines in 1861 and 1862, on the lines severally was as follows;

	1861.	1862.
Main Stem	2,571,438	1,953,769
Washington Branch	231,295	525,129
Northwestern Virginia R.R.	345,675	314,322
Total	3,148,408	2,793,220

The reports give no returns of the number of passengers carried, and very incomplete reports of the tonnage. The through tonnage on the main stem which in 1860 amounted to 222,538 tons, decreased in 1861 to 135,680, and in 1862 to 65,018 tons.

The aggregate quantity of coal transported by the company in 1860 was 427,793 tons; in 1861 the quantity was reduced to 213,984 tons, and in 1862 to 160,705 tons. This very important branch of the company's business, which before the war was being rapidly developed, fell in 1862 to two-fifths of its maximum amount.

The tonnage of live stock for 1860 was 36,359 tons, 1861 18,969, and for 1862 only 11, 788 tons.

The flour trade fell off from 619,419 barrels in 1861 to 390,839 barrels in 1862; and the lumber trade which in 1860 amounted to 23,321 tons, was in 1861 only 13,880, and in 1862 only 6,063 tons.

But notwithstanding this great falling off in tonnage the revenues of 1862, show a better return than those of 1861. The principal increase has been in the passenger business and transportation of troops. The following tables give the results of the last three years those for 1860 being inserted as a measure for comparison:

	Passengers.	Tonnage.	Total.
Main Stem—			
1860..	$697,735 44	$3,224,467 50	$3,922,202 94
1861..	889,159 05	2,324,266 65	3,211,425 70
1862..	1,769,497 13	2,712,361 85	4,481,858 98
Washington Branch—			
1860..	$361,026 57	$101 853 87	$462,880 44
1861..	327,879 03	110,260 66	438,139 69
1862..	444,262 30	334,154 37	778,416 67
N. W. Va. R R.—			
1860..	$111,357 20	$227,845 92	$289,203 12
1861..	134,386 14	216,145 59	350 531 73
1862..	125,780 09	238,242 10	364,022 19
Aggregate—			
1860..	$1,100,119 11	$3,554,167 29	$4,654,286 50
1861..	1,349,424 22	2,650,672 90	4,000 097 12
1862..	2,339,539 52	3,284,758 32	5,624,297 84

The aggregate gross earnings of the lines separately give the following amounts:

	1860.	1861.	1862.
Main Stem	$3,922,202 94	$3,211,425 70	$4,481,858 98
N. W Virginia	289,203 12	350,531 73	364,022 19
Washington Br.	462,850 44	438,139 69	778,416 67
Total	$4,654,286 50	$4,000,097 12	$5,624,297 84

The expenses of operating and repairs were as follows:

	1860.	1861.	1862.
Main Stem	$1,616,615 61	$1,391,094 91	$1,427,205 83
N. W. Virginia	194,566 65	3 9,922 14	266,670 77
Washington Br.	173,042 33	116,415 34	153,827 75
Total	$1,984,244 59	$1,517,432 39	$1,847,704 49

And the revenue after deducting the cost of operating and repairs as follows:

	1860.	1861.	1862.
Main Stem	$2,305,587 33	$1,820,330 79	$3,054,653 15
N. W. Vir R R.	94,636 47	40,609 59	97 351 42
Washington Br.	289,808 11	321,721 35	624,588 92
Total	$2,670,041 91	$2,182,661 73	$3,776,593 49

Reducing the expenses to proportion we find their relation to earnings to be thus:

	1860.	1861.	1862.
Main Stem	41.21	43.31	31.84
N. W. Virginia Railroad	72.28	88.41	73.25
Washington Branch	37.38	26.57	19.76
Total	42.63	45.43	32.85

The general results of the operations of the several lines are given in the profit and loss accounts, and their financial condition in the general ledger. The following statements present complete abstracts:

MAIN STEM.

Earnings:	1861.	1862.
Passenger	$887,159 05	$1,769,497 13

Fuel and its preparation, etc..	7,486 16	.....
Rep'rs of stationary machinery	360 86	.....
Contingent exp. mach. dept...	67 11	.....
Total expenses.....	$116,415 34	$153,827 75
Net earnings.....	$321,724 35	$624,588 92

The above table will require a word of explanation. On the 1st April, 1861, a system was adopted by which the "earnings are equitably divided, upon a basis requiring all the expenses connected with transportation, the use and repair of machinery, and of the shops and stations of the company in Baltimore, to be paid by the Main Stem—the expenses of the road department alone being charged to the Branch line." During 1861 -'62, large expenditures were made, (which are embraced in the statement of that year,) for the construction of additional tracks and sidings, etc. The increased business upon the line required further extensive permanent improvements, which the board had determined to prosecute as rapidly as labor and materials could be obtained. These are now in progress, or probably completed or nearly so.

Statement of profit and loss for the year ending September 30:

Cr.	1861.	1862.
Bal. from previous year.	$225,533 50	$356,394 92
Net earnings	321,724 35	624 588 92
Total	$547,257 85	$980,983 84
Dr.		
Dividends on stock	$148,500 00	$222 750 00
State tax on passengers.	40,926 77	199,701 94
Ground rents	20 00	20 00
On account of annuity..	1,250 00	1,250 00
Southern connections ...	166 16	.....
Bal. carried to next year	356,394 92	557,261 90
Total	$547,257 85	$980 983 84

In the year 1862 three dividends of 4½ per cent. each are included. In former years it has been usual to include the dividend declared Sept. 30, in the succeeding year's account. To correspond with the balance of 1861, there should be added to that of 1862—for dividends $74,250, and for State tax $80,565 92, making it $712,077 82.

Statement of the liabilities and assets of the Branch Company Sept. 30, 1861 and 1862:

Liabilities:	1861.	1862.

Total	$2,031,394 92	$2,232,261 90

Chicago and Great Eastern Railway.

The first regular trains of the Chicago and Great Eastern Railway passed over the entire road from Chicago to Richmond, Indiana, (223 miles,) on the 6th inst., the route being now opened for through traffic to the Atlantic cities. The connection is made at Richmond, *via* the Little Miami and Central Ohio Railroads to Bellaire, and thence over the Baltimore and Ohio Railroad to Baltimore; or over the Steubenville road *via* Pittsburg to Philadelphia and New York. It opens a fourth trunk line from Chicago to the East, and is the most important connection for the Western roads centering at Chicago which has been completed for many years.

Interest and Dividends.

The Marietta and Cincinnati Railroad Company have declared a dividend of three per cent. for the six months ending the 31st December, 1864, on the 1st and 2 l preference shares of the company, payable in kind on the 10th of March inst. The dividends due on the stock registered on the New York books, will be paid at the Farmers' Loan and Trust Company in New York City.

The Hudson River Railroad Company has declared a dividend of five per cent. less Government tax, payable April 10th.

The Suffolk Coal Company has declared a dividend of 3 per cent., payable on the 15th inst.

The Savage, Yellow Jacket, and Gould and Curry Silver Mining Companies have each declared a dividend of $75, gold, per foot; and the Imperial Silver Mining Company $8, gold, per share, payable on demand.

Railroads and Canals of Pennsylvania.

American Railroad Journal.

Saturday, March 11, 1865.

Stock Exchange and Money Market.

Those who contend that inflation of currency and advance in prices are exclusively chargeable upon a paper currency, may honestly change their opinions, if they are open to the teachings of history and experience. We have on former occasions alluded to the remarkable example of California, where with an exclusive metallic currency from the start, there has been often the greatest inflation of prices ever known on this continent; where speculations have been most rampant, bankruptcies occurring on the largest scale, and fortunes lost and won with unparalleled rapidity. The latest quotations we saw of the cost of articles in San Francisco, included the price of butter at 75 cents in specie, which has never been so high in currency even in the city of New York, when gold brought the greatest premium. Flour also being then $14 in gold per barrel or about $28 in currency. Let the bullionists explain this circumstances in the best way they can.

But there is a remarkable instance in another part of the world at this very moment, even more surprising, though the cause is well understood. Ever since the war, Great Britain has stimulated the production of cotton in its East Indian dependencies. The Presidency of Bombay has been a large gainer by this policy. A perfect deluge of gold and silver has poured upon it. Before the war in 1860, and '61, its import of bullion amounted to about six and a half millions sterling annually, and not always that, while for the succeeding years the amount has been in the total, sixty millions sterling or three hundred millions of dollars. All this has gone into a single city. The consequence is that prices have advanced upwards of 200 per cent. Even the Parsee and Hindoo tradesmen speak with contempt of a lac of rupees or $50,000. Speculation is on the rampage. Clerks in houses previously earning but $150 a year, have been known by daring ventures in cotton to amass, as in the instance of a Hindoo now the partner in a native house, the enormous sum of ten millions of dollars. Large numbers of cases are known of capitals being increased to five millions from very small beginnings. The middle men or brokers who act between the growers and the purchasers of cotton get rich on commissions and options. Crowds of village peasants are seen in the country towns, sitting in groups and receiving sums of 30 and 40,000 rupees for their growing crops. Real estate is in demand at almost incredible prices. The cost of a foot square of ground in the commercial portion of Bombay is from $150 to $300. All kinds of stock companies are proposed. At the latest advices, there were 30 new companies of the largest dimensions recently projected about to go into operation in the city of Bombay, and every day adds to the number, while an impulse of improvement is leading to gigantic changes in wharves, roads, public and private buildings, hotels, universities and hospitals. But while some classes are thus getting "rich beyond the dreams of avarice," a very large number are sinking into poverty and distress. It is impossible for a married man to live in Bombay for less than $5,000 a year. Families are breaking up and separating, finding their previous fixed incomes inadequate to their maintenance. Officers in the army of the rank of Captain cannot afford to have meat on their tables but once a week. In short the gold inflation in this dependency is greater than that we have yet experienced in New York at any time during the war, from the increase of paper money. And yet it has all grown out a plethora of the precious metals. Certainly the facts which we have thus collected from the best and latest authorities are a complete refutation of the doctrine that paper is the exclusive cause of inflation, and that everything commercial or financial is safest and steadiest in value and price when the precious metals are the standard and current medium of exchange. So that if we had as much gold and silver afloat as we have paper we should be even worse off than we are now, for there is a contractile power in paper which is adjustable to circumstances, but gold remains whether for good or for evil.

We notice that our opinion that our victories have had an effect on the gold market has been dissented from by a cotemporary in Philadelphia, who seeks the explanation in different causes. We confess we do not see any reason to change it notwithstanding, for the amount of paper money afloat has not yet diminished, while gold has fallen very heavily. The reason is that each success of our army and navy brings the war nearer to its close; with its close will come retrenchment, with retrenchment will come the certain application of our revenue to redemption, and with redemption paper money will appreciate and become the equivalent of specie as was in other periods. We think we may safely say that we were fully sustained both by our own logic, and "the logic of events." Connected with this subject, intimately indeed connected, is the fact that every where our wisest and most practical financiers accept the system which has so far prevailed as the only one which could have been adopted, or carried us through this war as it has. Our opinions frequently and conscientiously expressed have been affirmed by friends well known in the financial world, and now we have the pleasure of quoting a published letter from Thomas W. Olcott, Esq., President of the Mechanics and Farmers Bank of Albany commenting upon the remarks of Goldwin Smith, on the finances of the country. Mr. Olcott's name is honored wherever it is known, and is synonimous with probity, experience and ability. There have been times in his financial career when the credit of the State of New York, at home and abroad, has owed its stability to his interference and aid, and when he gives his opinion it is of value. He writes:

"*I cannot bring my mind to believe* that the legal tender act is the root of all our difficulties. The true and only cause of all our woes is the rebellion, and this *legal tender act was an unavoidable incident of that paramount and controlling calamity.* Its effects we all know, and its necessity we all deplore; but, as a choice of evils, I cannot doubt the wisdom of the enactment. It favors debtors we all know, and it favored the creation of the mighty national debt, essential to the successful prosecution of the war, and it averted, not the failure of a few wild-cat banks only, but of every bank in the country, with every individual and firm and corporation doing business upon credit. But for that act, it is my belief that *we should have had universal bankruptcy, national and individual.* How strange to suppose that we could have floated three thousand millions of debt *upon our insignificant supply of coin.* It is both *a financial and physical impossibility.* There is not coin in America, North and South, and all Europe combined, to meet the demand of our war—a war compared with which European wars are as pigmies to a mountain. And our friend Goldwin Smith excuses England for a like grave offence upon the feeble ground of having to send abroad to pay her little army comparatively insignificant sums of gold!

We must read and digest the rebellion first, and Adam Smith afterward. It is true, as Goldwin Smith stated, that real estate did not at first rise in price like other articles, nor has it to this day advanced at all in price—and this is a remarkable fact."

We may certainly be allowed to remind our readers, that we have previously replied to the strictures of Goldwin Smith almost in the same language, and we are confirmed by this letter of Mr. Olcott in our convictions that our views were correct. We dare also repeat another opinion recently expressed, that the financial position of the country is not only a strong one, but perfectly within the control of an able Secretary of the Treasury, as we hope shall find Mr. McCulloch to be.

The war near its close, the revenues ample, and retrenchment sure to begin, the monetary affairs of this country will be manageable as easily as those of a Wall street bank, and this is precisely what Mr. Pierpont of this city asserted in his able speech on Monday last in Union Square. There is no doubt of this fact. The present revenues of the country, willingly furnished by the people, who to the astonishment of English writers voluntarily hurry to the tax collectors to anticipate their payments, are ample to extinguish the National debt within a few years, while the values of the country during the next decade being sure to double at the present rate of progress, will in the same ratio diminish by one half the pressure of our burdens upon present individual means. The plough we have put our hands to is going through the furrows with perfect success, and we need not look back.

It is a source of extreme satisfaction to all those of us who entertain these views, that Government securities are appreciating so steadily at home and abroad. And we owe our thanks to those parties who are so active in bringing them to the knowledge of the people themselves. To them we owe much of the present popularity of the 7-30's, which for a time languished, and were but little sought for. The enlisting of intelligent agencies, by the great contractors as they would be called in Europe, Jay Cooke & Co., has been of essential service. As an army could not well be got together without recruiting stations, so subscriptions to the 7-30's could not be expected in the enormous sums which now swell the subscriptions, if they had not been placed within the convenient reach of the masses, of the small economists and investers as well as the millionaires. The system of Jay Cooke & Co., founded in wisdom has been crowned with eminent success. Since the 1st of February the amount obtained by them is $95,152,600, and there remain unsubscribed but $72,000,000.

We observe that the foreign imports for January, 1865, at this port as compared with those of the same month in 1864, are less by almost one half being a little more than ten millions of dollars. The exports for the first seven months of the same years are equally favorable to the country in their results. The domestic produce exported amounted during the same period to the value of $182,492,658, against $87,899,942 the previous year. There was a falling off in the shipments of specie the same time, as appears by the difference between $34,581,178, and $24,848,353, this last sum being for the 7 months ending January, 1865, since which period the shipments have been on a reduced scale. It is well also to note how the price of gold has fallen. Last July it stood at 294, and now it is 195. The total exports of specie in December last were $6,104,177, in January they were but $3,184,853, and in February but $612,671!! The amount of gold received since the 1st of July last at the New York Custom House was $34,576,193, and the interest paid in the same time on the public debt was but $20,555,170, thus demonstrating the perfect certainty of the ability of the Government to meet all its engagements of this character.

It is no wonder then that Government securities maintain their place in the market. The quotations are tending upwards, and it appears from our foreign exchanges of the 28d ult., that an improvement had taken place, even in London of from 2 to 2½ per cent. in the 5-20's. A London journal complains, that the Frankfort bankers seem to have particular facilities for learning the value and character of American securities. We might explain this very readily. This JOURNAL, which it must be admitted contains not only the most regular but the fullest accounts of all American securities, these being a specialty in its arrangements, is largely read and closely studied in the most prominent banking houses on the continent, a circumstance peculiar to its circulation. Every week these bankers are thoroughly posted with every fact arising in relation to our financial condition; they have been thoroughly informed of the character and extent of our resources, and are sufficiently advised of all the political movements of the country which are likely to affect its pecuniary affairs. These parties are indeed being removed from the immediate influences of cliques and combinations, yet having all the material facts before them, perhaps better and cooler judges of our financial ability than we are ourselves. We are not surprised therefore, to hear of further orders by the last steamers. The British capitalists are beginning to comprehend that they have lost a very great opportunity themselves, from having consulted their prejudices in this matter rather than their unbiassed judgment.

The rates at which these various National securities sell in this market, will be found in their usual place.

There has been a disposition during the past week to press the sale of railway shares, while on the other hand, railway bonds are scarce, and are held with great steadiness. We think those persons who fear that a contraction in the currency and an early return to specie payments are likely to break the present prices of the shares, deceive themselves. We believe that this state of things would materially benefit the companies, for while their receipts would be the same, their expenses on a specie basis would be reduced one half. And here we would offer one word of excuse for the apparent mismanagement of some of our roads, as evidenced by the frequent accidents of late. The truth is, that the war is constantly taking from them their most experienced employes, who are in demand by the Government on their extemporized roads near the seat of operations; their best engines are continually taken from them under the military necessities of our armies for transportation, and the very rails are also carried off under the same excuse, even where they were about to be laid on new tracks, or relaid on old ones. This fact is not sufficiently understood by an impatient public. We know of a company that has been put back almost a year by the seizure of its rails by the Government.

About two millions of 5-20's were sent out by the Cunard steamer on Wednesday for foreign account, and the price understood to have been paid for most of them was 111¾. The 10-40's. ex-dividend brought the same day 97⅛ to —⅝. Foreign exchange was also in quantities remitted at 106, which shows a further decline from par. Such facts as these are very significant, especially

when we add another, that there is a marked pressure to sell bills.

The petroleum exported thus far during the present year amounts to 1,936,220 gallons. The value of our exports from New York the last week exclusive of specie, which was very light, was $3,657,542, and the balance in the Sub-Treasury on Tuesday, was $28,806,644.

Money is in demand, and the rate of discount has advanced about 1 per cent. above the legal rate.

At the gold board the premium is on the decline, the price being but faintly held at 195 and downwards. $1,237,811 reached the city in the last steamer from Aspinwall, and it was more than the speculators hoped for.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Continental Bank Note Company.

This well-known company, engravers and printers for the National Banking Currency, which is executed in the highest style of art, both in design and workmanship, are particularly successful in the production of certificates of stock for mining, petroleum, coal and other corporations, banking institutions, railroad bonds, labels, stamps, and bank notes. We have before us some beautiful specimens of their work, and therefore speak by the card. The company has its office in the marble building, 142, 144, and 146 Greenwich, corner of Liberty street, where their business is carried on in a large and extensive way, and where all orders will meet with prompt attention. Railway corporations will especially find this company prepared to furnish bonds of the most elegant and appropriate style and finish, at the shortest notice, and moderate cost.

☞ The "New York, Philadelphia and Baltimore Consolidated Petroleum and Mining Company," with a capital of $1,500,000, shares $5 each par value, subscription price $3 per share, without further assessment or personal liability, is now in the full tide of success. Its wells, producing and under contract are thirteen in number, while the whole tract of 26 different and valuable properties is good boring land, being situated on Oil Creek, Cherry Run, Cherry Tree Creek, Walnut Bend, Allegheny River, Elk Creek, Sugar Creek, and other well known streams of equal reputation. The company is managed by first class men in this city and Philadelphia, and is organized under the laws of this State. We think it offers very large inducements to operators in oil stocks, and appears to have bottom and stability. Besides the present producing wells, there are ten new ones being bored, and nearly completed. The original subscriptions having closed, a limited number of shares is now offered at $3 per share, and if the price advances as it has done already for good cause, the investment yet within reach of the enterprising bids fair to ensure a very large profit.

Arrangement and Connection between Railroad Companies —Excursion Trains.—Coupon Tickets.—Refusal to give Check for Luggage.—Liability of Companies for Loss of Luggage in such case.

The case of Najac against The Boston and Lowell Railroad Company, recently decided on appeal in the Supreme Judicial Court of Massachusetts, was an action brought by the plaintiff against the defendants in the Superior Court in that State, on contract to recover for the loss of a trunk and its contents.

The following facts were agreed upon between the parties:

In September, 1859, one Josiah Perham, suggested to the defendants' agent an arrangement for an excursion train from Boston to Montreal, in the Province of Canada, and back. Such an arrangement was accordingly made with all the connecting railroad companies on the line, by which the price of each ticket was fixed at five dollars, of which Perham was to have fifty cents and the residue was to be divided among the various railroad companies in proportion to the length of their respective routes, and the train was to start from the defendants' station in Boston on the 20th September in said year. The tickets were accordingly printed, having a printed heading "From Boston to Montreal," and bearing the name of the defendants' agent, with the designation of his office, and with coupons attached for the other roads, good for ten days, and covering the return trip. Perham took some of these tickets and disposed of them as he pleased, and gave a receipt for such as he received, and returned all that he did not sell.

The plaintiff, a citizen of Providence, purchased two tickets of Perham, one for himself and another for his wife, intending to go to Montreal, and on his return to visit friends in Vermont, New Hampshire and Maine, and to be absent from home several weeks.

On the 20th of September he delivered two trunks to the defendants' baggage master at their station in Boston, and requested checks for them for Montreal. The baggage master declined to give checks, saying that they did not provide checks on excursion trains. The plaintiff then asked to have them checked by the regular train. To this the baggage master replied that the plaintiff and the trunks must go by the same train and they would be perfectly safe, as he (the baggage master,) was to go through with them. The trunks were put into the baggage car of the defendants, and the plaintiff and his wife took their seats in a passenger car of said defendants. The defendants' baggage master and both cars went through to Montreal, but the defendants' locomotive went only to the termination of their own road. Each road furnished its own locomotive and conductor. One of the plaintiff's trunks was lost after the termination of the defendants' road, but on what part of the route was left uncertain; and the plaintiff demanded it of the defendants' baggage master at Montreal on the 21st of September.

It was agreed that if upon this state of facts the action could be maintained, judgment should be rendered for the plaintiff; and judgment was accordingly rendered in favor of the plaintiff in the Court below, and the defendants appealed.

DEWEY, J.—In the view we have taken of the present case, it is unnecessary to enter upon the consideration of the question as to the effect of an ordinary sale of a ticket, having coupons for the connecting roads, the place of destination being beyond the limits of the road of the company selling such ticket, in reference to the liability of such company for the loss of baggage of the ticket holder, occurring beyond the limits of their own road. The facts here present their own peculiar circumstances, upon which this case may be decided. The defendants had, in common with various connecting roads, arranged for an excursion train from Boston to Montreal, starting from the depot of the defendants in Boston. The plaintiff purchased two tickets duly issued by the defendants, having printed thereon "From Boston to Montreal," and having attached to them coupons for the other roads, which also had upon them the words "From Boston to Montreal." Having these tickets for himself and his wife, the plaintiff became entitled also to the carriage of his reasonable baggage, and he delivered to the defendants' baggage master, at their depot two trunks, and requested checks for them to Montreal. The baggage master did not furnish checks, or offer to do so, either for the limited route of the defendants' road or through to Montreal. In this the defendants were acting in violation of law, such checks being required by the provisions of S. P. 1854, C. 23, by which it was made "the duty of all railroad corporations in this commonwealth to give checks when requested to do so, to passengers, for the baggage of such passengers, when delivered for transportation."

Upon the plaintiff's renewing his demand for checks for his baggage, and asking to have his baggage sent forward by the regular train, if checks could not be given on an excursion train, the baggage master refused to send the trunks by the regular train, saying the trunks and the plaintiff must go by the same train, and they would be perfectly safe as he (the baggage master) was to go through with them. The defendants' baggage car and baggage master went through to Montreal. At Montreal the baggage master delivered one of the trunks to the plaintiff. The other was demanded, but not delivered.

Upon the facts stated, the defendants, in violation of law, refused to give checks, although requested so to do. As a substitute, they through their agent, declared to the plaintiff that the trunks would be perfectly safe, as their baggage master was to go through to Montreal on the train. The trunks were thereupon committed to the custody of the defendants' baggage master, and the company assumed the obligation arising from these representations and acts.

From the nature of the baggage, the plaintiff did not exercise any further personal oversight of it on the route, nor make any examination at the terminus of each road, to ascertain whether the trunks were or were not in the baggage car. Under these circumstances the plaintiff has the right to recur to the defendants as the party immediately responsible for the loss of his trunk. Whether the action might not have been a joint one against all the railroad corporations which united in this common enterprise, it is unnecessary to decide. We have no doubt of the legal capacity of this corporation to assume responsibilities for the safe transportation of baggage beyond the limits of their own road. Angell and Ames on Corp., §§ 229, 239, 256. Redfield on Railways, 281, 287. Simkins *vs.* Norwich and New London Steamboat Company, 11 Cush., 102. Fitchburg and Worcester Railroad *vs.* Hanna, 6 Gray, 539. What is necessary to constitute such contract, or what acts will create such liability, must be decided as the cases occur.

As the default occurred on the 21st of September, and the trunk was then demanded, interest may properly be allowed from that date.

Judgment will be entered for the plaintiff for the sum stated in the report of the auditor, with interest as above stated.

Railroads in California.

Statement of the length and approximate cost of each railroad in California, near January 1, 1865:

Corporate Titles of Companies.	—Mileage— Total.	Open'd.	Cost of roads and equipment.
1. San Fra. & San Jose	50.00	50.00	$2,000,000
2. Western Pacific	120.00	.....	.....
3. Central Pacific	120.00	31.00	1,250,000
4. Sacramento Valley.	22.50	22.50	1,750,000
5. Freeport	9.00	9.00	250,000
6. Placerville and Sacramento Valley	84.90	15.20	1,000,000
7. San Fra. & Washoe	92.00	.....	.....
8. California Central	43.80	43.80	2,500,000
9. Northern California	29.00	29.00	1,200,000
10. California & Oregon	650.00	.....	.....
11. San Fra. & Oakland	4.00	4.00	200,000
12. San Fra. & Alameda	22.00	5.00	250,000
13. San Fra. & Sacram.	58.00	.....	.....
14. Mission .. S. F.	3.50	3.50	200,000
15. Market st. S. F.	2.80	2.80	150,000
16. South S.F.	4.00	.....	.....
Total	1,265.50	215.80	$10,750,000

REMARKS.

1. *San Francisco and San Jose*—constitutes the first division of the Pacific Railroad, and has cost about $40,000 per mile. It was formally opened for travel and freight June 4, 1864, but had been previously worked by successive sections as completed. During the summer and fall the monthly receipts were between $30,000 and $40,000, while the expenditures were from $10,000 to $12,000. When the rains set in the receipts fell off; but still more than realized the expectations of its projectors.

2. *Western Pacific*—carries the line eastward to Stockton, construction has not been commenced, but everything was prepared for breaking ground when the rains cleared off.

3. *Central Pacific*—when completed will extend from Sacramento to the State line of Nevada. The first 18½ miles from Sacramento to Lincoln, (crossing of the California Central Railroad,) was commenced Jan. 8, and completed April 16, 1863; the next 12½ miles to Newcastle were commenced July, 1863, and completed June 6, 1864, and the next 12 miles to Clipper Gap (Rock Creek or Neilsburg Station,) are expected to be opened in March or April, and 10 miles further in June, 1865. The receipts from operations to Dec. 31, 1864, had been $120,090, and the expenditures $63,264—leaving as net earnings $56,895. It is said that the receipts will be doubled when the line is completed to the Gap. The capital of the company is $20,000,000, and Congress, the State, San Francisco and the counties through which it will pass have contributed liberally towards the construction of the road. The San Jose section

has also been liberally aided, and the Western Division will receive both Congressional and State aid.

4. *Sacramento Valley*—Sacramento to Folsom—opened through in 1856. This was the pioneer railroad of the State and has done well. In a short time it will have valuable tributaries in the Placerville and Washoe lines.

5. *Freeport*—is a line of 9 miles in length, extending from Freeport on the Sacramento River, and forming a junction with the valley line (to which it is leased,) 7 miles east of Sacramento City.

Placerville and Sacramento Valley—was opened in August, 1864, from Folsom to Latrobe 15 miles, and will be completed to Shingle Spring, 11 miles further in May, and to Placerville 9 miles early in 1856. The finished portion is operated in connection with the valley line.

7. *San Francisco and Washoe*—is a recent organization, and will extend from Placerville to the Washoe silver mines by way of the south fork of the American River and Johnson's Pass. The surveys have been completed and the route found to be favorable, with a maximum grade of 95 feet to the mile. It will cost including equipment, etc., $7,015,568, or $76,255 per mile.

8. *California Central*—Folsom to Maryville—commenced in 1858 and completed to Lincoln 18 miles in the summer of 1863, and recently to Marysville. It is one of the most important lines in California, and the first link of the railroad projected to Oregon and the Columbia River.

9. *Northern California*—Marysville to Oroville, and the next link of the line towards Oregon was completed in February, 1864. It affords in its present condition an outlet for the traffic of Plumas, Lassen and Sierra counties, and accommodates travel into the Humboldt mines in Nevada.

10. *California and Oregon*—Marysville to the Columbia River—passing through the Willamette Valley, a length of about 650 miles. Of course this is as yet only a project, but one that the next ten years will probably see realized. Col. Barry's report of the survey recently issued gives a good account of the route, and the resources of the countries through which it is intended to carry the road.

11. *San Francisco and Oakland*—finished in August, 1864. This road, about four miles long, extends from the end of a long wharf at Gibbons' Point in Alameda County, and on the Bay of San Francisco, through the City of Oakland to the village of Brooklyn on the San Antonio River. It connects with San Francisco by a steam ferry, where a covered wharf has been built for its accommodation at the corner of Pacific and Davis streets. The company is paying monthly dividends of one per cent. to the stockholders.

12. *San Francisco and Alameda*—is connected with San Francisco by a four mile steam ferry. The route commences at the extreme western point of the Encinal of Alameda, and runs through the towns of San Leandro and Hayward to Vallejo's Mills, where it is designed to connect with the Western Pacific Railroad. The road was opened about 5 miles on the 25th August, 1864, and will probably be opened to San Leandro in March, and to Hayward in June. This road gives an advantage of six miles over the Oakland road to San Jose, or the southern part of the Alameda Valley.

13. *San Francisco and Sacramento*—a projected air-line railroad from Benicia to Sacramento, and to connect at the first named place with steamers to San Francisco. Nothing has been done towards its construction.

14. Mission—
15. Market street—
16. South San Francisco— } are passenger railroads accommodating the city and vicinity of San Francisco.

Railroad Earnings--Monthly.

The earnings of the Chicago and Northwestern Railroad in Feb., 1865 were $481,164 67
Same period last year 317,839 43

Increase (51.38 per cent.) $163,325 24

The earnings of the Cleveland and Pittsburg Railroad for the month of Feb., 1865, were:

Freight	$103,000 00
Passengers	69,524 70
Miscellaneous	7,524 24
	$180,048 94
February, 1864	170,879 72
Increase	$9,169 22

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending Feb. 25, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$27,521 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	86,859 00
Total	$117,504 00
Corresponding week, 1864	107,191 00
Decrease	$10,313 00

The earnings of the Marietta and Cincinnati Railroad for the 4th week in February:

	1865.	1864.
Passengers	$12,918 49	$12,003 99
Freight	12,856 55	13,147 43
Mail, express & telegraph	1,267 10	940 37
Total	$26,542 14	$26,091 79
Total this month to date	$86,626 94	$77,873 61
Total for the fiscal year, commencing 1st Jan...	184,739*14	142,680 01

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending February 28th, were:

	1865.	1864.
Passengers	$2,799 36	$2,847 28
Freight	5,608 57	6,503 78
Express	282 80	104 16
Mails	296 58	296 58
Total	$8,987 31	$9,751 80

Receipts from January 1 to Feb. 28:

1865	$80,981 05
1864	64,279 18
Increase	$16,701 87

Quicksilver Mining Company.

The New Almaden Quicksilver Company are advised, by mail and telegraph from California, of the product of their mines in January and February. The figures are much larger than last winter's successful operations:

	1865. Flasks.	1864. Flasks.
January	3,768	2,605
February	3,600	2,050
Total flasks	7,368	4,655
Gold value	$294,720	$186,200

Cincinnati City Passenger Railroads.

As a proof that street railways do not pay in every locality, if indeed they do in any at the present high cost of operating, we may cite those of Cincinnati. These companies are taxed one cent for each passenger carried, are compelled to pay $25 per car per annum for each car used, and to keep all the streets through which their tracks run in repair. They are now asking permission to advance their fare one cent. They make the following exhibit:

During the seven months ending Dec. 31, 1864, the Passenger and City Passenger Companies earned $100,474 81. The expenses in the same time were $102,252 36, showing an excess of expenditures over receipts of $1,777 55. The expenses are made up as follows:

For feed	$28,770 18
Stable labor and expenses	9,836 06
Conductors	9,694 49
Drivers	9,742 48
Taxes	3,605 46
Smith shop	3,731 60
Legal expenses	1,975 00
Insurance	857 45
Transportation incidentals	1,408 03
Salaries of officers	2,939 16
Horses	2,554 75
Car washing	398 00
Labor, repairing track and materials	8,713 43
Car repairs	10,228 80
Building repairs	1,811 09
Rent	780 15
Gas and oil	600 16
Car license	720 00
Harness and repairs	1,589 01
Stationery and printing	591 49
Damages	1,706 62
Total	$102,252 36

The Cincinnati Street Railroad Company earned during the year ending Dec. 31st, $93,993 44. Its expenses the same time were $95,712 08, showing a net loss of $1,718 64. The expenditures were as follows:

For wages—conductors, drivers, etc.	$19,257 75
Labor, repairing track and materials	6 105 25
Car repairs	6,758 44
Building repairs	30 00
Stable, labor, and expenses	9,070 53
Feed	26,767 88
Smith shop	3,018 89
Horses	7,657 50
Harness and repairs	1,491 00
Salaries of officers	2,377 85
Taxes	3,945 16
Rent	3,407 75
Transportation—incidentals	1,886 80
Damages	749 80
Legal expenses	2,163 11
Insurance	195 05
Gas and oil	824 42
Total	$95,712 08

Junction and Breakwater Railroad.

A bill has passed the Senate of Delaware providing for the issuing of State bonds to the amount of $400,000 in aid of this work, $88,000 worth of which are to be delivered to the directors of the company as soon as $50,000 worth of stock has been subscribed, and similar amounts of bonds for each $50,000 worth of stock until $200,000 in stock has been taken and bonds issued to the amount of $352,000. The residue of the $400,000 worth of bonds (48,000) to be retained by the State Treasurer, and to be by him sold to pay the interest on the whole for two years, at the end of which time the company is to be taxed so much per cent. on passengers and freight as will pay the interest.

Massachusetts Horse Railroads.

Statement of the condition of the horse railroads of Massachusetts, and their operations in 1864, compiled from the last annual returns of the different corporations:

Capital stock	$4,013,000
Capital paid in	3,757,903
Cost of roads and equipment	4,312,494
Total length of track (includ'g branches) in miles	141
Total income in 1864	$1,482,940
Working expenses	1,407,673
Net earnings	75,247
Interest paid	29,780
Number of passengers carried	27,070,624
Number of horses owned	2,059
Cost of horses	$259,536
Number of cars	343
Number of conductors employed	257
Number of drivers	261
Total number of employes	1,141

Northern Wisconsin Railroad.

The bill incorporating the Northern Wisconsin Railroad Company, authorizes it to construct and operate lines of roads over the following routes. 1. Beginning in the city of Milwaukee, or on the line of the La Crosse road, within five miles of that city, and running thence by way of Cedarsburg and West Bend to Fond du Lac, and thence in a northwesterly direction to Bayfield and Superior; 2. Beginning at the point on the route first described, at or near Cedarsburg, and running thence *via* the city of Sheboygan and the city of Manitowoc, to Green Bay. When twenty miles of any portion of the land grant route between Fond du Lac and Superior is completed, and the fact has been properly certified to, patents shall be executed and an equivalent proportion of the land grant vest in the railway company. The company must commence the construction of the road within two years from the passage of the act, and complete it within ten years.

☞ The Pittsburg *Chronicle* says that the difficulties at present in the way of furnishing sufficient oil and coal transportation, from Venango, Lawrence, Mercer and Butler counties, is hastening the construction of the New Castle and Franklin Railroad, and the company are now offering their coupon bonds to the public to raise funds for the completion of the enterprise.

☞ At the annual election of officers of the Dubuque and Sioux City Railroad Company, Jas. Robb, Esq., was chosen President, and Mr. Platt Smith, Vice President.

RAILROAD IRON.

THE UNDERSIGNED, Agents for the manufacturers, are prepared to contract for the delivery of rails of best English make, either f.o.b. in Wales, or ex-ship at ports in the United States.

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.....$1,000,000.

DESIGNATED DEPOSITORY of the UNITED STATES

AND AUTHORIZED AGENT OF THE TREASURY.

No. 5 NASSAU ST., Feb. 17, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, together with a portion of their correspondents, being persons of well-known standing and large pecuniary means, have become the owners of most of its Capital Stock, and assume its control and management, Mr. C. V. CULVER retaining all his interest, and accepting the Vice-Presidency.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents.

J. F. D. LANIER, President.
C. N. JORDAN, Cashier. 3m 8

American Railroad Journal.

New York, Saturday, March 18, 1865.

The San Francisco and Washoe Railroad.

The people of California are making every possible exertion to connect themselves by railroad with the new territories and States eastward. The present project is the construction of a railroad, crossing the Sierra Nevada Mountains from Placerville to the eastern boundary of the State on the line of business between San Francisco and the silver mines of Nevada. We are indebted to the considerate politeness of Francis A. Bishop, Esq., the Chief Engineer of the road for a copy of his report to the President and Directors; from which we are enabled to gather the following facts, as regards route, extent, and cost of construction. Not having any guide in the shape of maps, beyond those found in the ordinary atlases, and these not very minute, we are not able to be as clear in our abstract as we wish.

The line appears to be laid down in four divisions.

The 1st from Placerville to Long Canon—of a length of 19.13 miles; 2d from Long Canon to Alder Creek, 19.18 miles; 3d from Alder Creek to Strawberry, 28.3 miles; 4th from Strawberry to State Line, 25.31.

The estimated cost of each division, for graduation, masonry and bridging, is as follows:

1st Division	$1,119,927 00
2d Division	1,129,782 25
3d Division	1,203,273 50
4th Division	715,711 73

To these sums must be added the average cost per mile of superstructure, $11,609 70.

The buildings and fixtures are estimated to cost $169,000; equipment, $872,250.

Should the line be extended from the State boundary to the divide between Carson and Washoe Valleys 29 miles, it is calculated that the cost at $59,000 per mile will be $1,711,000.

So that the cost of the road to the State boundary will be in the total, $7,015,568 92, and is extended $8,726,568 92.

The route proposed has not been slightly examined. The State surveyor many years since under an act of the California Legislature passed in 1854–'55, instituted surveys as to the four principal passes, through which a wagon road might be carried, viz., the Calaveras, Henness, Beckwourth and Placerville. The reports were submitted to a State board of commissioners, and the Placerville route was unanimously adopted, and the practicability of its adaptation to railway purposes became very soon considered.

The circumstances which notwithstanding led to the present location of the Pacific Railroad across the Sierra Nevada, are explained by the fact, that until the year 1862 positive information had not been obtained in regard to the Placerville route. This is presented on the present occasion as having superior advantages for the following reasons.

The use of tunnels in various parts of the route is not uncommon, and in this case offer the opportunity from natural facilities for easy construction, and they will give a line free from heavy snow, and the expense of clearing it from the track. That a line may be carried directly over the summit and by descending into Lake Valley can connect again with the tunnel line. That by extending the line through Luther's Pass in the eastern range and down Carson Canon, only one summit will be crossed.

The advantages claimed for a line of railroad on this route over *all* others yet reported, and which the information substantiates, are, *cheapness in first cost of construction, lighter gradients, easier curves, less snow line,* and *less depth of snow;* its general directness to Virginia City, and its location in the great channel of trade between California and Nevada.

The general topography of the location is thus given in the report of Mr. Bishop:

The South Fork of the American River rises in the Sierra Nevada Mountains, latitude thirty-eight degrees fifty minutes north, and pursues a general westerly direction until its waters unite with those of the Sacramento River at Sacramento. The source of the most easterly branch of the South Fork, at the head of which the summit line is carried, is a little south of Johnson's Pass, having an altitude of seven thousand three hundred and seventy-three feet above the sea. The Slippery Ford branch of this stream enters it about six miles west of Johnson's Pass at Slippery Ford. Taking its head in the sierra about six or eight miles northwesterly from its confluence, it runs nearly parallel with the axis of the range, and splitting it and running through a deep and narrow gorge, for part of the distance, it leaves the higher peaks to the west; while on the east, between it and Lake Bigler, or Tahoe, is the main divide much lower and broken.

On the east side of the divide, four or five miles northerly from Slippery Ford, a stream rises which flows into Fallen Leaf Lake, and from thence into Lake Tahoe, at its southwestern extremity. This stream, flowing through a gorge similar to the Slippery Ford branch of the American, cuts the eastern base of the mountain very deeply, and at right angles with it, making the main ridge very narrow between the two streams.

Lake Valley, which lies east of the sources of the South Fork, is inclosed by a short range of mountains, which runs between it and Carson Valley. This range diverges from the main chain in the vicinity of the old Carson Pass, bearing to the east and north until it reaches the Truckee River. This stream, being the outlet of Lake Tahoe, flows from the west side, about two-thirds of the length of the lake from the south end, breaks its way through a chain of mountains, in a northwesterly and northerly direction, for about fifteen miles, then running northeasterly for about the same distance, it finally changes its course to the east, and enters the Great Basin.

The general altitude of the range between Carson and Lake Valleys seems to be as high as the main range. Its crest, however, is pierced by several low gaps, the lowest of which is called the Walton Pass—having an altitude of seven thousand and fifteen feet.

Southeasterly from Johnson's Pass, about eight

miles distant, and east of the range already described, is Hope Valley.

In this valley and near the old Carson Pass, the west fork of Carson River takes its rise. This stream, after leaving the valley, flows in an easterly direction until it enters Carson Valley, then, changing to the north, bisects the valley for its entire length, and piercing a low mountain range, turns to the east again and finally sinks in the sands of the Great Basin.

The east fork of the Carson takes its rise in the main sierra to the south of Hope Valley, flows in nearly the same general direction until it converges and unites with the west branch opposite Van Sickles and the eastern terminus of the Kingsbury Toll road.

Between these streams is an extensive mining district, familiarly known as "The Silver Mountain."

The divide between the Consumnes and American Rivers, upon which the line has been located, presents some peculiarities which require notice.

This ridge, extending from the summit of the sierra to Sutterville on the Sacramento River, maintains a very high elevation westward as far as Iron Mountain. Here a deep depression occurs, in which the Fleming and Ogilby toll roads join; one descending to Pleasant Valley, and the other running eastward into the valley of the south fork. About one mile further west of the junction, is the Union House. At this place Weber Creek takes its rise, and flows westwardly for nearly thirty miles parallel with the south fork, and generally about four miles distant from that stream, until it intersects it at one of its large bends, eight or ten miles above Folsom.

Weber Creek, as will be observed, splits the main ridge for some distance, making a long, narrow spur of the portion between it and the south fork. This spur attains considerable altitude west of the Union House; but, in a short distance, falls again and descends, with a very uniform elevation, to Placerville.

The main divide descends from the Union House to Pleasant Valley, ten miles, quite rapidly; but from there to Diamond Springs, nine miles distant, the descent is more gradual.

The Placerville and Sacramento Valley Railroad is located on the main ridge up to a point near Diamond Springs; it then turns in a northerly direction, crosses Weber Creek, and reaches Placerville.

Were it possible, the trunk line of railroad should be located along the main ridge. The reasons for leaving it at Diamond Springs, briefly stated, are:

The elevation of the divide at the junction of the toll roads near the Union House, a point which it is necessary to reach in order to gain the slope leading to the south fork of the American River, is four thousand one hundred feet. The elevation at Diamond Springs, nineteen miles distant, is one thousand eight hundred and seventy-five feet. It is then seen that an altitude of two thousand two hundred and twenty-five feet would have to be overcome in a distance of nineteen miles. The distance would probably be increased by following closely the sinuosities of the ridge; but it is found that the altitude of Pleasant Valley, on the summit of the ridge and nearly midway between Diamond Springs and the junction of the toll roads, is but two thousand five hundred and twenty-five feet, which shows that a uniform grade along the ridge cannot be maintained, and that from Pleasant Valley to the junction, a grade of one hundred and fifty-seven feet to the mile would be required.

A more particular description is deemed unnecessary, as it could not be easily understood by the reader without having a map of the survey before him. The grades are heavy, but by no means unusual or impracticable. They differ from 95 to 15 feet per mile, and the heaviest grades are on the longest lines.

The tunnels on the summit lines are short, and will from the character of the rock formation require neither shafting nor lining. There are 9 in the 1st division; 9 in the 2d, and 4 in the 3d; and the longest in this division is but 1,780 feet in extent; in the 4th 1. The whole length of these is 9,752 feet, which will cost $86.42 per lineal foot. The trestle bridges are generally designed only for temporary use, and there is abundant timber near by for their construction of the best quality. The location beyond the State line is declared to be easy. With regard to the business of the road, the report concludes as follows:

The nature and extent of the traffic between California and Nevada is well known. Statistics concerning it have been so frequently published that I deem it unnecessary to enter into an elaborate estimate of the amount of business which will be done by your road. It is sufficient to say that careful estimates show that the earnings would be very large, and will return a liberal interest on the capital invested.

Monongahela Valley Railroad.

The act incorporating the Monongahela Valley railroad company, with a capital of $2,000,000, authorizes them to construct a road from Pittsburg to Brownsville, and to connect with any railroad the construction of which has been authorized by the State of West Virginia. The corporation also has power to build or lease any road necessary to connect their line with any other line in Pennsylvania, Maryland or West Virginia. They can also build roads from their main line to any of the coal fields in the Valley of the Monongahela, and can purchase or lease the powers or franchises of the Hempfield Company, and also purchase and hold all the real and personal estate of the Monongahela Slackwater Company with all its franchises and powers.

Western (Mass.) Railroad.

The receipts and expenditures of this road for the years ending November 30, 1863 and 1864, have been as follows:

Receipts:	1863.	1864.
From passengers....	$887,610 50	$1,143,318 31
" freight.....	1,479,874 21	1,739,796 12
" mails, etc.....	118,227 43	111,884 31
	$2,435,712 14	$2,994,998 74
Expenses, viz:		
Repairs of roadway..	$314,106 27	$388,682 91
" engines...	92,922 23	149,705 34
" cars.....	163,544 37	234,575 78
" buildings, ferry, etc.	49,789 50	86,419 75
Transportation exp..	565,153 37	928,119 22
General expenses ...	21,491 16	30,638 76
	$1,207,006 90	$1,818,141 71
Net income	$1,228,705 24	$1,176,857 03
Add gain on P. and N. A. R. R.....		1,855 03
		$1,178,712 06
From this deduct—		
Interest on state loans and exchanges	$544,103 43	
One per cent to sinking funds	50,000 00	
Ten per cent. dividends.	515,000 00	
Excise tax on dividends	25,750 00	
		1,134,853 43
Surplus carried to contingent fund..		$43,858 63
Add balance of do. Nov. 30, 1863...		819,368 49
Total contingent fund Nov. 30, 1864		$863,227 12

Compared with 1863 the gross receipts show an increase of $559,286 60, with an increase in expenses of $611,134 81—making the decrease in net earnings $51,848 21.

The receipts of the Pittsfield and North Adams Railroad were $88,128 58; and the expenses, $49,023 55—leaving net earnings, $34,105 03. Two dividends of three per cent. each, amounting to $27,000 were paid, and the balance, $7,105 03, less $5,250 used to pay state tax, was carried to Western Railroad account as above.

The securities in the sinking funds have been examined by the committee, and amounted on the thirtieth of November to $3,153,046 52. These figures do not fairly represent the net increase of the Massachusetts fund during the past year, because the Sterling Bonds purchased in 1863, but added to the fund and paid for this year, are put in at their par value, while the income of the fund is charged with the exchange thereon, and the net gain, though apparently smaller than in some former years, has really been larger, continuing the ratio of increase which has been regularly maintained from year to year. In this connection it is proper to say that the exchange on remittances to pay the interest on the Sterling Bonds still outstanding, is paid from the earnings of the road, and amounted the last year to about $100,000 over 1863, and to about $200,000 more than was paid before the suspension of specie payments, so that at present the fund is in no way affected by the high rate of exchange.

It will be remarked, notwithstanding the large increase of gross receipts, derived mainly from an increase of business, that the increased expenses exceed the increased receipts, and the net income is smaller than in the preceding year. In our anxiety to keep the rates of transportation as low as possible without omitting any expenditure required to keep the roadway and rolling stock in a condition to insure safety, we have nearly exhausted the advantage of the low cost of materials which were on hand at the commencement of the year. Deprived now of this advantage, with wages largely advanced, it is apparent that while the present high prices last the expenses of operating the road must be largely increased, and can only be met by a corresponding increase in the rates of transportation.

In consequence of the scarcity of labor and high cost of iron, the construction of the second track has been suspended for the last two years. There are indications that it may not be as difficult to obtain laborers in the coming season, and should this anticipation be realized, we submit that the work shall be resumed.

The bridge at Albany has been commenced, and it is confidently believed will be ready for use before the close of the next summer. The foundations for the piers in the main channel of the river are all in, and the masonry nearly completed. The materials for the superstructure are already purchased and await the completion of the masonry to be put in place.

The propriety of increasing the capital stock of the corporation for the purpose of providing for the completion of the remaining forty miles of second track, to pay the assessments upon the bridge stock owned by this corporation, and the expense attending a change of our depot accommodations at East Albany, with the erection of proper accommodations in the city of Albany as also to cover the cost of the Hudson and Boston Road, is submitted to the consideration of the stockholders.

At the last annual meeting, upon a statement of the Directors then submitted, the committee appointed February 11, 1863, "to confer with the committee of the Worcester Road to agree upon terms, obtain the necessary legislation, and report a plan of consolidation," were empowered, if after consultation with the Worcester committee they should deem it advisable, to abandon further efforts to obtain the proposed union. Upon consultation, both committees decided that the interest of the parties and the public required that the application then pending before the Legislature for leave to unite should be persisted in. No similar application had ever been refused. The stockholders of both roads, in November, 1863, at

special meetings notified for that purpose, had by large majorities instructed the committees to proceed, and the officers of each were instructed to petition for an act of consideration, and to promote the work of the committees.

A hearing was accordingly had before a Legislative committee, under the management of the two committees to the stockholders, and counsel employed by them. The whole matter was ably and fully presented. The legislative action however was unfavorable, and a bill authorizing the union, subject to the approval of the two corporations, at meetings specially called after full notice of the terms which might be agreed on, was defeated in the House of Representatives. At the hearing, the Directors and Officers of this corporation were present, rendered such assistance as was requested, and presented facts and reasons which favored the granting of the application. It is understood that the committees of the two roads had so far progressed as to be able to agree upon the basis of union, but no information whatever, so far as we know has ever been directly or indirectly communicated to any one of any plan or terms agreed upon. In promoting this project therefore as we have, in unequivocal good faith, and in obedience to instructions, we could not, it is plain, have been influenced by considerations of pecuniary advantage to our stockholders. On the contrary we have been solely actuated by a desire to remove a great obstacle to the efficient usefulness of a great line of transportation.

In the developements of projects affecting the business of this line and the state already entered upon, the time may come when there will be no divided counsels in the management of the Worcester, or difference of opinion in the cities and towns on this line as to the necessity of this measure. Until then we must either submit with patience to see our traffic fixed and embarrassed by the anomaly of one continuous line between two important commercial points, under the control of two independent corporations, or seek such other access to Boston as may seem practicable.

While we regret that no immediate relief can be expected by this consolidation, we are persuaded that every delay will enhance the relative value of the Western Road, and perhaps secure for us better terms than would be likely in the peculiar state of affairs to be now awarded to us.

The equipment of the road consists of 20 passenger and 55 freight locomotives; 40 first class and 6 second class passenger cars; 12 baggage, 841 box, 306 platform, 62 gravel and 46 hand cars. Also 54-234ths of 23 passenger and 11 baggage cars of the New York and Boston Express Line.

The number of miles run by locomotives with passenger trains was 416,443; with freight trains, 966,507; with other trains, 47,273—total miles run 1,430,223, an increase over the previous year of 154,304.

The number of passengers carried was 936,715; of which 73,965 were through, and 862,750 way passengers. Of the through passengers, 71,195 were 1st class, and 2,771 2nd class. Of the way passengers 851,729 were first class and 11,021 2nd class. The whole number of first class passengers was 922,924; second class 13,791. The passenger traffic shows an increase of 226,258.

The number of tons of merchandise moved was 682,860; of which 510,660 were carried east, and 172,200 west. The through tonnage eastward amounted to 116,288; do., westward, 27,256. All other tonnage eastward, 394,372; do., westward, 144,944. Equivalent number of tons carried one mile, 57,749,666—equal to 870,190 tons carried over the whole road. The increase in merchandize traffic over 1863 was 25,263, and over 1862 36,894.

An aggregate of 99,792,986 passengers or tons of freight carried one mile in 1864, against 80,758,268 passengers or tons of freight carried one mile in 1863.

The cost of transportation for each passenger and each ton of freight one mile has been 1.822 cent, against 1.407 cent in 1863; or assuming the cost of transporting each ton of freight to equal the cost of two passengers the same distance, we find the cost this year to be 1.154 cent per passenger, and 2.308 cent per ton for freight, against 0.865 cent per passenger, and 1.730 cent per ton for freight per mile in 1863.

The cost of the Western, Albany and West Stockbridge, and Hudson and Boston Railroads to November 30, 1864, has been as follows:

Western Railroad		$7,581,945 24
Equipment		1,095,712 97
Albany and West Stockbridge R. R.		2,388,359 22
Hudson and Boston Railroad		192,638 98
West Stockbridge Railroad stock		13,000 00
		$11,271,656 41

The means provided for the construction and equipment of the same has been as follows:

Capital stock	$5,150,000 00	
Sterling bonds	4,319,520 00	
Albany city bonds	1,000,000 00	
Total means	$10,469,520 00	
Amount paid sink'g funds	459,578 62	
	$10,009,941 38	
Dollar bonds	950,000 00	
		10,959,941 38
Balance expended more than realized from construction funds		$311,715 03

BALANCE SHEET FOR 1864.

Cost of road and equipment		$11,271,656 41
Hudson River Bridge stock		100,800 00
Notes receivable		75,250 00
U. S. debt securities		36,000 00
Materials		290,131 24
Cash		270,725 72
Due from individuals and corporations		154,604 05
Commissioners of Massachusetts sinking fund	$2,255,961 69	
Trustees of Albany sinking fund	897,084 83	
		3,153,046 52
		$15,352,213 94
Capital stock, 51,500 shares		$5,150,000 00
£899,900 sterling bonds	$4,319,520	
Albany city bonds	1,000,000	
Dollar bonds	950,000	
		6,269,520 00
Unclaimed dividends and interest		15,720 81
Dividend No. 41		270,375 00
Interest accrued not due		70,496 00
Due individuals and corporations		13,573 77
Accumulated sinking fund profits	$2,699,301 24	
Contingent fund	863,227 12	
		3,562,528 36
		$15,352,213 94

Illinois Central Relief Club.

We have received the third annual report of this association, the special object of which is the relief of persons connected with the Illinois Central Railroad Company and their families. The management is chiefly in the hands of the wives of the officers of the road, and is an efficient one. It appears that during the past year the applications for relief numbered 1,069, that it is promptly and liberally afforded, that the association is well sustained in means, and that it has produced the happiest effects. Our readers will remember that we have warmly encouraged the plan of these associations, and we trust the example furnished by the Illinois Relief Club, will be imitated more generally in this part of the country than it has been.

Pittsburg and Connellsville Railroad.

An ordinance has passed both branches of the Baltimore City Council repealing the 3d section of ordinance No. 29, approved June 10, 1856, having reference to the guarantee by the city of one million of dollars of the bonds of the Pittsburg and Connellsville Railroad Company. The guarantee was made under certain conditions, which have not yet been complied with. The section repealed enacts that "whenever the said commissioners (of finance of Baltimore) shall be satisfied that the said railroad company can borrow from other sources the whole sum necessary to complete and equip the whole line of said road from Cumberland to Pittsburg, after the expenditure of the means now possessed, or which may hereafter be acquired by said company, upon the security of a first mortgage upon the property of said company, and can arrange that the city of Baltimore, as second mortgagee, shall have priority over all other claimants, against the property of said company, except the first mortgagee, the said commissioners shall certify the same to the mayor of the city of Baltimore, and then the mayor shall be and he is hereby authorized to execute to the lenders of said money a deed giving priority to the mortgage to the lenders of said money over the mortgage to the city of Baltimore." The effect of this repealing ordinance is to make the city a first instead of a second mortgagee on the road.

Contract of Sale.—What is Sufficient to Vest Title in Purchaser.—Misdelivery by Carrier.—Conversion, Dutiable Goods.—Arrangement, Authority of Agent.

The late case of Claflin, and another against The Boston and Lowell Railroad Company, in the Superior Court of Suffolk County, Massachusetts, was an action brought by the plaintiff against the defendants for the conversion of fifty-one puncheons of gas tar, or dead oil.

On the trial in that Court, the plaintiffs, who were partners under the firm of the Newton Oil Company, in order to show title, introduced in evidence a broker's sale note, as follows:

"Sold on account of W. L. Rose, & Co., to the Newton Oil Co. of Boston, Mass., from eight to ten thousand gallons (more or less) dead oil, as per sample, at seven cents per gallon, packages included, delivered in Boston. Terms, cash in ten days after delivery. George Tebern, Broker, 154 Water street, New York, October 21, 1862." Inclosed, "Accepted, W. L. Rose, & Co."

Subsequently the plaintiffs received from said W. L. Ross, & Co., the following papers:

"The Champlain and St. Lawrence Railroad will please receive from James B. Cowan, in good order and forward in like good order and condition, to Messrs. W. L. Rose, & Co., of Boston, the within packages, marked and numbered W. L. R., & Co., as per margin. Thirty-one pun. gas tar. "Received the above thirty-one packages in good order. Wm. Duncan, Montreal, 12 Nov., 1862." On the back of said paper was written, "Deliver the within to the order of Mr. J. P. Bridge.

W. L. Rose, & Co."

The plaintiff also introduced in evidence a similar paper, dated Montreal, November 4, 1862, inclosed in the same manner, for twenty puncheons. Bridge was one of the plaintiffs, and was their agent.

The plaintiffs also offered in evidence two other papers headed thus: "Merchandise transported by Trustees First Mortgage Bonds, Vermont Central Railroad Co., from West Alburgh (Alburugh) to Boston," dated respectively, November 12th and November 18th 1862, for thirty-one and twenty pucheons respectively, the former consigned to W. L. Rose, & Co., and the latter to W. L. Rose, & Co., care of A. Cushman. A draft of W. L Rose, & Co., on account of the dead oil, drawn at the same time that the other paper was sent by W. L. Rose, & Co., to the plaintiffs, was paid by the latter.

It appeared that whenever dutiable freight came from Canada, over the line of roads of which the defendant's road was a portion, an arrangement was made by which it came in bond, and those transmitting it made arrangements with Albert Cushman, to see that the duties were paid at the custom house, and it was the practice of the road to deliver such freight only to the order of said Cushman, the same being sometimes directed to the care of said Cushman, and sometimes not, and being distinguished from other freight by being marked upon the way—bills, "in bond."

The merchandize which is the subject of this suit was demanded of the defendants, but the evidence was conflicting whether such demand was made before or after the delivery as hereafter stated. There was evidence tending to show hat Samuel Page & Sons, purchased and received delivery of it of the said James B. Cowan, at Montreal, before October 21st 1862, and the defendants delivered the oil to him, upon the order of said Cushman. There was no such firm as W. L, Rose, & Co., in Boston, and the evidence tended to show that the defendants and Cushman endeavored to find such parties unsuccessfully, and, as Messrs. Page & Sons had received similar freight and were expecting more, Cushman concluded that the property belonged to them, and ordered it to be delivered to them, and it was so delivered. Cushman was agent of the Vermont Central Railroad Company, having general agency of freight through the continuous line of roads; and he testified that his duties, as to goods in bond had no connection with his agency, and that the same duty is now performed by one who has no connection with the road.

The case was submitted to the jury with instructions, which were not objected to, that, if the oil had been sold and delivered to Messrs. Page & Sons in Montreal, the verdict should be for the defendants; but if not, that the jury, should be authorized to find for the plaintiffs, and the value of the two different parcels was found separately.

The defendants claimed that, upon the papers introduced in evidence, there was no such delivery to or title in the plaintiffs as to authorize them to maintain an action against the defendants; and if there were such title, a delivery to the order of Cushman was a defence to the claim for both parcels, or if not for both parcels, at least for that lot which came addressed to the care of said Cushman; but the judge ruled otherwise.

Page & Sons, paid the duties and freight, but the plaintiffs were ready to pay the same upon delivery of the property to them.

The jury returned a verdict for the plaintiffs; and the case was reported for the determination of the Supreme Judicial Court of that State.

Hoar, J.—1. The first objection made to the plaintiff's recovery is, that the property in the oil never vested in them. The evidence showed that the plaintiffs agreed to buy a quantity of oil, not precisely determined, but within certain limits, at a price fixed, to be delivered in Boston; and the owners of the oil agreed to sell it to them. The specific quantity not being settled, nor the oil itself separated and distinguished, this did not constitute a complete sale, but only a contract to sell. But in pursuance of this contract the owners of the oil sent a quantity by railroad to Boston, consigned to themselves a part of it being also directed to the care of A. Cushman. They notified the plaintiffs that they had sent it, and gave an order for its delivery to the order of one of them, and the plaintiffs paid for it. There was thus an agreement of the parties that this oil should be the property of the plaintiffs; it was sent to the place at which by the contract, it was to be delivered; and the order upon the freight bill entitled the plaintiffs to the possession. Nothing more was to be done by the venders. They had made the delivery which the contract required; and we can have no doubt that it completed the sale, and vested the property in the venders.

2. If the defendants delivered the oil to a person who had no right to receive it, and thus put it out of their power to deliver it to the consignee or owner, this was in itself a conversion, and the plaintiffs can maintain an action to recover its value. Devereux *vs.* Barclay, 2 B. & Ald. 704.

3. The marking of the oil to the care of A. Cushman, and the custom to deliver goods thus marked only to his order, did not justify the defendants in delivering the oil to a person who was not the owner or consignee although Cushman ordered it to be done. The evidence showed that goods were marked to his care in order that he might attend to the payment of duties, and not allow them to be delivered until the duties were paid; and it did not show that he had any general charge or consignment of the goods, such as to authorize him to dispose of them or change their destination. The oil was sent to the consignees, "to the care" of Cushman; only that Cushman might see to the discharge of the custom-house requirements, and permit the delivery when these should be complied with, and it appears that this limited authority was known to the defendants, both from the nature of his employment, and from their own action in the premises. The defendants as well as Cushman, endeavored to find the consignees; and the oil was delivered to Page & Sons from the mistaken supposition that they owned it, and not from any idea that Cushman had any discretion to exercise in regard to its disposal.

There must therefore be judgment on the verdict.

Judgment for the plaintiffs accordingly.

Huntingdon and Broad Top Mountain Railroad and Coal Company.

The receipts and expenses of this company for the years 1863 and 1864, have been as follows:

Receipts:	1863.	1864.
From freights on coal ..	$181,566 65	$300,043 82
From merchandize and other freights.....	16,681 45	23,698 55
From passengers.....	17,354 64	32,749 22
From rent of mines and houses.....	8,869 04	11,155 75
From mail and express .	2,106 66	2,433 00
From miscellaneous	678 45	2,619 18
	$227,256 89	$372,699 02
Expenses, viz:		
For motive power.....	$46,885 94	$92,948 28
For maintenance of way	49,092 39	63,403 34
For maintenance of cars	5,564 80	10,929 31
For conducting transportation	27,171 93	44,296 55
For mainten'ce of mines	860 63	257 29
For office expenses, etc.	5,761 22	10,022 48
	$135,286 41	$221,407 25
Net earnings	$91,970 48	$151,291 77

The increase in gross earnings has been $145,-442 13; in expenses, $86,120 84; and in net earnings, $59,321 29.

The shipments of coal from the opening of the road to December 31, 1864, have been as follows:

	Tons.		Tons.
1856	42,857	1861	272,625
1857	78,812	1862	334,135
1858	105,717	1863	305,678
1859	130,595	1864	386,645
1860	187,853		

Total to December 31, 1864 1,844,917

The merchandize and miscellaneous tonnage in 1862 was 6,497; in 1863, 10,902; in 1864, 13,479. The total tonnage in 1864 was 400,124, showing an increase over the previous year of 83,544. The company have 16 engines.

The number of passengers carried in 1863, was 27,287; in 1864, 49,018—increase 21,726.

The road is 31 miles in length, extending from

Huntingdon to Hopewell; sidings 6 miles. Shoup's Run Branch, 9½ miles; sidings, 3 miles. Six Mile Run Branch, 4¼ miles; sidings, 2 miles; Sandy Run Branch, 1 mile; sidings, ¼ mile. Bedford Railroad, 13 miles; sidings, ¼ mile—total, 70¼ miles.

The enlargement of the Pennsylvania Canal, now in progress, and which will probably be completed to Huntingdon by the spring of 1866, will materially increase the business of the company.

During the past year 354 tons of new rails, 638 chairs, and 10,000 cross ties have been laid. During the coming year there will be required 20,000 cross ties; 400 tons of 60 lb. rails, and 1,600 wrought iron chairs.

The Bedford Railroad was completed to Bloody Run in July, 1863, and has since been extended to Mt. Dallas, its present terminus. This completes 13 of the 20 miles of road required to reach Bedford and its Mineral Springs.

In March, 1864, this company purchased all the liens upon the Bedford Railroad, and all the stock of that company, except a few hundred shares. At a meeting of the balance of the stockholders in June, the Bedford Railroad Company with all its franchises and corporate privileges, was merged into the Huntingdon and Broad Top Mountain Railroad and Coal Company, the terms of the merger being accepted by the latter on the 13th of September following. The cost of the road to this company has been about $70,000, and its purchase is likely to prove highly advantageous.

The company have during the year promptly met all their interest. In July they paid a dividend of 3½ per cent. on the preferred stock, and on the 2d of January declared another of same amount from the earnings of the last six months.

With a view to consolidate the mortgages of the company, and all their liabilities except the mine loan, into one mortgage, an act has been obtained from the legislature authorizing the creation of a mortgage of $1,500,000 with 30 years to run, to be a lien upon the entire railroad, including the Bedford road and its appurtenances; the bonds to bear 7 per cent. interest, payable half yearly, in April and October. This will make a lien of only about $25,000 per mile of road, independent of the sidings, stations, buildings and equipments, the latter alone being worth over $300,000. It is designed to set aside $1,000,000 of the bonds to be issued under this mortgage, for the redemption of the first and second mortgages now outstanding, and due in 1870 and 1875, or to exchange them for these at the option of the holders. Of the remainder, $173,000 will be applied to the redemption of the coupon certificates due in 1867; and the balance, $327,000, will be offered for sale. After the sale of these bonds and consolidation of the debt, the amount required for interest, and for a 7 per cent. dividend upon the stock will be as follows:

$1,500,000 mort. loan 7 per cent	$105,000
150,000 mine " "	10,500
190,750 preferred stock "	13,352
617,500 common " "	43,225
	$172,077

The half yearly sum necessary for this was exceeded by the earnings of the last six months. Allowing for the same rate of increase of net earnings the present year, as for the past, they will admit of a dividend on all the stock, and leave a large balance for contingent fund.

GENERAL STATEMENT.

London Coal Trade.

The quantity of coal imported into London by sea, railway, canal and road in 1863 and 1864, was as follows:

By sea.	1863. Tons.	1864. Tons.
From Newcastle	1,201,622	1,286,353
" Seaham	227,418	149,841
" Sunderland	988,109	903,721
" Middlesbro'	72,430	77,641
" Hartlepool	621,879	509,702
" Blyth	17,175	9,836
" Scotch	22,458	16,804
" Welch	104,513	92,467
" Yorkshire	88,115	26,640
" Duff	2.001	307
" Small	23,068	30,913
" Cinders	16,630	12,478
" Culm	266	
Total seaborne	3,335,174	3,116,703
By rail, canal and road	1,791,932	2,359,924
Total imports	5,127,106	5,476,427

The decrease of imports by sea in 1864 was 218,471 tons; and the increase by rail, canal and road 567,791 tons—making the net increase 349,320 tons.

The quantity of coal imported into the port or district of London, by sea, rail and canal, and afterwards exported coast-wise or to foreign parts, or sent beyond the limits of the London district, by rail or inland navigation, during the year 1864, was 756,467 tons; do., in 1863, 656,760 tons—showing an increase in 1864 of 99,707 tons.

☞ The deposits at the United States Mint for the month of February, 1865, were $473,114 58. The total gold coinage was $161,386 85. The total silver coinage was $453 27; and the copper $30,000. Total value $251,940 12.

Interest and Dividends.

The Germantown and Norristown Railroad Company have declared a semi-annual dividend of four per cent., clear of tax, payable April 1st.

The Harleigh Coal Company a dividend of two per cent, payable March 20.

The Potomac Coal Company a dividend of three per cent, payable April 1.

The Short Mountain Coal Company a dividend of 3 per cent, payable 20th inst.

The Franklin Mining Company a dividend of $3 per share, payable April 3.

The Silver Mining Company of San Francisco $8 per share.

The Pennsylvania Oil Creek Petroleum Company its fifth dividend, three per cent., payable April 1st.

The Philadelphia and Pittsburg Oil Company a dividend of four per cent., for January and February, payable March 15th.

The Columbia Oil Company a dividend of three per cent., payable on the 15th instant.

The Jersey Well Oil Company its second monthly dividend of three per cent., payable April 1st.

The Wallace Oil Company a dividend of one per cent., payable on the 23d instant.

The Mingo Oil Company a third dividend of two per cent., being twenty cents per share.

American Oil and Mining Company 1 per cent; Brooklyn Petroleum Company 2 per cent; Heydrick Oil Company 5 per cent; Everett Petroleum Company, 1 per cent; De Kalb Petroleum Company 1 per cent; United States Petroleum Company 5 per cent.

The Chesapeake Oil Company a third monthly dividend of two per cent, payable 17th instant.

Peat for Locomotives.

The Syracuse *Courier* says an experiment has been made with peat in a locomotive on the New York Central Railroad. The engine drew a car containing the superintendent and a number of gentlemen, twenty miles in forty-five minutes, without an attempt at making speed. The peat made a beautiful fire, throwing out immense heat, and burning with a steady flame. The steam was kept at even gauge of from ninety to one hundred pounds during the trial trip. The usual amount of fuel consumed by coal-burning engines is a ton to every twenty miles, but in this instance only half a ton was used, giving evidence of its value as a substitute for anthracite.

Rondout Valley Railroad.

The Albany *Journal* says that the company to construct a railroad from Rondout to Port Jervis has been regularly organized under the general State act, the necessary 10 per cent. of the requisite capital being paid in, the articles of association filed in the State Department and the needed certificate issued. The company will be ready to break ground as soon as the season opens. The precise line will be decided upon shortly.

Ship-building on the Lakes.

The tonnage of the Lakes, already over 600,000, tons is rapidly increasing. There were built last year in all the districts on the lakes, eighty-seven steamers, and one hundred sail vessels, with an aggregate burthen of 47,854. The greatest number were built at Cleveland, viz., twenty-six steamers and forty-one sail vessels; Buffalo, thirty-four steamers and seven sail; Chicago, thirteen steamers and two sail vessels.

American Railroad Journal.

Saturday, March 18, 1865.

Stock Exchange and Money Market.

There is a question now being raised as to the advantage or disadvantage of an early return to specie payments. Considering it in the latter aspect, we are pointed to the example of England which took twenty-four years to return to the metallic standard. We are also assured that great damage and loss would occur to holders of merchandise of every description, and manufacturers of all domestic goods, if there was a sudden redemption. We are of a different opinion as to the policy and the effects of it.

It is well known that immense fortunes have been made by houses that had their stocks on hand in any quantity, by the rise in price resulting from the war. Parties dealing in tens found themselves suddenly grown rich in a few months, and we may say every trader in the country made money in a similar way.

For four years while gold has been up and down, the prices of the necessaries of life have advanced, many of them maintaining the advance with great persistency. Articles have been retailed very generally at from 2 to 300 per cent. above former prices, and the consumers have had to pay these whether they liked it or not. The profit thus made, being realized in legal tenders, enabled these parties to discharge their former obligations, contracted when paper and specie were of the same value. Now these parties wish to have the consumers of the country, in other words, the masses, to give them time to make a little more. They would willingly wait twenty-four years longer with prices three times greater than the premium on gold, so that they might secure the advantages they have so long enjoyed from a depreciated currency and a fluctuating gold market.

We believe this unreasonable. But we think even this class is less in number than is supposed. We believe that they are not so numerous as they pretend to be. Any merchant who conducts his business on just principles has anticipated an early return to a specie basis, and has purchased accordingly. And it will be found that all such have kept their stocks low ready to meet a fall in prices. So too of the great manufacturing establishments. In the first place they have made unheard of profits in their business all through the war, but the most prudent have during the last year curtailed their operations, and proportioned the production of their fabrics to the demand for them. This class of persons is therefore prepared to come back to the old standards, while if it is understood that the policy of the Government and of the banks is to keep up an inflation of the currency, we shall for a long time be the victims of pute speculation. We cannot see therefore why there is any justice or even any reason for staving off the return to a sound currency against the interests and rights of the millions of consumers, in order that a certain class of producers shall continue to get whatever prices and profits they desire.

Again we doubt whether a return to specie payments would practically produce much injury even to these persons. The currency being reduced in quantity would have a purchaseable quality, expanding in power as it lost in inflation. It would buy just as much then as it did before in the shape of paper. Thus a paper dollar reduced to gold would then buy as much as two paper dollars now. We do not therefore see where the danger lurks.

As long as the war continues, and the Government is spending two millions a day, we can well see why a paper currency of large extent is indispensable to its success in obtaining loans, for the gold in circulation in this country added to that in Europe could not have been obtained in sufficient amounts to have sustained the war on our part for two years. But when the war is nearing its end, when our expenditures are about suddenly to fall off to a peace standard, currency may be dispensed with beyond the real wants of commerce and peace.

We therefore hope, that the opinions generally prevalent as to the intended policy of the new

Secretary may be correct. In a late letter from this gentleman, we have noticed that he is evidently disposed to move in the right direction. His principal object at present is to pay the army, and the creditors of the Government generally; he is desirous of having the 7-30's largely taken, and for a while held by capitalists so as not to load the market to the injury of the Government in obtaining additional subscriptions from other classes of citizens, and those precautions being adopted and successful, he expresses no fear for the future in regard to the National indebtedness. His hopeful anticipations are worthy of note, as a sounder, cooler and more experienced financier, according to his present reputation, was never at the head of the Treasury. The country also knows that this member of the Cabinet is entirely free from the ambition of being a future President, a novelty in these days of political intrigue and worthy of being recorded.

A pretty warm discussion is now being carried on in relation to the disposition of the cotton captured at Savannah. By some it is thought best to dispose of it here, and the reason alleged for this is, that the article is wanted for our own manufactories. Now we believe it would not be good policy for our manufacturers to absorb those 30 or 40,000 bales at present prices. It would at once subject them to loss from a fall, most sure to occur as we liberate the cotton States from their thraldom, and allow the large quantities still stored and secreted in the South to come into market. It would also array these manufacturers as a body against any reduction in our paper currency until they had secured their profits on their investment.

On the other hand, if the cotton is sent to England, it will be converted into gold, reduce the price of cotton fabrics, and cause large importations into this country at reduced prices, and so aid the revenue. At the same time the importation of the proceeds in coin would strengthen the ability of the Government to meet its interest in gold, which we are told by the same parties who are opposed to this last plan of disposing of the Savannah cotton, is likely to diminish. If they are sincere in this belief they should favor the sale of this cotton in Europe, and bringing back the proceeds to the Sub-Treasury. In addition to all this our friends on the continent who have nobly stood by American credit, notwithstanding the attempts of the British press to undermine it, will see how even the war is adding to our financial power, and the approach of peace is to bring back in this way the coin we have parted with. That our previous speculations on the consequences of our possession of cotton in quantities, have not been without appreciation abroad, we know from the circumstance, that a leading and widely circulating trade circular published in Birmingham, after quoting from us at some length, remarks that our predictions are "by no means comfortable tidings to our Liverpool friends," and that they "weigh like an incubus on the minds of the higher class of (British) capitalists at the present time." We shall, says the same Journal be compelled "*to replace back in the United States trade the 25 millions of capital we have withdrawn from it.*" This is a remarkable confession, and with it will come we hope a wiser policy in a quarter which has hitherto been strangely at fault. In confirmation of our general views on this subject, we have information of recent date from Washington, that the Secretary of the Treasury has expressed the opinion that large arrivals of cotton from the South will reach this city during the next three months. Our cotemporary at Birmingham will probably notice this in his circular, and make it the theme of another Jeremiad.

Gold has fallen at least 20 per cent. during the last few weeks, which we venture to ascribe principally to the succession of victories won by Sheridan and Schofield, and the unresisted progress of General Sherman. And yet there has been no reduction in the amount of currency afloat that we have heard of. Our previous remarks on this subject are evidently fully justified by what has occurred since.

Subscriptions to the 7-30s continue to be made on the most liberal scale, and the confidence of both capitalists and men of moderate means appears to be in no way impaired in the stability of our resources, nor the ability of the country to meet its public engagements. This is a cheering spectacle, and gives intense satisfaction to the friends of the Union, in which they have evinced such an abiding faith. This state of things is quite in contrast with that we witness in the South, where all reliance on the financial power of the Confederate Government appears to be lost. We hear of a singular movement on the part of some of the leading banks in Richmond, which are calling in and redeeming their circulation, at the rate of one dollar in gold for six in their own paper. It is evidently a preparation for the approaching storm, and in anticipation of the loss of Richmond. For if that city comes soon into our possession, the Banks would not be allowed to redeem their paper at any such rate, by the operation of the laws which would then come into force. They would be precisely on the same footing as the Banks of the North, and these certainly would not venture to offer to redeem their bills at any such figure. Still the bills of the Richmond Banks, if suddenly called in as proposed, would at least be out of the way when the crisis comes and that city falls, as we may now safely calculate it will.

The Stock Exchange has been considerably depressed the last few days by the fall in gold, and the expectation of a further decline. Many large operators are at a stand still. Railroad shares are at present quite dull, while the Government securities stand firmly. U. S. 10-40s are in favor as well as the 7-30s, the former being considered a cheap and desirable investment. The steamers which shall bring back from Europe the reverberations of the fall of Charleston and Wilmington, will also bring large orders for our Government Stocks, and we venture to predict a very handsome rise in the quotations. The announcement in the London *Times* that the British Government repudiated the attempt made upon it, to recognise Mr. Lincoln as only President of the Northern States, gives assurance of the continued determination of its intention not to risk by any such act, the present amicable relations existing, at least officially between the two nations.

Our relations with Mexico are just now the only cloud in our foreign horizon. The Munroe doctrine seems to be an obligation on the part of this country, and yet many wise and patriotic men doubt whether it is of perpetual observance. All who are acquainted with the history of Mexico have seen that it has been the history of successive factions, alternately aided by the church, which has the largest possessions, and the greatest incomes known in that country. What slavery has been as a disturbing element in the United States, priest-craft has been in Mexico. The present Emperor has accepted the issue as he found it, and has decided in favor of religious liberty, and the dispersion of the properties hitherto held by the Church, in the form they had already been disposed of. So far the new Empire has been republican enough.

If Maximilian should voluntarily resign the purple, and declare himself citizen President, subject to the trial of a fair *plebiscite* he would cut the Gordian Knot and secure his position. The Munroe doctrine would not touch him then, and we might consistently recognize him.

Money continues to be plentiful 7 ; per cent. is the rate at which it is generally loaned. On United States collaterals can be had at 1 per cent less. The subscriptions to the 7-30s continue large. The last week the aggregate of this amounted to twenty one millions, and on Tuesday of the present week the amount subscribed on that day was $5,240,700. Exchange is low and difficult of sale, being at a premium of 6 to 7 only for good merchant bills. This is the lowest figure reached for a great number of years, and shows conclusively which way the balance of trade is tending.

The amount of exports from this port exclusive of specie, (which was extremely small), during the past week was $3,572,860.

The balance in the Sub-Treasury on Tuesday was $27,459,209 25.

The fall on gold the same day was 7 per cent., and great alarm was experienced by the holders.

Heavy failures are announced in the grocery line. We venture to assert, that in any carefully and unspeculative establishment no such consequences were necessary. The public will look on with indifference at the fate of those houses which have helped speculations of a most unjust character, who have pushed up prices hundreds of per cents beyond a real necessity, and have gone down by increasing their purchases under a belief that the war was never to end.

In another place will be found a recapitulation of the value of the general crops of the loyal states of the country, as given officially by the Bureau of Agriculture, showing that their value has increased in 1864, from that of the previous year by nearly five hundred millions of dollars, or more than one quarter of our present funded national debt; a most suggestive fact and full of encouragement.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Ward & Co.

We call attention to the advertisement of the old established banking house of WARD & Co. No. 54 Wall street.

Mr. John Ward, so long and favorably known to our community, has retired from the active pursuits of business after an experience of forty-five years in Wall street.

The remaining partners, Messrs. Henry H. Ward, William G. Ward, and Charles H. Ward, have associated with themselves Mr. Wm. A. Stephens, lately of Messrs. Hunt, Tillinghast & Co., Commission Merchants, and continue the business of the house at No. 54 Wall street.

This firm devote especial attention to the purchase and sale of stocks, bonds and gold on commission, and were among the first of the discount houses to introduce the system of negotiation of business paper, to which they continue to give their attention.

They are also authorized agents for the popular United States 7-30 loan, and keep the notes always on hand for immediate delivery.

The house of Ward & Co., has been for many years a leading one in this city, and has often exerted its influence and used its means in promoting Government loans and relieving the Treasury department when in difficulty.

When in the time of Secretary Forward, it was found impracticable to place a considerable loan in Europe, this house stepped in and contracted for the balance required.

The present firm, of the same stock and school, indeed part and parcel of the former one, will beyond doubt continue to wear the mantle which has fallen upon them with dignity and reputation.

Coal—Important to Consumers.

The Hampshire and Baltimore Coal Company, as will be perceived by their advertisement on the last page of the Journal, are now prepared to execute orders for their excellent coal from the Hampshire Mines and Midland George's Creek, with despatch and certainty. The consumers of coal will find it greatly to their advantage to send in their orders to the office No. 59 Trinity Buildings Broadway, in this city.

Given, Jones & Co.

Among the new banking houses which the increasing business of New York is now creating, is that of Given, Jones & Co., 33 Broad street. The head of the firm is from an old and well known banking and commercial house in Kentucky, and Mr. Flournoy, a member, has been President of the Commercial Bank of Kentucky for thirteen years, and his name stands deservedly high throughout the Western States. The house will transact a banking exchange, and commission business in all their branches, with ample means, facilities and experience.

☞ The 10th National Bank of which D. L. Ross, Esq., is President, and J. H. Stout, Esq., Cashier, advertises the 7-30s on the most liberal terms to Banks, Bankers and Brokers. They forward the bonds free of expense to all parties ordering them. Our readers at a distance will do well to notice this offer.

Southwestern Railroad.

The Milwaukee *Wisconsin* says that an effort is now making to complete the railroad from that city to Burlington, Racine County, at the junction of the Racine and Mississippi Railroad,

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending March 4, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$26,784 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	92,281 00
Total	$122,189 00
Corresponding week, 1864	111,867 00
Decrease	$10,322 00

The earnings of the Marietta and Cincinnati Railroad for the 1st week in March:

	1865.	1864.
Passengers	$10,779 02	$7,417 90
Freight	9,912 20	13,406 65
Mail, express & telegraph	1,200 00	899 58
Total	$21,891 22	$21,724 13
Total for the fiscal year, commencing 1st Jan.	206,630 36	164,404 14

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending March 7th, were:

	1865.	1864.
Passengers	$3,147 47	$2,511 59
Freight	3,839 19	5,981 01
Express	162 80	104 16
Mails	296 58	296 58
Total	$7,446 04	$8,893 34

Receipts from January 1 to March 7:

1865	$88,427 09
1864	73,172 52
Increase	$15,254 57

The earnings of the Chicago and Northwestern Railway for the 1st week of March, are $115,860 39
Corresponding week of 1864 75,549 66
Increase 53.36 per cent $40,310 73

The earnings of the Michigan Central Railroad for the 1st week in March, 1865, were $74,339 00
Corresponding week of previous year 77,800 00
Decrease $3,461 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week of March, 1865, were $92,342 00
Corresponding week of previous year. 70,768 00
Increase $20,574 00

The earnings of the Chicago and Rock Island Railroad for the first week in March, 1865, were $76,917 00
Corresponding week of previous year 57,947 00
Increase $18,970 00

The earnings of the Toledo and Wabash Railroad Company for the first week of March, 1865, were $34,361 00
Corresponding week of previous year. 31,424 00
Increase $2,937 00

Buffalo and Pittsburgh Railroad.

A party in Buffalo have purchased the charter of the Buffalo and Pittsburgh railroad, with a view to extend it to the coal fields of McKean county, Pa., where they own some 20,000 acres. Recent explorations, however, while showing that coal does not exist there in such abundance as has been believed, demonstrates the presence of oil in large quantities throughout the entire tract owned by the company. The necessity for greater facilities for railroad communication with the coal and oil fields of our State is keenly felt, and it is to be hoped that new enterprises with this view will be pushed forward to completion as rapidly as possible.—*Pittsburg Chronicle.*

Specie Movement at New York.

The following shows the movement of specie at this port for the month of February, 1865:

Specie in banks and Sub-Treasury February 1	$30,342,250
Received from California in February.	914,735
" from foreign ports "	106,704
Gathered in from hoards "	4,181,853
Total supply in February	$35,545,542
Exported to foreign ports in February	1,023,201
Specie in banks and Sub-Treasury—	
March 1, 1865	$34,522,341
" 1864	43,111,000
" 1863	41,050,000
" 1862	31,335,000
" 1861	44,700,000
" 1860	31,400,000
" 1859	30,900,000

Total receipts since January 1, 1865:

	January.	February.	Total.
From California	$2,043,457	$914,735	$2,958,192
From for'n ports	52,268	106,704	158,972
From hoards	1,376,928	4,181,853	5,558,781
Total receipts	$3,472,653	$5,203,292	$8,675,945

Specie in banks and Sub-Treasury, Jan. 1, 1865	30,054,450
Total supply since Jan. 1	$38,730,395
Total withdrawn and exported since Jan. 1, 1865:	
January	$3,184,853
February	1,023,201
Total	4,208,054
Specie in banks and Sub-Treasury, March 1, 1865	$34,522,341

Railroad Earnings--Monthly.

The earnings of the Atlantic and Great Western Railway for Feb., 1865, were $347,648 00
February, 1864 188,534 00
Increase $159,114 00

The earnings of the Erie Railway for the month of Feb., 1865, were $886,038 71
Corresponding month last year 934,133 07
Decrease $48,094 36

The earnings of the Michigan Central Railroad for the month of Feb., 1865, were $279,137 59
Corresponding month of previous year 278,848 38
Increase $289 21

The earnings of the Chicago and Rock Island Railroad Company for the month of Feb., 1865, were $236,949 00
Corresponding month of previous year 168,154 00
Increase $68,795 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of Feb., 1865, were $299,890 00
Corresponding month of previous year 235,666 00
Increase $64,224 00

The earnings of the Marietta and Cincinnati Railroad for the month of Feb., 1864 $86,626 00
Corresponding month of previous year 77,873 00
Increase $8,753 00

The earnings of the Toledo and Wabash Railroad for the month of Feb., 1865 $139,171 23
Corresponding month of 1864 95,841 58
Increase $49,328 65

☞ The Delaware and Raritan Canal was opened for navigation on the 14th inst.

The Crops of 1863 and 1864.

We have received from Hon. Isaac Newton, Commissioner of Agriculture at Washington, a copy of his report for February. In this he gives the amount of our principal crops in 1863 and 1864, showing the increase and decrease during those years. It appears, that notwithstanding the large number of men away from their homes in the army, the value of our general crops has been increased from $955,764,322, in 1863 to $1,440,415,435 in 1864, a difference in our favor of $484,651,113. This is certainly a remarkable fact, and speaks volumes in favor of the industry and resources of our agricultural interests.

The following is a recapitulation of the tables in the report:

AMOUNT OF CROPS.

Bushels.	1863.	1864.
Indian corn	397,839,212	530,451,403
Wheat	173,677,928	160,695,823
Rye	19,989,335	19,872,975
Oats	170,129,864	175,990,194
Barley	12,158,195	10,716,328
Buckwheat	15,786,122	18,700,540
Potatoes	98,965,198	96,532,029
Total	888,546,554	1,012,959,292
Tobacco	163,353,082	197,460,229
Hay	18,346,730	18,116,691

The increase in the yield of corn was 132,612,191 bushels; in oats, 5,860,330 bushels; buckwheat, 2,914,418. Wheat fell off 12,982,105 bushels; rye, 116,360 bushels; barley, 1,442,567 bushels; potatoes, 2,423,169 bushels. Total increase in 1864, 141,386,939 bushels; total decrease 16,974,201 bushels. Net increase, 124,412,738 bushels.

ACREAGE OF CROPS.

	1863.	1864.
Indian corn	15,312,441	17,438,752
Wheat	13,098,936	13,158,089
Rye	1,439,607	1,410,983
Oats	6,686,174	6,461,750
Barley	557,299	540,317
Buckwheat	1,054,060	1,051,700
Potatoes	1,129,804	902,295
Tobacco	216,423	239,826
Hay	15,641,504	15,034,564
Total	55,136,248	56,238,276

The comparative values were as follows, showing a total of more than a million and a half of dollars in 1864, being an increase of $548,779,368, over 1863:

VALUE OF CROPS.

	1863.	1864.
Indian corn	$278,089,609	$527,718,183
Wheat	197,992,837	294,315,119
Rye	20,589,015	31,975,013
Oats	105,990,905	139,381,247
Barley	13,496,373	16,941,023
Buckwheat	12,660,469	21,986,763
Potatoes	55,024,650	77,184,043
Tobacco	24,239,609	29,335,225
Hay	247,680,855	365,707,074
Total	$955,764,322	$1,504,543,690

The above tables of the general summary do not show the exact comparative differences between the years 1863 and 1864, because the latter year embraces the crops of Kentucky, which are not in the year of 1863. Deducting Kentucky from 1864, the comparison will be as follows:

Table of Comparison between 1863 *and* 1864.

	1863.	1864.
Total, bushels	888,546,554	959,821,150
Total, tobacco, lbs.	163,353,082	140,503,760
Total hay, tons	18,346,730	18,004,866
Total acreage	55,136,248	53,950,797
Total value of crops	$955,764,322	$1,440,415,435

The *value* of the crops, the market value of gold when the prices were taken, and the per cent. increase of the value of both, are as follows:

Years.	Value of crops.	Rate of gold.	Gold, inc. per cent.	Inc. value of crops per cent.
1862.	$706,887,495	131	..	..
1863.	955,764,322	147	12	35
1864.	1,440,415,435	247	54	50

The commissioner accounts for the difference in valuation in this wise: The relative difference of 1863 and 1864, between the increase of gold value and of the value of the crops, shows that of the advance in the value of crops in 1863, 23 per cent. over the gold value, was caused by the demand of Government for war purposes; but in 1864, great as was the increase in the value of crops, being $484,651,173, it was 4 per cent. less than the increase in the value of gold. This proportional decrease was doubtless caused by the decrease of exports in 1864.

Silver Mines of Nevada.

During the past week the annual statements of the operations of three of the leading silver mines of this State have been published—the Gould and Curry, the Ophir and the Empire Mill and Mining Company. The gross product of these mines from December 1st, 1863, to December 1st, 1864, (although we believe the statement of the Empire dates from March, 1863,) is as follows:

Gould and Curry	$4,898,000
Ophir	1,012,365
Empire	1,043,720
Total	$6,954,085

These yields were produced, respectively, from the following quantities of ore:

Gould and Curry	65,000 tons.
Ophir	18,000 tons.
Empire	25,000 tons.
Total	108,000 tons.

The dividends declared and paid to stockholders have been as follows:

Gould and Curry	$1,440,000
Empire	332,000
Ophir	67,200
Total	$1,839,200

Notwithstanding the heavy outlays of the past year, it will be seen that between one-third and one-fourth of the gross product of bullion from these mines has been paid over to stockholders in dividends. The extraordinary expenses of these companies—such as the erection of mills, the purchase of machinery, etc., etc.—may be estimated at $1,000,000. Hence, nearly one-half the gross proceeds of the mines has accrued in tangible, marketable wealth to the stockholders. This is an unanswerable argument in favor of the profits of silver mining in the State of Nevada. The 108,000 tons have yielded an average of about $65 to the ton—which includes first, second and third classes of ores.

But we desire to direct especial attention to the probable monthly gold and silver yield of the State, as indicated by the annual exhibits to which we have referred. If three mines have yielded within a fraction of $7,000,000 during the past year, what has been the entire product of the State? what will it be during the coming twelve months? To this $7,000,000 must be added the product of the Mexican, the Savage, the Potosi, the Chollar, the Moscow, the Bajazet and other mines in this district—of the Imperial, the Plato, the Burke and Hamilton, the Sandy Bowers, the Crown Point, the Belcher, the Yellow Jacket, the Overman, the Uncle Sam and numerous other claims in Gold Hill district—and of the Daney, the Pride of the West, and several other mines, more or less productive, in Devil's Gate district. The Gold Hill mines have poured fourth a steady stream of treasure—in volume probably as large as this district—while the Savage, the Mexican, the Potosi and the Chollar have each produced more bullion during the past year than the Ophir. Since the 1st of January, 1864, about $10,000,000 in bullion has been shipped to California from the office of Wells, Fargo & Co., in this city. Is it not fair to estimate that nearly double this amount has been shipped in the aggregate from Gold Hill, Silver City, Dayton, Carson, Reese River, Esmeralda and Humboldt? The entire gold and silver product of Nevada during the past year has not been less then $25,000,000 or $30,000,000.—*Virginia, Nevada, Territorial Enterprise, December* 31.

Ohio School Commissioners Report.

From the Report of the Commissioners it appears that the total number of children between the years of five and twenty-one years in the State is 938,972; number enrolled on the school record, 694,920; average number in daily attendance, 396,256, or a little less than 45 per cent. of the whole number of children.

The School Fund for the year was as follows:

Balance on hand Sept. 1, 1863	$1,217,402
State tax	1,217,460
School Fund	218,638
Township tax	1,221,033
Fines, licenses, &c.	53,159
Total	$3,947,692

EXPENSES.

Common schools	$1,924,703	
High schools	138,960	
German school	14,100	
Colored "	18,417	
Total paid teachers	2,087,880	
Sites, buildings and repairs	317,184	
Fuel, &c.	333,060	
		2,738,124
Balance Sept. 1, 1864		$1,209,568

Stamp on Insurance Policies.

The commissioner of internal revenue has made the following decision:—In fire and marine insurance policies the stamp is determined by the amount of the premium paid, and the simple question to be determined is, what is the amount paid on issuing the policy? This amount is sometimes paid in money, and part by note. If an unconditional note is given for a fixed and definite sum, that note is to be recorded as a part of the premium, whether payable on demand or on time, even though there may be an agreement outside of the note that it shall not be called for except in cases of loss. If the note upon its face is merely an agreement to pay the assessment which may be made, and the note shows that it is merely security for such payment, it should not be recorded as premium.

Lehigh Canal Company's Railroad.

We are told that in May next, the Lehigh Coal and Navigation Company's railroad will be opened from Manch Chunch to Penn Haven, forming a connection at the latter place with the Hazleton Railroad.

The policy of the canal company, as developed in their acts, is to own and operate, as soon as the work can be completed without incurring excessive cost, a railroad from Wilkesbarre and the Wyoming mines to Easton.

It is also the avowed policy of the Lehigh Valley Railroad Company to extend their railroad from White Haven into the Wyoming Valley. And so there will be two parallel railroads from Wilkesbarre to Easton; and with both lines in operation, there will be a large and annually increasing coal tonnage carried from the Wyoming mines down the Lehigh Valley to the tide water markets.—*U. S. R. R. and Mining Register.*

Troy and Greenfield Railroad.

A Boston letter in the Springfield *Republican* says:

"The Supreme Court has just decided that the second mortgage bonds of the Troy and Greenfield Railroad are not good against the State. This destroys the value of about $600,000 of securities of this character. They were issued wholly or mostly to the contractors, Haupt & Co., and by them distributed among various parties. The State having full possession of the property under its first mortgage of the road, there is no indemnity or security for these bonds; and the present holders of them may as well file them away as valueless. The decision was made on the ground that the mortgage bonds in question were issued for thirty years, while by the laws of the State such bonds are limited to twenty years."

Steamboats on the Hudson.

We understand that a change is to be made the coming season in the place of departure of the night boats. It is said that on the completion of the new railroad, that the steamers "St. John" and the new boat (name unknown) will receive and land their passengers at Athens, and that the "Vanderbilt" and "Hendrik Hudson" will form the line to Albany. The day boats—the "Drew" and "Vibbard"—will run as usual between Albany and New York.

The Late Mr. Watts Sherman.

Mr. Sherman, whose death at Madeira on the 20th of February is announced, was one of the oldest bankers of New York, having been engaged in the business almost from boyhood. He was in 1851 chiefly instrumental in founding the well known house of Duncan, Sherman & Co., having previously rendered the Albany City Bank, by his excellent management, one of the most successful in the State. His health had been failing for several years and his decease was not unexpected by his friends. He leaves the reputation of a high-toned and able financier, and one who in the social circle will long be regretted.

☞ The bill now before the Pennsylvania Legislature incorporating the "Pennsylvania Oil Car Manufacturing and Transportation Company," is an important one, because granting very extensive and peculiar privileges; Among other powers are the following: To hold not exceeding five hundred acres of land; to construct and manufacture such cars, tanks, tools, implements, buildings, &c., as they may need in transporting oil and other freight; to locate such tanks, &c., wherever they may select on lands occupied by them; to construct lateral roads not more than five miles long each, from their tanks to lines of railroad; and to purchase, hire or build such steamboats and other vessels as they may need to transport their oil and other freight from Philadelphia, or adjacent thereto, to any foreign ports.

☞ In the Maryland House of Delagates, on the 9th inst., the bill to amend the charter of the Philadelphia and Baltimore Central Railroad was passed, with an amendment providing that the road shall be located so that it shall not run more than two miles south of Belair, in Hartford County; and that the company shall commence at the city of Baltimore, and complete five miles of the road in each and every year, the first five miles to be built on or before Jan. 1, 1867.

Bills to incorporate the Baltimore, Hartford and Cecil Railroad Company, and the Baltimore and Herring Run Passenger Railway, were also passed.

Coal Crop of Great Britain.

The number of collieries and the quantity of coal raised in each of the several districts in 1863 were as follows:

	No. of Collieries.	Tons of Coal.
Durham and Northumberland	312	22,154,146
Cumberland	32	1,327,368
York	415	9,402,500
Derby	154	4,550,750
Nottingham	20	750,000
Leicester	10	805,750
Warwick	17	685,500
Stafford and Worcester	465	7,870,320
Lancaster	379	10,875,500
Chester	39	822,750
Shropshire	66	1,150,000
Gloucester, Somerset & Devon.	121	1,950,000
Monmouth	99	4,075,000
South Wales	346	6,917,081
North Wales	81	1,728,000
Scotland	480	11,110,500
Ireland	46	127,050
Total produce	3,160	86,292,215

The following table shows the increase in the number of collieries in each county since 1853:

	1853.	1863.
England.		
Northumberland and Durham	225	312
Cumberland	23	32
Chester	30	39
Lancaster	333	379
York	276	415
Derby	123	154
Leicester	11	10
Warwick	15	17
Nottingham	17	20
North Stafford	123	117
South Stafford and Worcester	393	465
Shropshire	48	66
Gloucester and Somerset	85	119
Devon	2	2
Wales.		
Pembroke	19	21
Caermarthen	57	92

The number of collieries and the quantity of coal raised during the ten years ending December, 1863, was as follows:

	Collieries.	Tons of Coal.
1854	2,397	64,661,401
1855	2,613	64,453,079
1856	2,829	66,645,450
1857	2,867	65,394,707
1858	2,958	65,008,549
1859	2,949	71,979,765
1860	3,009	84,042,698
1861	3,052	83,635,214
1862	3,088	81,638,338
1863	3,160	89,292,215
Total in ten years		733,751,416

☞ It is expected that the Schuylkill Navigation Company's Canal will be ready for navigation by the 18th inst.

Mines and Iron Works of Prussia.

The production of the mines and iron works of Prussia during the year 1863, were:

	Quantity.	Value.
Coal	Tons 14,804,575	£3,504,160
Lignite	4,026,304	547,073
Minerals of all kinds	Not stated.	1,190,578
Pig	582,550	2,275,975
Steel pig	19,997	109,178
Cast pig, first fusion	34,131	287,049
Iron	347,972	3,417,336
Unworked steel	28,975	421,299
Zinc	60,311	950,007
Silver	23	203,371
Gold	Not stated.	31
Lead and litharge	24,409	461,277
Copper	2,682	253,204
Nickel	375	87,621
Arsenic	261	4,366
Antimony	60	2,400
Alum	2,588	24,803
Copperas	2,392	8,306
Sulphate of copper	264	5,130
Sulphur	310	2,870
Cadmium	Not stated.	61
Salt	200,711	252,188

The value of the coal and lignite produced in Prussia in 1863 was thus £4,051,232; of the iron minerals, etc., £1,190,578; of the products of the blast furnaces, £2,671,683; and of the other miscellaneous products, £2,255,635—making a general aggregate of £10,169,128. The number of workmen employed in the coal and lignite workings was 83,307; in the other mines, 41,490; and in the iron works and salt works, 74,035—making an aggregate of 198,832.

☞ The New York exports of specie for the week ending March 11th, compare as follows with former returns: Total for the week $29,015, previously reported $4,099,914—total since Jan. 1, 1865, $4,119,929.

Same time other years:

1864	$9,295,897	1858	$9,015,712
1863	9,323,879	1857	4,309,320
1862	7,067,529	1856	2,513,923
1861	1,259,897	1855	3,739,262
1860	2,612,320	1854	2,637,450
1859	6,361,005	1853	2,580,747

☞ The North Missouri Railroad is to be pushed north to the rich valley of the Desmoines, with an arm extending west to Leavenworth City. In aid of this exterprise, a bill passed the House at Jefferson City, releasing the first lien held by the State upon the North Missouri road, and authorizing the company to loan six millions of dollars on first mortgage bonds.

☞ A railroad is to be immediately built, running from New Castle, Penn., up Big Run to Slippery Rock, and up Wolf Creek to the coal fields of Butler County, which will render this oil territory easily accessible and largely increase its value.

☞ A meeting was held at Titusville on the 8th inst., to take into consideration the question of constructing a new railway from Oil Creek to the outer world. It was decided that such a road should be built, and that the direct route from Titusville to Union, on the Atlantic and Great Western Road, was the best for the purpose.

☞ The Legislature of Pennsylvania have passed an act incorporating the Allegheny Horse Railroad Company.

☞ The Chesapeake and Ohio Canal will be opened to through navigation on the 25th inst.

☞ In the U. S. Senate a new standing committee on mining has been established, with Mr. Conness, of California, as chairman, and Messrs. Stewart, Chandler, Morgan, Fessenden, Buckalew and Guthrie.

☞ Chief Justice Carter, of the United States Supreme Court for the District of Columbia, has decided that the purchase and sale of gold for the sole purpose of trade, commerce or use, is a valid transaction, but that all transactions in gold for speculative purposes are illegal, invalid and against the public good.

☞ Mr. Rollins acting Commissioner of Internal Revenue, has decided that "all bonds issued by State, county, city or town officers, for State, county, city or town purposes, are exempt. As are official instruments executed by State, county, city or town officers in the discharge of their official capacity."

New York, Saturday, March 25, 1865.

Liability of Railroad Companies for Loss of Passengers' Baggage.

Although a railroad company is not responsible for injuries to the *persons* of passengers, unless they happen from a want of such care and diligence as is characteristic of cautious persons, yet they are liable for the *baggage* of passengers, at all events, except such losses as arise from inevitable accident or the enemies of the country, where no notice is given. (Camden R. R. and T. Co., *vs.* Burke 13 Wend., 611.) And they are thus liable although they do not receive any other compensation for the transportation of the baggage than that which is paid for the conveyance of the passenger. (Powell *vs.* Myers, 26 Wend., 591.) The passenger having been received on board is entitled to a safe keeping of his baggage, although he may not have paid his passage money.

In one case (36 Barb., 557,) the Court lays it down that the obligation of a railroad company is to take whatever is delivered and received as baggage, from a passenger in the baggage car of a passenger train in which the passenger takes his passage, and take it along with and deliver it to the passenger at the place of destination, in the usual manner of transporting and delivering baggage. And the obligation is the same, whether the baggage is within the quantity allowed to a passenger, to be carried without any charge other than the ordinary fare of the passenger; or whether it is an extra quantity, for which an additional charge is made. If it be taken as the baggage of the passenger, whether ordinary or extra, it is to be carried with the passenger, unless there is some agreement to the contrary.

It is an elementary principle, therefore, that the carriers of passengers are liable as common carriers for their ordinary baggage, that is, they are liable for such baggage to the same extent as for freight; in other words, are insurers of the same. And it is considered that as railways have made their checks evidence in regard to the delivery of baggage, the possession of such check by a passenger is evidence against the company, of the receipt of the baggage. (*Redfield on Railways*, 243.) In one case the Court says "It stands in the place of a bill of lading." (Dill *vs.* Railway Company, 7 Rich., 158.) And where different railroads forming a continuous line run their cars over the whole line, and sell their tickets for the through route, and check baggage through, an action lies against either company for the loss of the baggage. (Hart *vs.* Rensselaer and Saratoga Railroad Company, 4 Seld., 37.)

Where the company employs porters at their stations to convey a passenger's baggage to the car in which the passenger leaves the station of the company, their liability continues until it is so delivered, and it makes no difference whether the baggage be placed in the same car with the passenger or in the baggage car. (Richards *vs.* London, Brighton and S. C. R. R., 7 C. B., 839.)

But if the passenger chooses to take the exclusive control of his own baggage, as a purse, or coat, cane or umbrella, for instance, the company is not ordinarily liable. But the liability having once attached by a delivery to the company's servant, they remain liable until a full and unequivocal re-delivery to the owner, and ordinarily to the end of the route.

Thus in a case where an emigrant passenger on a voyage from Liverpool to New York took the exclusive possession of his trunk, taking it into the steerage, placing it under his bed and fastening it to his berth by ropes, and during the voyage it was stolen, it was held that the owners of the ship were not liable. (Cohen *vs.* Frost, 2 Duer, 335.)

EXTENT OF RESPONSIBILITY.—WHAT IS "BAGGAGE?"

Railroad companies, as carriers of passengers are not liable for the loss of a package of merchandise which a passenger brings upon the train, packed as baggage, unless the company having an opportunity to inspect or know the contents of the package, see fit to accept it as baggage. A great number of cases have turned upon the definition or signification of "baggage;" thus the word has been held not to include a trunk containing valuable merchandise and nothing else, although it did not appear that the traveler had any other trunk with him; nor samples of merchandise carried to enable the passenger to make bargains. (Pardee *vs.* Drew, 25 Wend., 459; Hawkins *vs.* Hoffman, 6 Hill, 586.) But where a passenger delivered a box containing embroideries, to the agent for receiving baggages, and demanded a check for the place of his destination, and was told that the company "did not check such goods," but that they would go safely, it was held that the company was liable for the loss of the box as common carriers, on the ground that there was no attempt to deceive them, or to have the parcel pass as baggage unless they consented, and if they consented to accept and carry it in a passenger train they were liable, and might charge freight the same as if they carried it upon their freight trains. (Butter *vs.* Hudson River Railroad Company, 3 E. D. Smith, 571.)

In one case the carrier was held responsible for articles of jewelry, carried among baggage, which was a part of female dress, the plaintiff traveling with his family, such articles being treated without question, as forming a part of the passenger's baggage. (Brooke *vs.* Pickwick, 4 Bing., 218.) So a watch carried in one's trunk is proper baggage. (4 E. D. Smith, 181.)

But railroads, as carriers of passengers, are not liable for money which they may carry as baggage, beyond a reasonable amount for traveling expenses. The passenger is allowed to take not only money sufficient to defray the ordinary expenses of the journey contemplated, but any

reasonable sum in addition for such contingencies as are not improbable.

Thus, the distinction between baggage and freight has been pretty distinctly marked. And it must be remarked that an agreement to carry a passenger and his baggage includes only ordinary baggage, or such articles of necessity and personal convenience as are usually carried by passengers. It has, however, been held that guns for sporting purposes may be included in the baggage of a passenger from Europe to New York, for which the carrier is liable. (Van Horn *vs.* Kermit, 4 E. D. Smith, 453.) So tools used by the passenger in his trade, and also a gun, carried in his trunk, have been held proper by being included under the term "baggage," and recoverable as such. (Davis *vs.* Cayuga and Saratoga Railroad Co., 18 How., 330.) But a trunk containing silverware, carried as baggage without charge, from New York to Albany, was held not to be baggage for which the carrier was liable. The Court says "there is no difference between silverware and silver money." (Bell *vs.* Drew, 4 E. D. Smith, 59.) So a carrier is not liable for the value of a box of jewelry belonging to a third person packed in the passenger's trunk, the jewelry being put up as merchandise. (2 Bosw., 589.) Deception may as easily be effected by imposing upon the carrier valuable merchandise, under the guise of the owner's traveling baggage, as by a direct verbal misrepresentation.

It seems that books, writing apparatus, and the like, which the passenger carries for his amusement or instruction by the way, may be included in the term baggage. (Hawkins *vs.* Hoffman 116 Hill, 586.) We are not aware that the question has ever been passed upon, but we do not doubt but books, manuscripts, scientific instruments and diplomas, which a student has in his trunk on his journey to or from college or school, will be deemed baggage. It has however been held that presents for friends, masonic regalia and jewels, not being articles for the passenger's personal use or convenience, could not be recovered for as baggage. (4 Bosw. 225.)

DELIVERY TO THE PASSENGER.

The carrier must deliver the passenger's baggage to him at the place of destination, and the forgetfulness of the passenger is no excuse (Cole *vs.* Goodman 19 Wendell, 251). Though, after the arrival at the place of destination, a reasonable time has elapsed for the passenger to remove his baggage, and he fails to do so, so that the carrier is no longer liable as a *common carrier*, he is not relieved from all care of the property, and all responsibility for its delivery, when demanded. He may notify the passenger to remove it, but if he does not take it away, the carrier is bound to preserve it with *ordinary* care, and, as a bailee, is chargeable, if it is lost through his negligence (Van Horn *vs.* Kermit 4 E. D. Smith 453). The carrier, therefore, is chargeable as a carrier, for the baggage of the passenger, only for a *reasonable time* after its arrival at its destination. His subsequent liability is not that of an insurer, but only that of a bailee, or warehouseman.

EFFECT OF NOTICES AND SPECIAL CONTRACTS.

It is settled, in this state, that a common carrier of property cannot limit his liability, in part or in whole, by mere notice, even if the notice is brought home to the owner. Such notice is of no avail, unless the owner assents to its terms. (4 Bosw., 225.) Thus it was held in the case of the Camden Railroad and T. Co., against Burke (13 Wend., 611) that a notice that all baggage is at the risk of owners, although it is brought home to the owner, does not excuse the carrier from losses arising from the acts of himself or his servants, nor from actual negligence, nor the inefficiency of his machinery or vehicles, though it cannot be discovered by the eye.

In the case of Welles against the N. Y. Central R. R. Co., (26 Barb., 641) the plaintiff received a free ticket from the defendants, entitling or permitting him to ride upon their cars at his own pleasure, with an indorsement on it, by which "he expressly agreed that the company should not be liable, under any circumstances, whether of negligence of their agents or otherwise, for any injury to his person or for any loss or injury to his property." The court held that this contract was not unlawful. It is fully binding to the extent of exempting the defendants from all loss or liability to loss or damage from injuries resulting from mere negligence of any degree. And therefore, under an express contract that the goods are to be carried, "at the risk of the owner," the carrier incurs only the liability of an ordinary bailee (4 Seld., 375).

UNCLAIMED BAGGAGE.

It is provided by statute, in this state, similar to that in other states, that carriers, having on hand any unclaimed baggage, must enter it in a book to be kept for that purpose. If unclaimed for thirty days, the description of the goods must be published in the State paper on the first Mondays of July, October, January and April in each year, once a week for three weeks. If not claimed for sixty days, the goods are to be opened and an inventory to be made, and if unclaimed for three months after such examination, they are to be sold at public auction, giving six day's previous notice of the time and place of the sale. The net proceeds of the sale, after paying expenses and charges, is to be paid to the overseers of the poor of the town or city where the sale is made.

ARTICLES LEFT IN CARS.

It not unfrequently happens, that passengers in the hurry of leaving a train, neglect to take with them such articles as an umbrella, a coat or satchel. For the safety of these articles, which the passenger has assumed to care for himself, the company, as we have seen, are not responsible. But we believe it is always customary for one of the servants of the company to pass through the train and collect such articles as have been inadvertently left, and deposit them at the depot for reclamation by the owners. But by thus assuming to take charge of these articles, the company assumes a certain responsibility. If it should deliver an article thus found, to the wrong person, without taking care to ascertain who was the owner, it would be liable. But in general, no extraordinary care will be exacted of the company in such a case. It is not a case where property is put into its hands by the owner, but it comes into its possession by the owner's own neglect; and when the carrier does not know to whom it belongs, or by whom it was left, he should not be held responsible for delivering it to a wrong person if he has exercised all the care and vigilance that, could reasonably be expected from him, under the circumstances.

Erie Railway Company.

The earnings and expenses of this road for the years ending December 31, 1863 and 1864, have been as follows:

Earnings:	1863.	1864.
From freight	$8,476,810 18	$10,246,897 61
" passengers	1,850,984 49	3,002,197 70
" mails	101,052 04	101,352 04
" other sources.	40,634 58	88,196 19
	$10,469,481 29	$13,429,643 54
Expenses, viz:		
Office & station exp.	$915,587 30	$1,154,751 40
Cost of running	1,535,549 30	2,363,863 30
General expenses	158,315 00	275,835 87
Repairs of engines and cars	1,455,760 78	1,920,389 65
Repairs of track and roadway	1,475,426 39	2,414,683 45
Repa's of structures	161,319 12	420,611 42
Incidental expenses.	48,323 09	54,503 93
Miscellaneous	198,804 72	230,279 42
	$5,949,085 70	$8,834,918 44
Net earnings	$4,520,395 59	$4,594,725 10

Disbursed in 1864 as follows:

Interest on mort. debt	$1,231,806 84	
Rent of railroads	182,400 00	
Rent of Long Dock property	135,163 46	
Internal revenue taxes	323,803 74	
Taxes on real estate	259,819 45	
Pavonia Ferry	84,159 11	
Hire of cars	85,782 70	
Rents, repairs and expenses of operating the Buffalo Division	372,484 89	
		2,625,419 19
Surplus		$1,969,305 91
Dividends July 1, 1864	$925,992 50	
" Jan. 1, 1865	906,631 08	
		1,832,623 58
		$136,682 33
Surplus January 1, 1864		777,817 76
Balance to credit of income account January 1, 1865		$914,500 09

Compared with 1863 the gross earnings of 1864 show an increase of $2,960,162 25, with an increase in expenses of $2,885,832 74—making the increase in net earnings $74,329 53.

The freight and passenger earnings for the past two years compare as follows:

Freight earnings:	1863.	1864.
Through east	$3,858,042 71	$4,748,533 89
" west	1,871,186 35	2,031,184 57
Way east	2,322,774 21	2,382,586 77
" west	929,806 91	1,130,592 88
Total freight	$8,476,810 18	$10,242,897 61
Passenger earnings:	**1863.**	**1864.**
Through east	$209,463 51	$315,112 33
" west	279,863 34	458,985 81
Way east	642,967 74	1,057,201 65
" west	718,716 88	1,170,897 91
Total passenger	$1,850,984 47	$3,002,197 70

—showing an increase in freight earnings of $1,766,087 43, or 17.2 per cent.; and in passenger earnings of $1,151,213 21, or 38.3 per cent.

The tons of freight moved, and number of passengers carried, during the same two years compare as follows:

Freight:	1863.	1864.
Through east	452,667	440,758
" west	169,920	164,118
Way east	635,442	932,151
" west	616,605	6 8
Total tons	1,874,634	2,214,295

Passengers:	1863.	1864.
Through east	24,778	35,143
" west	53,612	59,949
Way east	586,465	844,511
" west	571,651	846,003
Total number	1,236,506	1,785,606

—showing an increase in tonnage of 339,661, and in passengers of 549,100.

The increase in the expenses of operating and repairs are given under the following general heads:

Office and station expenses	$239,164 10
Cost of running	828,314 00
General expenses	117,520 87
Repairs of engines and cars	464,628 87
Repairs of track and roadway	939,257 06
Repairs of structures	259,292 30
Incidental to road and structures	6,180 84
Miscellaneous	31,474 70
Total	$2,885,832 74

A very large increase in cost of running will be observed. Of this amount $357,818 53 is in the cost of fuel, the price of coal having increased very largely the past year, and of which a large amount is now used in the engines.

The increase in the cost of repairs of track and roadway is partly accounted for in the large amount of new iron laid down in 1864, viz: 20,480 tons, at a cost of $2,182,725 01, against 13,967 tons in 1863, costing $817,609 67—a difference of 6,513 tons, and in value of $1,315,015 34. The difference, however, in value should be reduced by the old iron taken up, which in 1864 was about $450,00C, which would leave a net increase of about $850,000. The average cost per net ton for railroad iron in 1863 was $58.66; in 1864 it was $105 per ton, a difference of $46.34 per ton. The estimated quantity of iron required for 1865 is 10,000 tons, which at $105 per ton, last year's price would be $1,050,000. The cost last year for 20,480 tons having been $2,132,000, the decrease in this one item for 1865 will be $1,082,000.

During the year 1¼ miles of double track and turnouts on the Eastern Division, and 4½ miles on the Susquehanna Division, in all 5¾ miles, have been completed; 6¼ miles on the Eastern Division, 16 miles on the Delaware Division, 5½ miles on the Susquehanna Division and 18½ miles on the Western Division, in all 48 miles additional, have been nearly completed, at a cost of $836,108 37. Shop and machinery at Susquehanna nearly completed; depot at Lackawaxen; foundations for shops and depot at Salamanca; and new tools and machinery for other shops, costing $439,877 69. Thirty-five new locomotives and 987 new cars, $1,682,508 54. Hawley Branch—new construction, $129,997 08. Long Dock—shops, freight sheds and docks, $365,475 35—total construction during the year $3,453,967 04.

The increase in capital stock during the year has been $4,830,600, accounted for as follows:

Fourth mortgage bonds converted	$1,386,000
Fifth " " "	737,000
Buffalo Branch " "	13.600
Long Dock " "	469.000
Sold to pay for construction	2,200,000
N. Y. and E. old stock converted	25,000
	$4,830,600

The capital stock and funded debt of the company compare as follows:

December 31,	1863.	1864.
Common stock	$11,569,500	$16,400,100
Preferred "	8,535,700	8,535,700
Total capital stock	$20,105,200	$24,935,800
First mort. bonds	3,000,000	3,000,000
Second "	4,000,000	4,000,000
Third "	6,000,000	6,000,000
Fourth "	5,020,000	3,634,000
Fifth "	1,739,500	1,002,500
Buffalo Branch bonds	200,000	186,400
Real Estate "	1,500	500
Total funded debt	$19,961,000	$17,823,400
Total stock and funded debt	$40,066,200	$42,759,200

The financial condition of the company is exhibited in the annexed balance sheet. The liabilities of the company on the 31st of December, 1864, were:

Accounts payable		$2,941,431 86
Dividends payable Feb. 1, 1865		906,631 08
		$3,848,062 94
Means to pay the same—		
Cash and cash items	$563,217 47	
Accounts receivable	1,383.286 94	
Long Dock Company	834,475 36	
		2,780,979 77
Excess of liabilities		$1,067,083 17
Contract for engines and cars deliverable prior to July 1, say		2,600,000 00
		$3,667,083 17

To meet which the company has in reserve $2,800,000 of common stock, and $900,000 of fourth mortgage bonds.

The property of the company consists of: Main Line from Jersey City to Dunkirk, 460 miles; Piermont Branch, 18 miles; Newburgh Branch, 19 miles; Northwestern Division, Hornellsville to Attica, 60 miles—total length of road owned by the company, 557 miles.

The Branch roads leased and operated by the company are: Buffalo Division, Corning to Buffalo, 140 miles; Rochester Division, 18 miles; Canandaigua and Elmira, 66 miles; Hawley Branch, just completed, 16 miles—total 240 miles.

The whole number of miles owned and leased by the company is 797.

The Warwick Valley road, ten miles long, is operated by the company, but not leased.

The whole number of miles operated by the company is 807.

There are on the Main Line and Branches owned by the company 191.5 miles of double track, and 145 miles of sidings—making the entire length of track equal to 1,132.5 miles of single track.

The equipment of the road consists of 276 locomotive engines and tenders; 114 passenger cars; 247 emigrant, baggage and caboose cars; 2,633 box freight, cattle, milk and oil cars; 1,180 flat freight cars; and 540 coal cars.

In the Report for 1863 the Directors called your attention to the necessity of having increased Motive Power and Rolling Stock; the remarks then made are applicable still. Although the road is now very well supplied with Cars, except Passenger Cars and Coal Cars, there is still a great deficiency of Engines. The Engines have been, for the last three years, worked night and day without any intermission.

In addition to the extra service required of the engines, the shops of the Company were found inadequate to repair them when they could be spared for that purpose, and it has been found absolutely necessary to provide more shops and larger accommodations for the repairs of engines and cars. The room provided did not anticipate so large an increase in the rolling stock as has been found necessary to do the increased, and constantly increasing business offered.

To meet this want the Company have nearly completed a new Machine Shop at Susquehanna, which will much facilitate the repairs of engines now so much needed, and give accommodations for building new ones.

There would have been a much more economical working of the road if the motive power had been greater and in first rate working order.

To provide for this deficiency contracts have been made to furnish sixty-seven Engines of the most approved pattern, to burn coal.

Authority has been given to build a sufficient number of coal cars in the Company's shops, and they are now being finished at the rate of about three coal cars per day.

Passenger cars are also being built in the Company's shops upon the most approved plans; and it is confidently believed that they will compare, in the most favorable manner, with any similar kinds of cars on any road. It is expected that the requirements of the travelling public will be fully met in the increased comfort of these truly complete coaches.

So large an outlay for additional motive power, cars and double track at a time of high prices, is justified by the demand upon the road by both local and through traffic. The total insufficiency of the equipment to do the business offered, and the consequent complaint on the part of those interested in transportation, made it imperative. And the increase in revenue resulting from this increased capacity we have no doubt will satisfy the stockholders that this expenditure is for their interest. With less provision for increased capacity, than is shown in this report, the large amount of business thrown upon the road by the opening of the Atlantic and Great Western Railway would become a source of embarrassment instead of profit. The managers of that road have already complained of our inability to do the business resulting from the connection, although that road has not yet been operated as a through line to Cincinnati or St. Louis. We are assured by the managers of the road forming the broad gauge connection to the Ohio and Mississippi Rivers that by May or June their roads will be fully equipped. And with this assurance the managers of this Company would hardly be held excusable for failure to prepare for so important an accession to its permanent business.

The Buffalo, Bradford and Pittsburgh Railroad, connecting with the Erie Railway at Carrollton Station, 405 miles from New York, will be open for use during the coming summer. This road from its connection with the Erie Railway to Lafayette is about 24 miles in length, and will ultimately, and at no distant period, be carried into the very heart of the great bituminous coal region of the State of Pennsylvania. When opened to Lafayette it will reach a point where coal, iron and lumber can be obtained in almost inexhaustible quantities. It will become the natural outlet for the coal and iron from that great mineral region, to New York, Canada and the Western States, and will be a source of largely increased business to the Erie Railway.

The growing scarcity of wood for locomotives has been a source of much anxiety, but with the opening of the Buffalo, Bradford and Pittsburgh Railroad, and the supply of coal from other tributaries of the Erie Railway, a source of much disquietude will be removed, as the supply of coal will be ample for fuel, and the cost between the supply of wood and coal for locomotive use will be at least one-third in favor of the latter article.

This review of the capacity and business of the Erie Railway—its location and connections for transporting the increasing business of the West and its adaptation to the commerce and convenience of the large population of the country traversed by it—animates us with the hope, that with our substantial and complete structures, and with

ample equipments and facilities, we can well sustain our relative position, and produce for its Stockholders a uniform and remunerative revenue.

In the present disturbed condition of our currency it would be unwise to present any estimates of the future business of the Company. The Directors, however, cannot see anything unfavorable in their affairs; they have great expectations of increased business for the current and future years, and with the increased prices for transportation of freight and passengers recently established, and the reasonable hopes that the cost of labor and material will be reduced, they confidently expect that the result of the present year's operations will be much more satisfactory than the year just closed.

☞ The bridge recently built across the Mississippi river at Clinton, Iowa for the use of the Chicago and Northwestern Railway, is 3,650 feet or more than three-fifths of a mile long. Of this distance 2,850 feet is between the Illinois shore and Little Rock Island and the Iowa shore. The bridge east of Little Rock Island consists of 1,400 feet of piling and seven spans of 200 feet each. West of Little Rock Island the bridge consists of three spans beside the draw. The draw is 300 feet long over all, and is built of iron. The abutments and one of the piers are founded on racks. The large crib is 409 feet and 64 feet wide, on the bottom. The draw turns on a pivot in the center, and when open leaves two clear passage ways for steamboats, 123 feet each. The draw weighs about 325 tons.

Property and Taxation of Ohio.

The following Table of the Property, and Taxes of the State of Ohio, for five years is from the Auditor's Report. It will be seen, that the *local* taxes are double those of the State; and that the taxes arising out of the War directly are $2,112,000, and that the whole amount of Taxes is $6,000,000 greater than in 1860. Probably two millions of this are also for War Bounty Funds, and other similar objects, classed, under the head of "Special Purposes."

AGGREGATE COINAGE OF THE MINT AND BRANCHES—1793–1864.

The following is a summary Exhibit of the Coinage of the Mint and Branches to the close of the year ending June 30, 1864:

Mints.	Commencement of Coinage.	Gold.	Silver.	Copper.	Total.
Philadelphia	1793..	$411,158,087 17	$98,299,074 82	$3,705,423 55	$513,162,885 54
San Francisco	1853..	181,111,516 81	3,884,580 41	....	184,996,097 22
New Orleans	1838..	40,381,615 00	29,890,037 13	....	70,271,652 13
Charlotte	1838..	5,048,641 50	....	....	5,048,641 50
Dahlonega	1838..	6,121,919 00	....	....	6,121,919 00
Assay Office	1854..	133,113,361 93	1,731,255 33	....	134,844,617 26
Denver	1863..	486,329 97	....	....	386,329 97
Total	....	$777,421,471 38	$133,804,947 69	$3,705,723 55	$914,932,142 62

The coinage at New Orleans was from 1838 till January 31, 1861. At Charlotte, N. C., from 1838 till May 31, 1861. At Dahlonega, Ga., from 1838 till February 28, 1861.

Canadian R. R. and the Passport System.

The order which issued from the State Department at Washington, by which passports became necessary for travellers between the United States and the British North American provinces, was a necessary precaution taken by our Government to prevent raids from across the border, which for a time threatened to be a repetition all along the Lakes, of the outrages committed at St. Albans. The consequence was that it broke up the railway travel of those Canadian lines connected with the United States, and was especially destructive to the interests of the Grand Trunk connected with the Michigan Central, and those also of the Buffalo and Lake Huron. The Suspension bridge connection was almost completely severed, and at that point trains were discontinued and business with Canada west nearly destroyed. The provincials soon discovered that their interests were more closely connected with ours than they had supposed. Fortunately for them their Government was in the hands of intelligent men, and so Parliament and the Canadian Cabinet went about the prevention of any further violations of their neutrality. Stringent acts were passed which made it dangerous to projectors of any further attempts upon our people across the frontier, and directly with due appreciation of this conduct, the passport order as it relates to Canada was revoked. We learn that the discontinued railway trains have again been restored and travel and traffic are now entirely uninterrupted between Canada and the United States.

Petroleum.

Among the many companies evidently founded on correct principles and conducted with prudence is the "N. Y. Philadelphia and Baltimore Consolidated Petroleum and Mining Company." It is working two wells of 350 barrels per day, and putting down more with every prospect of immense yields. While we have but a poor opinion of many of the schemes that are before the public for the production of petroleum, we have no idea but that the good companies will return large profits to their shareholders, and this we have every reason to believe is one of the best.

Book Notices.

ART OF SAW FILING.—By H. W. Holley.—John Wiley, N. Y. publisher.

That most useful instrument the saw, known in a hundred varieties, is the indispensable assistant of the Mechanic, and yet its principle of action, and the proper form of its teeth for the different kinds of work to which their cutting is applicable are but little understood. Mr. Holley in a neat little hand book illustrated by wood cuts, has explained the whole subject, and it should be in the hands of every person who has occasion to use this instrument.

MANUAL OF DRAFTING INSTRUMENTS AND OPERATIONS, designed as a text book and for self instruction.—By S. Edward Warren, C. E., Professor of Descriptive Geometry, &c., in the Rensselaer Polytechnic.—John Wiley N. Y., Publisher, octavo 115 p.p.

This is a beautifully printed work, and a most valuable text book. When we say it is more comprehensive, more intelligible and more useful than any work of its size with which we have any knowledge, we pay it a high but not an undeserved compliment.

American Railroad Journal.

Saturday, March 25, 1865.

Stock Exchange and Money Market.

The large decline in the price of gold as measured by the currency employed to purchase it, (for gold in fact has not fallen at all in the general market of the world,) has caused a lively sensation in financial circles, and is the subject of continual speculation by the press. All sorts of theories, all kinds of opinions and all varieties of suggestions are daily ventilated for the benefit of the public, but make no change in the current of events. We have recently seen an elaborate article in a daily paper to explain why prices do not go down with the fall of gold, and why they may not be expected to go down. But the writer does not explain the converse and complement of his theory, why prices should not go up when gold went up, as he is bound to do unless his rule does not work both ways, as rules of any value usually do. It is sheer nonsense, however, to undertake any such explanations as those referred to. Prices in inflated currencies will decline to gold prices as paper and gold assimilate, and though there may be exceptions while inflation lasts, the final tendency is certain. The exceptions only confirm the rule.

The desire expressed to have the return to specie payments a gradual one is natural enough, and not by any means improper. At the same time those who express it should also show some desire to meet the decline in the prices they ask for their stocks of goods on hand. For if they deprecate a return to the specie standard in order that they may still get 2 or 300 per cent. for their goods, as much for them now as when gold was approaching 300, we think they ask a little too much, and what they ask will not be granted by the public be it ever so indulgent. Nor do we think any combination of journalism will much alter the tendency of events. The public mind is fixed in the idea that the price of gold has been always too high. On the very strictest principles, if the old rule of currency circulation was a sound one, viz., that on one dollar of gold three dollars in paper might be safely set afloat, then in fact, the Government and the bank currency is not three times greater than the estimated quantity of gold in this country at this moment. But it is not concentrated anywhere in amounts enough to be at command, and thus paper money is redundant and redemption is impossible for the present. So the people have judged, while they never believed that the high premiums paid for gold were reasonable or justifiable. We have always contended that combinations, disloyal feeling and corrupt motives had much to do with the speculations in the commodity. In a letter lying before us from that well known banker and profound thinker, A. B. Johnson, Esq., of Utica, he says: "I wonder if those who thought the price of gold depended on the deterioration of our paper money are now satisfied of their mistake, though no doubt should the demand for gold make it rise again we should still hear repeated, the old song of the depreciation of paper money. What a man gets into his head by inculcation or otherwise you can hardly drive out with a sledge hammer." If gold continues to fall with the currency remaining in amount as it is, some interesting questions would arise. In the meantime we ask where is all this much abused United States currency? Where are all these legal tenders? Here in the commercial metropolis, here where all the financial power of the country concentrates or is delegated to representation, we see by the report of the 54 city associated banks made for the week ending March 18, that to redeem their circulation of $4,662,505, and deposits $174,479,367—total, $179,141,872, the only lawful available means at hand were specie, $22,256,596, and legal tenders about $33,645,014! Thus upon liquidation and settlement with their creditors and stockholders, but for these much despised legal tenders these institutions would find themselves in difficulty. This state of things is very suggestive. It demonstrates that so far as the Government issues are concerned, the rise and fall of gold has been entirely independent of that circumstance, and that legal tenders are not to be

found in places of deposit like banks, in sufficient quantities to pay more than one-third of their obligations. There are those who with considerable show of reason think this a fair conclusion. The Southern States now about to re-enter the Union are destitute of a sound currency, their paper has disappeared or is worthless. A very large amount of legal tenders will inevitably be required there, and be retained there on the resumption of business. The legal tenders will therefore become scarce in the loyal States, and be worth perhaps a premium as they several times have been, and appreciate to gold. Under these circumstances therefore, it may also be asked why should the Government issue any more stocks to be paid for the use of irredeemable bank paper, when it can issue its own which is so much more prized and so much safer. Why not better issue what it yet requires in legal tenders imperatively convertible after a year or two in stock, and thus save the interest in the interim. Will not the increase be a valuable aid to the business men of the South at the crisis of their return to the protection of the old flag? In this view of the subject, these inquiries are also important.

The absorption of our National securities on the continent of Europe continues large. It is asserted by a Philadelphia cotemporary, that of the original issue of $511,000,000 of the 5-20's, $409,000,000 are coupon bonds, and that of these $106,000,000 with coupons are held by firms in Frankfort, and $105,000,000 in Amsterdam. In these purchases the British capitalists have taken little or no part. On the contrary, there seems to have been a settled purpose to discredit all American securities. In the London Money Market *Review* of February 18, and it assumes to lead as a financial journal, we find the following (in one particular,) ignorant and unjust remark: "The debt of the United States is at present very large, and the amount of interest payable upon it, prodigious. *As matters now stand the sum annually receivable from taxation is insufficient to pay the interest.*" How such statements can be put forth by any respectable journalist we cannot conceive. Not only are the means received from taxes direct and indirect sufficient to pay the interest of the National debt, but more than sufficient. The Treasury has constantly a surplus of gold on hand for this purpose, and on several occasions had such a plethora, that it has paid the interest in advance several months before it was due. No nation in Europe has ever done this, or ever will.

We also notice the same unfriendly spirit in regard to other American securities. A combination was actually made to defeat the loan proposed by the Atlantic and Great Western Railway Company, because of the friendliness of its great promoter Mr. McHenry to the cause of the Union. Late advices assure us that vigorous efforts were made to prevent a realization on that loan which fortunately for the public, and the friends of the company was signally defeated, and the debt stands at 3 per cent. premium. While on this subject we take the liberty of extracting from a letter received within a few days past from Thomas W. Olcott, Esq., President of that well known and stable institution the Mechanics' and Farmers' Bank of Albany, a few powerful suggestions in regard to the future financial relations between Great Britain and the United States.

"Your money article of the 18th inst., is very suggestive and presents matter for grave consideration. England may yet receive from us, that aid which she volunteered to deny to us in anticipation of our wants and wishes. If she was staggered in her attempts to get cotton from the East to a degree that she was obliged to put up interest to the unprecedented rate of 9 per cent. when it was only 3½ at Hamburg; if through the stimulus of high prices she has on hand as is probable a full ordinary supply of cotton; if in addition to this we should through the restoration of peace within a few months throw upon her two or three millions of bales, and then call upon her for 100 millions of gold which she holds subject to sight draft from this country; if also in addition some of her timid and panic stricken citizens should send over a few millions for a more safe investment in the stocks of this country—if all this happens, and happen it may, who can estimate the dangers and terrors of the convulsion which awaits her?"

"And then bringing all the above resources to our aid, with the amazing product of our gold fields and our rapidly developing mineral wealth, with recuperated energies and a restored nationality, who can doubt, under the Divine blessing the future of the United States of North America?"

We commend these remarks of one of our wisest and most successful and deep thinking bankers, to the consideration of the Money Market *Review* and all who believe in it.

That all these speculations are not groundless is apparent from the tone of the London newspapers brought by the last steamer. The London *Times* of the 6th inst., considers a return of specie from England to this country, as "not anomalous," or in other meaning, improbable, under the circumstances, begun already perhaps by the recent arrival of $16,000 at Boston, and to be increased by the absorption of American securities abroad, and the sale of captured and liberated cotton. With regard to the much discussed question whether the 30 or 40,000 bales captured at Savannah are to be sold here, or shipped direct to England on Treasury account, we believe we are warranted in saying that it will be positively sold in this city. Without knowing or pretending to know the reasons of this determination it is not difficult to suppose them. Thus the expense of cartage and shipment on Government account, the freights, insurance, and commissions to agents in charge, the charges and commissions on the sale abroad, the reshipment of the proceeds with new freight charges and commissions, added to the delay of two voyages would probably influence the Secretary of the Treasury. If to these we add the possibility after the cotton arrived in England, of claims being made on it through its Courts of Justice by real or pretended English owners, or if parties who have made claims against the United States for seizure of their vessels and goods on the way to blockaded ports, should obtain injunctions against the funds realized from the sales of this cotton, there would arise an interminable delay before the decision of these Courts could be arrived at. It might take them as long as it has in the Thelluson case to find out to whom the proceeds shall go; these proceeds of five or six millions would be perhaps for years in the Bank of England, and if our Government remonstrated we should be told perhaps, it could not interfere in the course of justice any more than it did when we remonstrated against the continual violation of neutrality, and we were pointed to the Foreign Enlistment act, and the action of the Court as our only mode of redress. If any of these suppositions extend into the mind of the Secretary of the Treasury, we can well understand why he has deemed it best to sell the cotton here and make literally a clear thing of it. One thing is certain, that the very idea of shipments of cotton from the United States gives much apprehension in England. We notice in Ryland's Circular another quotation from this Journal on the subject, on which it comments as follows:

"What wonder if we hear of weakness in the Liverpool market? We anticipated a heavy fall in prices and advise our readers once more to exercise caution in their Liverpool and Lancashire transactions generally."

During the week we have quite a panic in the gold and stock market. It is quite an easy affair at any time. The currency has not been diminished in amount, in fact by the operations of the New National Banks, it has been actually increased. Yet gold has tumbled down to 155, and at this rate a paper dollar is worth about 68 cents, or about double what it was when gold was at its highest. We must lay then the rise and fall of gold at some other door than that of our inflated currency.

With the fall however, has come wild apprehensions of commercial ruin, and great efforts are made in influential quarters to stop the decline, at least until the speculators can save themselves. The Philadelphia *News* opposes this doctrine, and large numbers of persons here do so. Let the downward tendency says that journal "go on until its force is spent on the natural and proper victims." "Have not thousands of loyal people been ruined and rendered almost homeless by their devotion to the Government while the gold gamblers, and the speculators in provisions have grown to princely estates?" Now as the Secretarp of the Treasury has determined not to expand the currency another dollar, it is as idle to attempt to arrest the course of events, as it was in Dame Partington to keep back the Ocean with her broom. The public universally think that gold has been too high, and attribute its enormous rise to combinations of all kinds, not the least to those supported from treasonable motives. We all wish to see it fall to its proper level, whatever that may be whether 25 or 50 per cent. The stoppage of the fall by temporary expedients will do but little good, for consumers will buy as little as possible until a permanent rate is established. They will will not buy to save any speculator in gold or provisions or stocks, no matter how much argued with or implored. So we see no advantage whatever in laying anything on the track to stop the train of events. If the decline is gradual, we shall not seek to hurry it on. Let the laws of commerce, of finance and of political economy work out their own problems. It is very certain that as yet certain dealers in the necessities of life boldly hold on to the highest prices and do not care a pin for the public.

In this condition of panic it is not wonderful that good securities have been sacrificed, both by those who bought and held them for speculative purposes, and those who have held them in good faith. People throw their looking glasses out of the window when their houses take fire. But we think this plan a decided blunder. As the currency appreciates we come nearer to gold, and as

all payments come nearer to gold so will all companies, banks, railways and all monied associations become the stronger. Especially will railway property improve, for the dollars they receive for freights and passengers will double in value, while their outgoes will by the very same process be lessened one half. This is a simple and self evident proposition. A Bank now lending money gets but 3½ per cent interest. Restore specie payments and it will get seven in specie. We therefore think the panic in this respect is a perfectly idle one.

One of the vagaries of the market is the sudden rise in Exchange which has been as low as 106 for good merchant bills. We are not afraid to hazard the opinion that those who are buying at an advance are throwing away their money. When the London *Times* predicts a flow of specie westward, when six millions worth of cotton are likely to be converted into bills, and when we may count on large continuous shipments of the same article Eastward, we think that exchange is not likely long to be scarce or high.

Our private advices from Washington assure us that the Govrnment officials are confident of a very sudden cessation of hostilities by the voluntary or forced submission of the rebel authorities, exhausted as they are in men and money, and are unsupported by their fugitive congress which will be sorely puzzled to find either their states or constituencies except under the Federal flag. To this inevitable conclusion we must come, and we should shape our movements accordingly. A prolongation of the war is apparently impossible, and the threats of guerillas are a baseless reliance for permanent existence, as all history teaches. Napoleon the 1st was not driven out of Spain by guerillas but by the phalanx of Wellington, and his misfortunes and defects elsewhere. It is well known he always looked upon their operations with contempt, and Napier the historian of the Peninsular war tells us so.

Those of our readers who wish to follow accurately the fluctuations of the market since our last issue, will find them appended. The prices of all securities have been affected as will be seen but as we believe with a wholesome reaction near at hand.

The subscriptions to the 7-30s continue to be made on a large scale under the active management of Jay Cooke & Co., who have by an excellent arrangement with Wells Fargo & Co., prepared for their extensive distribution in the gold producing States and territories on the Pacific. There can be but little doubt that our miners there will largely invest in their securities, since they will pay in gold, and get them at that advantage, while beyond all question both the principal and interest by the resumption of specie payments will be repaid to them in the equivalent at no distant day.

The value of the exports from New York the week ending 26th March, exclusive of specie was $3,608,485, and the specie was but a trifling sum.

The balance in the Sub Treasury on Tuesday, was $2,629,007.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Commerce of Toledo.

Toledo is by no means a city of recent date. It has had a place on the map for the full third part of a century. The western tide of immigration, however, had given it the "go-bye," and as a consequence its growth was not demonstrative. In 1840 it had only 1,222 inhabitants, and in 1850, only 3,829.

But now it became from its geographical position a great railroad entrepot, and having also water connection by river and canal with the lakes and the Ohio, its commercial relations began to extend. The immigration which had passed it on its westward course had in the meanwhile laid the foundations of a vast empire, producing little but agricultural staples and wanting all the products of the anvil and loom. The interchange of these, while advantageous to the west as well as east, was no less valuable to the interlying settlements and especially to those on the great lines of transit. Toledo was one of these and soon emerged from its obscurity, and so rapidly did it expand that the census of 1860, found it with a population numbering 13,768 souls. The report of its commerce for the year 1864, which it is the purpose of this article to illustrate, claims that the city at the present time contains no less than 20,000.

Toledo is situated on the Maumee river, which five miles below the city enters the bay of the same name, an arm of Lake Erie. It is thus accessible from the lake, and is in fact one of the principal ports of its southern coast. Four miles above the city, the canals connecting it with Cincinnati and Evansville, come into the river and make Toledo their lake terminus. Four or five railroads also centre here, coming from the four cardinal points and connecting the port with all the great commercial centres of the Union and Canada. Thus Toledo is abundantly supplied with avenues, and as the result will prove is making them tributary to its own aggrandizement.

Toledo, says the report, is rapidly advancing toward a position among cities of the first class. In the grain trade she has already attained that distinction, and enjoys the reputation of being second only to Chicago, as a grain receiving and shipping point. The population of our city is estimated at over 20,000 and the rapidity with which it is growing, even at the present time, has hardly been exceeded by any of the cities of the West. Toledo has also an extensive provision and grocery trade, and the dry goods trade is becoming a prominent interest. The valuable timber trade of the Maumee valley has also its outlet at Toledo, and even from this distant part of the country New York derives a large part of its ship timber. For several years past oak ship timber has been exported to the ocean ports, and is highly prized by builders. The wholesale trade of the port becomes more and more important, keeping up with the development of the country. The retail trade is also rapidly increasing, and the merchants are considered as generally prosperous.

With these preliminary remarks we now proceed to tabulate the commercial results as shown in the "*Toledo Blade's seventh annual statement of the Trade and Commerce of Toledo for the year ending December* 31, 1864."

And first as to the aggregates, and then the details so far as may be compatible with the dimensions of a current article for the JOURNAL. The total value of imports and exports for the year 1864 was as shown in the following summary:

	Imports.	Exports.
Flour	$8,419,792	$8,304,703
Wheat	12,664,912	11,589,700
Corn	1,541,160	887 892
Oats	308,892	299,106
Barley	104,653	56,000
Rye	44,561	31,153
	$23,083,970	$22,168,554
Live stock	8,282,162	3,975,500
Provisions	13,819,896	14,059,896
Lumber and staves	3,372,965	4,332,566
Salt	180,500	195,200
Other items by lake	10,250,000	9,450.000
" canal	2,325,450	2,560,320
" Railroad.	24,865,423	29,163,722
Total value 1864	$81,180,366	$95,905,758
" 1860	46,727,754	52,248,627

The following statement shows the amount (bushels) of flour and grain received and shipped during the year:

	Received.	Shipped.
Flour (reduced to wheat)	5,262,370	5,178,960
Wheat	7,237,093	6,622,604
Corn	1,041,160	788,892
Oats	454,254	439,862
Rye	89,435	27,658
Barley	74,681	.....
Total, bushels	14,108,993	13,057,976
Consumed at the port		188,681
On hand Jan. 1, 1865		862,336

The table annexed exhibits the amount of flour and grain received by rail, canal and lake etc:

	Railroad.	Canal.	Lake.	Total.
Flour, bbls.	811,344	241,130	.....	1,052,474
Wheat, bu.	5.314,342	1,822,750	100,000	7,237,093
Corn, bush.	769,945	246,215	25,000	1,041,160
Oats, "	417,192	16,562	20,500	454,254
Rye, "	89,435	.....	.....	89,435
Barley, bu.	29,546	21,461	23,674	74,681

The amounts shipped were as follows:

	Railroad.	Lake.	Total.
Flour, bbls.	122,108	913,684	1,085,792
Wheat, bush.	309.220	6,313,384	6,622,604
Corn, "	45,336	743,556	788,892
Oats, "	168,222	271,640	439,862
Rye, "	9,778	17,880	27,658

It may here be remarked that the report gives in full the quantities of each article received and shipped in each year from 1860, and also the prices of each bi-weekly for several years. The details would occupy too much of our space, and in the nature of things it would not be possible to condense such information.

The receipts of otner principal articles are given as follows:

Pork, barrels	160,826
Bacon, lbs.	23,499,712
Dressed Hogs, lbs	12,050,278
Lard, barrels.	70,292
Beef, "	64,680
Butter, pkgs.	14,543
Wool, lbs.	4,806,486
Ashes, casks	3,813
Tobacco, hhds	42,404
High wines, bbls	76,870
Cotton, bales.	12,548
Live stock—Cattle	4,661
" Hogs	2,357
" Sheep	234
Hides, lbs	13,095,198
Sheep Pelts	700,000
Furs (various)	77,275
Lumber Pine, feet	55,799,200
" Black Walnut, feet	24,828,586
Staves	8,756,639
Lath	15,275,000
Shingles	18,149,000
Salt	50,659

The amounts of the above shipped from the port are given only in a few instances, and these we recapitulate as follows:

Wool, lbs.	4,806,486
Cotton, bales.	12,548
Live stock—Cattle	84,471
" Hogs	229,645
" Sheep	233,599
Hides, lbs	12,697,313
Lumber pine, feet	18,223,713
" Black Walnut, feet	26,750,728

The chief reason given for the omission to report shipments, is that the greater portion is shipped as third or fourth class freight instead of by name.

The rates of freight for grain by lake to Buffalo during the season were as follows:

April	3¼@6	3½@6
May	3 @4	3½@4½
June	4 @6	4 @6½
July	4¾@5¾	5 @6
August	4¾@5½	5. @6
September	4½@5	4½@5
October	4 @7¼	4 @7¼
November	7 @10	7½@12½

To Oswego the rates averaged twice as much as to Buffalo. Owing to the high price of gold and Canada money, however, the business by vessels was very light. No other currency was received for tolls on the Welland Canal.

The facilities at Toledo for elevating and storing grain, have during the past few years been vastly extended, and it has now storage for 3,000,000 bushels, and can receive or deliver 500,000 bushels daily. The principal grain elevators at the port are named below:

Names of Elevators.	Capacity. Storage.	Elevating.
Toledo and Wabash, No. 1	246,000	60,000
" " No. 2	445,000	60,000
" " No. 3	761,000	60,000
Canal, King Brothers	100,000	30,000
Michigan Southern, No. 1	200,000	30,000
" " No. 2	300,000	60,000
Canal, Walford & Co	250,000	40,000
Dayton and Michigan	120,000	30,000
Canal, Hopkins & Griffith	60,000	20,000
Canal, Young & Backus	150,000	30,000
Total	2,632,000	420,000

The Lake Commerce of Toledo as indicated by the Custom House returns of tonnage entered and cleared during the season of navigation is shown in the following tables—

Arrivals for each quarter:

Quarters.	Number.	Tonnage.	Crews.
April—June	702	171,199	6,720
July—September	951	244,043	8,978
October—December	530	147,108	5,126
Arrivals	2,183	562,350	20,824

Clearances for each quarter:

Quarters.	Number.	Tonnage.	Crews.
April—June	717	171,514	6,764
July—September	925	254,890	9,038
October—December	527	148,660	5,065
Clearances	2,169	575,094	20,867
T'l arrivals & clearan's.	4,352	1,139,414	41,691

The foreign commerce of the port consisted of —goods imported $1,650 and produce exported $224,700—the whole free under the Reciprocity Treaty.

The following table compares the receipts of flour and grain at three principal western Lake ports for the year 1864:

	Toledo.	Chcicago.	Milwaukee.
Flour, bbls..	1,052,474	1,141,791	280,874
Wheat, bush..	7,237,093	11,257,196	9,120,255
Cron, " ..	1,041,160	13,623,087	473,309
Oats, " ..	454,254	13,653,941	1,051,953
Rye, " ..	39,435	969,116	89,459
Barley, " ..	74,681	740,446	198,038
Total in bush.	14,108,993	45,952,741	12,337,679

The total bushelage—reducing the flour to wheat at 5 barrels to the barrel—is shown in the annexed table for the last four years:

Years.	Toledo.	Chicago.	Milwaukee.
1861	19,593,565	54.093,219	18,778,627
1862	21,518,065	57,558,950	19,104,749
1863	14,452,719	56.079,903	16,845,699
1864	14,108,993	45,952,741	12,337,679
Total	69,683,342	213,684,813	67,066,754
Average	17,420,835	53,421,203	16,766,688

Wealth and Resources of Vermont.

The Green Mountain State as it is called, has an area of 10,212 square miles, or 6,535,680 acres. Its length from north to south is about 157 miles. Its greatest breadth is about 90 miles. It is intersected its whole length by the Green Mountains which divide the streams that flow into the Connecticut River on the east, from those which flow into Lake Champlain on the west. Its water and mountain scenery is of the most splendid kind, attracting annually large numbers of travelers.

Its first constitution was formed in 1777. Its present one in 1793, and though simple in form and ultra democratic in its character, has moulded into homogeneity one of the most stable and industrious populations in the Union. Its earliest settlements date back to the year 1724. Its population in 1790 was 85,416, and in 1860 it was 315,098. In the same year the value of the farm lands was $91,511,673, and of the implements of husbandry used upon them $3,554,728.

The live stock consisted of 67,250 horses, 35 asses and mules, 171,698 milch cows, 42,280 working oxen, 149,359 other cattle, 721,993 sheep, and 49,433 swine, valued altogether at $15,884,393.

The products of animals was as follows: Butter, 15,681,834 lbs., cheese, 8,077,689 lbs., wool, 3,975,544 lbs., wax and honey, 212,905 lbs., while the value of slaughtered animals was $2,549,001.

The cereal crops were: Wheat, 431,127 bushels, rye, 130,976 bushels, Indian corn, 1,463,020 bushels, oats 3,511,605 bushels, barley 75,282 bushels, and buckwheat 215,821 bushels. The commercial crops were: Tobacco, 12,153 lbs., hops, 631,641 lbs., and flax, 5,107 lbs.

The miscellaneous crops were returned as follows:

Grass seed, bushels	11,420
Flax " "	831
Maple sugar lbs.	9,819,939
Peas and beans, bushels	68,812
Irish potatoes "	5,147,908
Sweet " "	628
Wine, gallons	2,923
Hay, tons	919,666
Clover seed, bushels	2,444

The orchard products were of the value of $198,427, showing a considerable falling off from the year 1850, and the products of market gardens were valued at $24,792, showing an increase of 25 per cent. on the valuation of 1850.

The number of manufacturing establishments in 1860 was [illegible] nearly 300 less than in 1850, while [illegible] them was $9,500,000, four millions *more* than in the former year. The cost of raw material used was $8,110,000 about double what it was in 1850. The number of operatives employed 10,800, while the value of the fabrics was $16,000,000, or about double their value as raw materials.

The value of the principal articles of production were as follows:

Woollen and mixed goods	$2,550,000
Flour and meal	1,659,898
Lumber	1,065,886
Leather	1,000,153
Steam engines and machinery	493,836
Boots and shoes	440.366
Iron castings	296,430
Furniture	268.735
Clothing	250.669
Agricultural implements	157,647
Printing	99,701
Iron, bar and solid (1,100 tons)	68,250
" pig (2,156 tons)	61,940
Musical instruments	57,960
Sewing machines (8,500)	42,000
Jewelry	37,950
Gas	15,215
Cotton goods	357,430

The value of its foreign imports $2,731,857, and its exports $783,702.

The total of its tonnage cleared and entered was 52,572 tons, of which the foreign was 17,173 tons. The tonnage owned in the State was 7,744, of which 4,492 were in steamers. Its foreign trade is with the Canadas.

The number of banks in 1860 was 44, with a capital of $3,872,642. There were also 10 savings banks, the deposits in which were $1,386,259. There are ten railways which cost $23,339,215, the total length being 526 miles. The system was that of opening the trade of the Connecticut Valley, and of Lake Champlain and of Canada, by a series of direct and transverse connections with Canada, New York, Boston and Portland.

The longest single line finished is 119½ miles between Rutland and Salem. The next is the Connecticut and Passumpsic which at present terminates north at Newport on Lake Memphramagog a port of entry, but is graded to the Canada line some 16 miles further. Vermont has three short canals, altogether not a mile in length originally intended to improve the navigation of the Connecticut River, but not now in use. At an early day boats went up from Springfield almost to the upper waters of the Connecticut, but the railways have superseded them. The State debt was small before the war, but $192,438; but the rebellion has largely increased it.

The future of Vermont will depend much on the re-establishment of the trade with Canada, which the cessation of the reciprocity treaty at the end of the year's notice will materially impair. But there is not much doubt it will be restored if wise counsels prevail. The project of a ship canal by the way of Lake Champlain between the St. Lawrence and the Hudson is still cherished both in the Canadas and this State. The widening and deepening of the Chambly and the Champlain Canals, both short, with but slight summits to overcome, will throw a large part of the trade of the lakes into the Hudson.

Surveys, calculations and reports, both American and Canadian have determined the feasibility and the cheapness of the work. It remains to be seen how soon circumstances will enable it to be undertaken.

Locomotive Express.

American enterprise is always busy. One of the latest novelties as well as one of the most useful arrangements of the day, grown out of the production of petroleum, is the establishment of a special Express for the transportation of stationary and portable engines to the oil regions. This is a large stride from the original idea of package Express, and is a proof that the world moves, and moves fast when American talent and capital apply their lever. Kassox's advertisement in another column, is proof of what we say.

Jerome, Riggs & Co.

This well known House is acting as the Government agent for the sale of the 7-30s, which continue to attract great attention. The subscriptions are going on by millions every week, and the people are evidently determined to place their surplus funds in this loan. Mr. Jerome is not only a capitalist like his associate Mr. Riggs, but has during the present war been lavish in his expenditures in the support of patriotic measures. We know of his having paid $20,000 at one time for a great public demonstration by which the Government and the Union were nobly sustained. It gives us pleasure to speak of such men and such Bankers.

Gilbert & Entz.

We publish in another place the card of this firm engaged in the business of Bankers and Brokers, No. 4 Wall street. These gentlemen are eminently qualified for their undertaking; Mr. Gilbert was lately Paying Teller of the Bank of the Republic, and Mr. Entz comes from the house of Winslow, Lanier & Co., one of our best schools of training in financial affairs. With these advantages the house may justly claim the confidence of the public, and will doubtless receive it.

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending March 12, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$27,693 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	79,189 00
Total	$110,006 00
Corresponding week, 1864	117,335 00
Decrease	$7,329 00

The earnings of the Chicago and Rock Island Railroad for the second week in March, 1865, were $57.815 00
Corresponding week of previous year.. 38,826 00

Increase $18,989 00

The earnings of the Chicago and Northwestern Railway for the 2d week of March, are $111,786 49
Corresponding week of 1864 87,098 09

Increase $24,688 40

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending March 14th, were:

	1865.	1864.
Passengers	$2,788 26	$2,517 72
Freight	3,429 20	5,998 08
Express	162 80	104 16
Mails	296 58	296 58
Total	$6,676 84	$8,916 54

Receipts from January 1 to March 14:

1865	$95,103 93
1864	82,089 06
Increase	$13,014 87

Railroad Earnings--Monthly.

The earnings of the St. Louis, Alton and Terre Haute Railroad for Feb., 1865, were..$153,902 72
Corresponding month of previous year 147,485 00

Increase $6,417 72

The earnings of the Milwaukee and Prairie du Chien Railroad for the month of Feb., 1865, were $74,283 18
Corresponding month of previous year 115,135 20

Decrease $40,852 02

The business of the Illinois Central Railroad for the month of February, 1865:

LAND DEPARTMENT.

Acres Construction Lands Sold	15,362.10 for	$173,984 19
Acres Int. Fund Lands sold	642.22 for	9,865 21
Acres Free Lands sold	3,569.88 for	41,489 82
Total sales during month of Feb., 1865	19,574.20 for	$225,339 22
To which add Town Lot Sales		3,623 30
Total of all		$228,962 52
Cash collected in Feb		$238,797 29

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$198,065 75
do.	Freight	208,130 95
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	6,000 00
Total Receipts in month of Feb., 1865		$522,555 03
Total Receipts in month of Feb., 1864		416,587 86
Increase		$105,967 17

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of February, compared with the same period last year, were as follows, viz:

	1865.	1864.
Freight	$417,339 80	$293,323 16
Passengers	252,289 25	140,600 10
Express matter	9,449 89	5,000 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous	2,750 47	3,395 47
Total	$696,737 74	$457,227 06
Increase		$239,510 68

Earnings from Jan. 1, to Feb. 28:

1865	$1,380,997 37
1864	747,902 97
Increase	663,084 40

Interest and Dividends.

The Pittsburg, Fort Wayne and Chicago Railroad Company have declared a quarterly dividend of two and one-half per cent., free of tax, payable April 17th.

The Philadelphia, Wilmington and Baltimore Railroad have declared a dividend of 5 per cent., payable April 1.

The interest coupons of the first mortgage bonds of the Chicago and Great Eastern Railroad Company due April 1, will be paid on and after that date by Messrs. Schuchardt & Gebhard.

The coupons of the Chicago and Alton Railroad Income bonds will be paid April 1st, less government tax, by M. K. Jesup & Co.; also the coupons of the St. Louis, Jacksonville and Chicago Railroad bonds, free of tax.

☞ The opening of the Suez Canal to navigation through its entire length, from the Red Sea to the Mediterranean, has been officially announced to all the Chambers of Commerce in Europe by M. Lesseps, President and Superintendent.

Accident Assurance.

The business of assurance against accidents, though a new one in this country, has been practised for years in Europe. The first company having in view the specific object of insuring against bodily injury or accidental death, was established in England, by act of parliament, in the year 1848. A second one, with similar powers, was established in the following year. From small beginnings, the oldest of these companies has grown into business and extent, till now its capital is £1,000,000, or five million dollars. Such is the natural growth of an enterprise which meets a public need, and commends itself to the sagacity and good judgment of the people.

Although in previous years several charters were obtained, contemplating a similar business, the first company of this description organized and doing a successful business in the United States, is the TRAVELERS INSURANCE COMPANY of Hartford, incorporated under a charter granted by the Connecticut Legislature of 1863. It has been in active operation, however, but about eight months, having waited to secure some important amendments to its charter by the legislature of 1864. During these eight months, about *ten thousand* policies have been issued.

Organizations for mutual relief, in different forms, have always been popular to a certain extent, whether in the form of Union Trading Associations, Orders of Free Masons, Odd Fellows, or Sons of Temperance, Firemen's Benevolent Associations, Mutual Fire and Life Insurance Companies, and the like. The principle in all cases is the same; by the payment of a small sum at stated intervals to secure pecuniary reimbursement in the case of a heavy loss. The same arguments which have induced the public to insure so largely against losses by fire, the perils of the sea, or to obtain the payment of a stated sum in case of death, apply with equal force in case of insurance against disabling accidents of whatever kind.

A policy of insurance will of course do nothing to prevent the occurrence of an accident; but by its weekly compensation, helps to bear the necessary expense consequent upon an accident which disables the policy holder from attending to his usual occupation; and in case of death resulting, the widow and children are provided for. This plan especially commends itself to men of moderate means and small income. The mechanic, whose pay is measured by the number of days he works, can easily lay aside from his earnings the small sum necessary to procure a policy; but, being suddenly disabled by a broken leg, or other casualty, the relief furnished is invaluable—he finds his wages are paid by the company, instead of his employers, and his mind is not harrassed with the sense of running deeply in debt, and losing time needed for the support of his family; while, if death ensues, the handsome sum secured leaves his family better provided for, pecuniarily, than they might have been by years of small savings.

The liability of persons to accident, in whatever occupation or condition in life, is shown by too many instances to need proof. Cases are not rare, even in this state, where a man has passed safely through three years of active service in the army, participating in numberless marches, skirmishes and battles without a scratch, and returned home to be killed or maimed by an accident occurring in the workshop, on the farm, or on the railroad.

Without further argument upon the propriety or necessity of Accident Assurance, let us briefly state the method by which insurance is effected in the Travelers. The risks taken are divided into three classes: ordinary, special and hazardous, the former including the class of persons least liable to serious accident. General Accident policies cover every kind of risk by accident, are issued for terms of one to twelve months, renewable on payment of the usual premium under such a policy; a premium of $3 secures to the family of the assured $1,000 in case of *fatal* accident, or $5 a week in case of disablement—or a premium of $5 secures both. To secure $15 a week compensation, and $3,000 in case of death, the annual premium is $15; to secure $25 a week compensation, and $5,000 in case of death, the premium is $25.

To railway and steamboat travelers, travelers' risks are issued for periods of from one to twelve months, insuring only against accidents while traveling. The annual premium of $2.50 secures the payment of $5 per week compensation, in case of disablement, together with the sum of $1,000 in case of death. Larger risks in proportion.

Policy tickets, for travelers, are also issued, hich are sold at railroad stations only, covering all risks for accidents to the conveyance by which the purchaser may at the time be traveling, for periods of from one to thirty days. The premium is very small—for ten cents only, a risk is taken for one day, or $2 for thirty days, securing $15 per week compensation or the sum of $3,000 in the event of a fatal accident.

The company have agents in all the leading cities and towns.

Mr. Edgar Forman is the General Agent for the City and County of New York, and policies are issued at the office No. 161 Fulton street, corner of Broadway.

Philadelphia, Wilmington and Baltimore Railroad.

We regret to learn that the able and highly successful President of this Company, Mr. Samuel M. Felton, has, from long continued ill-health, superinduced, as is supposed, from the arduous duties of his office during the last three or four years, felt compelled to resign his place as President of the Company, to take effect April 15. Mr. Felton, as an engineer and railroad manager, has long stood at the very head of railroad men in this country. His place in the Wilmington road has been sup-

plied by the election of Mr. Hinckley, of Lowell, Mass., a gentleman said to possess many requisites for the office.

Northern Central Railway.

The earnings of this road for the fiscal year ending December 31, 1864, were as follows:

From freight	$1,494,555 25
" passengers	752,936 82
" U. S. mails	26,100 00
" express	60,697 41
" United States transportation	586,907 86
" rents	15,104 79
" individuals and companies	59,210 81
" all other sources	56,156 71
	$3,051,669 15

The expenses were:

Conducting transp	$524,428 42	
Motive power	552,240 78	
Maintenance of cars	155,857 00	
" way	703,401 19	
General expenses	30,355 13	
		1,966,282 52
Balance of earnings		$1,085,386 63

Disbursed as follows:

Interest on funded debt and exchange	$295,613 58	
Dividend on capital stock	345,880 60	
Taxes on capital stock and dividend	33,911 54	
Discount & abatements	10,249 39	
Sinking funds	55,561 55	
Dividend on Wrightsville Branch	10,911 82	
		752,078 48
Leaving a net revenue of		$333,308 15

The earnings of the Elmira Division were:

From passengers	$192,523 53
" freight	284,923 61
" mails	11,550 00
" express	14,610 00
" U. S. transportation	135,030 65
" other sources	17,880 49
	$656,518 28

The expenses were:

Conducting transportat'n	$110,121 92	
Motive power	158,778 60	
Maintenance of cars	80,776 28	
" way	297,424 70	
General expenses	15,675 82	
Rental	165,000 00	
		777,777 32
Showing a loss of		$121,259 04

The receipts of the Shamokin Division were:

From passengers	$11,340 55
" freight	197,307 48
" mails, express, etc	17,669 87
	$226,317 90

The expenses were:

Conducting transportation	$31,260 78	
Motive power	82,553 76	
Maintenance of cars	9,704 26	
" way	40,720 55	
General expenses	4,588 14	
Rental	74,358 95	
		193,186 44
Showing a net gain of		$33,131 46

By adding the net gain of the Shamokin Division to that of the Main Line and deducting the loss on the Elmira Division, we have a net profit on the entire operations of the road of $245,180 57, thus showing a net revenue on the capital stock paid in, (after paying working expenses, interest on the funded debt and instalments on sinking funds,) of about eighteen *per cent.*

The working expenses have been sixty-four and three-fourths *per cent.* of the receipts; this might be reduced by deducting expenses which are extraordinary, but as it will be necessary to continue like expenses for some time, it has been thought best to consider this class of expenditure as a part of the ordinary or working expenses.

In accordance with the resolution of the stockholders, the capital stock of the company has been increased one hundred *per cent.* We have called in upon this stock, $1,084,860, and have expended on the second track $620,394 41.

There has been added to the equipment 12 locomotives, 209 house cars, 200 gondolas, 8 passenger cars, and 200 coal cars, at a cost of $630,918 14, to the payment of which, $245,180 57, the unappropriated balance of this year's earnings have been applied, and the remainder, $385,737 57, has been taken from the funds acquired by the increase of the capital stock, which must be returned for the use of the second track. This can readily be done without affecting the continued payment of the two *per cent.* quarterly dividend.

The coal business of the road has necessarily been very much restricted during the past year—the tonnage to Baltimore being but 75,000 tons as against 107,000 tons in 1863. This instead of falling off, would certainly have very much increased—perhaps 100 *per cent.*—had it not been that the demands on us on account of Government transportation of troops and supplies interfered.

The impression is prevalent, that the continued success of your road is dependent to a great extent on the continuation of the war, or upon the patronage of the United States Government. This is a mistake. The receipts from coal alone, (had we been excluded from Government patronage,) would have more than counterbalanced the revenue derived from United States business; but being compelled to carry freight for the Government for one-third less than the rates of 1861, and passengers at the same reduction, to the exclusion of the present rates of all other roads that are not used for military purposes, is severe, and will account to a very great extent for the percentage of the working expenses.

The work on the double track between York and Baltimore has been progressing favorably during the year. Eighteen miles have been completed, making twenty-five miles now in use. The balance is almost entirely graded and ballasted, and will be completed during the early part of the summer. The grading for the double track between Dauphin and Sunbury, is partially completed, and we hope to have the track laid between these points during the present year. When this work is finished it will permit a more economical working of the road, and enable us to take freight to Baltimore which has been forced in other directions by our inability to carry it on a single track.

We are glad to be able to state that the difficulties which have so long existed between this company and the City of Baltimore, are likely soon to be adjusted. The Committee of the Board have lately had several interviews with the Mayor and Finance Committee of the city in reference to the matter, and have agreed upon a settlement, which will be submitted to the City Councils for their approval. By this adjustment this company is to receive from the city the right to extend their road through the city to tide water at Canton, and also to change the route of the present line to Calvert Station, from a point on the line of the Canton Extension, thus avoiding the heavy grade of the present track in the city, which has always been a source of serious annoyance, and very great expense; and for this right, and the claim held by the city, we agree to pay $22,000 in cash, and $300,000 in bonds of this company. The city retaining her four thousand shares of capital stock.

We have had during the present year several offers from different parties, to lease the Shamokin coal lands now controlled by this company. But it has been our desire to retain the power to control the route which the coal of this region should take to market. It has been agreed upon to lease these lands to a company, which shall be owned and controlled by the stockholders of the Northern Central Railway Company. The details of this arrangement have been referred to a committee. That committee has the subject now under consideration, and will be ready to carry out the proposition as soon as the necessary legislation can be obtained. This we think will require but a short time, and we hope to be enabled to commence the development of the lands early this season.

From the reports we have from Mining Engineers and other experienced persons who are familiar with the property, we have every reason to expect that, when these lands are developed, the receipts, both of the Shamokin Division and our main line, will be very much increased.

We carried during the year 1,085,043 passengers. The large amount of money expended in the improvement of the road, has reduced the liability to accidents.

It is gratifying to us to be able to assure you that the main line of your road is in excellent condition, equalled to and not excelled by any road in the country. But to make it attractive, particularly to the local trade, which is the most desirable, it will be necessary to expend considerable money in the erection of suitable station houses at all stations on the line.

Another improvement which is necessary, and which we hope to accomplish soon, is a better connection with the Cumberland Valley Bridge at Harrisburg, to enable us to avoid the delay now necessary in transferring the trains from our road to Harrisburg, and to avoid the necessity of re-crossing the river. A proper connection with that bridge, and the right from the Schuylkill and Susquehanna Railroad, and the Pennsylvania Railroad, to use their tracks between Harrisburg and Dauphin, would save nearly an hour in the running time of the road.

The operations of the Shamokin Division during the year have been very satisfactory. The net revenue derived therefrom, as previously stated, (after paying expenses and rental) being $33,131 46, or about 4 per cent. on the capital stock of that road.

The results from operating the Elmira Division have not been so good. The condition of that road was referred to in the Report of the General Superintendent last year, who stated that it would require the entire receipts (after paying rental) to put it in good condition. We have found it necessary this year to exceed that sum, and have expended $121,000 additional in its improvements; a like expenditure will be required during the present year, when we hope to have it in good condition. We believe the trade from the Northwest is sufficient at all times to make that road profitable—independent of the advantage it is to this company as a feeder—and the power which it gives us to attract trade to Baltimore, which would otherwise go to New York.

Compared with the previous year, the gross earnings show an increase of $744,220 85; with an increase in expenses of $279,415 11—making the increase in net earnings, $464,805 74. The expenses were 64.6 per cent of the earnings—a reduction of 8.5 per cent.

The passenger business has increased $160,260 32; the freight business, $230,994 35.

During the year there have been transported northward 327,420 passengers, travelling an average distance of 40.4 miles; and southward 276,221, an average distance of 39.5 miles. The number of local passengers moved northward was 198,490; and southward, 156,057—an increase of 77,701; and to and from connecting roads 247,857—an increase of 53,151. The whole number of passengers carried was 742,117, (exclusive of soldiers) travelling 31,881,385 miles.

The number of tons of through freight moved northward was 1,611; do., southward 94,581;

local freight and connecting roads 651,706—total 747,898, a decrease of 14,837 tons. The reduction in tonnage is altogether in coal, amounting to 47,874 tons. The increase in local and through tonnage, other than coal, being 33,037 tons.

The engine mileage during the year was 1,099,848, at a cost of $127,897 58 for repairs; $163,135 55 for fuel: and $25,766 16 for stores. An average per mile for repairs of 11.7 cents.; for fuel, 14.8 cents; and for stores, 2.3 cents—total 28.8 cents per mile run.

The company have 85 locomotives—60 on the main line, 18 on the Elmira, and 7 on the Shamokin divisions. Twelve passenger and ten freight engines have been purchased during the year. Deducting the freight engines loaned to leased roads, the freight equipment for main line has been increased four engines.

The car equipment on main line and leased roads consists of 47 passenger, 14 baggage and 9 express cars; 1,189 freight, 2,132 coal, 130 truck, 3 drover, 9 tool, 6 caboose, and 37 maintenance of way cars—making a total in freight and roadway service of 3,506. The equipment added during the year was; 8 passenger, 2 baggage, 409 freight and 200 coal cars. There have been renewed: 8 passenger, 2 baggage, 40 freight, 123 coal and 3 express cars. Two passenger cars have been changed to baggage cars.

There have been used in repairs of track and renewals, 352 tons new rails, 4,990 re-rolled rails, 83,119 cross-ties, 14,673 chairs, and 147,994 lbs. spike.

The sidings have been increased in length 11,162 miles.

The receipts and expenditures of the company during the year have been as follows:

Receipts:	
Balance cash assets, Dec. 31, 1863..	$260,974 45
Earnings Main line and branch	3,025,491 52
" Shamokin division	226,317 90
" Elmira "	656,518 28

	$5,280,389 78

The total number of passengers carried on the Elmira division was 117,266, of which 63,967 went north, and 58,319 south—equivalent number of through passengers, 81,755.

The number of tons of freight moved was 170,081 viz: through north, 82,099; do., south, 89,595; local, 48,837. Total mileage of freight 10,831,514.

The mileage of engines was 308,770, at a cost of $41,278 23 for repairs, $41,340 04 for fuel, and $7,379 08 for stores, or 29.24 cents per mile run.

The number of engines owned by the road is 16. The car equipment is included in the statement of Main line.

In the twenty months past, 2,660 tons of rails, 51,399 cross-ties, 18,526 chairs, 125,087 lbs. spike have been renewed, and 1,103 feet of bridging rebuilt. The sidings have been lengthened 15,527 feet and are still too short for the business of the road.

The number of passengers carried on the Shamokin division was 21,190, of which 10,769 went north, and 10,421 south; of these 2,040 were through, and 19,450 way passengers.

The number of tons of freight moved was 402,883, viz: local east, 179,489; do. west, 222,062; through 1,332. Total mileage of freight 4,013,459.

The engine mileage was 87,070, at a cost per mile of 8.2 cents for repairs, 14.1 cents for fuel, 2.4 cents for stores—total 24.7 cents per mile.

The engine equipment is five, the cars are included in statement of Main line.

The condition of the road has been fully maintained. 179 tons of rails, 6,363 cross-ties, 397 chairs, and 4,500 lbs. of spike have been used.

Pork Packing in the West.

The packing season for 1864–'65, has been shorter than usual, and the accounts are all made up. From these we announce a continued decrease in the totals, owing to the partial failure of the corn crops for the two last years. Not only is there a falling off at the packing places, but the amount of meat cured by farmers for their own use, and by storekeepers at small places, has been much less than in average years. The number of hogs in the country is also diminished, and hence the supply of pork for summer use will be light.

The returns by States for the years 1863–'64, and 1864–'65 aggregate as follows:

	1863–'64.	1864–'65.
Ohio	621,935	498,852
Illinois	1,290,490	985,784
Iowa.....	347,431	176,807
Kentucky	126,019	118,267
Indiana	899,197	251,287
Wisconsin	160,076	121,128
Missouri	383,736	270,654
Total	4,828,884	2,422,779
	2,422,779	
Decrease in 1864–'65.....	906,105	

—or about 27¼ per centum.

The average weight of hogs and the yield of lard show a light average increase, though this was not uniform, for in Illinois and Missouri there is a falling off in these respects; but an increase in all the other States. The comparison by States is as follows:

	—Average Weight.—		—Yield of Lard.—	
	1863–'64.	1864–'65.	1863–'64.	'64–'65.
Ohio.....	196⅞	210¼	22⅛	26
Indiana...	182½	201¼	19⅛	22½
Illinois ...	189¼	185⅝	21⅛	20⅛
Kentucky .	182	208	21	28¾
Missouri ..	188¾	184½	23	20¾
Iowa	188⅜	189½	22⅜	20½
Wisconsin .	202	197	28	24

The general average weight of hogs and yield of lard, for the whole West this season have been: of hogs 195¼, and of lard 24⅛ pounds, which compare with the general averages last season as follows:

	Weight of Hogs.	Yield of Lard.
1863–'64	188⅞	22⅛
1864–'65	195⅛	24⅛
Increase	6¼	2

In speaking of lard, as above, we have alluded solely to what is called leaf lard. The yield of head and gut lard is 8 to 10 pounds per hog. To obtain the total yield therefore this must be added to our previous estimate, making it greater by about 30 per cent. than represented.

We have not the means at hand to count the number of live hogs sent east for slaughter; but from the partial information we possess we are certain that it has been light, though the numbers exceed those sent last year. Compared with 1862–'63 they are a third less.

After taking the whole subject into view we have come to the conclusion that the supply is a fourth part less than in 1863–'64. It is lighter than for ten years past, and prices even without the intervention of speculation must inevitably rule high. They are already up to a point that forbids exportation, and which will materially affect the home consumption. In fact the supply is inadequate to the home demand, and exportation is out of the question.

Marblehead and Lynn Railroad.

The Boston *Journal* says there is much interest manifested in the proposed new railroad between Marblehead and Lynn. The road will be three and three-fourths miles in length. After passing through the "Marblehead Farms," it will join the Eastern Railroad at what is known as the old Marblehead depot, in Swampscott.

Railroads of Massachusetts, 1864.

We give below, from the *American Railway Times*, a tabular statement showing in detail the result of the operation of each road of the Railroad system in Massachusetts, for the fiscal year ending November 30, 1864. The following is a comparative statement of the gross amounts of the *whole* system for the past and preceding year:

	1863.	1864.
Number of companies ...	51	51
Length of roads, miles...	1.595	1.570
Aggregate capital.....	$69,362,052	$77,614,305
Amount paid in.....	57,546,563	60,629,823
Aggregate cost of roads..	66,809,802	73,723,920
Total revenue	11,950,739	16,478,596
Funded and floating debt.	18,121,108	22,859,585
Surplus earnings on hand.	2,843,804	5,093,550

The results of *operation*, in detail, for the past two years, may be found in the following abstract:

	1863.	1864.
Number of railways.....	38	38
Length of main lines	1.303.8	1,272.4
Length of branches	171.9	163.5
Double track and sidings.	540.9	545.2
Cost of railways	$61,610,448	$61,896,123
Capital paid in.....	45,988,956	46,643,848
Funded debt	14,510,061	14,178,801
Floating debt	1,282,444	1,573,548
Total debt	15,792,505	15,775,750
Interest paid on debt....	902,212	1,141,655
Dividends paid	2,981,890	3,448,115
Surplus.....	5,392,661	4,993,411
Receipts from passengers.	4,912,121	6,649,343
Receipts from freight....	4,878,131	6,158,442
Receipts from mails, &c..	660,531	735,636
Total receipts	11,711,027	14,981,015
Expense of road bed	1,066,831	1,396,444
Expense of machinery...	1,044,727	1,755,524
Other Expenses.....	4,282,570	6,301,957
Total expenses	6,429,841	9,619,324
Net income	4,331,153	5,313,070
Per ct. of exp. to income.	54.9	64.2
Net income per ct. on cost	7.03	8.6
Miles run by pass. trains.	3,620,540	4,070,107
Miles run by freight trains	2,863,442	3,224,943
Miles run by other trains.	238,622	270,918
Total miles run.....	6,890,306	7,606,811
Receipts per mile run, cts.	175.6	196.9
Expenses per mile run, cts.	96.1	126.5
Net income pr. m. run, cts.	64.7	69.9
Cost of fuel pr. m. run, cts.	13.2	17.6
Road rep'rs pr. m. run, cts.	11.8	13.7
Engine rep'rs p. m. run, cts.	6.9	9.7
Car rep'rs pr. mile run, cts.	7.4	13.1
Passengers carried.....	14,297,194	17,575,230
Passenger mileage	218,080,413	290,819,276
Tons of freight carried ..	4,366,685	4,954,676
Tonnage mileage	161,422,514	182,377,580

The *net income* is here taken as the amount remaining after deducting operating expenses only. The movement of freight and passengers shows quite a large increase, and the "net income per cent. on cost," has gone from 7.03 in 1863 to 8.06 in 1864. The actual dividends paid in 1864 average on the whole system 6.05 per cent. Many of the roads pay 10 per cent., others 9 and 8 per cent. The net income per cent on cost shows the very handsome figure of 8.06 per cent. In the tabular statements only roads in operation are included.

(1) Owned and operated by the New Bedford and Taunton Railway Company.

(2) The New London Northern Railway embraces the New London, Willimantic and Palmer, and Amherst, Belchertown and Palmer roads. The whole length is 81 miles; of which 29 miles are in Massachusetts. The amounts tabulated are only twenty-nine eighty-sixths of those returned, and are entered only to add to the correctness of the footings.

(3) The whole road with its branches is 85 miles long; of which 25 miles are in Massachusetts. The earnings and expenses above tabulated are thus divided in the report; but the remaining items are twenty-five eighty-fifths of the amount returned, and are entered only that the footings of the columns may be more correct.

(4) Leased to the Housatonic Railway Company of Connecticut.

(5) Operated by the Boston and Providence Railway Company.

(6) Operated by the Boston and Lowell Railway Company.

(7) Operated by the Nashua and Lowell Railway Company.

(8) Leased to the Boston and Maine Railway Company.

Chicago and Rock Island Railroad.

The earnings and disbursements of this road for ten months have been as follows:

Earnings for 10 months		$2,801,838 78
Operating expenses	$1,280,881 90	
Construction land and equipment	404,613 20	
		1,685,495 10
Net		$1,116,343 68
Peoria and Bureau Val. rent, 10 months	$104,166 00	
Interest on debt 10 mos.	116,660 00	
October dividend, 3 per cent.	189,000 00	
April dividend, 5 per ct.	315,000 00	
		724,826 00
Surplus of 10 months		$391,517 00

Erie Railway Company.

To the report of this company, an abstract of which was published in our last issue, the following "Note" is appended:

NOTE.—The tables and statements in the foregoing report are as of January 1, 1865. The present liabilities of the company on account of the new construction and equipment are as follows:

Bills payable to Daniel Drew, Esq., for which 28,000 shares of stock are hypothecated—the debt to mature in one year from January 6, 1865, with a right to the company to pay the whole, or any part thereof, before maturity	$1,960,000 00
29 freight cars to receive	31,436 00
18 engines to receive in March	339,356 15
16 " " April	451,464 48
22 " " May & June	842,000 00
	$3,624,256 63

And the means to pay the same are—

28,000 shares of stock at par	$2,800,000 00
900 fourth mortgage bond	900,000 00
	$3,700,000 00

ROBERT H. BERDELL, President.

OFFICE ERIE RAILWAY CO.,
NEW YORK, March 16, 1865.

American Railroad Journal.

Saturday, April 1, 1865.

Stock Exchange and Money Market.

The weekly report of the associated banks of this city, 54 in number, this report being for the week ending 25th of March, shows the total of their loans and discounts to be $267,677,503, a falling off from the previous week of $3,809,148.

Specie	$22,066,524
Circulation	4,457,162
Deposits	166,965,508
Legal tenders	35,295,156

The amount of transactions at the clearing house were for that week $604,796,728 89, but the actual balance to be settled for these transactions or exchanges of liabilities was but $20,023,167.32. The first above tables shows a falling off in deposits in round numbers from the previous week of about eight millions, an increase of loans of fifty-six millions, a trifling decrease in specie of about two hundred thousand dollars, a falling off in circulation of about the same amount, and an increase in legal tenders of about one and a half millions.

The exports of specie from the port of New York for the week were but $164,440. Since January the total exported was $4,392,526, against for the same period in 1863 $14,066,188, and 1864 $10,032,465. The arrivals from California of the same article since January 4th, have been $4,627,165, against $3,106,077, in 1864 for the same period of time, thus showing an increase of $1,521,088. The National Banks number at the present time 908, with a capital of $202,844,486, with a circulation of a little more than half their capital, or $104,750,540, having increased their issues for the former week about $3,224,440. All these figures give a good idea of the condition of our bank policy, here and elsewhere.

The gold market continues to be much agitated. Quite early in the mornings William street and some of the neighboring streets are filled with crowds of people collected to anticipate and then to learn the turns at the board. No matter how slight, they are regarded with the deepest interest and the noise of the crowd is quite stunning. It is curious to observe what slight reports affect the price. It is generally conceded that the tendency is downward, but there is still a strong party which struggles for a rise, or at least a lull in the storm. It is currently reported that a good many houses, some notoriously connected with the South and with Canada, and operating hitherto on a large scale have been obliged to succumb. The principal hopes of the confederate leaders for some time past, expressed in their harangues have been that the North would break down both in its means, credit and currency. And the attempt to produce this result has been constantly made in this city, but happily in vain.

Never was there more confidence in the stability of the resources of the country, nor in its ability to meet its engagements, or a more decided determination to see this rebellion through, than are now manifested. It is understood that the whole of the 7-30's are now taken, but should there be a deficiency in the Treasury, the Secretary may fall back upon 70 millions of compound 6 per cents. It is stated on good authority that the unpaid requisitions in his department have been reduced to a trifling amount.

We cannot understand what is the meaning of a broad assertion of a cotemporary that to meet the "immense expenditures" of the Government, its "only dependence is on the 7-30's." We always supposed that the revenue from direct taxation was large, millions a week, and that this resource continued on the increase. Nor does this remark tally well with another in the same article we have already quoted from, that "if the Treasury should be in want of money at any time it will be its own fault."

There is much more truth in this last remark than the other which we have quoted. It appears from recent statements emanating from the Bureau of Internal Revenue, that the total receipts from July 1, 1864, to March 25, 1865, were $159,664,846 84, and by the 1st of June they will be swelled to $200,000,000. Now as we may safely calculate on the speedy termination of the war,

(General Grant has said within a few hours that Richmond cannot be held more than ten or twelve days longer,) and may also expect an immediate reduction of one half of the expenses of the Navy, and a large cessation of expenditure for the future materiel of the army, the financial condition of the country was never more promising.

There is certainly much hastiness of remark in these daily notices of the market which impairs their credit as financial and economical reviews. He who philosophises on the events of the hour only, is as much out of the way as he, who in giving the quantity of rain that falls in our latitude, should take the heaviest fall during a tempest and call that the mean.

It is a prevailing opinion that government stocks will shrink less than gold, and though the prices of some securities have fallen under a sudden pressure in some quarters to sell, the result of necessity or design, they still stand pre-eminent in the favor of the people and will stand. Combinations to break them down are currently reported in the street, but the operators may shortly find even the "attempt and not the deed confounds them."

The news from Europe is more satisfactory. We cannot conceal our disapprobation of the conduct of those foreign journals which insist that the United States, for such they are again sure to be, desire any quarrel with the people or Government of Great Britain. They have no such wish and no such intention, although they feel that they have been very unfairly treated throughout this rebellion, not only by a premature recognition of the character of the rebels as true belligerents before there was any certainty of their maintaining themselves for six months, and by the constant violations of the Queen's proclamation of neutrality. The fitting out of armed vessels to prey upon the commerce of a friendly nation, and the constant supply of the means of aggression by blockade running were unfriendly acts which we cannot forget. Yet at the same time the prudence, persistance and valor of our people, our love of freedom and our respect for and devotion to the institutions handed down to us by our forefathers are accompanied by magnanimity, a spirit of forgiveness, and a love of peace. The same feelings prevail among us with regard to the Canadas. Those provinces have only to behave with courtesy and fairness to be forever free even from a dream of invasion from the United States. Their interests are almost identical with ours; this the wise men of the Provincees well know, and none but political barrators would seek to sever them.

The failure of the Bank of Attica in this state is announced in the papers. The cause of its misfortunes is its heavy speculations in butter of which it held large amounts waiting for a rise, and a heartless profit gained from the necessities of consumers. We have no sympathy for such forestalling institutions. Those that lay their foundations on butter must expect to see them melt, and the superstructure fall to the ground. No one will grieve at the demolition of such institutions.

The course of the market the last week may be thus described.

Notwithstanding the combination to break down the Government securities, they stand firm and in good demand, the gold bearing bonds improving. Railway shares are not doing so well, and a heavy break in some leading companies, occurred on Tuesday. The truth is that whenever the public see that any great line falls under the entire control of individual operators with immense capital, with nothing of the experience or science or talent for governing so complex an institution as a Railway, they continually apprehend disasters, loans and accidents. This is the real reason why the popularity of these companies is declining so rapidly, and no other.

Miscellaneous shares are quite steady. Money is plentiful and large amonnts are held by the Banks in deposit. The rate is 7 per cent generally, but on call it is 1 per cent. less.

The exports from this city for the week ending March 25, exclusive of specie were $2,301,742.

The balance in the Sub Treasury on Tuesday was $34,089,174 64.

Gold sold at the morning board on Thursday at 149¾.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois coupon bonds, 97; McGregor Western 1st mort., 71½, Brooklyn Park Loan, 85; Manhattan Gas, 185; Long Dock bonds, 105; Smith & Paramalee Gold, 5¾; Nicaragua Transit, 5; Mariposa 1st mort., 45; Central Coal, 41¼; Wyoming Valley Coal, 49; Bank of the State of New York, 115; 4th National Bank, 90; Central National Bank, 100; Bank of Commerce, 99½; Bank of America, 130.

Philadelphia.—Allegheny County coupon 5s, 72; 13th and 15th streets R. R., 19; Fulton Coal, 4¾; Swatara, 5¾; Preston, 24; Green Mt., 3; New Creek, 81c.; Big Mt., 4¼; Keystone Zinc, 1½; Bank of Kentucky, 117; Miners' Bank, Pottsville, 50; Bank of North America, 191; Kentucky Bank, 107; Atlas Oil, 1⅛; Alcorn, 1⅛; Adamantine, 6¼; Big Tank, 3¼; Bull Creek, 2¾; Briggs, 2¾; Black Diamond, 3; Bruner, ⅞; Caldwell, 5½; Cherry Run, 26⅞; Corn Pl., 4¾; Crescent, 1½; Cow Creek, 1¼; Dalzell, 6⅞; Duncard, 1¼; Dawson's Run, 2½; East Oil Creek, 1⅛; Egbert, 3; Eldorado, 1; Eldorado, 1; Excelsior, 1⅛; Eagle Rock, 3½; Eureka, 1⅜; Fleniken, 1; Germania, ¾; Gt. Eastern, 2; Hibbard, 1⅜; Hyde Farm, 3¼; Howe's Eddy, 1⅛; Irwin, 7; Jersey Well, 3¾; Junction, 3⅛; McClintock, 4⅝; McCrea, 2; Mingo, 3½; Maple Shade, 19¼; McElheny, 4; Mineral, 2; McElrath, 2½; Noble and Delamater, 5½; Oil Creek and Cherry Run, 4; Organic, ¾; Petroleum Centre, 2⅛; Ross, 1⅛; Rock Oil, 2⅞; Royal, 1⅞; St. Nicholas, 3⅝; Story Farm, 1⅜; Sugar Creek, 8⅛; Sugar Dale, 3; Schuylkill and Oil Creek, 1½; Starr, 1⅛; Tionesta, 2; Tarr Homestead, 4; Union, 1; Winfield, 94c.; Walnut, 1½; Wm. Penn., 3¾; Watson, 2¾. The latest quotations are: City 6s, 86@86¼; do., new, 89¾@90; State 5s, 87½@88; do., coupon, 89@92; do., 6s, W. L., 99½@100; Phila., Wil. and Balt., 61; Reading, 44⅝@44¾; do., 6s, 1870, 95@95; do., bonds, 96@97; Camden and Amboy, 126@130; Penn. R. Cotton Production and Supply.

It is a curious fact and but little known, that the introduction of cotton into this country was entirely owing to an accident. A small bag of the seed was brought from Pernambuco to Georgia where it was thrown on a dirt heap; it grew there, was afterwards propagated therefrom, and in the course of time the American cotton not only supplanted that of the East Indies, but was intrinsically more valuable for its quality, and its cheapness caused its use throughout Europe.

Among the most interesting and instructive papers we have had on this subject is one recently prepared for and read before the American Geographical Society of this city by the Hon. F. A. Conkling, and is we understand to be published and printed at the request of the Society. It has generally been so dependent hitherto on accidental lecturers for its reputation that we are glad to see it contains within its own body so able a writer and good a thinker as Col. Conkling. This gentleman has not only highly distinguished himself on the floor of Congress, but has during the present rebellion been active in the field. At the head of a fine regiment of volunteers raised entirely through his own efforts, he has been twice in actual and dangerous service. Yet he finds time to consider other questions than those of war, and has now given the world at a very fitting occasion an important paper on cotton with many carefully collected facts, and original deductions. American cotton is doubtless about to play a very important part in commerce, more than ever perhaps, and restore the equilibrium in our foreign exchanges, disturbed by the war. Its production and export are to have a decided effect on the credit and financial resources of the country in the future, and Mr. Conkling now gives us the very best information to be obtained as to production and consumption, of this staple; its demand, source and supply.

Pittsburg Railway Connections.

The people of this enterprising city seem determined not to be dependent on the Ohio entirely for means of communication, nor even with their present lines of railways.

The New Castle and Franklin branch of the Erie and Pittsburgh Railroad is being rapidly completed, by which a short route will be opened into the heart of the oil region, and greatly enhance the value of property owned by Eastern Corporations on the upper forks of the Allegheny. Besides the chief connections West, *via* the Pittsburgh, Fort Wayne and Chicago and Columbus and Cincinnati Railroads, and East, *via* the Pennsylvania Central, Pittsburgh has of late extended the Beaver Valley Railroad north to Lake Erie at Girard, intersecting the Lake Shore road; is building a branch to Franklin and Oil City, on the east, another up the Mahoning Valley, to connect with the Cleveland branch of the Atlantic and Great Western, on the west; another down to Washington, Pennsylvania, to reach Wheeling, Virginia, on the south; and is now moving in the matter of completing the Connellsville Railroad, so as to form a junction with the Baltimore and Ohio, thus opening another through route to the eastern seaboard.

Cast Steel Rails.

The "Cyclops" Works, solely represented in this Country by PHILLIP S. JUSTICE, are manufacturing Steel Rails in large quantities, and the opinion is now general, founded on theory and experience, that they are the only kind that should be used, or permitted on our Railway lines. The advertisement of Mr. Justice in another column gives in a few words the reason of their superiority. The largest proportion of the accidents almost daily occurring on our railways arise from broken rails which are left in that condition for months after their fracture. An eminent engineer, who has very recently traveled over one of our Great Western lines, informs us that their broken rails at the present time *number by hundreds*. It would seem imperative on our Legislature to compel the substitution of these cast steel rails in place of those of iron. Here is a perfect article and it should be obligatory on companies to use them.

Winslow, Lanier & Co.

The advertisement of this well known and distinguished Banking House, which will be found on the last page of the JOURNAL, reminds us of their active agency in obtaining subscriptions for Government securities which maintain their steadiness and popularity. Those parties ready to invest, will meet with prompt attention from this House, for so many years in the front rank of financiers.

The Phillips Petroleum Co.

This is another Company which now presents itself to public favor as the owner in fee of a large tract of land on the Pithole creek, near the Fraser well, and another one of 50 acres on Oil Creek, near the celebrated Coquette well. Twenty two wells are about to be brought into immediate productiveness, while at present the yield of those worked is 75 barrels per day. Among the trustees of this company are such men as Washington Hunt, William Bigler, Elisha Riggs, E. A. Quintard, and others, whose connection with the project are vouchers for its importance, and its prosperity. Shares $4. Office 18 Broad street, New York.

Gratz Van Rensselaer & Co.

This new Banking house, composed of gentlemen of highly respected and historical names, with large and long financial experience, are established at 24 Broad street, in this city, and do a commission business in all kinds of securities, State, National and local, gold, &c.

The references given are of the highest character and the recommendations of J. W. Beekman, S. A. Schieffelin and the Treasurer of the State of New York could not be possibly given to any other than men of undoubted means and character.

Finances of St. Louis.

We learn from the St. Louis *News*, that the cash in the Treasury April 11th, 1864, amounted to $148,548 08, while the balance on hand March 1st, 1865, was $160,190 15—showing an unusual surplus at this season. The *News* says:

Since the installation of the present Administration, the bonded and floating debt has been reduced near *one quarter of a million*, while, in the same time, heavy expenditures for the benefit of soldiers' families and the poor of the city have been incurred, yet there is a surplus in the Treasury sufficient to inaugurate, most satisfactorily, the fiscal affairs of the coming year, and to render the credit of the city impregnable.

Finances of Canada.

The revenue of Canada is derived chiefly from customs and excise, the post office, public works, land sales, etc. The following exhibits the details (including loans and trust funds,) of the receipts in 1861 and 1864, comparatively:

	1861.	1864.
Customs	$4,774,562	$6,664,326
Excise	344,655	860,914
Post office and ocean postage	457,726	664,946
Public works and provincial steamers	355,198	429,910
Territorial	678,923	584,846
Interest on investments, premium and discount	508,236	819,487
Minor revenues of consolidated fund	131,983	165,410
Miscel. receipts on open accounts	268,473	320,620
Debentures and stock	2,756,306	4,354,582
Sales of public works, &c.	7,697	15,646
Municipal loan fund	279,388	174,850
Investment ex consol. loan	867,749	.....
Ocean steam company	189,620	.....
Bank of V. C.—special ac't	.....	236,667
G. T. Railway—adv'ce ac't.	1,000	.....
Miscel. guar. and advance accounts	116,483	165,016
Municipalities fund	325,025	164,606
Education & school funds.	161,455	189,918
Indian fund	256,629	176,698
Minor trust funds	28,942	38,107
Other trust funds	145,521	.....
	$12,655,581	$15,626,549
Deduct debentures and stock	2,756,306	4,354,582
Revenue	$9,899,275	$11,171,967
From this may also be deducted the following exceptional receipts:		
G. T. Railway—adv'ce ac't.	1,000	.....
Ocean S. S. Co.	189,620	.....
Investment ex consol. loan	867,749	.....
Other trust funds	145,521	.....
Bank of V. C.—Spec. acc't	.....	236,667
Total revenue (less loans and exceptional rec'pts.)	$8,695,890	$10,935,300

The payments for 1861 and 1864, ordinary and extraordinary, are shown in the following comparative statement:

	1861.	1864.
Public debt—intr't, charges, etc	$3,962,588	$4,126,317
Public debt—redemption	2,738,872	3,957,740
Civil Gov. (& pensions)	471,795	473,198
Justice	849,329	840,516
Legislation	463,125	379,959
Education & Geol. survey.	545,009	492,392
Hospitals and charities	272,842	299,331
Militia and enrolled force.	84,688	317,061
Agricultural societies	102,620	110,019
Public works, etc.	1,799,986	1,393,107
Seignorial	224,133	199,699
Subsidies	751,669	11,290
Municipalities fund	445,314	104,119
Indian fund and annuities.	135,146	168,420
Minor payments	389,075	262,621
Collection of revenues	1,507,463	1,408,093
	$14,742,834	$14,554,882
Deduct redemption of public debt	2,738,872	3,957,740
Expenditures	$12,003,962	$10,587,142

From this also may be deducted the following exceptional expenditures:		
Public works (Ottawa buildings)	655,149	458,077
Subsidies (exceptional)	704,945	.....
Miscel. (reception of P. of Wales)	63,225	.....
	$1,423,319	$458,077
Expenditures (less Red. of P. D. and exceptional items)	$10,480,643	$10,129,065

The balance sheet of the Province on the 31st December, 1864, was made up as follows:

Dr.	
Funded debt—direct	$60,950,101
" indirect	874,267
Total	$61,824,368
School funds	$1,966,814
Indian funds	1,614,519
Miscellaneous funds	569,650
	4,151,983
Miscellaneous accounts	735,239
Bank accounts	3,350,507
Liabilities in connection with seignorial tenure	4,118,203
Consolidated fund	2,043,761
Total	$76,223,061
Cr.	
Sinking funds	$1,536,792
Provincial works	26,355,525
Building and harbor funds	874,266
Railway debentures	20,435,061
Railway interest and special account.	9,642,025
Municipal loan fund accounts	12,890,838
Miscellaneous accounts	1,064,439
Due by trust funds	779,440
Consol. fund investment account	689,686
Bank of U. C.—special account	1,250,000
Bank accounts (includ'g Crown Lands $60,087)	705,040
Total	$76,223,061

The following will explain more in detail the several works and funds which constitute the amounts standing to the credit of the Province:

Public Works, viz:	
St. Lawrence Canals	$7,406,270
Welland Canal	7,309,849
Chambly Canal and River Richelieu improvements	433,808
Burlington Bay Canal	308,328
Lake St. Peter Improvements	1,098,225
Ottawa works	1,148,690
Improvement of the Trent	558,506
Harbors and lighthouses	2,549,617
Roads and bridges	1,726,695
Government buildings at Ottawa	1,812,509
Loans to incorporated companies	142,154
Miscellaneous works and buildings	1,860,862
Total Provincial works	$26,355,525
Railway Debenture Account:	
Grand Trunk, including subsidiary lines	$15,312,894
Great Western	2,810,500
Northern	2,311,667
Total railway debentures	$20,435,061

Including the dues by the building and harbor funds amounting to $874,226, and the railway interest and special accounts, the total amount based on the public and corporate works of the Province amount to $57,306,877, or three-fourths of the total indebtedness and liabilities.

The municipal loan fund now amounting to $12,890,838, consists of advances made to various municipalities, which secured the construction of various important works, such as the Ottawa and Prescott, the Brockville and Ottawa, and the London and Port Stanley Railways; also waterworks and other valuable local improvements.

The principal portion of the above information is derived from a pamphlet entitled "Statements explanatory of the financial position of Canada," etc. In this the statements are made for the four years 1861-'64, but in the foregoing detailed exposition it was not considered necessary to go over the intermediate years, but simply give the first and last. In our further remarks, however, the aggregates of the whole four years are used.

The following table shows the funded debt and sinking funds at the commencement of each year:

	Funded Debt.	Sinking Funds.	Net Debt.
1862	$65,636,478	$7,453,458	$58,173,020
1863	67,567,408	7,620,434	59,946,974
1864	65,238,649	4,883,177	60,355,472
1865	61,824,367	1,536,792	60,287,575

The amount of duties paid on imports the same years was as follows:

	Value of Imports.	—Duties Collected— Total.	Per cent.
1861	$43,054,836	$4,768,193	11.1
1862	48,600,633	4,652,749	9.6
1863	45,964,493	5,169,173	11.2
1864	52,498,066	6,637,503	12.6

The population of Canada by the two last censuses was as follows:

By census of January, 1852:		
U. Canada.	L. Canada.	Total.
952,004	890,261	1,842,265
By census of January, 1861:		
1,396,091	1,111,566	2,507,657

Assuming the same rate of increase as here indicated, the population of the Province has been yearly as follows:

Jan. 1.	U. Canada.	L. Canada.	Total.
1862	1,460,000	1,139,400	2,599,400
1863	1,520,000	1,167,800	2,687,800
1864	1,586,000	1,196,949	2,782,949
1865	1,650,000	1,226,800	2,876,800

Should the increase go on at the same rate, in view of the rapid and unprecedented manner in which the resources of the Province are being developed, we may assume that in ten years the population will exceed 5,000,000. In four years, in which difficulties both internal and external have had to be met, it increased by nearly 300,090, or to be precise by 277,400. In point of population as a power it would then in 1875 rank immediately after Norway and Sweden, and before Portugal, Bavaria, Denmark, Greece, Hanover, Holland, Saxony and other established nations.

The result of the foregoing figures are shown in the following tabulation, which reduces the amount of duties, debt, revenue and expenditure to a per capita rate for each of the four years included:

	Duty.	Debt.	Revenue.	Exp't's.
1861	$1.83	$22.31	$3.35	$4.27
1862	1.73	22.30	3.10	4.03
1863	1.85	21.69	3.48	3.75
1864	2.30	20.92	3.79	3.52

It is thus seen that the burdens of the people have been lightened with the progress of population, and that while the revenue has increased, the expenditures have decreased from year to year.

The main dependence for revenue by most nations is on internal and personal taxes. For National purposes Canada taxes neither the land nor other property. Capitation is unknown in the Province. The excise tax is indirect and applies only to a few articles of manufactures and is little felt by the people. This and the duties on imports and land sales indeed make the whole ordinary revenue. It is apparent then that Canada has not yet touched its material resources, and hence its strength remains for future exigencies.

There is also another phase in Canadian finance. Its debt has been almost wholly incurred on account of its public works, which have been the potent means of its development hitherto, and which in the future are to act as the great promoter of its most vital interests, including the very peopling of the land. Without these the flourishing Province we now behold on our northern borders would have continued to be for ages yet to come a vast, uncultivated, unpeopled wilderness.

Truly in the case of Canada national debt is national wealth, and the larger and rapider the future increment of the debt, if applied to similar purposes, so much greater will be the onward progress of the country to that great destiny to which it has been ordained by nature and civilization.

Interest and Dividends.

The Panama Railroad Company will pay, 5th April, a quarterly dividend of four per cent. out of the earnings of the road, and one per cent. from earnings of steamers.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of $8 per share, payable on the 5th of April.

The Chicago and Rock Island Railroad Company has declared a semi-annual dividend of 5 per cent., payable on the 10th of April.

The Cleveland and Toledo Railroad Company have declared a dividend of 5 per cent., payable free of U. S. tax on the 25th of April at the Continental Bank.

The dividend bonds and dividend certificates issued by this company in April, 1855, and maturing April 1, 1865, will be paid at maturity on presentation at the Continental Bank, New York.

The Hannibal and St. Joseph Railroad Company will pay the coupons on their land bonds, maturing April 1, on and after that date, by presentation at the office of the fiscal agency in Boston, or to Duncan, Sherman & Co., New York.

The Indianapolis and Cincinnati Railroad Company has declared a semi-annual dividend of four per cent., payable on demand.

The Consolidated Coal Company of Pennsylvania have declared a dividend of 5 per cent., payable April 6.

The Trustees of the first mortgage bondholders of the Vermont Valley Railroad Company will pay the coupons due 1st April, 1859, on and after Saturday, April 1, 1865, at the office of the Treasurer of the company in Bellows Falls. For the convenience of the bondholders in New York and elsewhere, the coupons will be paid for the space of one month, viz: from the 1st April to 1st May, from 11 A. M. to 2 P. M., at the office of Alexander Hamilton, Jr., 41 Wall street, Jauncey Court, and thereafter will only be paid at the office of the Treasurer in Bellows Falls.

The coupons of the 10 per cent. first mortgage bonds of the Great Western Railroad Company of 1859, maturing 1st April next, will be paid on and after that date, on presentation, at Messrs. Ketchum, Son & Co.'s, 40 Exchange Place.

The coupons due April 1st on the bonds of the New York and New Haven Railroad Company

will be paid at the Bank of the Republic, or at the office of the company in Fourth Avenue.

The coupons of the bonds of the Atlantic and Great Western Railway Company, due 1st April, will be paid at the office of McAndrew & Wann, 12 Pine street.

The coupons of the first mortgage 8 per cent. bonds of th Des Moines Valley Railroad Company, due April 1st, 1865, will be paid at the banking house of Gilman, Son & Co., 47 Exchange Place.

Damages for a Personal Injury.—Negligence of Plaintiff Contributing to Injury.—Carelessness as will Prevent a Recovery of Damages.—Questions for Jury.

The late case of Todd against The Old Colony and Fall River Railroad Company, was an action brought by the plaintiff against the defendants in the Supreme Judicial Court of the State of Massachusetts, to recover damages for an injury received by the plaintiff while traveling as a passenger in the defendants' cars.

At the new trial of the case in the above Court, after the decision granting such new trial, it appeared by the plaintiff's own testimony, that at the time of receiving the injury, his left arm was resting on the base of the window frame of the car, the sash being raised, and that his elbow extended outward, beyond the place where the sash would have been if the window had been shut.

The plaintiff was injured by a hasp upon the swinging door of a freight car, which struck the plaintiff's arm just above and below the elbow.

The judge ruled that the burden was on the plaintiff to prove that he used due care, and to prove that the defendants were guilty of negligence; that the defendants were bound to use reasonable care adapted to the circumstances of the case; that the means of conveyance employed by them, being instruments of great power and moving with great speed, required an increase of care on their part; and that the same facts required a corresponding increase of care by the plaintiff, when he used such means of conveyance; that passengers in railroad cars are to occupy the places provided for their convenience and safety by the carriers, and that it is negligence in them to occupy exposed positions which have not been provided or designed for such occupation; and that the plaintiff was guilty of negligence in placing his arm in the window, so that his elbow extended outwards beyond the window sash, so as to come in collision with a substance outside the cars; and he directed the jury to find a verdict for the defendants, which they accordingly did.

The plaintiff's counsel contended that there was evidence from the plaintiff, and from other sources, as to the mode in which the injury was occasioned, the nature and direction of the wounds, the effect produced by the collision, the motion and oscillation of the cars, the position of the freight car, door, &c., which tended to prove that the plaintiff's elbow was inside the sash of the window at the time of the collision, and which should be submitted to the jury; but the judge ruled otherwise.

The plaintiff alleged exceptions to such charge and rulings, which were afterwards brought on for hearing, when the following opinion was delivered by

Bigelow, C. J.—There was no controversy at the trial concerning the position of the plaintiff's arm.

His own testimony shows that it was resting on the sill of the window of the car, and that a portion of it, when the injury was inflicted was beyond the sash, so as to be outside of the external surface of the window. Nor was there any doubt or dispute that if the plaintiff had kept himself entirely within the limits of that part of the car intended for and appropriated to passengers, the accident which occasioned the injury would not have happened. It was the plaintiff's own act which contributed to the injury.

On these admitted facts, the ruling of the court, that the plaintiff was not entitled to recover, is fully sustained by the previous decision in this case, (3 Allen, 18, 21,) and by the several cases there cited.

The reasons which influenced our minds in setting aside the former verdict, and which are concisely stated by the learned judge as the ground of his ruling at the last trial, on further consideration, approve themselves to our most deliberate judgment.

It is a mistake to suppose that, in directing a verdict for the defendants, the legitimate province of the jury was invaded by the Court. Against any such interference we should most scrupulously guard. A wise and impartial administration of justice, as well as the express provision of the statute. (Gen. Sts. c. 115, §5,) require that the decision of controverted questions of fact should be left to the free and unbiassed judgment of jurors. But considerations of this nature have no application to cases like the one at bar. Upon the point on which the cases was disposed of by the Court, there were no facts in dispute, nor did the Court undertake to determine whether evidence was true or false.

It was solely on the legal effect of admitted facts, that the Court pronounced its judgment. On this it was not only the province, but the imperative duty of the Court to determine. Garett *vs.* Manchester and Lawrence Railroad, 16 Gray, Denney *vs.* Williams, 5 Allen, 1, 5.

Judgment on the verdict, for the defendants.

Fluctuations of British Stocks, 1863-64.

Wealth and Resources of Kansas.

In several addresses recently made in the New York city pulpits by an eminent divine from the State of Kansas, it was stated that very erroneous impressions prevailed as to its soil, climate and agricultural character. The first settlers of the Western states have usually been sufferers in the attempts to establish themselves, and in the instance of Kansas were subjected to considerable hardships from the violent effort made by the Southern States, to make it a slave holding territory, and to introduce there a code of laws of the most brutal description. Few persons are at this time aware of the bloody enactments which formed a part of the projected code. Imprisonment and death were ordinary punishments for the violation even of the rights of opinion and speech. That day is happily past, and Kansas under the influence of free institutions is rapidly rising to its true position among the Western States, and every day is dispelling the unfavorable impressions alluded to.

It contains 78,418 square miles or 50,187,520 acres of land. Of these in 1860 1,657,461 were improved, being the portion allotted by the United States Government for sale, and the value of these was $11,394,184. The value of the implements of husbandry used upon them was $675,336.

The live stock consisted of 18,882 horses, 1,430 asses and mules, 26,726 milch cows, 20,183 working oxen, 47,000 other cattle and 128,309 swine, in all of the value of $3,205,522. The products of animals comprised butter, 1,012,975 lbs.; cheese, 28,053 lbs.; wool, 22,593 lbs.; and the value of slaughtered animals was $547,459. Of beeswax the product wrs 467 and of honey 14,942 lbs.

The cereal crops were as follows:

Wheat bushels	168,527
Rye "	3,928
Indian corn bushels	5,678,834
Oats	80,744
Barley	4,128
Buckwheat	36,799

The commercial crops were:

Tobacco	16,978
Irish potatoes bushels	283,968
Sweet " "	922
Wine, gallons	241
Hay, tons	50,812
Clover seed, bushels	98
Grass "	2,633
Flax "	9
Hemp tons	44
Flax lbs	13
Hops lbs	130
Maple sugar lbs	1,548
Sorghum molasses gollons	79,482

There were 300 manufacturing establishments employing a capital of $1,068,000, consuming $667,289 and produing annually fabrics of the value of $2,800,000, and requiring the labor of 1,719 persons, all males. Among the articles produced were:

Lumber sawed and planed	$945,086
Flour and meal	284,281
Malt liquors (3,000 bbls)	52,800
Steam engines	40,000
Agricultural implements	20,000
Spirits (18,000 gallons)	3,750

The population was 107,206. The principal towns were Leavenworth, Atchison, Lawrence, Wyandotte, Topeka, (the capital of the State) Lecompton, Kickapoo, Tecumseh, Doniphan, Douglass, Potawotamie, Pawnee; Leavenworth having in 1860 a population of 7,429, the others varying from 2,600 to 1,000.

The taxable real property of the state in 1860, was valued at $16,088,602 and the personal $6,429, 680. The true value of the real estate was nearly double, and the discrepancy is explained by the general practice in most of the States, to value such property at about half of what it will sell for.

The railroads are as yet in their infancy. But the Eastern division of the Union Pacific formerly the Leavenworth, Pawnee and Western, is completed from Kansas city to Leavenworth about 40 miles. The whole length is to be 360 miles, and the capital thus far expended is $1,400,000.

All the connecting branches East will converge in Kansas.

The principal rivers in Kansas are the Missouri bordering its eastern line for 100 miles, the Arkansas navigable for 1,000 miles, the Osage for 600 miles, and the Kansas which is larger than the Ohio and also navigable for a great distance.

The soil of the state is generally very fertile, and the climate dry and salubrious. The best of land can be had at from $1 50 to $1 75 per acre.

Railroad Earnings--Weekly.

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of March, 1865, were | $80,424 00
Corresponding week of previous year. | 61,411 00
Increase | $19,013 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending March 21, were:

	1865.	1864.
Passengers	$2,751 88	$2,505 72
Freight	3,421 16	4,935 05
Express	162 80	104 16
Mails	296 58	296 58
Total	$6,632 42	$7,841 51

Receipts from January 1 to March 21:

1865	$101,736 35
1864	89,930 57
Increase	$11,805 78

The earnings of the Marietta and Cincinnati Railroad for the 3d week in March:

	1865.	1864.
Passengers	$9,982 32	$7,364 03
Freight	8,646 88	11,216 84
Mail, express & telegraph	1,300 00	899 58
Total	$19,929 20	$19,480 45
Total this month to date	$62,120 91	$61,348 18
Total for the fiscal year, commencing 1st Jan...	246,860 05	204,023 19

The earnings of the Chicago and Rock Island Railroad for the third week in March, 1865, were | $58,771 00
Corresponding week of previous year.. | 45,416 00
Increase | $13,355 00

The earnings of the Grand Trunk Railway for the week ending March 18, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$30,678 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	78,908 00
Total	$112,710 00
Corresponding week, 1864	122,604 00
Decrease	$9,894 00

THE

PHILLIPS PETROLEUM

COMPANY,

No. 18 Broad Street, New York.

OFFICERS:

THOMAS H. PHILLIPS, President.
DANIEL PACKER, Vice-President.
DAVID M. HUGHES, Treasurer.
THOS. B. LAWSON, Secretary.

This Company owns a large tract of land in the valley of PITHOLE CREEK in fee, covering admirable boring ground on the margin of that stream, for the distance of more than a mile; commencing about two miles below the great Fraser Well. Also Fifty acres in fee on Oil Creek about three-quarters of a mile above the celebrated COQUETTE WELL. Measures have been adopted by the Company to secure the prompt drilling of TWENTY-TWO WELLS on these lands. The present income is about Seventy-five Barrels of Oil per day. 3m-13

FOR SALE.

2 New first-class Dome, or Raised Roof, Cars, will seat 60 passengers, 4 ft. 8½ in. gauge; or will sell to parties wishing to furnish their own trucks.

Philadelphia and Reading Railroad.

The case of Timothy Boyle and others *vs.* the Philadelphia and Reading Railroad Company, which was argued some time since before the Supreme Court of Pennsylvania, has been decided in favor of the railroad company. This was an application for an injunction to restrain the Railroad Company from charging for freight and transportation more than the maximum sum (four cents a mile for freight, and two cents a mile for passengers) allowed by their act of incorporation. Justice STRONG, in delivering the opinion of the court, said that the charter of the company granted two powers—the first being that of a railroad company, and the other that of a transportation company. Under the first power they might allow the use of their road to others for the conveyance of freight and passengers. Under the second they were allowed themselves to be what are commonly known as carriers. He decided that the word tolls, used in the act of Assembly, fixing a maximum price, did not apply to transportation by the company itself, but only to cases where their road was used by other carriers. The injuction was refused, and the complainants's bill dismissed.

Des Moines Valley Railroad.

To the Editor of the American R. R. Journal:

DEAR SIR—Thinking that you would like to know the present condition of the Des Moines Valley Railroad, (formerly the Keokuk, Fort Des Moines and Minnesota Railroad,) and so post your readers of the JOURNAL, we beg to annex the following particulars:

This road is now a land grant road.

Length of road projected from Keokuk to Des Moines	156 miles.
Do. finished and running in 1863-'64	92 "
Do. do. do. in 1865	116 "
Do. now building	40 "
Engines in use in good order	10
Passenger cars "	6
Freight, stock, coal cars, &c.	176
Cost of the 116 miles built, with all buildings, &c.	$3,433,232 00
Do. of rolling stock	248,061 00
Total	$3,681,293 00
Capital—paid in	$1,550,000 00
8 per cent. mortgage bonds	1,740,000 00
7 per cent. income bonds	348,000 00
Floating debt, &c	43,293 00
	$3,681,293 00

The earnings of the 92 miles of road for 1863 and 1864, were as follows:

	Gross Receipts.	Expenses.	Net Income.
1864	$318,395 88	$159,042 77	$159,353 11
1863	227,024 03	112,125 05	114,898 98
Increase	$91,371 85	$46,917 72	$44,454 13

We estimate earnings for 1865, to be gross, $480,000; net, $240,000; and now think the same may be increased, as so far this year the revenue is from 50@80 per cent. over 1864.

No dividends to stockholders have yet been declared, as the road is still being built to Des Moines, the capital of Iowa. It now runs from Keokuk, Lee Co., to Pella, Marion Co., Iowa.

Eight per cent. first mortgage bonds are due in 1877. Interest in New York, April and October.

Seven per cent. income bonds are due in 1884. Interest in New York, January and July.

The former sells at 100 per cent., the latter 90@95 per cent. Interest coupons on both are duly paid at maturity.

Your obedient servants,

KILBOURNE, LEIGHTON & Co.,
Lessees and Contractors.

Keokuk, Iowa, March 24, 1865.

Lake Superior Copper Mines.

The total product, in tons, of the Upper Michigan Mining Districts, (the details of which have been published in the JOURNAL,) for the past three years, have been as follows:

Districts.	1862.	1863.	1864.
Portage Lake	3,942.4	4,106.6	4,292.6
Ontonagon	2,728.4	2,004.6	1,722.3
Keweenaw	2,390.3	2,429.2	2,547.2
Total	9,901.1	8,540.4	8,562.1

New York Canals.

The Oswego *Times* says there is now but a sorry prospect for an early opening of the New York Canals. From all points along these great improvements, we learn that the destruction has been terrible. Reports are current of the almost entire destruction of the Genesee Valley Canal, and of a large breach at Brighton, on the Erie Canal. Disasters on the Middle Division are spoken of by the Syracuse *Journal*. About one hundred feet of the towing path has gone out, one mile east of Canastota, which floods the low lands, covering thousands of acres. Several small breaches have occurred in the berm bank, between Butternut Creek feeder and Chittenango, in consequence of the flow of water from the outside into the canal. It has been impossible to control the water in the Long Level, and on Friday water was drawn into the Syracuse Level, in order, if possible, to lessen the danger which was apprehended. Large quantities of material have been washed away into the prism between Syracuse and Jordan, and heavy bars formed at the discharge places of the several feeders. The bulk head of the Skaneateles feeder at Jordan has been carried away, and 125 feet of berm bank forced into the canal west of the village, in consequence of the water rising and flowing the bank.

A very large quantity of earth has also been deposited in the canal. Nearly all the culverts on the Middle Division of the Erie Canal are more or less damaged, and many small breaches have been made in the banks; but the full extent of the damage done cannot be ascertained till the water is drawn off.

Grand Rapids and Indiana Railroad.

We take from the Kalamazoo *Gazette* the following act of the Michigan Legislature, confirming the grant of lands made by a recent act of Congress to the Grand Rapids and Indiana Railroad Company. This road is the Southern end of the railroad from Fort Wayne, Ind., to Mackinaw, through Amboy, Sturgis and Grand Rapids. Part of the line between Grand Rapids and Indiana has been graded. It is hoped that the work will now be resumed, and prosecuted to completion at an early day—

AN ACT.

To confer an additional grant of Public Lands upon the Grand Rapids and Indiana Railroad Company.

Whereas, by an Act of Congress approved June 3, 1856, a grant of Public Lands was conferred upon the State of Michigan, from Grand Rapids to some point on or near Traverse Bay. And

Whereas, Said grant of lands was enlarged and extended from Fort Wayne, in the State of Indiana, *via* Sturgis township, to Grand Rapids, in the State of Michigan, by an Act of Congress approved June 7, 1864; and

Whereas, Said original grant was conferred upon the Grand Rapids and Indiana Railroad Company, by an Act of the State Legislature, approved February 14, 1857; and

Whereas, The above mentioned extension of said grant is made upon, and describes the line of road occupied by said Company.

Therefore Sec. 1. The People of the State of Michigan enact, that said enlarged and extended grant of public lands be, and is hereby conferred upon the Grand Rapids and Indiana Railroad Company, upon the same terms and under the same restrictions and regulations, as are prescribed in the Act of February 14, 1857, and all subsequent acts relating thereto, so far as they are now in force.

E. O. GROSVENER,
President of the Senate.

GILBERT E. READ,
Speaker of the House of Representatives.
Approved March 10, 1865.

HENRY H. CRAPO.

Saginaw Salt.

A report recently made to the Michigan Legislature contains some interesting statistics relative to the development of the salt region of that state. From it we learn that during the past five years there was manufactured at Saginaw:

1st year—1860—bbls.	4,000
2d year—1861—bbls.	125,000
3d year—1862—bbls.	243,000
4th year—1863—bbls.	466,356
5th year—1864—bbls.	528,078

The following is a summary of the Salt business of 1864:

Number of Companies in operation	67
" Blocks	118
" Kettles	4,210
" Solar Covers	5,949
" Acres of Land	9,475¾
Investments	$2,269,500
Salt made in 1864, bbls	528,078
Men employed	892
Cords of wood consumed	109,368
Value of bbls.	$286,645
Ag. value of Salt at a shipping point.	$1,190,410

The disproportion between the aggregate value of wood and the number of cords given, says the report, is explained by the fact that many works where mill fuel is used, have given the value without any estimate as to the number of cords. As at present carried on, the demand for wood for Salt manufacture in Saginaw Valley will require each year the timber from off 3,000 acres of land.

Pittsburg Ft. Wayne and Chicago Railway.

To the Stock and Bondholders of the Pittsburg, Fort Wayne and Chicago Railway Company:

The third annual report of the operations of the Railway of this Company is now presented to you.

The following statements and figures will exhibit to you, in a concise form, the gross earnings, and the expenses connected therewith, of the Railway for the year 1864:

Earnings:

From passenger travel	$2,696,387 00
" freight traffic	4,148,503 00
" transportation of U. S. Mail	93,900 00
" express companies	68,306 12
" Cleveland and Pittsburg R. R. Co., for use of track between Pittsburg and Rochester	85,000 00
" rents	1,345 83
" miscellaneous sources	27,023 81
Total	$7,120,465 76

Expenses, viz:

For conducting transp.	$1,036,209 41	
" motive power	1,260,900 37	
" mainten'ce of way	1,113,496 62	
" " cars	334,941 91	
" general expense	355,850 32	
		4,101,398 63
Leaving a balance of		$3,019,067 13

The financial status of the Company for the year may be stated as follows:

INCOME.

Amount to credit of income, Jan. 1st, 1864, after payments by Trustees	$97,055 00
Net amount from the operations of the Railway	3,019,067 13
Amount from the Cleveland and Pittsburg R. R. Co. under the contract of 15th December 1863	39,035 33
Amount received from sale of 17,473 shares of capital stock sold under the agreement between share and bondholders made in April last	1,747,300 00
	$4,902,457 46

DISBURSEMENTS.

Amount to pay interest on b'ds of all classes.	$918,845 00	
Amount to pay sinking fund on 1st and 2d mortgage bonds	104,100 00	
Amount paid principal and premium on Chicago Depot (8 per cent) bonds	14,334 59	
Amount paid dividends Nos. 1, 2 & 3, (three quarters	530,782 50	
Amount of construction and equipment.	2,703,741 84	
		4,271,803 98
		$630,653 58

From this balance deduct the following payments:

Dividend No. 4 paid January, 1865, out of the income of 1864.	$204,265 00
Six months interest paid Jan., 1865, on 3d mort. bonds, out of income of 1864	56,822 50
Amount paid for bonds of the Akron branch road.	179,829 40
	440,916 90
Balance over all payments and liabilities	$189,737 68

The increase of earnings for the year over the previous year, is $1,987,532 02, or 38.9 per cent. Of this increase $1,133,976 94 was derived from the passenger business, $807,470 26 from the freight traffic, and $35,252 47 from express companies.

The amount of earnings derived from military transportation was $706,240 81, of which $510,023 75 was from transportation of troops, and $196,217 09 for quarter-master's supplies and other freights. The whole amount of Government business it will be seen produced less than ten per cent. of the gross earnings, and it is believed but a very small proportion of the net receipts, as the business was done full thirty-three per cent less than the commercial business of the road.

The gross earnings are equal to $15,214 67 per mile for the entire length (468 miles) of the road, and the working expenses 57.6 per cent of the earnings.

Owing to combination among the locomotive runners, which interfered with the running of the trains for about ten days, during the month of January, the earnings for that month fell short of what the regular movement of the trains would have produced, by about $150,000; but as the result brought about better discipline among the men, it is believed there was little, if any, ultimate loss on the year's operations.

The working expenses of the year are one and four tenths per cent. less than the previous year, notwithstanding the increase in the cost of materials, labor, and taxes. This diminution of the per centage of expenses may be attributed in part to the improved condition of the bridges, roadway, and track, and the large amount of new machinery put upon the road; and also in part to the larger per centage of passenger traffic to the whole of earnings in 1864 over 1863. In 1863 the passenger business was about 30 per cent. of the whole earnings, while in 1864 it was about 38 per cent. of the whole earnings. The reason for the more rapid increase in the passenger traffic is accounted for in the largely increased passenger movement throughout the country, growing out of the abundance of paper money, and partly for the reason that the through freight movement was restricted by the inability of the several eastern roads (as usually designated) to move the freight which was brought to their respective western termini, by rail and water communication.

The local business of the road has been moved with much greater promptness during the year than for the two years previous, resulting from the increase of motive power and cars; and but for the impediment at Pittsburg, which delayed freight and locked up our car equipments, there would not have been the slightest ground for complaint during the whole year in regard to delay in moving the local freight traffic of the road.

It will be seen, by reference to the tables in the Report of the Comptroller, that the increase in the local tonnage was 59,301 tons, or 23.4 per cent. while the increase in the through tonnage was only 11,497 tons, or a fraction over two per cent. The same disparity does not, however, exist in the *income* derived from the through and local freight, for the reason that the Company has received a greater increase in the rate charged for through tonnage than for local. There was a large falling off in the tonnage of horses, hogs, barrels of liquor and merchandise, especially merchandise moving westward. The principal increase of tonnage was in cattle, sheep, beef, manufacturers, coal, and products of the forest.

On the other hand, in the passenger business of the road, the greatest increase has been in the through and foreign travel, the number having increased from 173,941 in 1863, to 358,089 in 1864, and the revenue derived from this travel was increased from $771,460 56 to $1,401,980 56, while the local passenger business has only increased about one-half the above ratio, or about fifty per cent. The increased favor in which the public is beginning to regard this Railway as forming portions of the great through lines of the country, is believed to have exhibited itself in this increased business.

The average distance travelled by the local travel was 41 miles for each passenger, and for the through and foreign travel 200 miles for each passenger, and for the entire travel of the railway, local, through and foreign 82 miles for each passenger. These are about the average distances of travel for previous years, and exhibit about the same results as other leading passenger railways of a length approximating to the length of this Company's line.

The increased business and income of the road in 1861, 1862 and 1863, over the years next preceding (1860, 1861 and 1862), was most largely from the Western Division (west of Crestline), while the increase this year is about equal between the two Divisions; the Western Division increasing the most in freight, and the Eastern Division in the passenger traffic. This would seem to indicate a return of the travel and traffic of the southwest, so greatly paralized in 1861, 1862, and 1863, by reason of the rebellion.

The earnings of this Railway for the several years since our own line has been completed into Chicago has been as follows:

In 1859	$1,965,987 80
" 1860	2,335,353 83
" 1861	3,031,887 42
" 1862	3,734,390 43
" 1863	5,132,933 74
" 1864	7,120,465 76

The present equipment of the road, condition of the track, and station facilities, are sufficient to earn eight millions of dollars the current year, if the business offers, at the prosent prices; and if the earnings should amount to that sum, on the conditions supposed, there will be left, after paying current operating expenses, about $3,200,000 for interest, sinking fund, dividends, and such other disposition as the Board may think for the interest of the Company. To pay interest, sinking fund, and ten per cent. dividends, will require less than $2,000,000 of net income. It is, perhaps, prudent not to look for any increase on the net earnings for the current year, over the past year, as the operating expenses of the year may so increase as to more than counterbalance any increase in the gross earnings.

At the date of the last Annual Report, there was then ordered as additional equipment, 43 locomotives, and 9 passenger coaches; of these 38 locomotives were received during the year, and 5 a few weeks since, so that all the locomotives then contracted for, have been received, and are now running. The average term of service of the new locomotives run in 1864, was about three and three-fourths months. This would give a service equivalent to 158 locomotives for the whole year, or an earning of $43,432 per locomotive, including those employed in hauling wood, ballast, building materials, switching, and other non-earning service. The whole number of locomotives in service at the date of this Report is 187, a locomotive for each 2.66 miles of road. It is not proposed to add to this portion of our equipment this year, or until experience proves it inadequate.

The increase in the passenger train equipment has been very small, and is now very insufficient for the business of the Railway. The greatest want at the present time, connected with the operations of the Company, is, an increase of first and second class passenger coaches, baggage and mail cars. More than half the first class passenger coaches now on the road need repainting, and other repairs, yet the pressure of travel is so great that they cannot be spared from the track long enough to go into the shops for these necessary repairs. Repairs required for the safety of the trains is all that can be done until a greater number of cars are provided. There is now being built, at the Company's shops at Fort Wayne, four new first class passenger coaches, and Barney, Smith & Co., of Dayton, Ohio, are under contract to build four passenger coaches, all of which are to be in service in the month of April proximo.

The following will show the extent of the

PASSENGER EQUIPMENT.

	1st Class Coaches.	2d Class Coaches.	Emigrant Cars.	Baggage Cars.	Mail Cars.	Express Cars.
On Railway Dec. 31st 1863.	67	8	16	18	6	13
Bought in 1864	9					
Built at Allegheny shops			2		1	
" Ft. Wayne "						6
	76	8	18	18	7	19

In the estimate made a year ago, was included 400 freight cars, to be built at the shops of the company. The delay in the completion of the shops, and an order for 40 cars for the Government, which had to be executed, made it impossible to build the number estimated for.

The following table will give the

TONNAGE EQUIPMENT.

	Box Cars.	Stock Cars.	Flat Cars.	Caboose.	Total.
On Railway Dec. 31, 1863	626	433	520		1,579
" " 1864	812	585	629	26	2,002
Increase	186	102	107	26	423

All these new cars were built at the Fort Wayne shops, and in addition thereto forty box cars were built for the United States, under an order from the War Department, for which it has agreed to pay the company $42,840 00. These cars were furnished by the company at a less rate than we could buy at the time similar cars from private builders. All of the cars built to replace worn out, broken up, or burned up numbers, were also built at Ft. Wayne shops.

The condition of the roadway and track have been very much improved during the year, through the ordinary repairs of the Transportation Department. On the Eastern Division, (east of Crestline,) there has been placed in the track 4,031 tons of re-rolled rails, and 1,871 tons of new rails, which is equal to renewing 64 miles of the 188 on this division, or over thirty-four per cent. in a single year. On the Western Division there has been placed in the track 552 tons of new rails and 4,888 tons of re-rolled rails, which is equal to renewing 59.13 miles of the 280 on this division. In addition to this, 4,062 tons of rails were taken out of the track, on this division, repaired in the blacksmith's forge and replaced in the track, which makes a total of 103.28 miles of the 280 relaid with new, re-rolled and repaired rails. Taking the whole line, the renewal of track (exclusive of repaired rails) for the year, has been equivalent to relaying the whole road with new rails every four years. Including the rails taken from the track and replaced, the renewal of track was equal to one-third of the whole railway in one year.

Of new cross ties there has been put into the track during the year, 123,478 on the Eastern and 109,794 on the Western Division, or a total of 233,272, which is equivalent to renewing the whole road with cross-ties every five years. These renewals of track must be regarded as extraordinary and beyond the requirements of the average of future years. Notwithstanding the unusually large repair to the track in the past two years, we have not been without casualities resulting from defective track, but, fortunately, none of a very serious nature, so far as regarded the public. These casualties were the result of defective materials, notwithstanding the efforts to obtain the very best. The enormous price of railroad iron, and the difficulty of getting a supply, always results in an inferior product by manufacturers; and this rule finds no exception at the present time. This evil is aggravated by the virtual withdrawal of foreign competition, in the supply of articles necessary to the repair of railways and machinery, caused by protective tariffs and paper currency. These remarks not only apply to iron rails, but to most manufactures of iron and steel used in the repair of Railways and the machinery upon them. The rails now in use on all the roads of this country, are very short of what they should be for economy and safety, *i. e.* on roads doing a mixed business of over $5,000 to $6,000 per mile per annum. They are defective in quality as to wear, and, perhaps, in weight and form. Whoever remedies these defects, at reasonable cost, will be entitled to a niche among the useful men of his age.

In April last the bondholders united in the policy recommended by the Board in the last Annual Report, and approved by the stockholders, to increase the share capital of the Company for the purpose of improving and extending the property more rapidly than could be done from the earnings of the Railway alone.

The work proposed to be done, and the estimated cost, was given in the last Annual Report, and discussed at length by the then General Superintendent, now Chief Engineer, in his Report.

The amounts of the estimated expenditure for those purposes in 1864 was $1,912,000. The actual amount expended has been $2,703,741 84, or an excess over the estimate of $791,741 84. This is a very large increase, growing out in part of the rapid advance during the year in the price of materials and labor, and a greater quantity of work done than was estimated for

The principal items of expenditure for construction and equipment are as follows:

	Eastern Division.	Western Division.	Total.
Ballast	$78,483 04	$88,563 67	$167,043 41
Bridge, masonry	72,529 75	77,929 06	150,458 81
" superstructure	56,842 01	8,374 07	65,216 08
Car, passenger	26,008 68	13,572 57	39,671 25
" freight	205,438 68	215,431 62	420,870 50
Cross ties	21,779 04	8,469 79	30,248 83
Chairs	10,256 39	5,620 81	15,877 20
Engine houses	95,323 81	80,276 41	175,600 22
Grading	114,887 59	86,405 47	201,293 06
Iron rails	179,787 05	58,062 26	237,849 31
Locomotives	341,526 77	212,000 30	553,527 07
Machinery for shops	4,530 00	22,112 74	26,642 74
Machine shops	95,044 85	63,744 17	158,789 02
Real estate	25,259 48	7,670 33	32,929 81
Right of way	26,299 40	55,076 61	81,376 01
Spikes, splices, &c.	10,188 56	24,765 11	34,953 62
Stations and warehouses	70,122 43	59,023 86	129,146 29
New telegraph line	6,551 59	7,033 12	13,584 71
Fuel and water stations	23,176 24	55,956 83	79,133 07

It will be noticed that the amount paid for equipment alone, exceeds one million of dollars. If to this be added the amount paid since the 1st of January, for equipment delivered under the contracts of 1863, the whole cost amounts to about eleven hundred thousand dollars.

The second track from Pittsburg to Rochester has been laid down, and will be brought into use so soon as the frost is out of the ground, and the embankments which slope into the river have been tested by the spring rise.

The grading for the second track, from Chicago to Rock Island Railroad Junction, (7 miles,) was completed last fall, and the iron delivered, but the delay in getting cross ties prevented the track from being laid. It is expected that this track will, in a very short time, be ready for use. The grading for the second track east and west of Alliance, and east and west of Crestline, has been

suspended owing to the price of labor having advanced beyond the rate which the contractors were able to pay and before much work was done.

A great impediment to the prompt and economical movement of the traffic in previous years, has been the insufficiency of side tracks for passing and storing trains. This difficulty existed as to the small number of side tracks, and the deficiency in length of existing sidings. During the year there has been much improvement in this particular. The length of sidings on each division, and the comparison with former years, is exhibited in the following figures:

LENGTH OF SIDINGS.

	Laid previously.		Laid 1864.		Total.	
	ms.	ft.	ms.	ft.	ms.	ft.
Eastern Division.	33	3,662	7	2,280	41	662
Western Division.	34	1,775	6	5,100	41	1,595
	68	157	14	2,100	82	2,257

It is important that ten or twelve miles of sidings should be put down the present year, to prevent the delay of moving trains and to furnish standing room at stations.

A large amount of work has been done on bridge masonry and bridge superstructure, and of a substantial and permanent character, which adds to the security of the road, and will reduce the future cost of repair for these objects. The most important structure is the bridge across the Allegheny River, which is being renewed in the three spans next to Pittsburg with iron. The shore span, divided into two by the erection of another pier, will be finished about the 1st of May.

In referring to the table of expenditure just given, it will be seen that a very large amount of money has been expended in buildings, amounting to over five hundred and fifty thousand dollars. This class of improvements absorbs money faster than any other kind, as the labor to make them is mostly skilled, and the materials are expensive. The most important structures are the new engine houses and extension of old ones at Allegheny, Alliance, Crestline, Fort Wayne, Valparaiso and Chicago, by which we have 183 stalls for our 187 engines; the new machine, car and smith shops at Allegheny, Alliance, Fort Wayne and Valparaiso; the new station houses at Alliance, Crestline, Up. Sandusky, Fort Wayne, Plymouth and Chicago. At Plymouth an eating-house has been erected, and at Alliance one is in process of erection, for the accommodation of the passenger trains. At Crestline a convenient and commodious hotel is being erected for the accommodation of the travel at that important point, and where a good hotel has been greatly needed for many years. It is expected to have the building furnished and occupied by midsummer. The building of the company on Fifth street, Pittsburg, and now occupied as the General Office has been sold, as it was too small and unsafe as a depository of the valuable papers and books of the company. The foundation of a new fire proof building has been laid, and the walls of the first story are partly finished, on the property of the company, corner of Penn and Wayne streets, and, if possible, will be got ready to move into by the first of October next. The hotel and station building at Fort Wayne was found to be too small to accommodate the officers of the Western Division with suitable office room. A substantial two-story brick building, fifty feet square, has been erected for the purpose, and the rooms formerly occupied as offices are now used to advantage in connection with the hotel and eating house.

It is very desirable that all the work which has been commenced should be carried forward to completion, excepting, perhaps, the grading, which has been abandoned by the Contractors. The Chief Engineer estimates that $580,000 will be required for the purpose based upon the present contracts and current prices. Ballasting and ditching should also be continued, and one hundred and fifty thousand dollars might very profitably be expended for that purpose.

The number of first class passenger coaches ought to be materially increased, for which not less than seventy-five thousand dollars should be provided. The car equipment, if larger, would facilitate the business of the road, but, as the eastern roads do not appear able to carry off the through business which is brought to them by the western roads, and by water communication, we seem for the present to have reached the maximum of through traffic, and that additional equipment will only be required for the present for the local traffic.

The amount required then for construction and equipment will be as follows:

Estimate of Chief Engineer	$580,000 00
Ballasting and ditching	150,000 00
New passenger coaches	75,000 00
New freight cars	200,000 00
	$1,005,000 00

Of this amount about one half, it is believed, can be provided out of the earnings of the road. The additional cash capital required for conducting the operations of the road, growing out of high prices and extended operations, will not permit more than that sum to be diverted from the income of the road. In supplies alone $1,052,058 was invested at the close of 1864, as against $536,719 at the close of 1863, being nearly double. The amount due by other companies in the hands of agents, in the hands of the paymaster, and *in transitu* to the Treasurer on the 31st of December, 1864, was $1,142,885, as against $550,290 the twelve months previous, or in other words, the general law of trade, that the larger and more extended the business the greater the amount of capital required to conduct it, is as applicable to railroad companies as to other business.

If the company is provided with a full stock of supplies, its track and equipment in good order, and sufficient surplus cash on hand to pay promptly (and occasionally anticipate) the demands against the Treasury, it will be prepared to meet any reverse in trade that may seriously affect railway traffic, or a return to a specie basis for business, without impairing the ability of the company to pay regular dividends. The company now approximates this condition in its affairs, and it can and should at once be brought fully to this high standard.

About $5,302,432 has been expended for construction and equipment in 1862-'63-'64 on contracts mostly made in 1861-'62-'63, upon an average depreciation of currency not to exceed 25 per cent. To make good this depreciation to stockholders, so that the capital stock shall only represent the cost of a property upon a *specie* standard, we can readily pay the discount out of the earnings of the road, and consider that much as lost. The net earnings during these years, after deducting operating expenses, interest on bonds, sinking fund, and the dividends declared and paid in 1864, has been about $3,692,000. If from this sum we deduct $1,325,608, being the loss or discount on the amount expended for construction, so as to represent this cost by a specie standard, we still have a suplus of earnings of $2,366,392. This view of the case shows the actual strength of the company, and the intrinsic value of the capital.

If the work to be done on construction the present year is paid for, one half from proceeds of sale of stock and one half from the income derived from the working of the road, not to be charged to capital stock, we shall still have our capital stock, representing a property bought and improved at the specie standard. In this way, and in this way only, shall we avoid having the property represented by too large a capital.

Any railroad company that may now be adding to its construction and equipment, solely by means derived from the increase of capital stock by its sale for money, or out of its increase, to be made good to its shareholders by issue of new stock to them for a like amount, is building a pyramid with an inverted apex.

Of the $3,500,000 capital stock which the stockholders at the last annual meeting authorized to be sold, but $1,747,300 has been disposed of, and, as shown in a previous part of this report, the proceeds have all been expended as required by the stockholders. The Board has as yet taken no action as to the sale of the remaining portion authorized to be sold, but it may be inferred, from what has already been said, that it is not probable that the whole amount now authorized will be sold. The Board see no occasion, therefore, to ask you to authorize a further issue than has been already granted.

The harmony produced in the management of the railway of the company, and the Cleveland and Pittsburg Railroad, by the contract of Dec. 15, 1863, has been productive, we have no doubt, of an increased income, diminished expenses, and a better understanding between the employees of both companies. By reference to the income account it will be seen that this company received $39,035 33 of the earnings of the Cleveland and Pittsburg Railroad Company for the year. In the first nine months of the year the earnings of the Cleveland and Pittsburg road were more largely in excess of the per centage due it of the joint earnings, but during the last three months the earnings of this company were in excess, leaving the balance as above stated. This change was produced by a large increase in the equipment of this road, and not in the disparity of business offered to the two roads. The Directors of the Cleveland and Pittsburg Railroad Company in their last Annual Report say: "The experience of the past year shows that the resources of the Cleveland and Pittsburg Railroad are as yet only imperfectly developed; that the true interest and highest profit of the company is to be found, not in competition with other roads for distant business, expensive to be obtained and to be managed, but in developing and encouraging that which properly belongs to us, and which we may look on as permanently ours." This quotation undoubtedly expresses a fact as to the undeveloped business of the road, and the true theory upon which it should be managed. The Board of Directors of the Cleveland and Pittsburg Railroad Company have now under contract an increased equipment, both of locomotives and cars, and have also perfected their purchase of a large dock property at Cleveland, which, when improved as is proposed, will largely add to their facilities for increasing a freight traffic already offered to the road.

The Erie and Pittsburg road was so far completed during the year, as to allow trains to commence running through between Pittsburg and Erie in last October. As is usual on all roads just opened for business, the condition of the track and short equipment admits of doing but a limited amount, and so it has been with this road. The large local trade and good condition of the New Castle and Beaver Valley Railroad, however, has made good our expectations from that quarter, by throwing upon our road at Homewood a business which yields an income of at least $4,000 per mile per annum, to that portion of our line east of Homewood, and for which business very fair prices are obtained.

The Newcastle and Franklin Railway Company has completed the surveys and estimates of their proposed road, and so soon as the requisite amount of stock is subscribed, which may be expected in a very short time, the whole line will be put under contract. As stated in our last report (48 8-10th miles in length) furnishes the best route from Pittsburg to the Upper Allegheny oil region, and can be opened at less cost, and in shorter time than any other route.

The Lawrence Railroad and Transportation Company has under contract the greater portion of its road from Mahoningtown, on the Newcastle and Beaver Valley Railroad, up the Mahoning Valley to Youngstown, where it is to be connected with the Cleveland and Mahoning road. The completion of this 18 miles of road, and the 48 miles of the Newcastle and Franklin Railroad, will bring to Pittsburg almost the entire business of the great basin west of the Allegheny River, and east of the valley drained by the waters of the Tuscarawas, in Ohio, being about three thou-

sand square miles in extent in territory, rich in minerals and productive soil. This business alone, if controlled upon the road of this company in the manner just indicated, will pay the annual sinking fund, or in other words, pay off the mortgage debt of the company.

The Atlantic and Great Western Railroad, although completed to Mansfield at the date of our last Annual Report, has not as yet, as we can observe, had any effect on the business of this company, either to add to or diminish our business. Within a few days we have had a request to confer with the President of that company relative to the future business relations of the two companies, and a meeting will likely be had for the purpose within a week or ten days.

The business of the Cincinnati and Chicago Railroad Company, (now Chicago and Great Eastern,) which has passed over our road (near) Valparaiso to Chicago during the past year, was on the 6th inst., diverted to their own road. Owing to the temporary character of the relation between the two companies the business has produced quite as much inconvenience and annoyance to the officers managing the traffic of the road as of profit to the company.

On the 7th of April last, at meetings of the first and second mortgage bondholders respectively, called by the Trustees for the purposes, the Board submitted a "Financial Programme" for their adoption, to enable the Board to make a further issue of capital stock, as recommended in the resolution, adopted by you on the 16th of March last. Each class of bondholders at their several meetings, adopted the "Programme" as submitted. The President of the company and the Trustees have, in pursuance of the authority given them, executed such an agreement as will secure the objects sought to be obtained. A copy of the proceedings of the bondholders, and of the agreement which was executed, will be submitted for your information.

The several reports of the Chief Engineer, General Superintendent, and Comptroller, give very full information upon every point of interest in detail, and you are invited to give them a careful reading. The Board is especially gratified in being able to congratulate you upon the success of the Chief Engineer and his corps, the General Superintendent and his assistants, in conducting the operations of the road during the past year. In no year since railroads have been in use in this country, has a successful management of them had so many difficulties to contend with. These difficulties are too well understood to require a recital here.

By order of the Board of Directors,
G. W. Cass, President.

Pittsburg, March 14, 1865.

Wealth and Resources of Nebraska.

This territory lies north of and contiguous to Kansas; with Dakotah to the north and west of it, and Iowa east, having an area originally of 122,007 square miles, reduced, however, according to an official map from the Treasury Department, to 76,928 sq. miles, or an area of 49,233,920 acres.

At the last census it was divided into about 36 counties, some of which were scarcely inhabited. This is a remarkable feature in American progress and population, viz., that as soon as possible after the first settlement, or even exploration of a new territory, it is divided up into counties, the lines mathematically adjusted and carefully mapped. This renders the subsequent division into towns, and then land sections, a matter of easy accomplishment, and becomes a safeguard against disputes about boundaries and land titles. Thus many difficulties which attended the settlement of the original thirteen colonies are entirely guarded against, and lawsuits so common in the older States from defective locations and descriptions are entirely prevented.

The administration of the public land offices has from first to last not only been conducted in an original and masterly, but in a most practical and beneficial manner.

The total population of Nebraska in 1863 was 35,000, and it was constituted a territory in 1854.

The number of acres of farm lands laid out was 624,205, of which 122,582 were cultivated, of the value of $3,916,002, and the farming utensils employed on them was valued at $180,082.

The live stock consisted of 4,522 horses, 473 asses and mules, 7,125 milch cows, 12,720 working oxen, 8,870 other cattle, 1,757 sheep, and 25,965 swine, the whole valued at $1,216,328.

The products of animals were: of butter, 352,697 lbs., cheese, 15,762 lbs., wool, 3,312 lbs. The value of slaughtered animals was $100,755. The yield of wax was 202 lbs., and of honey, 9,465 lbs.

The cereal crops were as follows:

Wheat bushels	72,268
Rye "	1,185
Indian corn bushels	1,846,785
Oats	79,917
Barley	1,243
Buckwheat	12,329

The other crops were:

Tobacco, lbs.	3,801
Peas and beans, bushels	4,508
Irish potatoes "	169,762
Sweet " "	163
Wine, gallons	631
Hay, tons	25,320
Clover seed, bushels	5
Grass " "	206
Hemp tons	9
Sorghum, gallons	23,105

and of maple sugar and molasses a trifling quantity.

The manufacturing establishments were in 1860 107 in number, with a capital of $271,475, consuming material worth $238,225, and producing fabrics of the value of $581,942.

The articles thus produced were chiefly:

Lumber sawed and planed, worth	$316,104
Flour and meal	110,391
Boots and shoes	28,651
Malt liquors (2,200 bbls.)	16,400

In 1860 there was but one bank with a capital of $60,000. The value of the real estate and personal property was of the value of $9,131,056.

The soil of Nebraska is generally very fine, of a light, porous and black mould, very deep and easily cultivated. 450 bushels of wheat, and 150 of corn are frequently produced on a single acre.

The climate is milder than in the same latitudes east.

Bituminous coal and salt springs highly charged are found in Nebraska, and the gold mining district on the Wind River 400 miles west of Ft. Laramie is producing gold in large quantities. Omaha city the principal place, is situated on the Missouri River, and is the capital of Nebraska, with a growing population. It has a beautiful State house, numerous churches and other public buildings, being one of the most flourishing cities in the far West.

There are no railways in actual use in Nebraska though several are projected.

The truth is that these territories and new States make such rapid progress, that it constantly outstrips all published reports. The census of 1860 gives but a faint idea of the true state of things in 1865; and the statician of to-day finds that the figures of yesterday are generally quite incorrect, and are sure to be so to-morrow. In conclusion we may say, that the lands in Nebraska and Kansas are among the cheapest open to emigrants, and must necessarily attract their attention as soon as further access to them is obtained by railway, and peace returns with healing in its wings.

Cape Cod Central Railroad.

The annual meeting of the stockholders of this company was held in Brewster on the 21st ult. The report which was presented states that the work of grading the road bed was commenced at the beginning of July, 1864, and is being steadily prosecuted. The whole number of miles of grading completed is 15, and the whole amount of excavation completed, is 252,320 yards, at an expense of $50,464. The culvert masonry on the line is completed, at an expense of $3,842 24. The whole cost of grading and masonry thus far, is $54,306 24.

There remains yet to be completed 3¾ miles of road bed at the following estimated expense:

Grading 90,000 yards	$18,000 00
Loose rock, bridge, and grading depot grounds	3,700 00
Total	$21,700 00
To which add the cost of work completed	54,306 24
Making a total for grading, masonry and bridge work, as per Engineer's report	$76,006 24

The Directors also report that they have purchased 152 acres of land for the purposes of the road, including depot grounds, road crossings, &c., at a cost of $7,081 63, including also damages and cattle passes.

The whole amount of money expended for construction, as by the Treasurer's report, is $75,097 63, and the receipts from stockholders, paid on assessments, is $75,591 80, leaving a balance in the hands of the Treasurer up to date, of $494.17.

The old Board of Directors was re-elected, and the following votes were passed:

"That in the opinion of the stockholders the proposed railroad from Orleans to Provincetown should be built by the Commonwealth for the purpose of coast defence; and that the Directors of this company should ask the Legislature for leave to increase the capital stock of the company to such amount as in their judgment, may be expedient for the completion and equipment of the Cape Cod Central Railroad, between its present termini in Yarmouth and Orleans.

"That the Directors be requested to call a meeting of the stockholders at an early day to consider the expediency of bonding the road for the purpose of raising funds for its completion, etc."

☞ Mr. Andrew Carnegie has resigned the Superintendency of the Pittsburg Division of the Pennsylvania Railroad, and Mr. Robert Pitcairns, late Superintendent of Transportation, assumes he position he has thus vacated.

☞ A new bridge is to be constructed over the Schuylkill, at Gray's Ferry, by the Philadelphia, Wilmington and Baltimore Railroad Company, to take the place of the old one now in use.

☞ Messrs. Jerome, Riggs & Co., Exchange Place, have been appointed Sub-Agents for subscriptions to the popular 7-30 per cent. loan of the United States.

American Railroad Journal.

Saturday, April 8, 1865.

Stock Exchange and Money Market.

The eventful news of the fall of the capital and stronghold of the confederacy was received in this city on the 3d inst., with intense satisfaction. There seemed to be but one feeling among all classes of our citizens, that of pious thankfulness and heartfelt delight, and if the rebellion had any friends left among us, they were silent and discomfited. Leaving to other papers the appropriate task of commenting upon the political and military consequences of the splendid victories of Generals Grant and Sheridan, we cannot but perceive in them a further pledge of the certain triumph of our financial system, the assurance of a final redemption of our public debt, and a not distant relief from extreme taxation in the Northern and loyal States. For it must be borne in mind that all the tables of our statisticians, all the admirable treatises on our burdens and resources, all the deductions of such writers as Dr. Elder, Professor Wells and others, as well as the speculations which have appeared in this JOURNAL, have been based on the wealth, population and progress of the loyal States, looking to the possibility of their having to meet alone the outlay of this war for our National existence. We do not remember to have seen a single calculation founded on the absolute return of the rebel States, and their consequent contributions to the U. S. Treasury in common with the other members of the Union. But all this is changed. We now perceive that the seceded States will have to bear their full proportion of the cost of this war, and it is only a small atonement they can make for the misery and bloodshed which they have so wickedly and unprovokedly caused. We may then say that in addition to the sources of revenue already known to exist in the loyal States, we shall add those of internal revenue, customs duties at the Southern re-opened ports, and an excise duty on Southern cotton and tobacco. Without reckoning what would be the amount collected on cotton alone, we may safely suppose that the revenue would be thus increased—a full one-third by the application of our existing system of taxation and the present tariff. The holders of American stocks at home and abroad will therefore have a positive addition of 33⅓ per cent. to their present security. More than this, the occupation of Richmond which is accompanied by the practical destruction of the last principal army of the rebels is a guarantee of an approaching reduction of our burdens, and a reduction on a large scale, of our whole naval and military expenses. In this view of the subject the Government will ere long withdraw from the market as a borrower, and this probability has not escaped the attention nor been left out of the calculations of the present able and clear-headed Secretary of the Treasury. Let us see. If our expenses could be cut down to a million a day within six months, all difficulties in his way would vanish. Not another dollar would he have occasion to borrow. The present revenue, shortly to be increased by one-third from the South will not only be sufficient to pay all interest, and the civil list, but the expenses of the navy and army when they shall be reduced to a peace standard. It is the hope of Mr. McCulloch, at least that the expenses of the army as well as the navy may be "materially diminished." We do not doubt it.

Assuming this view of the subject, we may further assert that the Treasury will be perfectly able to sustain the National credit not only by its ample resources, but by the diminution of its necessities, and will be thus able to leave the loan market. It may not even be necessary in this condition of things to fund the legal tenders at all; they may be gradually absorbed by the payment of taxes, doing good service as currency meanwhile, and then be cancelled. The bugbear of three thousand millions of funded debt will be found a comparatively harmless affair of say two thousand millions, of which the reimbursement of one-third by our previous calculation will fall and fall justly on the rebel States. In this termination of the matter the funded debt will bear on the loyal States with much less weight than the

alarmists have contended. Should, however, this favorable liquidation not be so near as supposed, should the leaders of the rebellion, stiff-necked and bloody to the last, compel us to follow them to the mountains and caves of their fastnesses, and our military expenditures not decrease as rapidly and to the extent they otherwise would, then of necessity, the Government may require during the interim more money, and the question arises as to the form in which it should be raised. It is the opinion of such bankers as Mr. Olcott of Albany, that compound interest notes should not be used. We quote his own words on this and collateral questions; and they are worthy of attention. They seem to support our often expressed opinion, that if more paper must be issued, it should be legal tenders, with limited power, and to be only used as such for 12 months from date, after that to be convertible into stock and nothing else. Large amounts of interest would thus be saved.

"I dare not say that no further contingency may not arise to justify a further issue, but apprehend no such contingency beyond replacing in some form the compound 6 per cent. legal tenders which have recently been taken in payments from the Government, and also to the extent of possible calls for deposits with the Sub-Treasurers. I would not issue three years compound interest legal tenders. For the first 8 or 12 months they are used as currency. No one thinks of claiming or allowing interest on them. So that the interest is a loss to the Government without any advantage to the holders.

The 7-30s might be allowed to be taken by the Banks as pledges on which to obtain circulating notes. The Treasury does not get aid through the demand for stocks for the National currency. Purchases must be made through third parties who hold the gold bearing stocks. Yearly certificates could also be resorted to. After a short time we shall be in smooth waters."

He continues as to the operations of speculators: "Their success in carrying up gold instead of ruining saved the country, and by forcing importers to purchase and send abroad our agricultural productions, it has enriched our producers and has stimulated and sustained their loyalty throughout the whole of our long and terrific struggle for National existence. Legal tenders came opportunely to our aid, and have been an indubitable element of power and success. But for those legal tenders, by a mandate of our State constitution all our banks would soon after suspension have been placed in the hands of receivers for liquidation, and such a scene of bankruptcy and ruin would have followed as to have paralized our National energies beyond the hope of a prolonged and successful struggle. I think, however, we should all regard legal tenders as medicine for the correction of disorder, rather than as food for the healthy condition of life. We cannot in my judgment at the present time either lessen or increase their issue without serious derangement."

We may safely conclude, however, that if the Government is forced to continue for a time in the market as a borrower, it will not have much if any difficulty in obtaining what it requires. And the proof of this is that in the last forty-six secular days 161 millions of the 7-30s have been disposed of to the people without difficulty. No such spectacle was ever before witnessed in any country under similar circumstances. In a single week there were 1,691 subscribers of moderate sums of $50 and $100. And with such subscriptions, such large receipts from revenue it is no wonder, as we learn from an official statement from the Treasury, that the debt certificates which on the 31st of March were $230,373,000 were on the same date the present year reduced by the sum of $58,583,000, and a cotemporary asserts that the whole of this debt is in fact paid off.

From this statement we also learn the following in regard to the condition of the public funded debt on the 31st ult.:

Amount bearing interest in gold	$1,100,861,242
" " " currency	751,055,128
Total funded debt	$1,851,416,370
Legal tenders	$438,160,569
5 per cent. (in 1864 $120,519,110)	69,522,350
6 " coupons	156,477,650

In this funded debt, we presume the 5s, 6s, and 7-30s are included.

The temporary loan is given at $52,352,328.

It will be thus seen that the funded debt is not much greater itself than it was in October last, the increase of the whole debt is in certificates, temporary loans, and those 7-30s, which have not gone into permanent funded debt. We may then assume as we already have previously to reaching this last statement, that the revenues now accruing and to accrue under the law for their increase taking effect the 1st of April, will be on the calculation of the probable reduction to one-half of the army and navy expenditures enough to meet all these temporary loans, absorb the legal tenders, pay off the certificates, and in short reduce the whole floating debt at an early period, and thus leave us a permanent funded debt not much more than at its present amount.

The whole interest on the 31st March, payable in coin was $56,646,604, and in currency $28,667,002, and the greenbacks in circulation were precisely the same in amount they were in October last, viz., $438,160,569, thus refuting the idle rumor viz., that the issue had been lately increased. In our judgment it would have been far better to have at all times issued legal tenders for the amounts wanted, than legal tender interest notes, which pass from hand to hand in the quality of money, rather than at securities for loans.

The gold market has been seriously damaged by our recent grand military successes, notwithstanding the currency has not been diminished. In other words the Bank and Government paper afloat is actually several millions more now when gold has fallen to 150, than when it stood at 285. This fact is an important one to be considered and remembered. It is a complete refutation of the idea that inflation infallibly raises the price of gold. It disconnects the two entirely under certain conditions, and in this case proves two things, first that the large advance in gold was a fraudalent rise produced by disloyalty and combination. Next that the people of this country have implicit confidence in the stability of the republic, and the ability of its Treasury to retire in coin at an early day every obligation it has incurred.

But still the question is raised whether the approximation of paper to gold at its present speed of movement may not be the destruction of the Country, and this opinion it is known is entertained by political economists of some note who have pressed this view of the subject on the Government within a few days past. While we confess to a desire for a gradual rather than an instant change of the value of paper to that of a silver dollar, we cannot see any such result.

Let us examine this question in a plain and simple manner. There was in total circulation in paper when gold was 285 say 900 millions of dollars. It was at the moment of its greatest depreciation, worth in coin about 33 cents on the dollar, or $297,000,000. If we now estimate by the same rule the present worth of this currency at 70 cents on the dollar, we find the nine hundred millions of paper are worth in coin 630 millions of dollars. In other words the holders of this paper are worth 333 millions of dollars, or one-sixth of our whole funded debt, more than they were a few months since!

The purchaseable power of this currency is thus increased by 333 millions of dollars, and is relatively so much actual gain to the holders! Is there any man in his senses who will assert that this is a destructive process? So far from this, the Government, all creditors and all purchasers and consumers are so much better off by this rise and difference in the improved value of the currency. Possessers of fixed incomes also are getting twice as much in them as they did a few months ago. Such a change as this is anything but destructive to those who have hitherto been able to realise practically but 33 cents for every paper dollar they held or received.

The shoe pinches one class, and this we believe is a small one. It presses on those who in expectation of continued sales at 2 or 300 per cent., profit ventured to increase their stocks and run in debt for them, expecting hereafter to pay in paper constantly depreciating from its nominal value. The merchant for example who bought $10,000 worth of goods and agreed to pay for them at a specie value of 33 cents to the dollar, and now finds he cannot get a paper dollar either for gold or goods at less than 70 cents will unquestionably find himself a loser of nearly one-half the capital employed in that transaction. And so will the whole class of dealers who believed the war was never to end except with our overthrow, or if to end at all in our favor, was to entail upon us an endless career of irredeemable paper money. We learn the merchants of Boston whose foreign imports have been moderate, and whose transactions have been cautiously managed feel that an immediate return to specie payments would do them generally but little harm.

We notice that Railway shares and securities are improving, and there has been quite a demand for and a rise in many of them. It is said that shares are not so readily lent in the street as they were, a most injurious practice and tending to favor speculators rather than actual sales. Since Wall street is ever determined to speculate, or to speak plainly will gamble in something or other, it would perhaps be a good substitute for railway shares, if a grand lottery was drawn every day with large prizes, so that the operators might amuse themselves with that. Some one might draw a million for example and become a millionaire in ten minutes, and thus save a world of running, sweating and misrepresentation. The

drawers of blanks would not outnumber those who now lose their money every day in the street.

Money is still plentiful and the rate is about the same as usual, although it is well understood that some houses supposed to have made a great deal of money have been in the hands of Shylocks recently, and have ransomed their credit by only the most frightful sacrifices. Easy come and easy go is an expression, the truth of which the world has long recognised. The exports of specie the last week have been very small not quite $100,000. Exchange has ranged from 106 to 109½. We notice a great fall in cotton goods the last week. When fair muslins bring only 12 cents a yard, and when sugar sells at 11 cents a pound, we perceive that some dealers at least are not going to wait to find out whether it is best for gold to drop or rise. We only wonder how it is that the butchers, grocers, gas men and coal dealers manage to keep their commodities up at the highest rates, and the hatters, bootmakers and clothiers to find customers ready to pay the same prices they did when gold was 285. All this will now be corrected by the force of events. Those who oppose themselves to its current will be the losers.

We perceive that the subscriptions to the Government stocks are steadily going on in large amounts, with a marked improvement in the quotations, and that heavy foreign orders without a limit have been filled during this week. Railway shares have also rapidly improved, and public opinion of these is being as rapidly improving under a proper appreciation of their permanent character.

Our exports from this port for the week ending April 4, were exclusive of specie $2,960,719 against $3,766,748 same time last year.

The balance in the Sub-Treasury was on Tuesday last $41,766,746.

Money is easy, and the Bear interest in railway securities has been attended with numerous disasters within a few days past.

We learn on the best authority that the issue of government debt certificates has been discontinued by Mr. McCulloch.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Georgia 6s, 65; North Carolina 6s, 60; Brooklyn City Water Loan, 96; Milwaukee and St. Paul 1st mort., 80; Milwaukee and Prairie du Chien 2d pref., 70; McGregor Western 1st mort., 71½; Galena and Chicago 2d mort., 95; Brooklyn City R. Success of the 7-30 Loan.

Our readers will notice that subscriptions to the popular 7-30 Loan are still continued in the most liberal manner. To the Old World the success of these Peoples' Loans is one of the wonders of a Republic. The Government does not seek to borrow in foreign markets; it offers no premiums to bankers, but appeals directly to the people, and with what success is sufficiently shown by the fact that during *forty-three days* they subscribed and paid the cash down for *one hundred and sixty-one million dollars* of the 7-30 Loan. There can be no stronger evidence of public confidence in Government securities. While nearly all other stocks have gone down from twenty to fifty, and even a greater per cent. within a few weeks, all forms of U. S. bonds and stocks have remained firm except the slight fluctuations that are incident to all rapid changes in the money market. Our readers will remember that the subscribers to the 7-30 Loan receive semi-annual interest at the rate of seven and three-tenths per cent. per annum in currency, and at the end of three years from June 15th, 1865, they will have the option of receiving payment in full, or converting their notes into a 5-20 six per cent. gold interest bond. The late great decline in the premium on gold makes these notes more desirable than ever as an investment, and it should not be forgotten that their exemption from state or municipal taxation adds largely to their value. There is no interruption

in the receipt of subscriptions or the delivery of the notes. All banks, bankers, and others acting as Loan Agents, will pay subscribers the interest in advance from the day of subscription until June 15th.

Journal of Railroad Law.

LOSS OF GOODS.—NEGLIGENCE.—SUFFICIENCY OF EVIDENCE.—RULING OF COURT.

The recent case of Lamb against The Western Railroad Corporation was an action brought by the plaintiff against the defendants, in the Superior Court, Worcester County, Massachusetts, to recover the value of a chest of tea and a keg of tobacco which the defendants had transported, as it was alleged from Boston to Charlton, and deposited in their depot at the latter place, where the same were lost.

At the trial of the case in that court, the plaintiff testified that after a fruitless, inquiry for the goods on a previous day, he went to the depot on Saturday, May 11th, at about six o'clock, and, finding it locked, he asked some boys who were there, where Mr. Titts (who was employed there by the defendants) was, and the boys replied that he had gone away. On the following Monday or Tuesday he sent for the goods, and the messenger brought back word that the Mr. Towne (the defendant's agent) said that the depot had been broken into between Saturday night and Monday morning, and the goods stolen. Towne and Titts both lived within forty or fifty rods of the depot, and the plaintiff did not go to the house of either of them on Saturday, when he called at the depot, or make any further search or inquiry for either of them.

The plaintiff also put into the case the receipt of the defendants for the goods, to be transported from Boston to Charlton, and testified that he paid the freight.

No other evidence was offered, and the judge ruled that the evidence was insufficient to enable the plaintiff to maintain his action and the jury accordingly returned a verdict for the defendants.

The plaintiff alleged exceptions thereto, which were afterwards fully argued and heard before the Supreme Judicial Court of that State, when the following opinion was rendered by

BIGELOW, C. J.—There was not a *scintilla* of evidence offered by the plaintiff, to sustain the allegations in the declaration, that the defendants were guilty of negligence in their capacity as warehousemen. In the first place, there was no legal evidence of the loss of the plaintiff's property. So far as is shown by the exceptions, the only evidence on this point was that the plaintiff's messenger said that the defendants' agent told him that the depot had been broken open and the goods stolen. This was purely hearsay.

But assuming that this part of the plaintiffs's case was satisfactorily made out, there was still an essential deficiency in the proof necessary to sustain the action. No fact was shown which tended to prove any neglect or omission of duty by the defendants. It was not sufficient to prove that the depot was broken open and the goods of the plaintiff stolen. This might have occurred when the defendants were in the exercise of the most careful vigilance and oversight.

It was necessary for the plaintiff to go further, and offer some affirmative and substantial evidence of carelessness on the part of the defendants. They were liable only as depositaries, and could not be held liable except for negligence in the want of ordinary care in the custody of the goods. Thomas *vs.* Boston and Providence Railroad 10 Met. 472. Of such negligence there was no evidence.

It was not shown that the depot was not securely locked, or that any precaution against the risk of robbery was omitted, which a person in the exercise of due and reasonable care would have taken. In this state of the proof the court was well warranted in ruling, that the evidence was not sufficient to maintain the action, and in withholding the case from the jury. Denny *vs.* Williams, 5 Allen, 5.

The exceptions were over-ruled. And the verdict for the defendants sustained.

Railroad Earnings--Weekly.

The earnings of the Grand Trunk Railway for the week ending March 25, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$35,652 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	80,265 00
Total	$128,041 00
Corresponding week, 1864	120,601 00
Increase	$7,440 00

The earnings of the Marietta and Cincinnati Railroad for the 2d week in March:

	1865.	1864.
Passengers	$11,697 56	$7,838 19
Freight	7,402 93	11,400 83
Mail, express & telegraph	1,200 00	899 58
Total	$20,300 49	$20,138 60
Total this month to date	$42,191 71	$41,862 73
Total for the fiscal year, commencing 1st Jan...	226,930 85	184,542 74

The earnings of the Chicago and Northwestern Railway for the 3d week of March, are $110,807 94
Corresponding week of 1864 ..... 84,637 77
Increase $26,170 17

New Railroad Route to Washington from the West.

Both branches of the Maryland Legislature have passed a bill authorizing the Baltimore and Ohio Railroad Company to construct a railroad from some point on its line between Knoxville and Monocacy to the District of Columbia, and the Senate has also passed another bill giving authority to the Metropolitan Railroad Company (the corporators of which are residents of the District of Columbia, and of Frederick and Montgomery Counties, of this State, to build a road from Monocacy to the same point. The latter charter will, however, become null and void should the Baltimore and Ohio Railroad Company commence the proposed work in one year, and finish it in five years, from the passage of the act; so that this latter grant is not likely to prove one of any practical importance. The precedence thus given to the great corporation in which the State is so largely interested, will generally be recognized as eminently proper and in consonance with the best interests and convenience of the public.

The distance from Monocacy to the District of Columbia, *via* Hyattstown and Rockville, is some 45 miles, and from Point of Rocks, a station lying between Knoxville and Monocacy, about 50 miles. If the Baltimore and Ohio Railroad Company should select the latter as the initial point of the proposed road, passengers from the West would have their journey to the capital shortened by fifty or sixty miles, and portions of Frederick and Montgomery Counties be accommodated with increased facilities of travel and transportation. It is probable that measures will soon be taken to commence the construction of the road.—*Baltimore Sun, March* 24.

Valuation of Allegheny Co.

The following is the taxable valuation of Allegheny County in 1864:

City of Pittsburg—		
Real estate	9,786,588 00	
Personal	241,980 00	
Occupations	900,735 00	
		10,929,303 00
City of Allegheny—		
Real estate	3,224,662 00	
Personal	257,547 00	
Occupations	525,346 00	
		4,007,555 00
Fifteen Boroughs—		
Real estate	2,792,613 00

Progress of the Pacific Railroad.

We are informed that the reports in relation to the hostility of bushwhackers in Jackson County to the workmen on the line of the Pacific railroad, near Independence, have been exaggerated. No laborer has been molested or even threatened, but a few petty thefts have been committed, from time to time, of property belonging to the company. The work has not been stopped a single day, and the bridges destroyed by Price east of Kansas city have been rebuilt. Trains are now ready to run regularly between that place and Independence. Orders have been given for immediately laying the track to the Little Blue, and the work will now be pushed with all possible rapidity from west to east, as well as from east to west.

From Warrensburg the road bed is graded to Kingville, and the track will be laid to Holden, nine miles from Warrensburg, before the end of next month. All the iron, spikes, ties, and culvert timbers have been bought, and are now ready for use. About 800 laborers are employed on the grading, and were it not for recent wet weather, this part of the work would have been finished as far as Pleasant Hill. Additional laborers are going forward every day. Fifty teams and carts were sent up the road on Thursday morning, and from all information in our possession, we are happy to assure our readers that the progress of the road toward its final completion is entirely satisfactory. Unless some unforseen accident or interference should occur which cannot be provided against, the company confidently expect that the road will be completed its entire length to Kansas City the middle of July.

Gov. Fletcher manifests a strong interest in this work, as he does in all enterprises connected with our system of internal improvements. The Governor has secured ample military protection for the laborers employed on the road, and Gen. Pope and Gen. Dodge have assured the company of their hearty co-operation in promoting the early completion of the railroad by the aid of a military force adequate at all times to drive off Rebels in large or small gangs. The presence of three additional companies of cavalry has been secured, and the men are now on the ground protecting the workmen and property of the company. The

prospective completion of the Pacific Railroad is an event in which every citizen of St. Louis is interested. For years the want of this important road has been increasing, and we are pleased to record the favorable symptoms of its present condition, which promise so abundantly to give us a finished road before the Summer months are over. —*St. Louis Democrat, Mar.* 25.

Copper Product of Keweenaw District.

The following statement will show the number of tons of copper produced by the various mining companies in the Keweenaw District in the years named:

Mines.	1862.	1863.	1864.

Central Pacific Railroad.

The Auburn, Placer Co., Cal., *Stars and Stripes*, of March 1st, says:

The work of grading the Pacific Railroad is now progressing rapidly. The Company have about 1,500 men and about 150 horses and carts employed, and the road bed between Newcastle and Auburn will soon be completed. The work of raising butts of the trestle-work at Newcastle has been commenced. We are assured that if the weather only continues favorable, the work of track-laying will be commenced about the 1st of April, and it will only require a few days to complete it to this place. A large force of laborers are also at work at several places between here and Clipper Gap. It is the expectation of the company that the track-laying will be continued, when once commenced, until the road is completed to Clipper Gap, a distance of 12 miles from Newcastle, and which will probably be reached in May. The work is heavy, but with the large force employed, the progress is by no means slow. The Company still need laborers, and employ all able-bodied men who apply. They would be glad to double their present force, and are increasing it as fast as they can.

Pacific Railway.—Eastern Division.

A correspondent of the Boston *Commercial Bulletin*, writing from Wyandotte, Kansas, says that "a daily train is now running to Lawrence, and during the summer will reach Topeka, the State capital. Since the death of Mr. Hallett, last summer, Mr. E. M. Barthlow has acted as superintendent. John D. Perry, of St. Louis, is president. I am told that the road is now clearing eighty dollars per day, with a steady increase as navigation opens. The Government aid of twenty-four thousand dollars per mile has not yet been received, neither have the company acquired a title to their land. The road thus far has been built and stocked by private funds, and has made its payments promptly. The Missouri Pacific Railroad has nearly repaired the immense damage committed by Price last Fall, and will be completed to Kansas City (connecting with the Union Pacific) this season. There will also be a road built from Leavenworth to Wyandotte during the summer; distance, twenty-five miles, thus giving Leavenworth a direct St. Louis connection."

The Continental Bankers.

The following interesting particulars with regard to the operations of the Continental Bankers in American securities, are taken from the Frankfort correspondence of the Cincinnati *Gazette*. We have long known of the transactions of several of these houses, and others in Germany of equal wealth and reputation. Our JOURNAL is regularly furnished to most of these, a peculiarity of its circulation, and we have from time to time taken especial care to give them early and precise information during the financial difficulties of the United States, always assuring them of the final result of the rebellion, and the increasing strength and resources of the country as adequate to meet all its engagements. If the JOURNAL has influenced their business, they will have made immense fortunes by relying on its statements, and investing in the securities recommended. The writer says:

In London, the chief firms engaged in this business are Rafael & Co., Cohen (a relative of the Rothschilds,) and Sattherwaite & Co.; and in Frankfort, Speyer, Ellisen & Co., Greenbaum & Bullion, Seibert & Co., Ph. Nic. Schmidt, and Seligmann & Stettheimer—the latter an American firm just formed.

It is probable that the Amsterdam bankers buy and import as many American national bonds as this city, but I think not. It is very strange indeed that none of our shrewd Yankee bankers have gone into this very profitable business, but have allowed it to be monopolized by the foreign dealers wholly. I think for the past two years not to exceed half a dozen steamers have brought quotations showing higher rates in New York than here. Now every steamer brings a large amount to London, and not less, generally, than a million to Germany and Holland. All that comes is absorbed at once, generally sold before its arrival, and still the cry is for more. Within the last week orders have gone to New York for over $5,000,000 (!) of 5-20s for this city alone.

The sale of American stocks constitutes the chief business at the Bourse. Orders arrive daily for large purchases from Brussels, Berlin, Dresden, Munich, and within the last week the bankers have received orders to purchase considerable amounts for Vienna, Geneva, and even St. Petersburgh. New fields for purchase seem constantly opening, so that it is impossible to glut the market. In Austria, it is not allowed by law for any person, as I am informed, to buy or sell anything but Austrian funds, yet the Austrian capitalists have caught the mania, and send their Austrian securities to be sold here, and the avails invested in American stocks, which are held in trust for them by the Frankfort bankers.

To give your readers a little idea of the extent of the amounts held by some capitalists in Germany, we could mention one individual here who holds a million dollars of 1881s, and a baron, I—hi, of Munich, who holds $500,000 5-20s, which he bought of the late King of Bavaria at 67, and I know of various other persons holding from $20,000 to $100,000 each. They have an abiding confidence in the restoration of the Union, and seem to be taking as much interest in our affairs as any of our own citizens. In November last the number of United States stocks held in Holland and Germany was estimated at two hundred million dollars, but it must be much more at this time, and it will not be long before the whole $510,000,000 of the 5-20s will be absorbed in Europe.

Pittsburg, Ft. Wayne and Chicago Railway.

The annual meeting of the stockholders of this company was held at Pittsburg on the 15th ult., at which the following gentlemen were elected directors for the ensuing year:

J. F. D. Lanier, S. J. Tilden, L. H. Meyer, — New York.
J. Edgar Thomson, G. W. Cass, S. Harbaugh, — Pennsylvania.
Kent Jarvis, Willis Merriman, Robt. McKelly, — Ohio.
Samuel Hanna, Jesse L. Williams, P. Hoagland, — Indiana.
W. B. Ogden, Illinois.

At a meeting of the Board of Directors after the election, Mr. McKelly resigned his position as a Director, and the Board unanimously elected the Hon. John Sherman, of Ohio, to fill the vacancy.

The usual quarterly dividend of two and one half per cent. to 1st April was declared, payable on the 17th inst.

The President's annual report for 1864 was read and accepted and ordered to be printed. As it is replete with interest, we have decided not to mar it by making a synopsis, hence it will be found entire in our present issue. Although of considerable length, it will amply repay a perusal by any one desirous of knowing the condition of this great thoroughfare of the trade and commerce of the West.

Debt of Allegheny County.

The funded debt of Allegheny County at the close of 1864 was as follows:

No. 1—Certificates of loan 6 per ct.	$70,899 53
No. 2—Vol. bounty bonds 6 per ct..	87,750 00
No. 3—Comptrollers coupon 5 per cent bonds	1,945,000 00
Comptrollers 5 per cent. Reg. bonds	156,770 95
" " " scrip.	473 42
	$2,260,893 91
Floating debt	488,027 25
Total	$2,748,921 16

☞ The Consolidated Coal Company, Pennsylvania, has been consolidated with the Wilkesbarre Coal and Iron Company. As a company operating in the Cumberland region have adopted a similar title to that of the Consolidated Coal Company, the new organization will be known as "The Wilkesbarre Coal and Iron Company."

☞ Our last advices from Liverpool mention the fact that petroleum has advanced in that market 2s sterling, or 50 cents of our money per gallon, and is in demand. This advance is owing to the excise duty charged on it here, and will not affect the sales as it is an article of prime necessity, and not to be had from any part of the world at present except the United States.

☞ At a sale of Sea Island cotton by the U. S. Marshal at Philadelphia on Tuesday last, the prices ranged from 29 cents to 27 for the best, and 6 and 7 cents for the damaged. The quotation of American at Liverpool on the 21st ult. was 14½@18d sterling.

☞ The Phillips Petroleum Co., of whose respectability and success we spoke last week, has had all its shares taken, and the price is not $4, as we supposed, and inferred from its circular.

Allegheny Valley Railroad.

The Allegheny Valley railroad has been leased to the Mahoning and French creek Railroad Co., a recently formed and charterd organization, and the new arrangement will go into operation on the first of April. The new company contract to put under construction immediately at each end of the road, ten miles of track, and to complete as rapidly as possible the seventy-six miles yet remaining unfinished. If they can easily obtain labor, this work will be done within a year. This road, says the Pittsburg *Chronicle*, "will be of immense importance to this section of the country, particularly when it is completed out through the oil regions, as it will then bring directly to this city, the oil which accumulates in such vast quantities during the winter, when the navigation of the Allegheny river is closed, and a great portion of which is now diverted to New York city. Statistics have shown that this trade amounts to three or four millions of dollars per annum and no effort should be spared to secure to our city the rich revenue arising from it."

Quakake Railroad.

The work of the extension of the Quakake railroad is progressing rapidly. By fall there will, in all probability, be another route open from the Schuylkill region to the city of New York. This road crosses the Catawissa road at the Quakake junction, and then, passing through Shenandoah city, reaches Centreville, and from there passes on to Mount Carmel, where it connects with the Shamokin Valley road. It will afford an easy and quick transit for passengers from Harrisburg and south, through the heart of the Pennsylvania coal fields—giving them an opportunity of seeing some of the wildest and most picturesque scenery. The road connects with three of our main roads, the Philadelphia and Erie at Sunbury, by means of the Shamokin Valley road, the Catawissa at Quakake junction, the Lehigh Valley road above Mauch Chunk, and the New Jersey Central at Easton.

Central Ohio Railroad.

The property, franchises, &c., of the Central Ohio Railroad Company were yesterday sold at public sale by H. J. Jewett, Special Master Commissioner, for that purpose appointed by the Circuit Court of the United States for this district, to J. W. Garrett, President of the Baltimore and Ohio Railroad Company, and W. H. Clement, President of the Little Miami Railroad Company, as trustees, who, in the purchase, represent the creditors and stockholders of said company, parties to an agreement looking to the capitalization and reorganization of the affairs of that company.

By the order of sale, no bid for less than $1,000,000 could be received by the commissioner. The sale was made at that sum, subject to the first and second mortgage, upon which there was due, on the first day of January last, as found by the court, about $2,800,000.

The purchase was made and the property will be held by the prrties named, in trust, for such of the creditors and stockholders as are parties to the agreement stated; and we understand from the gentlemen making the purchase, that all creditors and stockholders who have not signed the agreement and surrendered their claims, in accordance with the terms thereof, will have the opportunity of doing so at any time previous to the confirmation of the sale, which they will consent to be postponed to as late a day as the parties in interest may think is proper.

By the terms of the agreement, which we have had the opportunity of examining, interest upon all claims proposed to be settled under it is ignored, and the principal alone is dealt with. The Fourth Mortgage Bonds, the first in order of priorities, are to be paid in common stock at par, or in preferred stock at eighty cents to the dollar, at the election of the holder; the Income Bonds at eighty cents to the dollar in common stock, or at sixty cents in preferred stock, at the election of the holder. The Floating Debt will receive sixty cents to the dollar in common stock, and the present stockholders forty cents. By this programme, the liabilities of the Company will be reduced to about $5,000,000, which is regarded as a very reasonable estimate of its present and prospective value.

The agreement for the capitalization of the affairs of the company it is aimed to make eminently just in its provisions, and we refer to it now more at length than is our custom, that it may receive the full consideration of such of our readers as are interested in that company, and to advise them, now that they have the opportunity, to avail themselves of the time allowed by which they may become parties to it.—*Cincinnati Commercial, March* 29.

McGregor Western Railway.

W. B. Strong, long connected with the Milwaukee and Prairie du Chien Railway, at Janesville, has been appointed Superintendent of the McGregor Western Railway. This road is now operated by the former Company.

Columbia and Port Deposit Railroad.

The bill granting a right of way through the State of Delaware to the Columbia and Port Deposit Railroad Company has passed both branches of the Legislature of that State.

☞ The Montreal City Gas Company have issued a stock bonus of twenty per cent. in addition to their usual dividend of 8 per cent.

☞ The gold crop of Nova Scotia in 1864 weighed 20,022 ounces, an increase over the previous year of 7,021 ounces.

RAILROAD IRON.

I WANT to purchase one thousand tons best, from 40 to 60 lbs. rails, for a Corporated Company in Pennsylvania, payment made in first mortgage bonds to run for 30 years, at the rate of 7 per centum, per annum; bonds will be made out under special agreement, payable in Gold or in Sterling, interest payable half-yearly either in this City, Philadelphia, or in London. As to reference, no better can be given, and any further information will be given by

PHILIP NATHAN,
26 South William street, N. Y.

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO R. R. COMPANY, PITTSBURG, March 17, 1865.

DIVIDEND NOTICE.—At a meeting of the Board of Directors of the Pittsburg, Fort Wayne and Chicago Railway Co., held on the 16th inst., the regular dividend of TWO AND ONE HALF (2½) PER CENT. on the capital stock for the quarter ending March 31st inst., was declared payable, free of government tax, on and after April 17th prox., by the Treasurer, to Shareholders registered at Pittsburgh, and by Messrs. Winslow, Lanier & Co., No. 52 Wall street, to shareholders registered at New York.

The transfer books will close March 31st inst., and will reopen April 17th prox. By order of the Board.

4-12 F. M. HUTCHINSON, Secretary.

J. F. D. LANIER, President, of Winslow, Lanier & Co. C. V. CULVER, Vice-Prest. of Culver, Penn & Co.
C. N. JORDAN, Cashier.

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.....$1,000,000.

DESIGNATED DEPOSITORY of the UNITED STATES AND AUTHORIZED AGENT OF THE TREASURY.

No. 5 NASSAU ST., Feb. 17, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, together with a portion of their correspondents, being persons of well-known standing and large pecuniary means, have become the owners of most of its Capital Stock, and assume its control and management, Mr. C. V. CULVER retaining all his interest, and accepting the Vice-Presidency.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.

C. N. JORDAN, Cashier. 3m-3

American Railroad Journal.

New York, Saturday, April 15, 1865.

The Union Pacific Railroad.—How to Construct it and Save Millions of Money and Years of Time.

The great work of restoring the Union having been nearly accomplished, the next great undertaking we have on hand is unquestionably the construction of the Union Pacific Railroad. Notwithstanding the war and its enormous demands on the people for men and money, the Railroad has not been forgotten. The first active movement in its favor was commenced during the war, and a period of great despondency. We can now continue it under the most exhilerating circumstances. In California there is great activity in laying out lines, constructing them and bringing them into use. Our readers have been informed from time to time of the progress of these works which are now going on, so as soon to cross the slopes of the Sierra Nevada, all looking to the approach of the great line from the East, where the difficulties of grade and construction are almost nothing. The Eastern section of this between Leavenworth and 100th parallel is finished for forty miles, and is being rapidly constructed for about 60 more. To the 100th parallel there is no doubt, the company having this part of the route exclusively under their own control, will in good faith proceed to finish it as fast as possible The road as far as completed is now doing a profitable business; indeed it has not capacity at present to do all that is offered.

The Company chartered by Congress is believed to be engaged in surveys and preliminary examinations of the routes beyond the 100th parallel, but probably will not, before the division E of the 100th parallel is in operation, be able to do much more for want of means of transportation.

The ordinary expectation of the public is that the whole line will be opened in ten or fifteen years.

This is too long altogether, but a delay quite unavoidable unless we can hit on a new plan of operations, and certainly there is one quite opportune and worthy of consideration.

At an adjoining meeting of the Chamber of Commerce to be held on the 15th, notice will be given by Mr. Bloodgood of his intention at a proper time to introduce a resolution to inquire into the propriety and feasibility of the employment of such portion of our large armies as may agree to the service, in the construction of the Union Pacific Railroad.

The mover contemplates the employment of two or three hundred thousand men, to be under military discipline, to receive the usual pay and rations, and to be led by the Engineers of the army. As a further reward for their services they should receive adequate grants of land along the line, so that they may be able to locate themselves on their own properties, to become artizans, agriculturists, miners, engineers, railroad employees or what else they may choose to be.

It is very certain that during the present war our soldiers and military and civil Engineers have together executed most remarkable works with astonishing celerity. Bridges of all sizes, tracks and superstructure, canals and ditches have been the work of their hands in every campaign. Large rivers have been turned into new channels or dammed into sufficient depth to pass large fleets around or over shallows. The spade has been as efficiently used as the musket or the sword, and in fact every soldier engaged in these works has become a practical Engineer. Now then as these men will in all probability be thrown back on the Country very suddenly, and be for some time in want of employment, would it not the best thing to be done for them and for the country, to transfer them with their own consent and with certain inducements of a valuable nature, to the line of the Union Pacific Road, and set them at work. They have most of them already made so many military railroads, that they may be considered as experts.

The following results might be safely calculated upon. The Government paying the wages and furnishing clothing and rations for these men, could offset this in money against the subvention of millions they have agreed to pay to the Company.

A large body of good of soldiers would have regular, remunerating and healthful employment until the road was completed. Their supplies and subsistence would give a great impetus to industry and protection in the Country in the vicinity of the work, to the manufactories producing the tools and materials for construction, and in a great degree favor the continuance of numerous works for the manufacture of shovels, spades, crowbars, barrows, trucks, &c., necessary for laboers on railways. A large demand for rail cars and engines would grow up as the sections came into use, while all this production, manufacture and activity would be immediate, for by the proper application of a force of 200,000 skilful men along the line, the whole could be made ready for use *within two years* from the time they commenced work. It is well known that with a force of 5,000 workmen, the Atlantic and Great Western Railway, was constructed for a considerable portion of it at the rate of one mile per day. At the same rate, forty miles a day could be constructed and finished by our own troops, if in the numbers stated, so that in fact between 13 and 1400 miles could be laid in a single year, counting the working days only.

Two years then would give ample time for its construction. At the conclusion of this period farms, mining grants, village and city lots, could be given as bounties and rewards to the workmen. These could then gather their friends and families around them, and permanent settlements and industrial occupations would follow on a large and profitable scale. The probability is that the whole

line of the road would be dotted with habitations singly, or in towns and cities; millions of acres of land would be put under cultivation, and in a short time a very dense population would cluster around these infant settlements. And finally the route to California being at once opened, the trade and commerce between the Atlantic and Pacific would become so enormous and so valuable as to materially enlarge the wealth and resources of the Country. We may safely say that the best if not the greater part of the trade of the East Indies and all that of the Northern Pacific Ocean would cross our continent in our own latitudes. In short that wealth would pour in in such enormous streams, that we should be surprised that we ever doubted our ability to meet our national debt. All these results may most surely be obtained by an immediate construction of the road in the manner suggested, and we believe our gallant soldiers would volunteer as one man for the purpose, for they can see as well as the most prominent men of the Country have seen, that we want but this one more element of National strength to open all our mines, and work them, and to reach the Pacific and appropriate its Commerce to ourselves.

Nor is the plan a novel one. The great canal of Suez has employed 25 to 26,000 men at one time, and is now navigable from the Mediterranean to the Red Sea. It seems to us that if this plan is matured and managed as well as our military campaigns have been of late, we might see cars starting from this city direct for San Francisco in the year 1868, and the traveler pass through countries where 200,000 contented soldiers were gathering their families about them in twice and thrice that number. The plan certainly deserves attention.

Important to Miners.

The "*United States Disintegrating Ore Co,*" have permanently located their office at Nos. 155 and 157 Broadway, N. Y. This company have purchased from the inventor a perfected process for the treatment of ores, whereby the most unmanageable argentiferous, auriferous, and other ores are fully and completely desulphurized and oxydized. By this process the assay can be reached, or as nearly so as is possible,—certainly 95 per cent. of it—expeditiously and cheaply, and with far less original outlay than is possible by any other known process. Large quantities can be treated in a single apparatus—reaching without difficulty 50 tons per day of 24 hours. Letters Patent have been secured by the Company, amply protecting their rights, and active measures are being taken to introduce their valuable process to the notice of the Mining interests generally. To convey an idea of the superiority and value of the process of this company, the following statement is submitted:

We take the Sulphur, Arsenic and Phosphorus from the ore by attraction, and oxydize the baser metals,—or in other words—we attack Sulphur, Arsenic and Phosphorus, in a heated condition, by Hydrogen gas, which become by the contact, sulphuretted, arsenicated, or phosphoretted Hydrogen gas, as the case may be, and simultaneously another agent follows and oxydizes the antimony and the baser metals, copper, iron, &c.

By our process, the hardest minerals, combined with metals, are decomposed or disintegrated, so that, when thus treated, it is only necessary to pass the residuum between the grinding surfaces of mill stones, in order to remove the oxide from the metallic particles, after which treatment it is ready for amalgamation.

The first outlay for apparatus, including motive power, will be about two-thirds less than the cost of the expensive, complicated, and cumbersome machinery heretofore employed in practical mining operations; while the material required for the construction of our apparatus is mostly within the reach of miners, on their own ground. Those parts requiring transportation are easily obtained, and can be moved from point to point with perfect facility.

As stated above, the assay by our process, is reached within say 5 per cent., while the yield of metal by the old method of treating ores is well known to be an average of 25 per cent. of the assay.

Rights to use our process will be disposed of on the following terms, to wit:—$1,000 in cash, for a license to put up an apparatus of any capacity, and a royalty of $3.00 per ton; this amount being saved in preparing the ores for amalgamation by our process as the expense of preparing the ores by the old method is about $6.00 per ton. The Company are prepared to treat with parties owning good mines, for the purchase of such properties.

The following statement exhibits the difference in the results of treating ores by the old process, and that owned by this company. The results by the mechanical methods heretofore employed, at an enormous expense, are based upon the general experience of practical miners, while the results rendered by our process are based upon an estimate of $100 to the ton of sulphurets—$100 per ton being the lowest figure that should be given, as the yield of sulphurets by assay is from $100 to $1,000, or more, per ton.

STATEMENT.

Tons treated per day by the ordinary process	50
Yield of Gold per ton by the ordinary process	$25
Value of yield of Gold per day	$1,250
Working days of the year	300
Value of annual yield of Gold	$375,000
Annual expense of labor, $10 per ton	150,000
Net Annual Profit	$225,000

PER CONTRA.

Tons of ore per day treated by our process	50
Value of yield of Gold per ton treated by our process	$100
Value of yield of Gold per day	$5,000
Working days in the years	300
Value of annual yield of Gold	$1,500,000
Annual expense of labor, $10 per ton	150,000
Total value of annual yield of Gold	$1,350,000

RECAPITULATION.

Value of annual yield of Gold by our process	$1,350,000
Value of annual yield of Gold by old process	225,000
Difference in favor of our process	$1,125,000

We could show a greater difference still in our favor, from the fact that it is cheaper and easier to treat ores by ours, than it is by any other known process; but we can afford to be liberal, and have been so in making the above statement.

C. V. DeForest, Pres't.
T. Hampden Field, Sec.

☞ A bill is now pending in the Wisconsin Legislature, which provides for amending the several acts, incorporating the Mineral Point Railroad Company, so as to authorize that company to extend its line from Mineral Point, in the County of Iowa, to Tomah.

Toledo, Peoria and Warsaw Railroad.

The following is a comparative statement of the earnings of the Toledo, Peoria and Warsaw Railway from June 1, 1864, to March 31, 1865:

	1863–'64.	1864–'65.
June	$24,048 14	$35,469 99
July	20,799 91	27,391 51
August	24,249 80	37,165 31
September	27,011 14	47,640 44
October	26,700 38	44,052 98
November	24,849 87	44,733 45
December	26,420 76	39,230 30
January	20,983 79	39,738 68
February	26,689 92	45,813 92
March	30,214 05	48,605 50
	$252,067 76	$409,842 08

Increase in ten months, $157,774 32; average increase per month, $15,777 43.

Chicago and Milwaukee Railroad.

The following is a comparative statement of the earnings of the Chicago and Milwaukee Railroad for the months of December, January, February and March:

	1863–'64.	1864–'65.
December	$45,248 76	$62,844 46
January	86,428 65	59,764 68
February	46,158 32	55,329 68
March	46,875 10	70,418 86
	$174,890 83	$248,357 58

Gain in four months, $73,466 75; average gain per month, $18,364 19.

Illinois Central Railroad.

The receipts from operations of this road for the years ending December 31, 1863 and 1864 have been as follows:

	1863.	1864.
Freight	$2,500,959 91	$3,706,632 72
Passengers	1,797,972 12	2,360,398 55
Extra baggage	2,749 11	4,037 75
Mails	76,300 00	75,346 26
Express	40,809 70	49,757 58
Rents	15,149 17	.....
Rent of road	54,196 04	59,559 78
Rent of engines & cars	17,011 42	.....
Storage and dockage.	81 49	127 06
	$4,505,228 96	$6,255,859 70
Earnings over P.& O. Railroad	65,799 42	73,587 50
	$4,571,028 38	$6,329,447 20
Less operating expenses:		
Salaries	$77,083 26	$95,913 18
General expenses	83,402 14	126,044 59
Legal expenses	9,493 95	12,761 84
Claims and damages.	17,086 52	35,627 09
Station expenses	338,303 00	487,809 92
Train service	104,695 66	320,783 90
Wood and preparing.	80,692 68	78,946 85

Add balance of profit and loss account, N. Y. office profits from sundry sources		62,603 80
Net amount as shown in General Balance Sheet	$2,930,174 93	$3,547,387 97

Compared with the year 1863, the gross income from traffic in 1864 shows an increase of $1,758,418 82, with an increase in operation expenses of $1,308,952 72—making the increase in net earnings $449,466 10. Deducting the charter tax, the gain is $344,946 64. The balance to credit of Interest Fund Account, being amount applicable to interest and dividends, is $617,313 04 in excess of the previous year. The President in his report says:

The local traffic upon the Illinois Central line, in the year 1864, was much disturbed by the requirements of the Government; the forage and other supplies for the armies in the South-west were taken to a large extent from Illinois, and the preference, which the Government had a right to demand, prevented the Company from doing the private business of the line with regularity. Great dissatisfaction has existed on the line of the road. Although the rolling stock has been largely increased in the past two years, we have not kept pace with the increasing volume of our business, and require more motive power. Our expenses were much larger than in previous years. From a careful consideration of the possible condition of the traffic, if peace should be at once restored, I am disposed to believe that there would be a larger amount of business than we have yet had, and with diminished expenses.

You will observe from the Superintendent's Report that the increase of traffic over 1863 was 38 per cent, while the gain in net earnings is only 18.4 per cent. We are exposed to very expensive labor in the machinery and repair department while the war is in progress.

I am pleased to report the promising condition of the Land office. There has been a very active demand for land,—3,501 purchasers for 264,422 05 acres averaging $10 96 per acre, for $2,898,980 19. These sales are widely distributed and in small tracts. On the majority of them one-fourth of the purchase is paid in cash, and the balance payable in one, two and three years, with six per cent. interest payable annually in advance. A very thorough examination and adjustment of the sales made in previous years has been carried out. The arrears of interest have been generally paid. The policy of the Department has been liberal to the party actually settled upon and working the land. Great care has been taken not to dispossess any man making an honest effort to work his farm, and this course has established confidence in the Company.

At the close of the year there were upwards of 15,000 individual accounts on the books of the office, and no suit or claim pending in the courts in relation to any one of them; the balance of notes and contracts on hand is $9,357,692 56. There are 1,110,553 51 acres of land for sale. The collections were double those of any previous year—$2,575,928 45; of this sum $1,440,090 56 was paid for 1,200,000 construction bonds, which have been canceled.

The following statements are condensed from the various reports annexed. From the balance to the credit of income account a dividend of 5 per cent. was declared payable 1st of February.

Capital Account.

Balance as per last Report		$364,928 00
Receipts from Capital Stock—		
9,206 shares at $90 per share		828,540 00
113,260 shares at $10 per share		1,132,600 00
6 per ct. redemption bonds of 1890, issued		2,086,000 00
		$4,412,068 00
Applied to—		
Payment of 8 per ct. bonds of 1865.		$46,000 00

Balance		1,566,855 40
		$6,316,194 41

In pursuance of the measure suggested in the last annual report to supply the Trustees of the Construction Mortgage in advance of the collections from the land, two proposals were made:—first, To exchange two millions of six per cent. bonds due in 1890 for the land bonds at fifteen per cent. difference, and secondly, to call in $3,000,000 of bonds under the original condition, by paying twenty per cent. premium. The exchange was made, and a large proportion of the bonds called for have been taken up; there are still $618,000 to be paid, which are coming in from day to day. It is quite probable that, in the course of the present year, a portion of the Second Series of the six per cent. bonds will be negotiated at a difference of ten per cent. and give us an ample supply of construction bonds. The amount of bonds delivered to the Trustees in advance is already $2,257,000.

The shares have been paid in full;—part of our cash receipts from the lands have been applied to the discharge of the debt. When the bonds called for, with $240,000 eight per cent. bonds due March 1st, are paid, and for which we have the cash in hand, our debt will be reduced to $12,500,000.

It will be observed that the cost of the property of the Company exceeds the amount of share capital and debt; if the shareholders desire that the amount of capital issued, in the form of debt and stock, shall represent the cost of the property, and shall express this desire at the next annual meeting of the shareholders, the Directors will doubtless authorize the distribution among the shareholders of the requisite number of shares.

This property now consists of 706 miles of Railway, 105 miles of sidings and double track, of 133 engines and 3,500 cars. The machine shops are well furnished; the facilities for building locomotives and cars are ample. A very large outlay has been made at Chicago and Cairo for depot and station accommodations. I do not know that the Company will require any more land at any of its stations for many years; two-thirds of the structures on the road are of iron or masonry:—the cost of the property stands upon the books at $50,000 per mile, and besides the income from the railway, you will have for many years a large revenue from the land. We have the right, by paying an annual rent, to run our freight trains over the Peoria Road, which conects our Main Line with the Chicago Branch; the Company has no other engagement involving liability; it has no interest in other Railway lines, and has adhered thus far strictly to the policy of taking no share in extension by branches or otherwise, and is free at this time from litigation or controversy of moment. The first debt which matures is due in 1875, ten years hence.

Total amount as shown in General Balance Sheet	$29,675,409 75

From the report of the Superintendent we learn that the motive power and rolling stock have been well maintained, and will compare favorably with its condition at the time of any former report.

The number of miles run by engines with passenger trains during the year was 942,580; with freight trains, 1,997,709; with construction trains, 75,826; with wood trains, 4,620; with switching trains, 366,155—total, 3,386,850, an increase over the previous year of 376,153 miles. Average number of cars hauled 12.77; pounds of waste used, 56,230; gallons of oil, 38,411; cords of wood, 19,319; tons of coal and coke, 87,967. Cost of repairs, $478,852 99. Cost of repairs per mile, 13.97 cents. Cost of wages 5.56 cents. Cost of cleaning, 1.05 cents. Cost of fuel, 11.57 cents. Cost of oil, waste and tallow, 1.35 cents. The entire cost per mile run by locomotives, including oil and waste, fuel, wages of enginemen and firemen, and repairing and cleaning engines, has been 33.52 cents, against 22.28 cents in 1863, and 17.42 cents in 1862; the total cost being $1,125,298 68, $670,802 43 and $446,125 82 respectively.

The expenditures on account of machinery department have been large, owing to the increased cost of labor and material, as well as the extraordinary expenses incurred where machinery is overtaxed. The necessity of working overtime and at nights, in order to keep the motive power in working order, owing to the scarcity of skilled machinists, added at least 100 per cent. to the cost of the work so done, over what it would have cost had the work been done at regular time.

The number of locomotives belonging to the company is 126; of these 107 are using coal as fuel, 15 having been changed from wood-burners during the year, and 10 new ones added. Fifty-one have received thorough repairs, of which 22 were rebuilt. Three have been built at the company's works during the year, and six more now under way will be completed before the close of summer.

The company have 68 passenger cars, 29 baggage, mail and express cars, 2 officers' cars, 1 pay car and 7 sleeping cars; 3,275 freight cars; 9 derrick, wrecking and tank cars; and 14 snow plows. There have been added to the rolling stock during the year, 6 new passenger, and 320 freight cars. Ten passenger and two mail and baggage cars were rebuilt, and with 56 house and caboose cars were re-roofed with tin; 48 house and 82 platform cars were rebuilt; 479 cars of all classes received thorough repairs, and 530 were re-painted. The cost of repairing passenger cars was 2.58 cents, and of freight cars 0.78 cents per mile run.

In addition to the motive power and rolling stock that have been charged to permanent expenditures during the year, there has been a large amount of shop machinery and tools supplied to the various shops.

The amounts charged on account of road department for the year have been $941,835 76 to operation, and $498,143 83 to permanent expenditures. These expenditures, for the reasons stated, are much in excess of the previous year for the amount of work done; on operation account, including repairs of roads and bridges, and repairs of station buildings, water tanks, wharves, and basins, the increase is $324,933 88 over 1863. The cost of repairs of road and bridges for each mile of road was $1,238 25; and for each mile run by locomotives was 26 cents, being an increase of $440 04 per mile of road, and 7.26 cents per mile run by locomotives, over 1863. There were used in the repairs of road during the year 250,307 cross ties, 255,819 lbs. spike, 35,338 chairs, 26,858 fish plates and bolts, 14,417 bars re-rolled iron, 2,079 bars new iron, 12,753 bars repaired iron, and 10,230 bars old iron. The average cost of repairing iron was $1 18 per bar. The bridges and station buildings have received thorough and in many cases extensive repairs. There have been 10.23 miles of ballasting completed since the last report; 17,113 feet, or 3.24 miles of new sidings have been laid and 1,404 feet of new fencing built.

The proportion of operation expenses to earnings is, exclusive of charter tax, 54 per cent., being an increase over 1863, of 7.6 per cent.; and inclusive of charter tax 60.4 per cent.

Number of passengers carried, 1,108,937—an increase of 256,278. Number carried one mile, 96,811,726—an increase of 23,732,974. Average number of miles traveled by each passenger 87.30. Revenue per mile 2.44 cents. Do., per mile of road, $3,338 61.

Tons of freight transported, 1,022,024—an increase of 69,210. Tons carried one mile, 153,271,668—an increase of 18,494,264. Average distance each ton was carried 150 miles. Revenue per ton per mile 2.51 cents. Average revenue per ton $3 77. Tons of freight carried one mile north, 48,785,788; do., south, 104,385,880. Tons of local freight carried, 837,763; do., carried one mile, 131,018,340; do., carried one mile north, 41,513,890; do., south, 89,504,450. Tons of through freight, 184,261; do., carried one mile, 22,153,228; do., carried one mile north, 7,271,898; do., south, 14,881,430.

Land Department.

From the report of the Land Department we learn that the total land sales in 1864 were 264,422.05 acres, for $2,898,080 19. The aggregate sales from commencement to January 1, 1865, were 1,484,446.49 acres, for $17,548,436 81. The unsold lands amount to 1,110,553.51 acres.

The following is a statement of transactions of the Land Department for the year 1864, and General statement of accounts to December 31, 1864:

Land notes and contracts on hand as per report of 1863		$9,914,008 58
Received in 1864.	$1,944,681 25	
Canceled in 1864.	1,219,284 68	
		725,446 57
		$10,639,455 13
Payments in 1864		1,281,762 57
		$9,357,692 56

Journal of Railroad Law.

LIABILITY OF RAILROAD COMPANY FOR BAGGAGE OF PASSENGER LOST IN PASSING OVER CONNECTING ROADS FOR WHICH TICKET WAS SOLD.

The recent case of Schwarzenberger against The Pennsylvania Railroad Company, was an action for the recovery of damages for the loss of the plaintiff's carpet bag, containing as was averred, the wearing apparel of said plaintiff, $728 in gold coin, and a watch, chain, seal and key, valued at $130.

The plaintiff took passage at Philadelphia, for Cincinnati, on the 10th of February, 1861, having purchased at the ticket office of the defendants, a through ticket, and received from the proper officer of the company, a brass check for his carpet bag, having upon it the following letters and figures:

P. C. & C. R. R.,
Phila., 458,
Cincinnati.

The plaintiff left in the train the same evening, and was carried through to Cincinnati; but the carpet bag and contents were never delivered to him.

The complaint charged the defendants with carelessness and negligence as common carriers, which the defendants denied.

On the trial, the purchase of the ticket, the delivery of the baggage check, the loss of the carpet bag and its contents, were proven by the plaintiff, who thereupon closed his case.

The defendants then proved by their ticket agent at Philadelphia, that the tickets sold by the defendants to persons desirous of traveling beyond its lines of road, over other connecting or adjacent railroads, were in the following form:

"Philadelphia to Pittsburg. Pittsburg to Cincinnati. In selling this ticket for passage over roads west of Pittsburg, the Pennsylvania Railroad Company acts only as agents for the western lines, and assumes no responsibility west of Pittsburg."

The defendants also proved by one Garret, that he was, in February, 1861, and still is the general baggage agent of the defendants, the witness producing a paper, testified that it was the through baggage way bill from Philadelphia to points west of Pittsburg, for the 10.45 P. M. train, of February 10th, 1861, out of Philadelphia for Pittsburg; that he knew the signature of one C. S. Jenkins, who was the baggage agent of P., F. W. & C. R. R.; that that was his signature, and check "458," for "Cincinnati *via* Steubenville," was marked in the list of baggage on the way bill. The way bill was then admitted in evidence, the receipt at the foot of same being in the following words:

"Pittsburg, February 11th, 1861, received of the Pennsylvania Railroad Company the above described baggage, in good order, which we agree to deliver in like good order to the several destinations above stated: Signed C. S. Jenkins, Agent P., F. W. & C. R. R."

The defendants then closed their case, and the judge instructed the jury to find for the plaintiff, subject to an opinion afterwards to be formed by the Court, upon the points of law presented by the evidence in the case; and thus reserving the questions of law for the future consideration of the Court, the cause was submitted to the jury, who thereupon rendered their verdict, finding "for the plaintiff, subject to the opinion of the Court."

Afterwards the judge directed judgment to be entered for the plaintiff, upon the verdict. The defendants' counsel excepted to the charge and opinion of the Court, and the case was thereupon certified to be a proper one for the opinion of the Supreme Court of Pennsylvania, sitting in banc, which was afterwards delivered by

Strong, J.—The facts in this case are, in very essential particulars, unlike those which appeared in The Camden and Amboy Railroad Company *vs.* Baldauf, 4 Harris, 67, and they call for the application of different principles.

We have here no question relative to notice by common carriers, or its effect in limiting their common law liability. Nor need we inquire whether the defendants had power to contract for the carriage of the plaintiff and his baggage beyond the terminus of their railroad.

Conceding that they had, the evidence is very satisfactory that they did not.

The plaintiff took passage at Philadelphia for Pittsburg, and thence for Cincinnati. The carpet bag, for the loss of which, with its contents, this suit was brought, was offered by him as his baggage, and was received as such. There is no pretence that it was offered or taken as freight. Nothing was offered or paid for its carriage apart from what was paid for the plaintiff's own carriage as a passenger. It was offered in the usual form of personal luggage, and there was nothing to indicate a desire of the plaintiff, or intention of the defendants, that their obligation to transport safely the carpet bag should be distinct from or greater than their obligation to transport safely the person of the plaintiff. In fact, the luggage was understood and treated as inseparable from the passenger. What was then the contracts between the parties? The defendants are not common carriers except between Philadelphia and Pittsburg. They were under no obligation to carry the plaintiff beyond the termination of their route, or to transport his luggage. It is true, they received the fare for the whole distance from Philadelphia to Cincinnati, and if that were all, it might raise a presumption of an agreement to carry over the entire route between the two cities. But contemporaneously with the receipt of the fare, and as evidence of the contract into which they entered, they gave to the plaintiff a ticket, informing him that they assumed no responsibility for his carriage, and of course for the carriage of his luggage, beyond Pittsburg. They notified him that they acted only as agents for the carriers, whose route extended westward from Pittsburg, and not at all for themselves. With this express disclaimer of personal liability, there is no possibility of implying an agreement. It is not to be doubted that the defendants could act as agents for a connecting railroad line, and if they could, the contract for carriage between Pittsburg and Cincinnati was with the principals of the defendants, and not with themselves. Their own engagement was performed when they had transported the plaintiff to Pittsburg, and delivered his baggage to the carriers on the connecting railroad beyond leading to Cincinnati.

It is settled in this state that a carrier may limit his responsibility even upon his own route, by a general notice that the baggage of a passenger is at the risk of the owner, provided the terms of the notice are clear and explicit, and provided the notice is brought home to the employer. Beekman *vs.* Shouse, 5 Rawle, 189; Bingham *vs.* Rodgers, 6 W. and S., 500, and Saing *vs.* Colder, 8 Barr, 484. He may not, however, release himself from responsibility for want of ordinary care.

Here, however, was no attempt by the defendants to limit their responsibility as common carriers. There was nothing more than an express refusal to assume an additional and unusual liability, a careful guarding against the implication of a contract, which without the notice, might have arisen from the fact that the passage money for the entire distance to Cincinnati was here received. Towles *vs.* The Great Western Railroad Company, 7 Exch., 699.

This is the whole case. The plaintiff breaks down in the beginning. He fails to prove that these defendants contracted to carry him and his baggage beyond Pittsburg. His remedy, therefore, is not against them, but against the company which undertook for that portion of the route upon which the carpet bag was lost.

Judgment reversed, and judgment given for the defendants.

Atlantic and Great Western Railway.

The earnings of the Atlantic and Great Western Railway, New York, Pennsylvania and Ohio, including the branches to Cleveland and Franklin and the Oil Creek Railway, have been, exclusive of Erie bonus and mileage of cars and engines due to the Company:

1865.	Miles open.	Passengers, Mails, &c.	Freight.	Total.
January	322	$109,555	$245,200	$354,755
February	322	101,645	281,502	383,147
March	322	113,412	336,403	449,815

Bear Creek Railroad.

The Legislature of Pennsylvania has chartered the Bear Creek Railroad, which is to commence at a point on the Pittsburg and Erie road, between Sharpsburg and Greenville, in Mercer county, near the Ohio State line, where the Atlantic and Great Western Railroad crosses the Pittsburg and Erie road. From this point the line runs eastwardly, directly through the heart of Mercer county, and by the town of Mercer—enters Butler county near the northwest corner, and passes entirely across the northern end of that county, to the little village of Martinsburg on the bank of Bear creek, from which point two or three miles more of the road will give it a connection with the Mahoning and Franklin road.

American Railroad Journal.

Saturday, April 15, 1865.

Stock Exchange and Money Market.

We cannot permit the result of the recent strategic and victorious operations of General Grant, his able coadjutors and his gallant armies, to pass by without an appropriate record in our columns. We live in the midst of unexampled events, and those of us who have been spared to witness their magnificent conclusion, should not refrain from uttering our joy at the approach of peace which will bring in its train its thousand blessings. Nor should we forget to express our thankfulness or rather gratitude to that Omnipotent power which has reached down from its high dwelling place, planted anew on our citadel his banner of love, and who in our extremity of foreign and domestic assault taught our paralized hands how to war, and our fingers to fight. It is a remarkable circumstance, so remarkable as to be worthy of record, that the recent events have called forth from all classes of loyal men, no matter what their religious belief, the simultaneous expression of gratitude to the great Ruler of Nations such as was never before uttered, and from every lip and from every heart there have gone forth thanks and adoration for the visible interference of Divine Providence in our behalf.

Against weaknesses in the Cabinet, blunders in the field, against domestic treachery, combination and ingratitude, our cause has triumphed, and at the critical moment when the opportunity came for the final blow, great Generals were raised up for us, animated by the noblest and most disinterested purposes to guide our veteran batallions and lead them to unparalleled and glorious victories.

The historian who at some future time shall write the history of this war, will have a theme of the most magnificent proportions, the opportunity of discussing the power of the great principles at stake, the dangerous subtlety of daring abstractions interposed as a shield and cover for practical injustice and fraud, the mighty inherent power of free institutions, with the danger they have had to encounter from pretended friends; the entire failure of a great retrograde march in human progress, and the glorious triumph of a persistent, manly, self-denying and truthful people, "pledged to religion, liberty and law."

There is no doubt of the fact, that the rebellion was begun and prolonged under an entire deception. The leaders of the South overrated their own powers, and undervalued those of the North. They moved audaciously to the assault against the unprepared and unsuspecting North confident of victory. There was not a doubt in their minds but that success would attend their arms; and at first it did so, blinding the judgment of many among ourselves as to the final result, and adding to their own numbers from the ranks of the doubtful and wavering.

Another mistaken calculation from the first, was the confident expectation of an unjust assistance by foreign powers. And though in part and indirectly granted them through the loop holes of neutrality, it was with such a sense of embarrassment and with so many protests, that it only made their cause the more feeble.

The next mistake was in imagining that the resources and means of the North would be broken down, and that the early denial of credit to the U. S., by the French and English Exchange, not a house of either Nationality coming forward to our assistance, while a rebel loan found early supporters and subscribers there, would in itself be fatal to our cause. While the scrip, bonds, Treasury notes of the rebels have now seen the day when they lie in piles in the gutters and cellars of Richmond, not worth the price of good clean rags, the credit of the North has stood high and unimpeached among its own patriotic people, and all the money demanded by the Government has been always forthcoming in spite of the most vigorous efforts of sympathizing operators in the gold market, to weaken our confidence in the country.

Let it not be forgotten that the financial battle has been fought as hard as any in the field. The North has swarmed with emissaries to spread

their ambiguous voices in every street and every corner against our National credit, against our currency, against our responsibility. Funds provided by the rebel Government have been used to bring our currency down to the degradation of their own, presses have been subsidized in our midst to stagger our faith in ourselves and our rulers, and the whole armory of deceit, lies, frauds and cruelty has been exhausted of its weapons to take the life of our country.

All these circumstances have given a peculiar tinge to the controversy now coming to a close, but which in and by its close has raised the character of the American people to a height, which when the eyes of spectators of the old world are turned upon it, must produce in the observers a sensation worse than giddiness. The civil wars of Rome were but the trial of strength of factions, those of Greece of ambitious talent, those of Germany of thick-headed controversy, those of England of families for forty years, or fanaticism during the manhood of a Cromwell's life, those of France a combat between ill-digested philosophy, rank infidelity, and dynastic and clerical bigotry, while this war of ours has been on our part waged for humanity, truth, liberty, progress, the unalienable rights of man, and with sublime faith in the principle of self-government not only possible, but competent to outlast all other forms, by which foreign despots have cheated, trampled on, and desolated the human race, and man has been made to mourn.

Now when we look at this subject in this light and with these feelings, we may well see that the results of our recent victories must have a most tremendous influence not only on ourselves but on the world. No break up of the "model republic," no loss of territory, or of political, or commercial, or material power has gratified the vision of those persons on the shores of Europe, who as they watched the setting of the orb of day predicted the disappearance of our great light of liberty forever from the Western skies.

All this is changed. The spectacle we now present to the old world may well challenge its wonder. A mighty rebellion has been put down, a grand Nation of States wickedly dissevered has been reunited, its territory and boundaries have been preserved intact, and above all, its eye is not dimmed, nor its natural force abated. It has thrived amidst its struggles, grown richer and stronger and bolder amidst its trials, wiser, better, greater in its sufferings; it has purified itself of its last deepest guilt, and stands this day at the head of the greatest powers of the world as the strongest and most enduring defence of religious, civil and political liberty.

When we arrive at this state of feeling, we have arrived at a point at which we can look at our financial burden as a comparatively trifling affair, as if our debt was nothing compared with what it has helped us to achieve, as if our resources were equal to any obligation we have incurred however large, as if our wealth was as yet but in its infancy, and as if we might religiously and thankfully assume, that we are the special objects of the favor and protection of the Almighty.

We confess we cannot write without deep emotion when we reflect on the origin, duration, and now the consequences of this great result. We were forced into it. We had been making concessions to the South for half a century, we were willing to make still more. But treason was in their hearts, they longed to "sprinkle blood," as their leaders said at Montgomery, "in the faces of the people," and if we advanced to repossess ourselves of our own despoiled possessions, we were told that "with bloody hands they would welcome us to hospitable graves."

And now that the weapons have fallen from their hands, and peace has been conquered at so large a cost, we who have from first to last stood by our cause and country, "unshaken, unsubdued, unterrified," we are but too thankful for even the humble part we have played as journalists, during this eventful time.

The hopeful view we have taken of our financial affairs all the way through, is of course not only enlarged by the present condition of things but brightened. We see the value of our currency rapidly appreciating, fixed incomes resuming their former value, the Government likely soon to withdraw from the market as a borrower, our National expenditures about to be largely diminished, an annual surplus in the treasury, our population and industrial products increasing rapidly, our national and local securities advancing, and the whole tone of the public feeling improving. Certainly with half of the debt of England and far greater national resources, with all its energy and more enterprise, we may calmly or rather hopefully look the future in the face.

Our National Banks are giving us a sound and universal currency, the Government will as rapidly as safety will permit, withdraw its issues, and trade and commerce will revive with accelerated force. Never did a Nation come out of such a war so gloriously or so strong.

The market already begins to show that this cheerful view of things is generally taken. Railroad shares and securities are on the rise. Exchange is down to a low figure; stocks of goods are cheap, and becoming scarce, calling for further importations, and money is easy although paper has doubled its value within a few months.

In another column to-day, we point out how the Railroad to the Pacific may be rapidly and economically constructed, building up new towns and cities and populating new States, and how the commerce of the world may be diverted from its old paths to the new.

We have also the promise of the Navy and Post Office departments that the surplus steamers of our navy shall be employed in a new mail service instead of as heretofore being used as pageants in the harbors of distant countries to gratify the pride of unfriendly courts. In short all the elements are in our hands for a long and peaceful career, and a boundless prosperity.

It has been asserted that unless we have gold high and a depreciated currency our exports will fall off. This argument so called has been actually maintained in high financial quarters but the facts appear to be otherwise. For the first two years of the war the inflation of the currency was not excessive, and the premium on gold was comparatively small, and in 1863, when the premium was on the average but 40 per cent. the exports were 300 per cent. in quantity and the value actually, undiminished relatively. This shows that the variation in currency had but little to do with the quantities exported, as the following table shows:

	In 1859–60. Exported.	In 1863–64. Exported.
Wheat and flour, bu	17,200,000	41,800,000
Indian Corn, bu	3,314,000	4,975,000
Butter, lbs	7,640,000	20,795,000
Cheese, lbs	15,515,000	47,733,000
Pork, brls	204,700	312,325
Bacon, lbs	25,844,000	110,759,000
Lard, lbs	40,289,500	85,385,000
Petroleum, gals	———	23,192,000

It is known also that our exports have been large in proportion to our exports for some time past, and there stand to our credit abroad, funds remitted there through apprehension, of more than 100 millions, balances accumulated on the transfer of our vessels to foreign flags, and for freights earned. These sums may be expected to come back to us, and a leading commercial British Journal admits that British capital to the extent of 28 millions withdrawn from the United States in consequence of the war will be re-invested here. All these circumstances must be taken into account as great auxiliaries in our restoration to our normal condition.

The sale of of 3,000 bales of cotton on Tuesday was well attended, and the price in gold was considered to be liberal. The rates obtained were for good middling from 25 cents to 15 for good ordinary, principally taken for our own manufactories as it is understood. Still the fall in the article is so great, that it must affect its value in Europe and bring down the cotton speculators with a crash.

The sales of the 7-30s continue to be made on a grand scale. It is stated that Jay, Cooke & Co. have offered, so large is the subscription, to furnish the Treasury with a hundred millions per month. Legal tenders are being very largely collected by our City Banks, forty millions of them being now held by them as a reserve. Exchange is still low and drooping, a significant and favorable circumstance.

There is quite a spirited demand for railway shares at an advance, and railway properties generally are assuming their just rank in the security market.

The week's exports from this port exclusive of specie were of the value of $1,613,293 against $3,181,888 the same period the last year, and considering that the paper dollar is worth twice what it then was, the difference in the value of the exports is not so much as at first sight would appear. The balance in the Sub-Treasury on Tuesday was $32,111,977 12. The London *Star* of a very late date in its commercial article speaks as follows of the rise in 5-20s, "the rise clearly indicates the real opinion of the market. Those who hold Confederate stock, and wish to get rid of it, naturally strive to create a favorable opinion for the South; and it is marvellous with what ease theg can impose on many who are ignorant of the geography of the United States, and who do not know the limited area to which the war is now reduced."

We give elsewhere an abstract of the Annual Report of the Illinois Central Railroad Company for 1864. The gross earnings were $6,329,447 20; the expenses, $3,460,739 39; and the net earnings $2,868,707 81—deducting the charter tax, the net earnings were $2,463,193 77. This shows an increase, as compared with 1863, in gross earnings of $1,758,418 82; in expenses of $1,308,952 72; and in net earnings of $449,666

10. Deducting the charter tax in both years, the gain in net earnings is $344,364 64. For the first three months of this year the earnings have been $1,661,241, against $1,204,250 in the first three months of 1864—showing a gain of $456,991.

The earnings of the Toledo and Wabash Railway for 1864 were $2,050,822 against $1,489,798 in 1863—a gain of $610,524. For the first three months of 1865, the earnings have been $438,924 against $208,473 in 1864—a gain of $230,451.

The approximate earnings of the Chicago and Rock Island Railroad for the year ending March 31, 1865, were $3,101,118, against $2,143,875 in 1863–64—a gain of $1,057,243. In January, February and March, 1865, the earnings were $793,059, against $577,368—a gain of $215,692.

The earnings of the Erie railway for the first three months of the present fiscal year were $3,035,006, against $3,033,478 in 1864—a gain of $1,528.

The earnings of the Hudson River Railroad for the first six months of the present fiscal year (October to March inclusive) have been $2,558,707, against $2,412,575 in the corresponding period of the previous year—showing a gain of $146,136.

The earnings of the Marietta and Cincinnati Railroad for March show an increase of $2,648 81; and for the three months ending March 31, an increase of $53,973.

The increase in the earnings of the Michigan Southern and Northern Indiana Railroad in March was $80,264; in the past three months, $175,893; and for the fiscal year ending March 31, $869,346.

The increase in the earnings of the Pittsburg, Fort Wayne and Chicago Railway for March is $275,244; and for the past three months, $908,338.

The earnings of the Chicago and Alton Railroad for March are $92,356 in excess of those of March, 1864; and for the quarter are $351,438 in excess of the corresponding period of the previous year. For statement of the earnings of the above roads the reader is referred to our table of Monthly Earnings on page 353 of our present issue.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—North Carolina 6s, 65; Tennessee 5s, 40; Illinois coupon bonds, 1865, 88; Georgia 6s, 65; McGregor Western 1st mort., 72, Milwaukee and St. Paul 1st mort., 80½; Long Island R. American National Bank.

We invite the attention of our readers to the Advertisement of the AMERICAN NATIONAL BANK, in another page. Noah L. Wilson, Esq., its President, has been long and favorably known at the West, as President of the State Bank of Ohio, also as President of the Marietta and Cincinnati Railway Company, which position he still retains. Mr. D. W. Vaughan, its Vice President, was formerly Cashier of the Fourth National of this city; and Mr. Alfred A. Post, Cashier, is a graduate from the same institution. The American National therefore comes into the field with every advantage on its side, and will no doubt receive a full share of the public favor.

☞ We invite attention to the advertisement of Messrs. ROPES & Co., on the last page of our paper. These gentlemen are well known among the Bankers and Brokers of our large cities. With large experience and ample capital, this house may justly claim the confidence of the public and will doubtless receive it.

☞ The telegraphic line between Calcutta and Bagdad, just opened, by means of its connection with the telegraph between Bagdad and Constantinople, opens up direct communication between India and all parts of Europe.

☞ A bill has been introduced into the Wisconsin Legislature, to incorporate the Milwaukee Horse Railroad Company, with a capital of $100,000.

Stowell's Railroad Builder.

As long ago as April last we gave an account at some length of the ingenious invention of Mr. B. T. Stowell, of Quincy, Illinois, by which in making excavations and embankments for railways, a few yoke of oxen, and three men to manage them and the machine to which they are attached, may readily do the work of one hundred men. In that account we gave a description in detail of the construction of the apparatus, and it is not necessary to repeat it. We have confirmation of the correctness of our views in a letter now before us from O. B. Gunn, Esq., Chief Engineer of the Atchison and Pike's Peak Railroad, in which he says: "The grading machines work admirably, and are especially adapted to work like that encountered in all Prairie States. For such, they are as invaluable as a sewing machine to a clothing establishment. In my experience of their use during the past two years, I find they will load earth into carts and wagons at less than 50 per cent. of the cost of loading with shovels; the most of the labor being performed by oxen, saving thereby four-fifths of the ordinary manual labor—a great consideration in times of scarcity of men. They operate effectively in any material that can be plowed, if free from stones or brush. I cordially recommend them to railroad men."

This recommendation is decisive, and we are happy to give it publicity.

New York Central Railroad.

The following is an extract from a communication published in the New York *Tribune* of 10th instant:

The managers of this company have applied to the Legislature for partial relief from the restriction imposed upon its way fare,—a restriction unreasonable and invidious, as they maintain, and such as no other railway in the State is subjected to. And they insist that this limitation is now specially onerous and unjust, in view of the fact that the expense of maintaining and operating the road have more than trebled since the restriction was imposed; this increase in the cost of materials and labor, and in the amount of taxes, having arisen from causes over which the company have no control, and for which they are in no wise responsible.

In order to a clear understanding of the whole case, I go back to the period of consolidation, twelve years ago.

The New York Central Railroad Company received the net earnings of the several corporations owning the line from Albany to Buffalo, from May 1, 1853. It went into the actual occupation and management of the roads, August 1, 1853. The first dividend was paid Feb. 20, 1854. It was five per cent., and on earnings for the previous nine months. During the eleven following years, the company has made twenty-two dividends: the first ten were four per cent. each; the next seven were three per cent. each; the next ten were three and a half per cent. each; the next (in February, 1864,) was five per cent.; the next (August, 1864,) was four per cent.; the last (February, 1865,) was three per cent.: making in all, for the whole existence of the company—eleven years and nine months, up to February last—eighty-five per cent. in dividends, being 7.23 per cent. a year. That is all the income the shareholders have received from their stock.

During that period, the stock has fluctuated in the market between fifty per cent. discount, and thirty per cent. premium. The value of the property has been uncertain. The income has been moderate and uncertain also. For these and other reasons, large amounts of the stock have changed hands.

There was held at consolidation by stockholders owning 200 shares and over $13,698,600
The same stockholders now own only. 3,483,900

In new hands $10,214,700

The smaller stockholders have changed in as great a proportion.

The following is a statement of the earnings and expenses of the company for the first six months of the last and of the present fiscal year:

1863–'64.	Earnings.	Expenses.
October	$1,041,521 88	$991,230 25
November	1,045,401 01	835,801 81
December	1,074,699 91	721,187 58
January	921,830 13	644,580 13
February	936,586 64	887,352 65
March	1,059,028 49	708,145 89
Total	$6,079,068 06	$4,788,298 31

1864–'65.	Earnings.	Expenses.
October	$1,196,435 22	$880,469 68
November	1,157,817 56	1,240,655 52
December	1,039,902 14	1,053,130 04
January	899,478 12	996,914 75
February	581,372 41	936,286 35
March (estimated).	915,600 00	800,000 00
Total	$5,790,205 45	$5,913,456 34

Earnings less for first six months of this year than for same period last year $288,862 61
Expenses more for same months this year 1,125,158 03

Condition of company worse so far this year than last $1,414,020 64

During the last ten years preceding October 1, 1864, the close of the last fiscal year, the whole receipts for way passengers, were $19,785,582 09, being an average of $1,978,558 annually. Half a cent per mile would yield—supposing the whole increase to be realized—an addition of $494,639 to the annual income of the company.

The taxes paid by the company in 1864 amounted to $390,000
The taxes paid and to be paid by the company in 1865, exclusive of duties on most of the articles consumed by the company 907,000

Increase of these taxes alone in 1865 over 1864 ..... $517,000

Up to near the close of the last fiscal year, the operations of the company were carried on with supplies purchased at low prices, so that the apparent net income of the company for the last year, with the large addition to its business growing out of the war, was about nine per cent.

The stock of supplies purchased at low prices has been exhausted, and the business of the company must be done for the current year with labor and material, the prices of which are two or three times as great as they were in 1853, when the present rate of fare was fixed.

The additional expenses of the company for the year 1865 over the expenses of 1864, growing out of increased prices and increased taxation, will be at least $2,000,000, rendering dividends hereafter impossible.

The Consolidation Act provided that the capital of the new company should not be greater than the aggregate capitals of the old companies. The stock of the old companies was put into consolidation at its market value. Consolidation was impossible in any other way—and consolidation had become a necessity in order to secure the unity and harmony of action requisite to compete with the other long lines of railroads then going into operation. The stockholders made nothing by consolidation. Take the case of two men owning stock in the Syracuse and Utica Company. That stock was put into consolidation at 50 per cent. premium. One sold out at $150 for each share, and invested his whole money in bonds and mortgages, or other securities yielding 7 per cent. interest. He has received 7 per cent. interest on his whole investment ever since. The other put his stock into consolidation, received one share of new for one share of old stock and $50 on each share in debt certificates, at 6 per cent. interest. He has received 7.23 per cent. on $100, and 6 per cent. on $50, and his stock is now worth only 94c., (it has been as low as 50c.,) and his debt certificates are worth 97c. only.

Expenses first six months of 1865 as by above statement $5,913,456 34
Earnings first six months of 1865 as by above statement 5,790,205 45

Deficiency of receipts to meet exp. .. $123,250 89

The company must rely on this *deficiency* to meet the following unavoidable claims accruing during the same months, in

Interest on funded debt $500,000
Sinking fund 50,000
Rent—Canandaigua road 30,000

$580,000

The necessity of presenting the whole case in a single communication compels me to be somewhat discursive and desultory.

The question of way and through freights has been much discussed along the line of the road, and great misapprehension has prevailed respecting the relative amounts of way and through freights that have been transported by the company during the past winter. A transcript from the books of the company, showing the whole amount of property shipped during the months of January and February last, will disabuse the public mind on this point. I have not the figures for the month of March before me; but I have no doubt that the excess of way freight over through which was moved during that period was in a still greater ratio.

The road was under orders from the Government to give precedence to its freight; but, upon consultation with the agents of the Government, it was agreed that live stock and perishable commodities should first be moved by the road, and then the Government property should be shipped; and freights have been moved substantially in this order.

Of live stock, perishable commodities, and Government property, there have been shipped during the above-named period 57,474,078 pounds.

The following is a statement of miscellaneous property shipped during the period above stated:

	January.	February.
Way Freight	24,006,842 lb.	16,067,982 lb.
Throught Freight	17,877,068 lb.	10,089,372 lb.
	6,129,774 lb.	6,028,560 lb.

Excess of *Way*, over *Through* Freights, 12,158,-334 lbs.; amounting to over 6,079 tons of such excess of *Way*, over *Through* Freights for these months.

It should, however, be stated that for full two weeks of the time referred to, there was little or no movement of freights of any kind, on account of the blockade of the road by snow and successive snow storms. Hence this excess of *Way*, over *Through* Freight relates to a period of only six weeks.

During the time embraced in this statement there were detained at Buffalo and Suspension Bridge from two to four thousand car loads (and never less than two thousand,) of Western property waiting transit by the Central Railroad.

It is now eight or nine months since a material change was made in the direction of the Central. Since that time, several important reforms have been effected, and many of still greater magnitude have been initiated, and will be prosecuted as rapidly as circumstances will permit. By sending the through freight, passenger and express matter by the way of Troy, nearly $400,000 will be saved to the company annually, in cartage and other unnecessary expenses. And I have no hesitation in asserting that a wise economy, rigid-

ly enforced, such as the stockholders are justified in expecting from the new President, sustained as he will be by the younger and more vigorous men that he is gathering around him, will increase the net earnings of the company more than half a million dollars a year. * * * *

The gentlemen in the Legislature who admit the justice and reasonableness of the claim for relief preferred by the Central, and yet express their determination to resist it, under the apprehension that, by some inexplicable process, great detriment to the Republican party must result from the slightest relaxation of this restriction, take a narrow and superficial view of the case. I insist that no permanent party advantage can ever be gained by the perpetration of a conscious wrong. And Senators who oppose the application of the Central, after acknowledging that it is just and right, and ought to be granted, oppose it on the ground that the dominant political party in the State cannot afford to do away with this inequality and injustice, are unworthy to represent an enlightened and honest constituency.

Railroad Earnings--Monthly.

The business of the Illinois Central Railroad for the month of March, 1865:

LAND DEPARTMENT.

Acres Construction Lands Sold	16,147.25 for	$186,750 77
Acres Int. Fund Lands sold	720.00 for	9,593 60
Acres Free Lands sold	3,349.44 for	43,938 10
Total sales during month of March, 1865	20,216.69 for	$240,282 47
To which add Town Lot Sales		2,762 70
Total of all		$243,045 17
Cash collected in March		$236,157 25

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$231,314 53
do.	Freight	344,602 90
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	6,000 00
Total Receipts in month of Mar., 1865		$592,275 76
Total Receipts in month of Mar., 1864		459,762 33

The earnings of the Erie Railway for March, 1865, were $1,240,625 77
Corresponding month of 1864 1,114,508 17

Increase $126,117 60

Increase	$7,493 42

The earnings of the Pittsburg, Fort Wayne and Chicago Railroad for the month of March, 1865, were $886,541 54
Corresponding month of 1864 ..... 611,297 54

Increase $275,244 00

Earnings from Jan. 1 to Mar. 31:

1865	$2,267,538 91
1863	1,359,200 51
Increase	$908,338 49

Fond du Lac and Superior Railroad.

A bill to incorporate the Fond du Lac and Superior Railroad Company, and execute the trust created by section 3, of the Act of Congress entitled "An act granting lands to aid in the construction of certain railroads in the State of Wisconsin," approved May 5th, 1864, has been introduced into the Wisconsin Legislature by Senator Bentley of Sheboygan.

The road is to begin at Fond du Lac. The bill gives equal connections to all connecting roads, consolidation with any being prohibited; compels 60 miles to be built from Fond du Lac before any other portion is built. The lands granted are exempt from taxation five years, except those sooner sold, and unlike the most of the other land grand charters, it does not propose to tax the road a percentum on earnings in consideration of the grant, but leaves the company unembarrassed in this respect. It provides very strictly against the diversion of the grant or its avails to any other purpose than the building of this road.

Mineral Treasures in Utah.

It is well understood that the Mormons while knowing that their territory abounded in the precious metals, concealed the fact of their existence as much as possible, lest the mining population might become so numerous as to endanger their peculiar institutions. Notwithstanding these precautions, however, there is every probability of the realization of their fears. Recent accounts inform us that rich lodes have just been discovered on the northern slope of the Meadow Creek range of mountains, and since last summer thirty of them have been located. One thousand pounds of silver ore from the Panacker lode sent to San Francisco was assayed and certified to have produced $15,000 per cord. Pure origin silver is discovered at no great depth from the surface. Three new valuable lodes have been discovered and located in the same place, the Dunderberg, the Dictator and the Morning Star. Utah, if the immigrants can be protected from Mormon aggression who will flock there by thousands, will take its place in the front rank of the silver producing territories.

UNITED STATES DISINTEGRATING ORE COMPANY,

Is removed from 74 Broadway, to the new Marble Building, Nos. 155 & 157 Broadway,

FRONT OFFICE, SECOND FLOOR.

3m-15

NEW CAR SPRING.

Wanted Capital to develope a newly patented Car Spring which promises to supersede those already introduced.
Enquire of EDWARD GILBERT,

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL ..... $1,000,000.

DESIGNATED DEPOSITORY of the UNITED STATES AND AUTHORIZED AGENT OF THE TREASURY.

No. 5 NASSAU ST., Feb. 17, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, together with a portion of their correspondents, being persons of well-known standing and large pecuniary means, have become the owners of most of its Capital Stock, and assume its control and management, Mr. C. V. CULVER retaining all his interest, and accepting the Vice-Presidency.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.
C. N. JORDAN, Cashier. 3m-8

American Railroad Journal.

New York, Saturday, April 22, 1865.

The Death of President Lincoln.

During the thirty-five years of the existence of this JOURNAL, it has never before been called upon to record in its columns so distressing an event as this of the assassination of President Lincoln. It has witnessed many changes in Government and dynasties, watched the rise and fall of great names, and preserved for remembrance many remarkable occurrences in an eventful generation; but this murder of our Republican President, in a Country hitherto so free from crimes of this character, so averse from the employment of this bowl and the stiletto as political agents, and so entirely at variance with the principles and tendencies of the American people, is the most shocking, the most bloody and the most foul in all the chronicles of modern crime.

The murder of the "gracious Duncan, and the deep damnation of his taking off," which have so often drawn tears from the spectators of the wondrous drama of Shakspeare, and the assassination of the good and generous Henry IV of France by the fanatical Ravaillac, at the moment when he was the most active in dispensing blessings on his people, and the fate of the great Prince of Orange, are nearer in resemblance to the deplorable event which now astound us, than any other which we can call to our remembrance. But nevertheless the death of the late President stands immensely foremost of all the instances, as a most cruel and undeserved and demoniacal sacrifice, and entails eternal infamy on the cause and the supporters of a cause which could seek revenge by such a deed. The Martyr has left behind him an imperishable fame, and his blood will be the seed of a Republic, one and indivisible.

Happily for us no one man's life or death is our ruin. Our institutions, our laws and our policy are the fruit of a written constitution: not the result of individual will, but the deliberate work of our greatest and wisest ancestors. The Nation cannot die if it resolves to live. Our Presidents are merely temporary agents of the people, with a brief trust of their delegated authority, and thus our epochs are not those of men. The history of foreign nations is a history of princes, and thus events in their career are set down as having occurred during such or such a reign, but here we speak of the revolution, of the war of 1812 and '15, of the Mexican wars, and of the rebellion, rather than of the Presidents in whose time they occurred. So that what in other countries is material to their safety and endurance, the life of their rulers and the prolongation of dynasties, is here of no actual importance. We find also that our system places very much on an equality, all our rulers for the time being, and we may say with truth that honesty and simplicity of purpose, without extraordinary talent, and the ordinary experiences of observing minds appear competent endowments for the exercise of the Presidential functions. Certainly not the greatest men have hitherto succeeded to the Chief Magistracy. We could name a host of our greatest orators, statesmen, publicists and heroes who never could reach a position for which they were so eminently fitted.

Mr. Lincoln without much education, possessed beyond question great sagacity and knowledge of men, was thoroughly pure and unselfish, and had an uncommon benevolence of character, a trait never found in bad and unprincipled, and we had almost said ambitious men. He had faith in great truths and great principles, and knew when it was proper to bring them forth and use their power. He was eminently prudent and knew when the time and the hour arrived for action. He had full perceptions, natural logic, and great persistence. In short though without preparation, he proved to be the man for the occasion, and he was spared Providentially to see that his work was finished.

While it is quite probable that a more diplomatic President might have early compromised the difficulties of the rebellion, by abject concessions, and a surrender of the new territory to an existing evil and a dangerous element, it is most fortunate for the Country that to no such authority were we committed. For it is now apparent that any one dogma, no matter what it may be, which becomes a danger to the State, that can disturb its legislation generation after generation, that is continually a menace, that is dogmatical, overbearing and unappeasable, is dangerous to the existence of any nation where it maintains itself in a political form, and compromise with it is in the end certain death. The simple-mindedness of President Lincoln led him directly to the application of the shortest and surest remedy, and though it cost him his life it has saved his Country.

With these opinions we are among the sincerest of his mourners, though never a political partizan. But he must have a depraved heart indeed who does not feel the deepest emotion at the sudden death of this great and good man, the Martyr President.

We are happy to understand from those who have been longest and most intimate with Mr. Johnson, who has succeeded to the vacant Chair of State, that the people of this Country may repose their entire confidence in their new chief magistrate. A single error at an interesting moment did indeed give a reasonable alarm; but as Mr. Lincoln alluding to it said, no man should be cast off for a single mistake, and we would add why should we overlook the former long and brilliant career of the new President. As Mayor of the City of his residence in 1830, and three times re-elected, frequently chosen to the Legislature, a Presidental elector, for ten years successively a member of Congress, twice Governor of Tennessee, then chosen a United State Senator which dignity he relinquished from patriotic motives to return as the most capable energetic and popular man in

that state, to whom its military Government could be entrusted, and finally owing his nomination at Baltimore as Vice President, and of course his election to the influence of the present Secretary of State, and Mr. Weed, his intimate counsellor, he seems to come before the people with extraordinary vouchers for ability and experience. Perhaps no other prominent man of the time has so much practical experience, so perfect a knowledge of the rebellion or knows so much of its leaders as Andrew Johnson. The State of Tennessee has been kept through his skill and energy safe under the folds of the old flag, and his resemblance to Andrew Jackson, whose friend he was, has been observed to be very marked and distinct. No one objected to the humble origin of that man, and none but fools will do so of any of his successors. Ours is a Government of and from the people, and it is our glory, that from their humblest ranks our greatest and most useful men arise. We would finally exclaim against the gross injustice of that sentiment which condemns for one mistake under very extenuating circumstances, all the other previous good actions of a public man. The public have been for years past lenient enough to habitual offenders in a certain way in the very highest positions in this Country, and have trusted their dearest and most important interests to them without hesitation. A little charity borrowed from the past would have saved a world of anxiety as to the propriety of criticism.

The modest acceptance of his new honors inspires us with renewed confidence in the man, used to public trusts and in no way exalted in feeling by this last and highest elevation. The Country will go safely through the finale of this struggle. By no possibility can the assassination of Mr. Lincoln help the lost cause of the South. On the contrary it has extinguished whatever sympathy existed for it in the North, if not throughout the civilized world, and from the tomb of Mr. Lincoln will spring up the Olive which he so generously planted, under which our penitent and sorrowful brethern may once more recline in peace, if they can conquer their turbulence and are capable of appreciating our magnanimity.

☞ The Reading Railroad Company have nearly ready ten fine locomotives, for use on the Lebanon Valley Branch. The business on this branch is very heavy, and constantly increasing.

Marietta and Cincinnati Railroad.

We learn that the decision of the Court against the right of the Marietta and Cincinnati Railroad Company to condemn private property has led to its re-organization under a general law of Ohio, which secures to the company all the rights and privileges of other railroads of that State. As some misapprehension of the scope of the decision has existed in the public mind, it is proper to say that the Court, in declaring the claim set up by the company, to condemn private property for the use of the road, unconstitutional, has expressly declared, that on the sale of the road by the mortgagees, the purchasers became invested with the franchise of maintaining, operating and making profit from the use of the road, according to the grant made to the old company. What was wanted was the franchise *to be a corporation*, without which what is called the right of eminent domain could not lawfully be exercised. This franchise has since been acquired under a general law of Ohio, so that the Marietta and Cincinnati Railroad Company is now as complete in organization as any other corporation of that State. Indeed, what the public has regarded as a serious difficulty of the company has turned out to be a positive benefit. As the company now stands, their charter is one of the very best in the country, conveying as it does, among other things, the power to fix its own rates for transportation without any limitation. This power was not granted by the special law, which has been declared unconstitutional.

Chicago and Alton Railroad.

The income of this company for the year ending December 31, 1864, (embracing the earnings on 257 miles of road between Chicago and Alton) were:

From freight		$1,479,659 42
" passengers		974,548 90

		$741,236 21

At the commencement of the fiscal year, $500,000 in the stock of the Joliet and Chicago Railroad, owned by this company, was set apart as a fund to be used in acquiring additional rolling stock, depot buildings, water stations, and other structures of a permanent character, to increase the capacity of the line for business purposes. Of that fund, $148,214 25 has been expended for the purposes named, leaving a balance of $351,785 75. Also, in pursuance of the contract with the Alton and St. Louis Railroad Company $800,000 of stock was issued and placed in the hands of this company, as a fund to pay the liabilities of that company, and complete their road. Of that amount there now remains unexpended the sum of $77,471 30, leaving in the hands of the company, unappropriated for specific purposes, the sum of $429,257 05—making the total in cash and its equivalent, December 31, 1864, $1,170,493 26.

The capital stock and funded debt of the corporation are represented as follows:

Capital stock—common		$1,783,100
" preferred		2,425,200
		$4,208,300
Preferred sinking fund bonds	$554,000	
First mortgage bonds	2,400,000	
Income bonds	1,100,000	
		4,054,000
Total stocks and bonds		$8,262,800

On the 1st of January, 1864, this company commenced operations on the Joliet and Chicago Railroad under a lease, and assumed the liability to pay interest and dividends on the bonds and stock of that company as follows:

Mort. bonds, 8 per cent. on	$500,000	
Stock, 7 per cent. on	1,500,000	
		2,000,000

On the 1st of April, 1864, the company contracted with the Alton and St. Louis Railroad Company, for the perpetual use of the road of that company, assuming the payment of a fixed dividend of 7 per cent. on stock to the amount of.. 800,000

Making an aggregate capital of | $11,062,300

—represented by 281 miles of railroad, extending from Chicago to St. Louis; 220 miles (between Joliet and Alton,) being the property of this company, and 61 miles being held under perpetual lease.

The fixed annual charges from and after

ary 1, 1865, having priority over dividends upon the stock of this company, are represented as follows:

On preferred sinking fund bonds, interest and sinking funds	$72,000
On 1st mort. bonds, $2,400,000, at 7 per cent.	168,000
On income bonds, $1,100,000, at 7 per ct.	77,000
On Joliet and Chicago bonds, $500,000 at 8 per cent. and sinking fund	52,000
On Joliet and Chicago stock, $1,500,000 at 7 per cent	105,000
On Alton and St. Louis stock, $800,000 at 7 per cent	56,000
Sundry liabilities on account of Joliet and Chicago, and Alton and St. Louis Railroads, being taxes, etc., say	10,000
	$540,000

Under the operation of the two sinking funds, the amount of annual fixed charges will be reduced, and under no circumstances can they be increased.

From the foregoing, it will be seen that all net earnings in excess of $540,000 per annum, are applicable to the payment of dividends on the common and preferred stock of the company.

The gross earnings per mile in 1864 were $10,916 82, against $7,607 75 in 1863—a gain of $3,309 07, or 43½ per cent.

The net earnings in 1864 were $4,955 32 per mile; in 1863, they were $3,190 29—a gain of $1,765 03, or 55.3 per cent.

The operating expenses of 1864 are 54.6 per cent. of gross earnings.

The equipment of the road consists of 49 locomotives; 29 passenger, 4 sleeping, 7 baggage, 2 express, 579 house, 138 stock, and 213 platform cars.

Miles run by locomotives with passenger trains, 363,050; with freight trains, 568,031; with wood trains, 21,392; with construction trains, 41,217; switching, 110,507—total miles run, 1,104,197.

The number of passengers carried was 424,940, of which 392,782 were way, and 32,158 through passengers.

Tons of freight moved north 174,366; do., south, 211,830—total, 386,196.

During the year the company have added to their rolling stock, by purchase, 6 locomotives and 2 passenger cars, at a cost of $148,214 25. Additions have also been made by building at the shops of the company, 1 passenger, 1 baggage, 2 express, 55 house, 32 stock, and 7 platform cars, and by rebuilding 86 house and 7 stock cars—practically adding to the amount of rolling stock, 6 locomotives; 8 passenger, 8 baggage and express, and 274 freight cars.

The completion of the road between Alton and St. Louis enables the company to begin its operations for the year 1865, with a complete line under its exclusive control between Chicago and St. Louis, the importance of which can only be fully appreciated by those who have had the direct charge of the company's operations.

The earnings of the line for the past year, were reduced by the limited number of engines and cars employed, and also by their inefficient condition during the first half of the year. As evidence of the latter fact, it will be seen that while at all times during the year, the demands for transportation were greater than could be met, nearly two-thirds of the gross receipts were earned during the last six months.

It is now submitted as the judgment of the Directors, that in view of the present and certain demands in the future for increased facilities for transportation, it is a duty the company owe to themselves and their patrons, to increase the capacity of their line, by an additional number of engines and cars, depot and track accommodations. Acting on this belief, the Directors have contracted for 12 new locomotives for delivery during the next four months, and have increased the capacity of their shops so as to provide for the construction of one freight car per day, and a limited number of passenger cars during the present year; but the number of engines and cars thus provided for will not be sufficient, and a greater number must be provided or the full value of the company's property cannot be developed.

By a wise provision in the organization of the company, its capital stock cannot be increased without the written consent be first obtained from three-fourths in interest of its stockholders. In view of these facts, one of two courses must be adopted. The company must either invest an undue proportion of its net earnings in rolling stock and other property to increase the capacity of the line—thus giving those who may hold the stock in the future, the benefit of the earnings justly belonging to the present proprietors; or an increase of capital stock must be resorted to, to represent expenditures demanded by an increasing traffic, which must keep pace with the growth of the two great commercial cities at the termini of the line, and the increase of population in the cities and towns, und on the fertile prairies intervening.

It is believed that the latter course should be adopted, and a communication will be addressed to stockholders, requesting authority to carry out a plan which will be therein submitted for an increase of stock, to be limited to actual expenditures made from time to time for the purposes indicated.

By an oversight in framing the charter of the company, the Directors were constituted life-members of the board, unless it should be their pleasure to resign, and in that case, it was provided that the vacancies should be filled by the remaining Directors. An application has therefore been made to the Legislature of the State, now in session, for an amendment which shall provide for annual elections of directors by stockholders, and no doubt is entertained that it will be granted.

President.—T. B. Blackstone.

Directors.—Albert Havemeyer, Geo. A. Robbins, Geo. Talbot Olyphant, John A. Stewart, New York; T. B. Blackstone, John B. Drake, John Crerar, John V. Farwell, Chicago; John J. Mitchell, Alton.

Secretary and Treasurer.—W. M. Larabee.

General Sup't.—Robert Hale.

Atchison and Pike's Peak Railway.

The Atchison (Kansas) *Daily Champion* says: "We learn from Major Gunn that about two thousand Germans who have recently arrived in this country, are on their way to Atchison from New York, to work on the Atchison and Pike's Peak railroad. The company has hired them, agreeing to pay them partly with twenty acres of land apiece, out of the late Kickapoo reservation, thus forming an important and valuable colony of industrious citizens in our country, and also securing laborers for an important public work, which has heretofore been difficult to do."

North Missouri Railroad Bonds.

Statement of John F. Hume, State Fund Commissioner.

By an act of the Missouri Legislature, approved February 16, 1865, the North Missouri Railroad Company is empowered to issue bonds for six millions of dollars, for the purpose of securing the completion of its road and branches, so as to form a connection between the city of St. Louis and the railroads penetrating the States of Iowa and Kansas, and construct a bridge for its cars over the Missouri River at the city of St. Charles. These bonds are, by law, denominated "First Mortgage Bonds of the North Missouri Railroad Company," and are to be issued in sums of one thousand dollars each, and will bear seven per cent. interest, payable semi-annually, with interest coupons attached, and will have thirty years to run before maturity. In the State of Missouri they are exempted from all State, county, and other local taxes. As their name implies, the bonds are to be first mortgage bonds, secured by a first lien, not merely on the portions of the road they are intended to aid in building, but likewise upon so much of the road as is already finished—170 miles—together with all the rolling stock, depots, machine shops, and other appurtenances belonging, both now and hereafter, to the road. To authorize the execution of such a mortgage, the State—in the act referred to—has

relinquished a first lien on the road already built, for the sum of $4,350,000, being assistance rendered by the State to the company in aid of its work already done, and takes a second lien on the entire road and branches. A mortgage, to the effect above described, has been executed by the company, and the bonds will soon be in the market.

As Fund Commissioner of the North Missouri Railroad Company, by appointment of the Governor of the State, charged by law with the duty of selling these bonds, and directing the application of the proceeds to the objects specified, it is proper that I should state such facts as go to determine their value, for the information of parties seeking an investment in such securities.

With this view, three points suggest themselves as being those upon which such parties would chiefly desire to be satisfied. First, the sufficiency of the security for the principal of the bonds; second, the paying capacity of the company, as showing its ability to promptly meet the interest; and third, which is rather preliminary to the others, the sufficiency of the bonds, if sold at fair rates, to finish the road.

On the first point, it would appear to be sufficient to state that the bondholders will not only have a first lien on all the road to be constructed and equipments acquired with their money paid in the purchase of the bonds, but also on other means in possession of the company which will be applied to the same end. For instance, in the construction of the West Branch to Kansas, the company has, as assets to be used, 25,000 acres of land in Chariton County, conveyed to it by a company previously organized to build a road on this line. Much of this land is valuable, the whole being now estimated at $75,000. It has fifteen miles of grading done, worth $75,000. It has a subscription by Carroll County of $175,000, and another by Ray County of $200,000. The city and county of Leavenworth have each voted a subscription of $250,000 to aid in building the road to that point. A deep interest is taken along the entire line in the early completion of the road, and liberal contributions to that end may safely be anticipated from counties and individuals interested in the matter, as well as a general donation of right of way, &c.

Of the main line to Iowa, above Macon, the present terminus of the completed road, twelve and a half miles are graded, while the counties of Schuyler and Adair each owe $35,000 on subscriptions. On this portion of its line the company has finished its surveys and accomplished a good deal toward obtaining right of way and depot grounds. Great anxiety is likewise felt along this portion of the line for the early building of the road; and as it, as well as the West Branch, penetrates a country of considerable wealth, some local aid may be expected. Whatever assistance is thus obtained, adds to the security of which the bondholders get the benefit. The company, it is proper to add, has no floating debt, but on the contrary, has a considerable cash balance on hand, from the earnings of last year.

But the most tangible security which is offered to the purchasers of these bonds, consists of one hundred and seventy miles of completed railroad, in good running order, well stocked with locomotives and cars, and doing a profitable business. This portion of the road, connecting St. Louis with the Hannibal and St. Joseph Railroad, at Macon City, and thus enjoying an advantageous connection, was built in the years 1855, 1856, 1857 and 1858, at a cost of $7,000,000. Although much the most costly and difficult portion of the line, it was built at a less cost per mile than any road in the State, and yet is the best constructed of all the Missouri railroads. In addition to the road itself costing the above mentioned sum, the company owns and has in use rolling stock, machinery, other property, worth, at present prices, nearly one million of dollars, which is likewise covered by the mortgage securing the bonds.

All of this property, as before stated, was subject to a first lien in favor of the State, for the sum of $4,350,000 advanced in aid of the road's construction; but, as will be seen by the act of the Missouri Legislature, hereinafter given, the State has relinquished its lien in favor of the holders of the six million bonds, taking a second lien on the entire road, regarding that as ample security. This shows what estimate is placed upon this enterprise by the parties immediately representing the interests of the people of Missouri, who ought to be most familiar with the subject.

That portion of the line now finished is 170 miles in length; the contemplated northern extension is 68 miles; the West Branch 150 miles—making in all, when finished, 388 miles of road, having its main terminus in the largest city on the western half of the continent, and penetrating the richest districts of the State of Missouri, with connections of the most favorable character—costing, road and equipment, with the strictest economy, not less than fourteen millions of dollars, and this is offered as security for six millions. Who can doubt its sufficiency?

Next, as to the ability of the company to promptly meet the interest on the bonds. The money for this purpose must come from the earnings of the road. The company has, as already stated, 170 miles of its road finished and stocked, which has been in operation for the past seven years. During this time, notwithstanding the greater portion of it has been a period of civil war in Missouri, the road has not only paid expenses, but yielded a reasonable profit. That an idea of its business may be had, I give the following statement of its gross earnings for the last three years:

Total receipts in 1862	$438,434 43
" " in 1863	636,248 24
" " in 1864	911,286 84

This exhibits a handsome annual increase; but perhaps a better evidence of the growth of the company's business may be gathered from a showing of its monthly receipts for 1864, which are as follows:

January	$47,316 50
February	70,949 14
March	83,339 06
April	65,604 94
May	63,328 21
June	61,411 94
July	59,370 31
August	89,130 35
September	94,530 62
October	33,752 65*
November	109,321 57
December	132,233 55
Total	$911,286 84

The net earnings of the road for the fiscal year ending the 1st of March, 1865, amounted to $309,857 85, nearly sufficient to pay the interest at seven per cent. on $4,500,000. There is every reason to believe that, as the State fills up with population, these net earnings from the main line will increase.

The Hannibal and St. Joseph R.R., for the last year of its business earned $2,000,000. This road is 208 miles long. The West branch of the North Missouri road will be 150 miles long, passing through a much more thickly settled portion of the State, and will reach Kansas City, Leavenworth, and by the Platte country road, Atchison and St. Joseph and points north of St. Joseph to Council Bluffs. It is reasonable to estimate that the earnings of the West branch alone will be, when finished, over $1,000,000. As the whole of its business must pass over the 170 miles of the North Missouri road now completed, it will, undoubtedly, increase the present earnings of the main line one million of dollars. From the best data to be obtained, it is estimated that the extension to Iowa will give not less than one million of additional business for the whole road from Iowa to St. Louis:

The present earnings then are for a year, say	$1,000,000
The building of the West branch in its own business $1,000,000, and the increase to the main line $1,000,000 more	2,000,000
The extension to Iowa will give, at least, annually, a million more to the business of the road	1,000,000
Total	$4,000,000

When the road is fully completed it ought to be operated on less than 60 per cent. of its gross earnings; but, say it should take 70 per cent. of its gross earnings, this would leave $1,200,000 for interest, and it is confidently believed that this result will be more than realized. If so, then the net income will not only pay the interest on the $6,000,000, but also on the debt of the road to the State, and make the road a dividend paying road to its stockholders.

The interest on $6,000,000 of first mortgage bonds, at 7 per cent., is	$420,000
The interest on the $4,350,000 of State bonds, issued to the road heretofore, at 6 per cent., is	261,000
Total	$681,000

To pay which the company will have twelve hundred thousand, or nearly three times as much as will be required to pay the interest on the $6,000,000 of first mortgage bonds.

To correct any possible misapprehension, it may be proper to state that the earnings of this road have not been increased by Government business, but on the contrary, the effect of the war in Missouri has materially decreased them from what they would have been. The total receipts of the road from Government for the last three years are as follows:

Government transportation in 1862	$74,006 75
" in 1863	47,516 96
" in 1864	57,596 57
Total for three years	$179,020 28

To say nothing of the actual losses of property to this company destroyed by rebels. The products of the country to be shipped over the road, and the importation to supply it, have been greatly diminished in consequence of the presence of war among us, by which the company has been occasioned a loss that would far exceed any receipts from the Government for its transportation.

Located as the North Missouri Railroad has been for the past four years—the greater portion of the time in the midst of an active theatre of war—it is easy to understand the embarrassments under which it has labored. Its losses in property, destroyed by the enemy in that time, have amounted to not less than $300,000, while its business has, at intervals, been entirely suspended, and at all times greatly lessened, from that cause. This difficulty—with the restoration of peace and order in Missouri, which may now be anticipated, the change of Missouri from a slave to a free State, which is already accomplished, and the influx of a loyal immigration, which has vigorously begun—may now be regarded as permanently removed. The effect upon the business interests of the road must be most salutary. The company, I doubt not, with its present working line alone, would, from this time on, be able to pay from its net earnings the interest on the entire six millions bonds. It is proper, however, to state, that in view of the importance of promptly meeting the interest on any bonds sold, when a failure involves the forfeiture and possible loss of such valuable interests, as well as from a desire to sustain the credit of the road, the policy to be rigidly pursued will be to sell only so many bonds under the mortgage, that the interest upon them will, beyond all contingency, be punctually met at maturity.

* October, 1864. In this month Price's raid caused almost a total suspension of business in Missouri.

With regard to the third point, the sufficiency of the bonds, if sold, to insure the completion of the contemplated lines of road, as well as to build the bridge over the Missouri, it is enough for me to say that, according to careful estimates of those most competent to judge of such matters, there seems to be no doubt on the point. It must be recollected that the completion of a portion of a road greatly facilitates and cheapens the construction of the balance, as rolling stock for the transportation of material is then at hand without additional expense. The sections of country to be penetrated by the contemplated branch and extension of the main line are unusually favorable to railroad building, being made up in great part of level prairies, requiring merely a surface grade, with few streams to cross and bridge. Competent engineers estimate the entire cost of the branch and extension as not to exceed $25,000 per mile, and of the bridge over the Missouri at half a million of dollars. The Company, in applying to the Legislature for the privilege of issuing first mortgage bonds, made certain of asking latitude enough, in connection with its other available assets, to be sure of finishing the work, intending, however to sell only so many bonds as may be actually necessary.

To any one interested in the subject, it is important that he study the map that he may form an accurate judgment of the business advantages which the completed road will enjoy and the profits it will yield. It will be seen that with its branches it penetrates the richest agricultural districts of Missouri, especially with its West Branch, which passes up the Missouri river valley, the garden portion of the State, thus making sure of a profitable local business. Its prospect for connections is also worthy of observation. The main line from St. Louis now connects at Macon City with the Hannibal and St. Joseph Railroad a well known Western artery for freight and travel. At Liberty, in Clay county, the West Branch is within eight miles of Kansas City, the eastern terminus of the Union Pacific Railroad, one of the National Pacific branches endowed by Congress with Government aid, which is now finished and in operation westward from Kansas City, in Missouri, to Lawrence, in the State of Kansas. From Liberty to Kansas City the grading for a road is already done, which is tendered to the North Missouri Company, on condition that it will lay a track upon it. Further to the northwest, this branch strikes the Missouri river, opposite Leavenworth, the principal city of the State of Kansas, from which point a branch of the Union Pacific Railroad is building westward, and which the Union Pacific Railroad is bound to complete within two years from this time to Lawrence in the State of Kansas, or forfeit most valuable rights acquired under act of Congress, on condition that this work should be done in a limited time. Seven miles further on, it reaches Weston, from which the Platte Country Railroad is already built and in operation northward by way of Atchison and St. Joseph, to Savannah, in Andrew county, a distance of fifty-two miles. The Platte Country Railroad is, by law, compelled to lay a third rail at its own cost to St. Joseph, of the same gauge of the North Missouri Railroad, on which the North Missouri Railroad Company has a right to run its engines and cars.

At Atchison a connection is formed with the Atchison branch of the National Pacific road, one of the lines having Government aid, and now in course of construction. From Elwood opposite St. Joseph, another railroad is projected westward and partly built through Kansas, with which a connection is had at St. Joseph. The Platte Country road is located as far north as Forrest City, on the Iowa line, and the company is bound to complete its road to that point in three years from last February, or have it forfeited to the State. From Forrest City, up the Missouri valley to Council Bluffs, opposite Omaha, the eastern terminus of the Northern Branch of the National Pacific Railroad, (likewise having Government aid,) a company has undertaken the building of a road in connection with the Platte Country and the North Missouri, which is now under contract, and twenty miles of its line graded. It will thus be seen that the Forrest City and Council Bluffs, the Platte Country and the North Missouri, will, in fact, constitute but one road from Council Bluffs to St. Louis, 495 miles in length, connecting with and tapping every east and west road at present contemplated west of the Missouri river, thus giving the North Missouri road thousands of miles of railroad, both to the east and west, tributary to its business, and must make it one of the best paying roads in the United States.

It will likewise be seen that the North Missouri extension from Macon City strikes the Iowa line at a point thirty miles south of Ottumwa, on the Des Moines Valley road. Arrangements are now being made for the filling up of this link. The Des Moines Valley road, besides penetrating the richest portion of the State, is designed to intersect and connect with all the east and west roads crossing Iowa, and ultimately unite with a road traversing the valley of the Minnesota to St. Paul thus creating a through line, with the North Missouri, from St. Paul to St. Louis, a distance of six hundred and ninety-two miles.

Thus it will be seen, that the North Missouri, with its branches and feeders, will reach the entire country west of the Mississippi and north of St. Louis, supplying it with a southern market, and constitutes the only system of roads that will do so. At St. Louis, besides striking the roads diverging eastward, it connects with the Iron Mountain Railroad, running due south on the western bank of the Mississippi, designed to reach Memphis or Columbus, below freezing point, to connect with roads leading to New Orleans, Mobile and Charleston. Of the Iron Mountain road, eighty-six miles from St. Louis are constructed and in operation. One hundred miles more will carry it from the Iron Mountain to which it is completed, to Columbus, at which point railroad connection is had with the Mobile and Ohio Railroad, which gives by railroads now in operation an outlet to Charleston, Mobile, New Orleans, and every Southern city reached by rail of importance. The North Missouri and the Iron Mountain together will furnish the only line of railroad west of the Mississippi between the great Northwest and South; and a large portion of the year, when the northern rivers are impeded with ice, will supply the only direct means of communication between them.

I have thus endeavored to give a full and candid statement of the claims of the North Missouri Railroad to the confidence of the financial public, that men possessed of capital may see the security upon which they will rely in purchasing the bonds of that road, which I have to offer.

It is proper that I should say, that I am not an officer or employee of the North Missouri Railroad Company nor even a stockholder in it. I am an officer of the State, receiving my appointment from the Governor. Into my hands, as a representative of the State, the railroad company, in pursuance of the legislation before referred to, and which is assented to by the Company, places its bonds and the application of their proceeds, as well as the receipts and earnings of the road, in consideration of the States's relinquishment of her first lien, that the State's interest in the second lien may be protected by her own agent. As whatever contributes to the security of the second lien likewise operates in favor of the first lien, it will be seen that my official position makes me, practically, a trustees both for the State and the holders of the bonds under the first mortgage, binding me to guard their interests in opposition to those of the railroad company, should any conflict arise.

It gives me much pleasure to say, however, that no such conflict is anticipated. The officers of the North Missouri Railroad Company are gentlemen of high standing, and familiar, from long experience, with the business they have in hand, in the management of which they have been eminently successful. The President of the Company, the Hon. Isaac H. Sturgeon, is widely known among the most faithful and competent railroad men of the country—thoroughly devoted to the interests of his company, with the duties of whose business he is entirely conversant, having filled his present responsible position for seven years.

The act of the Legislature, has been accepted by the stockholders of the Company, as herein provided, and the mortgage under it has been duly executed and recorded. The bonds issued under a former law, and required to be destroyed, have thus been disposed of, and the bonds issued under the present mortgage will, in whole or part, soon be placed upon the market. The trustees representing the bondholders in the mortgage are John J. Cisco, Morris Ketchum, and John A. Stewart, of New York.

Pittsburg and Boston Mining Company.

The report of the Directors of the Pittsburg and Boston Mining Company, gives the following estimates of the operations for the year ending November, 1864:—

The amount of rough copper produced was Masses, net weight, 1,022,361 lbs.; barrel work do do., 376,321 lbs.; stampings, do. do., 710,205 lbs.; stamp tailings, do. do., 7,096 lbs.; making a total of 2,115,983 lbs., or 1,047 1983–2000 tons, being an average monthly product of 88 332–2000.

Of the foregoing there were shipped during the season of navigation 1,907,386 lbs., leaving on hand at the mine and mine landing at Eagle river, 208,597 lbs.

The actual and estimated product of refined copper is 1,384,171 lbs.

The 1,103,131 lbs. of copper already sold, realised $546,275 51, or a net average of 49 16–100 cents per pound, after deducting freight and commissions. Estimating the price to be obtained for the unsold product as above of 281,040 lbs. at 40c. per pound the receipts for the year would approximate $662,394 06.

The estimated expenses for the year are $405,865 56, leaving a probable net profit for the year of $256,528 50, to this adding balance of year 1863, which was $121,482 49, and deducting dividend, &c, $134,119 32, a probable balance of $243,891, 67 on the estimates made of the year 1864 would be left.

By reference to the balance sheet of the company we learn that the capital stock paid in, amounts to $110,905, and that the proceeds of the sales of the product of the mine amounts to $6,469,702 73. Dividends have also been received amounting to $1,944,492 54.

The Railroad Bridge at St. Louis.

The City Engineer of St. Louis has reported on the contemplated railroad bridge across the Mississippi at that point. He estimates the expense at $3,332,200, of which the city should subscribe $1,500,000, the merchants, etc., $732,000, and the several railroad companies the balance. He thinks such a bridge would save to St. Louis annually $1,800,000. The plan he recommends is a tubular iron plate bridge, without a draw, to pass which steamboats must lower their chimneys to the hurricane deck. In addition, the Chairman of the Committee on the subject appointed by the City Council made a long report in favor of the scheme, which, with the Engineer's report, was ordered to be printed.

☞ Two new locomotives, built at the Norris Works, Lancaster, for the Reading Railroad, have arrived in Reading. They are named after two distinguished generals now in the service—"General Grant" and "General Meade."

American Railroad Journal.

Saturday, April 22, 1865.

Stock Exchange and Money Market.

The money market has been paralyzed the last week to a great degree by the commission of a crime for which we have no adequate name. Very few have cared to follow even their ordinary avocations under the sense of a great public bereavement. A few persons made a spasmodic effort to profit by the melancholy occasion, and with the true spirit of the gambler unfeelingly attempted to enhance the premium on gold by speculating on the probability and chances of prolonged misfortune. It is a fact that the quotation advanced through their manipulations nearly 10 per cent from the previous existing rates, for there were those in whom the love of money and the hope of gain are stronger than private and public decency, and whose judgment is not sound enough to control their conduct, when opportunity offers for speculation. There was no good reason whatever for the rise alluded to. The life or death of no one man, however good or great, can render the resources of the country less available, diminish its extent, overthrow its industry or stop its production. This people are not the property of any individual, however exalted his station. Their rulers are their servants, and not their masters. We can well conceive how the overthrow of a dynasty, or the death of a monarch, might affect a fall in the funds abroad, or endanger a Governmental financial policy; but here the death of a President is totally disconnected from such a consequence. We marvel that such a supposition could be seriously entertained among us for a moment; and especially when the war was so evidently near its close, and with such brilliant circumstances.

Our admirable constitution fully provides for every such emergency as has just occurred, so that we can never be a single day without legitimate Government. The 12th article provides that "in case of the removal of the President from office, or of his death, resignation or inability to discharge the powers and duties of said office, the same shall devolve on the Vice President, and the Congress may by law provide for the case of removal, death, resignation or inability both of the President and Vice President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected."

Accordingly, by a law of Congress, it has been long since provided that in case of the death, or resignation, or other inability of the President and Vice President, the President of the Senate *pro tempore* shall succeed, and if there be no such President *pro tem.*, then the Speaker of the House of Representatives for the time being should succeed to the Chief Magistracy until the disability is removed or a President elected.

We have long adopted the practice of appointing a President *pro tempore* in the U. S. Senate in order to meet the possible emergency of the deaths of the regularly elected President and Vice President. In the present instance the President *pro tem.*, of the Senate is Mr. Foster, of Connecticut, a wise and conservative man, and said to be the ablest parliamentarian in Congress. And though Justice Story in commenting upon the fact that between the session of an expired Congress and meeting of a new one, there would be no actual Speaker of the House, and therefore it is questionable on whom the Chief Magistracy would fall, yet even that contingency is guarded in the 3d Section of the 2d Article, where on extraordinary occasions the Senate may be convened by itself, and then its chosen presiding officer would become Vice President, while his immediate predecessor would have become President. It is therefore very evident if this view should prove to be correct, a call of the Senate at this time, if it be not advisable or necessary to convene both Houses of Congress, would fully meet the exigency except from the contingency of a wholesale butchery of all our regularly elected rulers.

Our foreign readers, who are not acquainted with the marvelous power and workings of our Constitution, as well as they are with our progress under it, will see how well guarded our institu-

tions are by this admirable instrument, and how much safer and more certain is the fulfilment of our public engagements, than in any other country where the Government is in individual hands, and often dies; or is endangered by failure of succession, or the mere interruption of descent. Our present Constitution which superseded the early articles of confederation, (which proved to be a rope of sand,) thus carefully provided for the continuance of its National executive, making its failure almost impossible. Nothing short of a universal pestilence, or a general massacre could therefore interrupt the ordinary functional powers of the Government. The holders of our securities abroad should understand therefore that, as far as human wisdom could devise, our organic law is in this respect as in most others—*perfect*.

The death of our lamented President, therefore, so far as the stability, or power, or future indeed of the republic is concerned, is really no more than the death of any other statesman or patriot, except, as in this memorable instance, he has sealed the bond of union with his blood.

That these opinions of ours are absolutely those of the people, is plainly enough to be seen by the great steadiness of the market in Government securities which are advancing, and also of the large daily subscriptions to the 7-30s, the last loan we are likely to have for many years offered the public. Under the wise administration of our present Secretary of the Treasury, whose great object is retrenchment in expenditures, a reduction of the currency and a return to specie payments whenever this latter can be safely attempted, and when he shall have withdrawn as a borrower from the market, we may look to a most triumphant financial career, a heavy advance in the value of our National securities, and large and deserved profits to those who have had faith in the investment.

In further proof of these statements, we have but to allude to the fact that the subscriptions to the 7-30s were on the day preceding the President's death, and the day after it was known, upwards of eight millions of dollars!

As still another illustration of the confidence of the public, we point to the return of gold to its former rate, a large advance in Government securities generally, and in our leading railroad securities. This advance will be seen in our usual report of quotations. Money is plentifully supplied, and its surplus hoards will soon be employed in the purchase of other than Government securities as it withdraws from the market as a borrower. We see this tendency already in the demand for those railroad shares which have most depreciated within the last few months.

The bank returns show an increased supply of legal tenders of five millions since the previous weekly statement, also about half a million more specie, and about three millions of deposits. The imports at this port from the 1st of July, 1864, to 15th April, inst., were of the value of $121,964,405, against $166,067,435—showing a decrease of $44,103,030. The value of the exports from this port the week ending April 18, was $2,114,312, exclusive of specie.

The City of Baltimore from Liverpool brought on her last trip £1,701 in specie.

The balance in the Sub-Treasury on Tuesday was $33,774,087 41.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Tomah and St. Croix Railroad.

A private letter from Tomah, Wis. to the editor of the Milwaukee *Wisconsin*, states that on the 4th inst., the contractor and engineers arrived in that place for the purpose of beginning the work of surveying and setting grade stakes, preparatory to commencing work on the Tomah and St. Croix Railroad. This is an important enterprise, and we are pleased to learn that it is about to be undertaken in earnest. The speedy completion of this road will prove of immense benefit to the North-western portion of the State.

Debt of Tennessee.

The debt of Tennessee is stated in the recent Annual Message of the Governor to be $3,894,606, at an annual interest of $212,388. Besides this debt the State has bonds for internal improvement, and railroads amounting to $16,211,000.

The aggregate debt is $20,005,606, and the annual interest, $1,185,048. The arrears of interest since January 1, 1861, amount to nearly twenty-five per cent of the principal.

Journal of Railroad Law.

LIABILITY OF BANK TO OWNER OF ITS DESTROYED NOTES.—WHAT TRANSFERS PROPERTY TO CARRIER IN GOODS LOST IN TRANSITU. QUESTION OF FACT FOR JURY.

The recent case of The Adams Express Company *vs.* The Hagerstown Bank, was an action to recover of the defendant $3,315 of its notes, which the plaintiffs averred was their property, and which had been cancelled or destroyed, whereby the bank was relieved from all liability to redeem them.

The facts of the case were as follows:

On the 6th of October, 1860, a package containing $9,455 of defendant's bank notes was made up at the Merchants' Bank of Baltimore, and received by plaintiffs to be delivered to defendant. When it was opened on the 8th of October by the defendant at Hagerstown, it contained but $6,095 —$3,360 having been abstracted from the package, and a bundle, made up of newspapers cut to the proper size, substituted. The plaintiffs were informed of the loss, and their superintendent on the 11th of October, went to Hagerstown and gave his check, to the defendant's cashier for the amount of the loss. When the check was given, the cashier of defendant gave plaintiffs' superintendent his receipt for the $3,360. The efforts of plaintiffs were then earnestly directed to ascertain by whom the money had been taken. Circumstances indicated a young man named Simmons, who was subject to occasional attacks of insanity and who was then temporarily employed by the plaintiffs, as the person who had taken the money. He was privately questioned as to his knowledge of its loss, and upon being assured that he would not be prosecuted if he told the truth about the matter, he confessed that he had taken the money from the package, at the express office in Harrisburg, on the 8th of October, about one o'clock in the morning, that he took it home to his father's house, and put it in a box, where it remained until October 13th, when he took it, except $45, to Wetzels Swamp, about two miles from Harrisburg, and burned it there. The amount of the sum burned was therefore, according to the confession, $3,315. After this confession Simmons accompanied by four gentlemen went to the place where he said he had destroyed the notes. A quantity of cinders and ashes was found, showing the character of the paper burned. There were also found a number of pieces of defendants' notes, which were produced and identified at the trial. From the evidence on the trial it was shown that young Simmons, at the time he broke the package and took the notes, was in "one of his spells," or fits of insanity, and it was also proved that after these attacks he had always a clear and distinct recollection of all that took place whilst his mind was under their influence.

On the 1st of April 1861, after tendering to defendant, a bond of indemnity, this suit was brought. There was only one error assigned as to the admission of evidence on the trial in the court below, which was to the deposition of this Simmons, because of his interest in the question, the want of authority for the execution of the release, which was offered for the purpose of restoring his competency, and the inducements held out to him by the promise not to prosecute if he would make a full confession.

Under the instructions of the court, there was a verdict and judgment in favor of the plaintiffs for the amount claimed ($3,315), whereupon the defendant sued out a writ of error and the case was afterwards argued before the Supreme Court of Pennsylvania, and the following opinion was delivered by that Court, by

WOODWARD, J. We agree with the learned counsel of the defendants, that the money in controversy was not recoverable as for money paid by mistake. There was no mistake of facts in the payment. The express company had undertaken to carry $9,455 of money from Baltimore to the Hagerstown Bank. It was the bank's property, and the carrier was bound by law to deliver it to them. An agent or clerk, of the express company stole $3,360 from the package during its passage. It was the duty of the company to make good this sum to the bank. The bank could have recovered against them at law. When the plaintiff's superintendent, therefore, on the 11th October, paid to the bank $3,360 in settlement of the claim, he did only what the law would have compelled his company to do, and the bank received only what they were entitled in equity and good conscience to receive and retain. So far from being a payment in mistake of legal rights and duties, it was a payment in discharge of clearly ascertained legal rights and duties.

But the consequence of such settlement and payment was to transfer the property in the notes from the bank to the express company. The bank having received the value of the notes, had no further rights to the notes themselves, and were bound to redeem them when presented, as they would redeem any other paper issued by them. Simmons, the company's agent, had the custody of the notes, but he had acquired no property in them, for he had taken them from his employers feloniously. He was bound in law and conscience to return them to his employers, in whom the title had now vested absolutely; and whilst he retained the custody, he must be considered as holding in trust for them. Whatever of the notes he passed away was the company's loss, and whatever he destroyed enured to their benefit, for it entitled them to claim so much money from the banks as for destroyed notes of their issue.

It is argued that a wanton destruction by their own agent could give the company no right of action. To this we cannot assent. Even if a careless and unintentional destruction of bank notes by an agent, in the course of his duties, would not give the principal an action against the bank that issued them, a proposition which we do not mean to affirm, it is very clear that a wanton destruction by a faithless agent, not in pursuit of the duties for which he was employed, but in gross violation of them, cannot be imputed to the company as their wrongful act. It was their duty to employ honest and faithful agents, and when in pursuit of their calling as common carriers, their agent failed to deliver all the money they undertook to deliver, they were, as I have before said, clearly responsible to the bank for his negligence and fraud. But when, by settlement with the bank, the company had become the owner of the notes in question it was a fraud on *them*, not on the bank, to surreptitiously destroy the notes. It was like a malicious destruction of any other property of the employer by an unfaithful servant. What right has the bank to profit by his fraud on his employers? By what rule of law or of morals can they adopt his wrongful act and appropriate it to their benefit? Ordinarily an employer is not responsible to third parties for the wilful wrong of a servant, even in the course of his employment; but here was an act, the destruction of the notes, which was not in the course of the agent's duties, which was not injurious to the bank, for if not destroyed, the bank was more certainly liable to redeem the notes than if they were destroyed, but which was a great wrong to the employers, and to nobody else. Now, to treat the bank as the injured party, and the express company as the wrong-doer, would be an extremely artificial view of the case and a strange inversion of legal principles. The real question in the case was whether there was adequate evidence of the destruction of the notes. Upon general principles of law, no man loses his right either to real or personal property, or to a chose in action, by losing the evidence of it; but if he cannot produce the primary evidence, he is bound to account for its absence and to produce secondary evidence that shall be reasonably satisfactory to a Court and jury. As long as a bank note exists, the bank is liable to redeem it in the hands of the bearer, and therefore it is necessary for a party who calls on a bank to redeem notes without producing them, to prove something more than mere loss, because though lost to the real owner, the bank remains liable to the finder. But if their destruction can be shown, there is an end of the banks liability to some casual holder, and the owner may recover them. The cases are all cited in the argument, two of the best of which are Bullet *vs.* The Bank of Penn., 2 Wash. C. C. R., 172, and Martin *vs.* The Bank of U. S., 4 id., 255, both of which were cases in which the owners of bank notes had cut them in twain, and lost one part and presented only the other part. The banks were held liable as for destroyed notes. In such cases the evidence is complete, for the part produced is sufficient to identify the note, and the mutilation and loss of half, is the destruction of the whole for all legal purposes. The case most relied on for the defendant, is that of Tower *vs.* The Appleton Bank, decided in the Supreme Court of Massachusetts in 1862, and reported in 3 Allen, 387. "There was evidence tending to show that the plaintiff left the bills in question in his trunk in his room, in a house in Chicago, which was burnt within an hour afterwards, and that no person entered the room after he left it, and that the trunk and its contents were burnt with the house." This is all the account the report gives us of the evidence, and the court held it insufficient to prove destruction of the bank notes. The Court intimated, that if "the bills were shown to be actually destroyed beyond all question or controversy," the bank would be liable, but such proof as was before them they held insufficient.

And so it is maintained in this case, that there was a defect of proof on the main point. On looking through it, we think the Court could do no less than submit it to the jury, and we cannot conceive how it could have been submitted in a manner more clear and fair. The precise amount of notes burned was not fixed, except inferentially, but the jury had ample grounds for the inference they made

The witness Simmons, was legally competent, notwithstanding his physical and moral infirmities, for he was called to testify against his interest. His testimony was referred to the jury with all proper cautions and instructions, and we have no right to presume that any more weight was given to it than it deserved. On the whole, we think the evidence of destruction was such as the Court were bound to submit, and it having satisfied the jury it must satisfy us.

The judgment is affirmed.

Milwaukee and St. Paul Railway.

A paragraph is going the rounds of the newspapers stating that—

"The Supreme Court of the United States, at Washington, has just declared that the eastern division of the old La Crosse railroad, claimed by the St. Paul and Milwaukee Railroad Company belongs to the Milwaukee and Minnesota Railroad Company, together with the rolling stock and appurtenances, and the receiver is ordered to be discharged. The court also declares worthless, a judgment in favor of Selah Chamberlain, held by the St. Paul and Milwaukee railroad company. The value of the property involved in this decision against the St. Paul and Milwaukee Railroad Company is estimated at about $2,500,000."

To this the Company, through their Vice-President, RUSSEL SAGE, Esq., reply as follows:

"In the first place, there has been no such decision as is here stated. In the second place, The Milwaukee and St. Paul Railway Company does not and never has claimed to be the owner of the eastern division of the old La Crosse railroad. On the contrary, it has adopted and executed a policy which makes its position entirely independent of that division. This company was organized for the purpose of securing and operating a complete line of railway from Milwaukee to La Crosse. We have effected this object by purchasing the western division of the old La Crosse railroad from Portage City to La Crosse, one hundred and five miles. 2d. By purchasing the Milwaukee and Western railroad from Milwaukee to Columbus; and 3d. By constructing over forty miles of new railroad from Columbus to Portage, including a new track from the Prarie du Chien junction into the city of Milwaukee—so located as to unite with the Chicago line in a common depot at Milwaukee. By these combinations we have formed a new and unbroken line (somewhat shorter and better than the old one) from Milwaukee to La Crosse, and all the through trains have passed over it since last September. Our reason for carrying out the policy above explained was that after purchasing the western division under the foreclosure of the land grant mortgage, we found the eastern division involved in interminable litigation between its creditors and parties known as the Milwaukee and Minnesota Company, claiming ownership subject to the incumbrances. The only controversy concerning the title to the eastern division is between the company and its creditors. The company decided not to await the progress of the proceedings. The eastern division was in the hands of a receiver, pending the foreclosure of the second mortgage, and still remains in his possession. The Milwaukee and Minnesota company has been at liberty at all times to take possession by paying the interest in arrear and the judgment resting on the title. The decision of the Supreme Court to which you refer, orders that the road be sold under the second mortgage, unless the said Milwaukee and Minnesota company, pay the interest in arrear, and give security to apply future earnings on certain judgments. If they comply with this condition it will be gratifying to the creditors. A Majority of the second mortgage bonds are held by stockholders in this company, and the validity of these bonds is fully sustained by the decision of the court. The amount of interest due up to the 1st instant was $480,000, and the bondholders would be glad to receive the money. The only contest between the corporations relates to a portion of the rolling stock which this company purchased new under the land grant mortgage. It was covered by several mortgages, and our title rests on priority of lien. The Supreme Court has made no decision adverse to this principle. It overruled a demurrer in this case, and remitted the cause to the Circuit Court for trial, and we feel confident that the validity of our title, to the equipment in question, is too clear to admit of doubt of the result. The statement in relation to the judgment in favor of Selah Chamberlain is no less unfounded than the other representations under review. The court made no such decision, but, on the contrary, ordered that the eastern division remain in the hands of the receiver unless the Milwaukee and Minnesota Company, after paying interest on the second mortgage, give satisfactory security to apply future earnings to pay the balance due on this judgment. The actual difficulty in the case is, that this detached piece of road is not of sufficient value to pay the liens upon it, and the holders of the residuary interest have struggled for some years in pursuit of an imaginary and inpossible surplus. They assumed that the eastern division was necessary to the Milwaukee and St. Paul Railroad Company, and under this delusion they insisted on exhorbitant and impracticable terms. In the meantime we have gone forward and perfected the new line above described from Lake Michigan to the Mississippi, and so far as this corporation is concerned, the disposition that may be made of the eastern division of the old La Crosse road has become a matter of comparative indifference.

New York and Boston "Shore Line Railway."

At the annual meeting of the Stockholders of this company held at New Haven on the 15th ult., the following gentlemen were elected directors for the ensuing year; S. B. Chittenden, C. S. Bushnel, Jas. M. Townsend, E. C. Scranton, E. Ingraham, A. N. Ramsdell, H. Hotchkiss. The following vote was passed after discussion:

Voted, That the trustees for the holders of the first mortgage seven per cent bonds of the New Haven and New London Railroad Company, now known as the New Haven, New London and Stonington Railroad Company, be, and are hereby requested under and in pursuance of the provisions of the sixth section of the charter of the Shore Line Railway, to sell all the property, right and franchises conveyed to them in trust for the holders of said bonds in the city of New Haven, on some day to be fixed by them previous to the 20th June next; and the directors of this company are hereby authorized and directed in behalf of the stockholders, to make all necessary arrangements for the purchase of said property, rights and franchises now held in trust by Henry Hotchkiss and Chas. Buckingham, whenever it shall be offered for sale as aforesaid.

Junction and Breakwater Railroad.

The bill as amended by the Senate, passed the House of Assembly at Dover, Del., on the 15th ult. It provides for the issue of state bonds to the said railroad company to the amount of $400,000, as follows: When $50,000 additional stock is subscribed and actually paid in to the company, the State to make and deliver its bonds for $132,000; when $50,000 more additional subscriptions are made and paid in, $44,000 in bonds to be delivered; when $50,000 more is subscribed and paid in, $88,000 in bonds to be delivered; and when $500,000 more is subscribed and paid in, $88,000 in bonds to be delivered. The State to issue and dispose of $48,000 other bonds, in order to meet the interest on the bonds delivered to the company for two years. The company to execute a first mortgage on the road from the junction at Harrington to Lewes in favor of the State for the sum of $400,000. The company to pay to the State 25 cents for every passenger carried, and 20 per cent on all other business on the road, and the fund so derived to be first applicable to the payment of the interest on the bonds, and secondly to the principal of the mortgage.

Railroad Earnings—Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 1st week in April:

	1865.	1864.
Passengers	$9,916 67	$6,261 89
Freight	8,362 76	8,866 31
Mail, express & telegraph	1,200 00	1,054 58
Total	$19,479 43	$16,182 78
Total for the fiscal year, commencing 1st Jan.	297,722 28	249,717 69

The earnings of the Chicago and Northwestern Railway for the 2d week of April, are $107,220 93
Corresponding week of 1864 ..... 88,930 21

Increase $18,290 72

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending April 7, were:

	1865.	1864.
Passengers	$4,824 61	$2,708 23
Freight	2,911 58	5,347 53
Express	162 80	104 16
Mails	296 58	296 58
Total	$8,195 57	$8,456 50

Receipts from January 1 to April 7:

1865 ..... $121,554 76
1864 ..... 114,322 27

Increase $7,232 49

The earnings of the Grand Trunk Railway for the week ending April 8, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$45,139 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	84,342 00
Total	$132,605 00
Corresponding week, 1864	107,167 00
Increase	$25,438 00

Mails from Richmond.

The first United States mail from Richmond, since the war broke out, arrived at Washington on Saturday *via* City Point, in the steamer Dictator. The railroad from City Point to Petersburg is now in running order, and the road thence to Richmond is to be immediately repaired. It is also stated that arrangements are made to put in running order the railroad from Aquia Creek to Richmond. The Construction Gang has commenced operations, and it is expected this road will also be open in a few days.

☞ The deposits of gold at the U. S. Mint for the month of March amounted to $1,210,242 95, and of silver, $25,261 38—in all $1,235,504 53. The gold coinage for the month amounted to $1,250,067 90, and was entirely in double eagles. The silver coinage was $31,551 66, principally in half dollars. The copper coinage was $24,000 in two cent pieces, and $40,300 in one cent pieces, —in all $64,300—covering 5,240,000 copper pieces. The total coinage of the month of all kinds is $1,346,119 56, and the whole number of pieces 5,366,146.

Commerce of San Francisco.

The total tonnage movement of the port in 1864 is stated in the following table:

Whaling grounds	32	10,680	30	9,578
Grand Total	2,096	739,190	705	512,124

The arrivals of vessels and tonnage from all quarters during the past four years, and in each of them, were as follows:

Years.	Vessels.	Tons.	Years.	Vessels.	Tons.
1861	1,980	599,243	1863	1,899	641,893
1862	1,869	634,769	1864	2,096	739,190

—and the following exhibits in gross the quarters whence the above arrivals occurred:

From	1861.	1862.	1863.	1864.
Atlantic ports	121,342	119,935	114,963	120,064
Pacific ports	267,608	261,703	253,017	283,389
Foreign ports	205,672	250,211	268,909	325,057
Whaling grounds	4,521	2,920	4,504	10,680

Of the arrivals from foreign ports the larger portion is composed of steam tonnage employed on the regular lines plying up and down the Pacific coast, and in 1864 were as follows:

From	Steamers.	Tons.
Panama, Pacific Mail Steamship Company's	26	95,316
" Opposition Company's	6	10,864
San Juan del Sur, Opposition Company's	5	8,176
Victoria, V. I., Holliday's	18	23,343
" C. S. N. Company's	18	21,267
Mexico, Holladay's	9	16,536
Total, 1864	92	175,502
" 1863	88	144,801

Owing to the imports from domestic ports not being recorded at the custom house, there are no means of ascertaining their value with any degree of accuracy. The usual way of estimating is to charge $200 per ton for freight by sailing and double that amount by steam vessels.

The aggregate value of exports from San Francisco for the years 1862–64, inclusive, was as follows:

	1862.	1863.	1864.
Treasure	$42,561,761	$46,071,920	$55,707,201
Merchandise	10,565,294	12,877,399	13,271,752
Total	$53,127,055	$58,949,319	$69,978,943

—of which the following are the values of merchandise shipped *via* Panama $571,070 $1,430,036 $2,189,484

The destination and values of the total merchandise exported were as follows:

To—	1862.	1863.	1864.
New York	$2,245,633	$2,737,435	$3,399,143
Boston	1,192,489	1,505,690	1,532,021
New Bedford	.....	.....	235,000
Domestic ports	$3,438,122	$4,243,125	$5,166,164
Great Britain	1,335,217	1,697,822	955,858
Australia	332,336	487,685	579,746
British Columbia	2,190,908	1,746,801	1,510,689
Mexico	1,014,639	1,819,652	2,215,614
Peru	271,251	216,206	247,128
China	722,229	1,246,254	1,374,106
Hawaiian Islands	292,379	357,369	359,485
Japan	21,598	43,901	49,337
Other countries	920,630	920,584	513,678
Total	$10,565,294	$12,877,399	$13,271,752

The value of treasure exported and the amounts to each principal importing country monthly, and for the year 1864, were as follows:

Month.	New York.	England.	China.	Total.
January	$1,135,699	$3,294,940	$442,747	$4,981,905
February	1,270,997	5,645,372	414,415	7,545,084
March	871,880	3,827,056	826,570	5,726,946
April	923,779	2,401,241	.....	3,625,549
May	701,827	2,272,269	358,744	3,437,841
June	698,758	2,439,392	446,031	3,670,181
July	1,211,517	3,904,342	539,743	5,729,753
August	1,085,757	2,177,932	946,192	4,275,259
September	840,068	2,447,327	1,421,561	4,780,064
October	1,341,187	2,307,428	633,955	4,365,585
November	1,085,657	2,160,650	550,158	3,823,095
December	1,194,001	1,603,476	891,651	3,745,963
Year	$12,316,122	$34,436,423	$7,888,973	$55,707,201

The value of treasure exported to each importing country during the three years 1862–64, inclusive, was as follows:

	1862.	1863.	1864.
New York	$26,194,085	$10,389,330	$12,316,122
England	12,950,140	28,467,257	34,436,423
China	2,660,754	4,206,371	7,888,973
Japan	17,916	31,564	35,631
Manilla	35,652	66,200	150,136
Panama	434,508	2,503,296	378,795
Havana	.....	32,303	8,000
Hawaiian Islands	3,000	31,253	130,603
Society Islands	.....	8,000	16,952
Mexico	5,000	155,519	175,245
Central America	10,000	77,827	45,322
Australia	121	.....	.....
East Indies	62,414	.....	.....
Victoria, V. I.	188,222	100,000	125,000
Total	$42,561,761	$46,071,920	$55,707,201

The following table shows the passenger movement of the port—the number arriving and departing by sea during 1864, as declared at the custom house:

From and to	Arrivals.	Departures.
Panama, N. G.	23,573	12,627
San Juan del Sur	1,016	2,252
Victoria and coastwise	1,575	974

Total in seven years			99,622

—averaging a yearly accession of population from immigration of 14,232 souls.

The Price of Coal.

There is every indication at present of a speedy decline in the price of coal. The final closing of the war, the fall in gold, and the increased shipments from the Pennsylvania mines furnish sufficient evidences to warrant the supposition that the cost must soon be lessened; and when we take into consideration that the largest purchaser, the Government, will probably in a short time leave the market, it will not be considered preposterous to predict that coal will be furnished during the coming summer for little over one-half the price demanded in 1864. The Pottsville (Pa.) *Journal* of Saturday last says: "The shipment is heavy this week, and the consequence is that the demand is slackened off to some extent again, and prices favor buyers. Those few who advanced wages on the 1st have found it necessary to suspend their collieries at present for want of orders."

New York Canals.

The repairs of the Canals of the State appear to be progressing very favorably for an early opening. While the work is being vigorously prosecuted on the Eastern and Western Divisions, there is no lack of energy on the Middle Division. If the present favorable weather should be continued, this Division of the Erie will be ready sometime before the first of May. Large quantities of material have been delivered for the restoration of the dams in the Oswego river, and appearances give promise of an earlier opening of the Oswego Canal than has been anticipated. Strenuous efforts are being made to open it simultaneously with the Erie. The other lateral canals will be in readiness at the time appointed for the opening, despite the heavy damage done to them.

Opening Communications with Richmond.

Arrangements are already made to put in running order the railroad from Aquia Creek to Richmond. The construction corps has commenced operations, and it is expected in a few days this road will be open. The rebuilding of the bridge over the Rappahannock at Fredericksburg is the most serious obstacle, but great exertions will be used to have it built in the shortest possible time.

☞ Messrs. Kasson & Co., of this city, have organized an "Oil Creek Line" of their locomotive express for the exclusive shipment of this description of property from New York and vicinity, to the oil regions of Pennsylvania. They employ their own cars and messengers in this business, and they assure persons shipping, that they can rely with certainty upon great care and despatch. They are now delivering these engines in four days from New York.

☞ The temporary bridge of the N. Y. Central Railroad, near the Genesee Falls, was constructed by Messrs. Fowler & Leighton of Rochester in six days. The company will now make arrangements to construct new piers and put up a permanent bridge—one it is hoped that will withstand future freshets.

☞ We learn that the fine packets running in connection with the Milwaukee and Prairie du Chien Railroad have resumed their trips, and will run regularly every day throughout the season.

☞ The Welland Canal was opened on the 17th inst.

☞ A branch railroad is to be constructed from a point on the Stonington road to Wickford, R. I., from which place it is proposed to run a steamer to Newport, connecting with Shore line Stonington boats and all trains on the Stonington road. This will open a new route, either by boat or rail, between New York and Newport, avoiding Point Judith; also a new route between Boston, Providence and Worcester and the stations on the Boston and Providence and Providence and Worcester Railroads and Newport, which would probably be well patronized during the season of pleasure travel.

☞ Phineas B Tompkins, of the United States military railways, late from Tennessee, has been ordered to Norfolk to take the superintendency of the railways diverging from that point—the Seaboard and Roanoke, from Norfolk to Weldon and Clarksville, and the Norfolk and Petersburg road.

FOR SALE.

1400 Ton 56 lb. Railroad Iron.
650 Ton 48 lb. City Street Rail Iron.
500 Ton 45 lb. Railroad Iron.

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO R. R. COMPANY, PITTSBURG, March 17, 1865.

DIVIDEND NOTICE.—At a meeting of the Board of Directors of the Pittsburg, Fort Wayne and Chicago Railway Co., held on the 16th inst., the regular dividend of TWO AND ONE HALF (2½) PER CENT. on the capital stock for the quarter ending March 31st inst., was declared payable, free of government tax, on and after April 17th prox., by the Treasurer, to Shareholders registered at Pittsburgh, and by Messrs. Winslow, Lanier & Co., No. 52 Wall street, to shareholders registered at New York.

The transfer books will close March 31st inst., and will reopen April 17th prox. By order of the Board.

4t-13 F. M. HUTCHINSON, Secretary.

J. F. D. LANIER, President, of Winslow, Lanier & Co. C. V. CULVER, Vice-Prest. of Culver, Penn & Co.
C. N. JORDAN, Cashier.

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.....$1,000,000.

DESIGNATED DEPOSITORY of the UNITED STATES AND AUTHORIZED AGENT OF THE TREASURY.

No. 5 NASSAU ST., Feb. 17, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, together with a portion of their correspondents, being persons of well-known standing and large pecuniary means, have become the owners of most of its Capital Stock, and assume its control and management, Mr. C. V. CULVER retaining all his interest, and accepting the Vice-Presidency.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.

C. N. JORDAN, Cashier. 3m-8

New York, Saturday, April 29, 1865.

Wealth and Resources of Tennessee.

One of the first efforts of the new Governor of Tennessee, was to call the attention of the people of that state to its material capabilities. The accession of one of its most distinguished citizens to the Chief Magistracy of the Union, by the act of the constitution rendered operative by an inscrutible disposition of Providence gives a natural direction to the eye of the observers, and as an entire change has recently taken place in the character of its domestic institutions it is well to contemplate what its condition was, as appears by the last census, and from that deduce what it may become under an improved order of things. It is a large and noble domain, and the geographers tell us that the longest straight line that can be drawn within any state in the Union, is in Tennessee, viz., one of about 455 miles from N. E. to N. W. It contains an area of 40,000 square miles, or 29,184,000 acres, and is generally very fertile, well watered, has some navigable rivers and is full of valuable minerals. In the year mentioned it contained a population of free persons 834,082, and of slaves 275,219. The slave population in 1800 was but 13,584. Its principal cities are Memphis, Nashville and Knoxville, their populations before the rebellion being respectively 22,623, 16,988 and 5,175. These numbers have been considerably reduced by the changes which the war has produced by the effect of military operations.

The improved land in farms contains 6,897,974, and the unimproved 13,457,960. Before the war land could be purchased in various parts of Tennessee for from 10 to 12 cents per acre, yet this low price failed to attract immigration for the reason, that slave labor made the contrast of free labor a stigma. The value of these improved farms was $272,555,054, and of the implements of husbandry $8,371,095.

The live stock for which the state was famous, consisted of 289,548 horses, 119,221 mules, 247,105 milch cows, 104,475 working oxen, 408,574 other cattle, 773,317 sheep, and 2,348,948 swine. The total value of these was estimated at $61,257,374.

The products of animals was as follows:

Butter, lbs.	10,000,823
Cheese, "	126,794
Wool, "	1,400,508
Wax and honey, lbs.	1,598,966

and the value of the slaughtered animals was $12,345,696.

The cereal crops were wheat 5,409,863 bushels, rye 265,244 bushels, Indian corn 50,748,266 bushels, oats 2,343,122 bushels, barley 23,489 bushels, buckwheat 14,421 bushels.

The commercial crops were of rice 30,516 lbs., tobacco 38,931,277 lbs., cotton 227,450 bales, hops 2,329 lbs., hemp 803 tons, flax 161,740 lbs., molasses 294,322 gallons.

The miscellaneous crops were as follows:

Peas and beans, bushels	550,913
Irish potatoes "	1,174,647
Sweet " "	2,614,558
Wine, gallons	13,562
Hay, tons	146,027
Clover seed, bushels	8,062
Grass " "	41,532
Flax " "	9,611
Maple sugar, lbs	117,859
" molasses gallons	6,754
Sorghum " "	485,828

The value of the orchard products was $314,269 and of the market gardens $274,163. The value of the home made manufactures was $3,166,195.

The number of manufacturing establishments was 2,420 with a capital of $17,270,000 using $9,365,000 of raw material and producing annually fabrics of the value of $17,100,000, a sum equal to the capital and about twice the value of the raw material.

The specified articles produced and values were as follows:

Flour and meal	$3,820,301
Lumber	1,975,481
Leather	1,118,850
Iron castings	552,050
Cotton goods	533,348
Printing	491,220
Iron rolled (5,024 tons)	483,248
" pig (18,417 tons)	457,000
Coal (138,964 tons)	413,662
Copper ore (2,379 tons)	404,000
Woollen and mixed goods	267,622
Boots and shoes	262,348
Spirits (283,194 gallons)	176,648
Steam engine and machinery	174,000
Illuminating gas	63,800
Soap and candles	44,000
Malt liquors (4,000 bbls.)	24,000
Agricultural implements	17,280

The total value of foreign and domestic exports was $27,966. The tonnage of the steamers, its only class of vessels of a large size was 12,364 tons. On some of the rivers boating is extensively carried on. The rivers are the Tennessee, Cumberland, Holston, Clinch and ten others. The former is navigable for steamers of a good size 1,200 miles, and many of them have been scenes of naval combats.

There were in 1860, 35 banks with a capital of $17,942,288. The works of internal improvement consisted of 15 railways 1,197 miles in length, costing originally $29,587,722 of which the longest line is the Nashville and Chattanooga 158 miles long. All these have been traversed by opposing armies, many of them destroyed temporarily and temporarily repaired by their occupants.

The public debt was but $3,844,667, now considerably increased.

Union Pacific Railroad.

At a meeting of the stockholders of the Union Pacific Railroad Company, (eastern division) at Leavenworth, Kansas, on the 3rd inst., the following gentlemen were elected Directors for the ensuing year: John D. Perry, Adolphus Meyer, Giles F. Filley, J.P. Upsher, John P. Devereux, Samuel R. Stinson, Thomas L. Price, Alexander C Anderson, and Charles S. Greeley.

Debt of Tennessee.

Civil Government has been restored to the State of Tennessee. A new, loyal Governor, chosen by the people, and a loyal Legislature, elected at the same time, are now in council at Nashville. The old Railroad Public Debt of the State is recognized as binding upon the public faith, and immediate steps to restore punctuality are recommended in the Governor's message. The railway 6 per cent. Public Debt amounts to $16,211,000; of which $13,661,000 is in the bonds of the State direct, and $2,550,000 by State indorsement of the bonds of the railway companies. The whole is a first mortgage lien of $10,000 per mile on the finished (and for the greater part) productive railways of the State. The arrearages of interest since the outbreak of the rebellion, is about 24 per cent. These arrearages will, probably, be funded, and the prompt payment on the subsequent interest resumed. In the case of the indorsed mortgage of the Nashville and Chattanooga Railroad, on which the arrearages of interest is about $300,000, on $1,535,000 indorsed bonds, the Governor believes that the War Department of the United States will owe the road upon account, more than sufficient to liquidate this sum. The recognized Public Debt, other than for railways, is stated at $3,894,606. The unrecognized debt is $3,000,000 of 8 per cent. war bonds, which have never had currency at the North or in Europe.

Michigan Southern and Northern Indiana Railroad.

The following is a comparative statement of the earnings and expenses of this road for the fiscal years ending March 1, 1864 and 1865:

Earnings:	1864.	1865.
From freight	$2,016,850 79	$2,242,972 10
" passengers	1,244,129 25	1,875,061 50
" mails	53,514 58	53.843 75
" express	41,829 36	74,385 56

Supplies	20,656 22	27,407 46
Station service	13,289 46	10,218 14
Law expenses	3,910 18	14,255 25
Loss and damage	17,229 14	14,192 51
New York office	30,740 01	10,480 88
All other expenses	29,431 46	30,510 98
	$1,753,516 90	$2,408,352 17
Net earnings	$1,630,777 33	$1,881,113 56

Compared with the previous year, the gross earnings show an increase of $905,171 50, with an increase in expenses of $654,835 27—making the increase in net earning $250,336 23.

Of the increase of gross earnings, $630,932 25 is from passengers, $226,121 31 from freight, and $48,053 94 from mails, express, rents, etc.

The proportion of operating expenses to earnings in 1864–'65 was 56.14 per cent.; in 1863–'64, 51.80; in 1862–'63, 48.50.

The amount of net earnings $1,881,113 56, afforded income sufficiently large to meet the payments maturing during the year for rental, taxes, interest on the bonded debt, the year's contribution to the Sinking Fund, and the ten per cent. dividend on the guaranteed stock, in all $1,187,221 69, leaving a surplus of $743,891 87; equal to nearly ten per cent. on the common stock.

Two dividends of 5 per cent. each, less the government tax, were paid in August and February, on the guaranteed stock, and one of 3½ per cent free of government tax, in August last, on the common stock. The February dividend of 3½ per cent. on the common stock was, in consequence of some contemplated settlements with holders of guaranteed stock requiring time for the reception of their assents, postponed until March 1st, on which date it was paid, thus throwing forward the actual payment into the new fiscal year, though paid from the earnings of the past year. The amount of the two dividends on common stock thus paid is $555,828 40.

The total payments, viz: The year's charge for interest, sinking fund, rental, taxes and two dividends on both classes of stock, amounting to $1,692,550 09, being deducted from the amount of net earnings, viz: $1,881,113 56, left a net balance of $188,563 47. This balance was expended in necessary additions to the rolling stock and real estate. For these purposes the total amount of expenditure was $530,604 60; and so much of this outlay as was not covered by the above named surplus of net earnings, amounting to $342,041 13, may be met by any excess of net earnings accruing during the new year, or by sale of bonds as may be hereafter determined to be best for the interests of the Company.

The Company holds unissued and uncancelled $772,500 of its own and the Detroit, Monroe and Toledo Railroad bonds, the whole or any part of which might with propriety be expended for purposes of permanent improvement in additional equipment and real estate, which accession to the property of the Company largely adds to its capacity for doing an increased business beyond even the large business of the past year.

These acquisitions to the property of the Company, are of a permanent character and to be employed in earning the gross income of a series of years hereafter, even more completely than they have been employed in the business of the past year. It would, therefore, be eminently proper by the sale of bonds to meet so much of their cost as may not have been covered by the surplus of net earnings of the past year, after paying 7 per cent. on the common stock.

Were the whole amount of the bonds on hand and available sold, the bonded debt would be but $9,336,000, subject to a reduction of $130,000, during the coming year, by the operation of the Sinking Fund, and annually, thereafter, by a gradually increasing amount.

As will be seen by the tabular statements appended, the issue of Sinking Fund Bonds has been increased since the date of the last annual report $310,000. It will be observed, also, that the table of floating liabilities and assets exhibits an item of floating indebtedness for balance due on purchase of guaranteed stock, of $250,078 52.

These items, amounting to $560,078 52, represent the cost of 4,000 shares of guaranteed stock, purchased and withdrawn from issue. This amount is less than would have been the cost of that number of shares of a ten per cent liability, redeemed at a premium that would reduce the rate of interest to the equivalent of a 7 per cent. liability at par.

It was thought advisable to make the exchange of liabilities in this manner, by the purchase of one and sale of the other class of securities, not only because of the gain just named, but because it set at rest, so far as the amount of guaranteed stock purchased is concerned, the vexed question of back dividends on that class of liability, and relieves the Company from any chance of claim or litigation therefor.

Bonds of same class would have been sold to the full amount necessary for paying the entire cost of the purchased shares, had the market for railroad bonds remained in a condition to take more at a premium. The 310 bonds sold, were disposed of at rates varying from 6 to 17 per cent. premium.

Besides the $400,000 of guaranteed stock, the company have redeemed during the year $22,000 of old, overdue bonds, and $34,300 of Detroit, Monroe and Toledo Railroad Stock.

The Commissioners of the Sinking Fund now hold $884,000 of Sinking Fund Bonds in the fund, making the contribution full to March 1st, 1865.

The withdrawal from issue and reduction of stock and bonds during the year, exceed the issues by $157,640, thus reducing the aggregate of those liabilities to that extent. The report says:

Difficult questions have been pressed upon the consideration of the Board, by the claims of a large number of holders of the Guaranteed Stock for back dividends, under the obligations that, it is contended, were created at the period of its original issue, to guarantee yearly dividends of ten per cent. Under this pretext there is a default of over five years interest on said Guaranteed Stock, prior to the time when the present administration paid the first dividend on said stock.

The persistent demands of strong and influential holders for such accumulated interest, were not responded to by the Board, and suits to recover the back interest were instituted. After careful examination of the intricate questions of liability involved by eminent counsel, it was advised by them that while claims would admit of a line of defence, yet they would lead to a costly and vexatious litigation, calculated to array the different interests in both classes of stock against each other at the risk of great and permanent detriment to all concerned; under such advisement, and after conferring with a large number of stockholders controlling a majority of the stock, it was deemed to conclude an amicable arrangement of compromise with the Guaranteed Stockholders, and such an agreement as was satisfactory to a large majority of them was effected in the month of January last. The terms thereof are set forth in the following circular issued by the Treasurer on the 12th day of January last:

TO THE GUARANTEED STOCKHOLDERS:

In order to reconcile conflicting interests in dispute, growing out of a claim made by a portion of the guaranteed stockholders for back dividends, this Company has consented, as a compromise, to accept of a proposition made by parties owning and representing a large majority of the Guaranteed Stock, and by parties who have heretofore brought suits for back dividends against this Com-

pany which suits are now on this settlement withdrawn. The Company deems it but just to offer the same terms of settlement to the remaining Stockholders as have been accorded to the majority above named, viz:

In addition to the 5 per cent, cash dividend, payable on the first day of February next, this Company is ready to issue to the Guaranteed Stockholders, common stock at par, to the extent of 30 per cent., of the Guaranteed Stock held by them in full payment of all claims for dividends and interest accruing prior to February 1st 1863, endorsing such payment upon the face of the Guaranteed Stock Certificates. All common stock so issued prior to the closing of the Common Stock Books on the fourteenth of February proximo, will be entitled to the three and a half per cent. dividend on Common Stock payable first of March, 1865.

HENRY KEEP, *Treasurer.*

By this measure it was hoped the last important question likely to arise from former embarrassments had passed away; but in a short time certain parties procured a temporary injunction, restraining the Directors from proceeding with the settlement. A hearing in the case has been had before the courts, and their decision is pending which must initiate or conclude a litigation which the Directors, mindful of the trust reposed in them, have sought to avert.

The fiscal year closes with a large, uncollected balance due from the general government and other sources owing to the delay of settlements beyond our control. The easier condition of the Public Treasury and the approach of navigation to relieve freights awaiting movement at Toledo, will enable us soon to realize on such balances.

It will be observed that the value of fuel and supplies on hand has increased $381,647 05 over last year; this arises in part from the higher cost of the articles purchased, but chiefly from an increased stock of fuel and supplies. The past winter, though severe for railway operations, was unusually favorable for bringing out the requisite quantities of wood and ties, and the wants of the road have been abundantly supplied by an accumulation of one year's stock upon the line.

On the 21st day of November last, pursuant to a vote of the stockholders at their last annual meeting authorizing it to be done, the Company entered into an arrangement with the St. Joseph Valley Railroad Company, and the Three Rivers and Schoolcraft Railroad Company, and another party, to lease that portion of our line of four miles running north from White Pigeon to Constantine, and surrendered up to those parties all our interest in the old track and fixtures of the St. Joseph Valley Railroad, on condition that the line of road should be extended within three years and laid with T rail for twenty miles north of Constantine to the town of Schoolcraft.

More than 137 miles of track have been relaid with new, re-rolled or repaired iron, and the bridges, fences, and other road-works have received extensive repairs, all of which has been charged to the cost of operating. The sum of $50,072 18, has been expended in the construction of new depots, warehouses, engine-house, paint shop and other buildings, and the amount included in operating expenses, although more properly chargeable to improvements, as covering the cost of additional property on the line of the Road.

Thorough repairs and improvements have been effected in equipment. New cars have been built to replace the old and worn out stock, and such renewals and repairs have been made to both engines and cars as to add to their value and efficiency for service.

The sum of $21,513 97 has been added to the value of the shops since last year, by the purchase and construction of new tools and valuable machinery, and this increased value has also been charged to operating expenses.

It has been the purpose of the management to fully maintain the condition of the Road and equipment, and the liberal outlay made during the year for these purposes has been sufficient to effect the object.

The assets and floating liabilities of the company March 1, 1865, were as follows:

ASSETS.

Cash in New York	$55,110 99
" Toledo	63,040 93
Uncollected earnings	204,608 72
Freight overcharges due	11,724 06
Bills receivable Toledo	2,591 24
Individual accounts Toledo	16,006 07
Interest in Chicago Union stock yards (loans in trust)	33,333 33
Outside real estate	15,621 24
Supplies on hand	670,372 85
	$1,072,409 43

FLOATING LIABILITIES.

Bills payable in New York	$10,000 00
" Toledo	25,000 00
Coupons and bonded interest	24,908 30
Interest on overdue bonds	3,640 00
Unclaimed dividends	14,777 40
Unpaid vouchers, including February expenses	379,473 74
Due individuals at Toledo	2,024 31
Balance due on purchased guaranteed stock	250,078 52
	$709,902 27

The apportionment of freight and passenger earnings of Main Line and Branches for the year 1864–'65 was as follows:

	Passenger.	Freight.
Main Line	$1,233,973 91	$1,660,458 38
Air Line	161,778 62	291,421 81
Det., Mon. & Toledo.	198,559 38	158,731 01
Jackson Branch	52,578 62	33,873 50
Monroe and Adrian	44,326 10	58,350 05
Three Rivers Branch		3,577 30
Military transp	183,844 87	
Storage		36,560 06
	$1,875,061 50	$2,242,972 10
Previous year	1,244,129 25	2,016,850 79
Increase	$630,932 25	$226,121 31

The total number of passengers carried was 831,365, of which 135,197 were through, and 696,168 way. Of the through passengers, 101,434 were 1st class, 19,867 2d class, and 13,896 3d class, yielding $766,103 95. Of the way passengers, 694,277 were 1st class, 1,162 2d class, and 729 3d class, yielding $925,112 68. The number of miles traveled by through passengers was 33,260,246; by way passengers, 28,212,298—total, 61,472,544; an increase, as compared with the previous year, of 254,468 passengers, and of mileage, 19,742,274. The average mileage of each through passenger was 246; do., way, 40. The average amount received from each through passenger was $5.67; do., way, $1.33. Average rate per mile on through travel 2.33 cents; do., way, 3.28 cents.

The number of tons of through freight moved eastward was 126,631; do., westward, 68,038—total 194,669, yielding $1,064,818 95, or 48.26 per cent. Way freight moved eastward, 228,941; do., westward, 103,891—total, 332,832, yielding $1,141,593 09, or 51.74 per cent. Total tons through and way eastward, 355,572, or 67.4 per cent., yielding $1,432,644 52; do., westward, 171,929, or 32.06 per cent., yielding $773,767 52—the total tonnage being 527,501, against 558,979 the previous year; and the revenue therefrom, as above, exclusive of storage, $2,206,412 04, a gain as compared with the previous year, of $224,884 56, or 11.35 per cent.

The equipment of the road consists of 97 locomotives; 8 10-wheel and 68 8-wheel passenger cars; 9 second class, 4 emigrant, 22 mail, express and baggage, 10 military, 16 drovers', 1 paymaster's, 2 wrecking, 170 stock, 906 box, and 259 platform cars.

Number of miles run by passenger trains, 785,286; by freight trains, 1,151,612; by wood and gravel trains, 250,226—total, 2,187,124, an increase over the previous year of 15,647. Cost of repairs per mile run, 8.66 cents, including the rebuilding of 10 engines, a thorough overhauling of 29 others, and the expenditure of $2,418 99 on one new engine, not yet furnished.

Number of miles operated, 523.82.

Pittsburg Interests.

The "Trade Circular," published at Pittsburg, a new and highly useful monthly throws a better light on the great interests of the "smoky city," and discusses their varying phases with more knowledge and ability than has heretofore been brought to their elucidation. From several excellent articles which have appeared in its successive numbers, we make up the following information.

The importance of this city, which occupies a position between the Allegheny and Monongahela Rivers, where their junction forms the Ohio—a position not unlike that occupied by the City of New York at the confluence of the Hudson and East Rivers—has long been acknowledged, but is only now beginning to be fully understood. Standing at the head of the navigation of the most important arm of the Mississippi, its site in a commercial point of view is almost unrivaled

among inland towns, while on the east and the west it is flanked by extensive suburbs enjoying in a minor degree the same facilities enjoyed by the parent mass. Railroads make it a great seat also of the land movement of goods and passengers, and connect it east and west with all the principal markets from the seaboard to the lakes and the Mississippi. Its centrality, indeed, insures it an easy distribution of its own manufactures and the means of concentrating to itself the products of all parts of the Union. But if the city can so boastfully claim attention to its commercial facilities, it may also boast of a growing and important list of manufactures, which in a great measure utilize the natural gifts of its position; and gives prominence to its commerce. It is principally of these we shall speak in the ensuing remarks.

Pittsburg is the great producer of steel, of copper, and of iron, three staples that are largely distributed from its mills and furnaces in their simple form in all other sections of the country. For the production of the various manufactures of these metals the facilities are as abundant as for the production of the staples themselves, and the day must come when the hum and clatter of a score of factories will drown the din of the furnace and mill around which they cluster and which supply them with the raw material.

Iron.

As one pre-eminently of the great interests of Pittsburg naturally leads an exhibition of the manufactures of the city and suburbs. More than 225,000 tons of pig metal are sold in Pittsburg annually; and the variety of the metal is greater than in any other market in the Union. The supply is drawn from seven sources: 1—from the Allegheny region, hot and cold blast charcoal metal, strong in wrought iron; 2—from the anthracite region, excellent for castings; 3—from the celebrated Juniata region; 4—from the Big Beaver Basin, including the contiguous counties of Northeastern Ohio, producing a very tough metal; 5—from the Missouri, Lake Superior and Youghiogeny iron regions, the ores of which are smelted here; 6—from the Hanging Rock region of Ohio, a fine quality of charcoal metal; and 7—from the Tennessee iron region, charcoal pig. These various grades of metals are attracted to Pittsburg by the demands of *thirty* mills for rolling iron, which produce one-third of all the rolled iron made in the United States, and have a capability of producing fully one-half. Eight of these thirty mills are fitted for the production of navy armor-plates, and have supplied many thousand tons for our National iron-clads, and in the future will contribute towards the building up an iron mercantile marine, which as sure as day follows night will supplant the wooden ships of the present times. The export of this staple by railroad alone for the two years ending Sept. 30, 1864, amounted to the following tonnage:

	1862–'63.	1863–'64.
Tons exported west by railroad.	31,797	72,018
Tons exported east by railroad .	6,115	11,390
Total by railroad	37,912	83,408

Another large aggregate of tons is exported by river, while a third heavy aggregate is consumed in the city and suburbs, in the production of the many other articles of Pittsburg manufactures which are constructed in part or entirely from the merchant iron turned out from the rolling mills. Probably the railroad and river and home manufacture divide the sum total of the tonnage produced and that pretty equally, which as before stated is estimated from very accurately ascertained returns to have been 225,000 tons a year.

Although a Pittsburg staple of later date than Iron,

Steel.

is now, and more especially in its future, one of the most important of Pittsburg manufactured products. Its production was commenced as an experiment in 1828, and certain qualities have been successfully made for over thirty years. But the finer qualities for edge-tool purposes have been produced at this point for less than five years, and yet in that brief period the quality that should triumphantly compete with the English article is a success belonging to Pittsburg alone. In other parts of the Union the lower grades have been extensively manufactured, yet none has been produced equal to the steel which the Pittsburg manufacturers have turned out. Indeed the very best qualities of English cutlery steel are more than equalled in all requisites by that now produced in Pittsburg, where there are six steel mills manufacturing annually 18,000 tons of all descriptions with a capacity for nearly double that product.

The consumption of coke and coal in the manufacture is over 3,600,000 bushels per annum, and of iron about 20,000 tons.

The distribution of this staple (in pounds) by railroad in the two years ending September 30, 1864, is stated to have been as follows:

	Steel.	Spring.	Wing.
1862–'63, East...	1,156,968	140,585	85,920
" West ..	4,702,523	630,077	408,800
1863–'64, East...	3,878,741	146,740	54,540
" West ..	6,627,411	842,120	824,949
Total, 1862–'63 ..	6,559,491	770,662	494,720
" 1863–'64 ..	10,005,752	988,860	879,589

The exportation by river cannot be so thoroughly ascertained as by railroad from causes given; but the best estimates make the figures as fully equal to those by rail. The home consumption is also large and increasing.

Nails.

Another allied and important product of Pittsburg is the product of its nail-machines. The export of these has not been as definitely ascertained as of iron and steel. The following is the distribution as given for the years 1862–'63 and 1863–'64:

	1862–'63.	1863–'64.
Kegs exported east by rail....	5,334	33,576
" west by rail....	223,047	212,671
Total	22,381	246,247

and an equal amount, or even a larger may be set down as having taken the river route, by which indeed the great bulk of heavy articles find their way West.

Castings.

There are at Pittsburg 46 foundries. Four of these manufacture a class of goods known as malleable iron. Three manufacture plow castings only. Twelve are especially fitted up for the production of the heaviest steamboat and machinery castings only; and the remainder are adapted to either heavy or light castings as ordered; and twelve of the forty-six have machine shops attached.

The average number of hands employed in this branch is 2,494; and the annual consumption of metal over 4,600 tons, with a disbursement of over $1,000,000 a year in wages.

In addition to these is the famous Fort Pitt Cannon Foundry, with all its vast powers and resources, and employing an average of 280 hands, at a cost in wages of $5,000 a week. This celebrated workshop, since the breaking out of the rebellion has cast and finished 2,050 cannon and mortars, of which nearly 1,200 were those immense guns popularly termed Columbiads. In addition to this great amount of cannon the foundry has turned out 10,000,000 pounds of shot and shell..

The distribution of castings (pounds,) not including stoves and cannon, by rail in the two years named was as follows:

	1862–'63.	1863–'64.
Exported east by railroad...	741,639	1,437,410
Exported west by railroad ..	2,202,832	3,669,598
Total	2,944,441	5,143,008

The largest amount of stoves are shipped by river so that the transportation by rail affords but a limited view of the stove product of the city. No figures are given for 1862–'63; for 1863–'64 the export by rail was 14,863 stoves.

The distribution of cannon by rail for the same years was—

	1862–'63.	1863–'64.
Pounds exported east	7,009,862	25,720,000
" west	163,672	6,886,000
Total	7,173,534	32,606,000

The amount of pounds is the estimate weight from the average of the amount of pounds in each description of gun.

As a matter of additional interest a table of the size, weight and service of Columbiads is subjoined, showing also whether intended to carry shot or shell and the weight of each ball.

Size of Bore.	Service designed for.	Weight each gun. lbs.	Shot or shell.	Weight each ball. lbs.
9 inch	Navy	9,100	Shell	70
10 "	"	16,800	Ball	70
11 "	"	16,800	Shell	130
15 "	"	43,900	Ball	450
20 "	"	100,000	"	1,000
8 "	Army	8,400	"	64
10 "	"	15,900	"	128
15 "	"	50,000	"	450
20 "	"	116,497	"	1,000

The 15 inch army guns enumerated in the above table, are 17 feet nine inches long. The navy guns, 17 feet 5 inches long, and both descriptions, 4 feet in diameter at the trunions.

As a further matter of interest is also subjoined the weight of shell or ball thrown by Howitzers, Mortars and Rifled guns.

Size bore.			Weight ball. lbs.
8 inch	Howitzer.	Shell	50
8 and 10 "	Mortars.	"	50 and 84
18 "	Mortars.	"	200
4½ "	Rifle guns.	Ball	38

Among the other iron manufactures of Pittsburg we may specially note those of axles, spikes and rivets, bolts and nuts, and axes.

The distribution of axles (in pounds,) was as follows:

	1862–'63.	1863–'64.
East by railroad.....	122,926	78,490
West by railroad	992,023	1,692,770
Total.....	1,114,949	1,771,260

Of spikes and rivets there was distributed by railroad in 1862–'63—east 5,187, and west 12,909: total, 18,096 kegs. The distribution in 1863–'64 is not given. Of bolts and nuts the annual distribution by rail is estimated at 15,000 to 16,000 kegs. Of all these products the far largest amount goes by river and is not ascertainable.

MACHINERY.

Machinery constitutes but a small section of the products of the Pittsburg foundries. Enough, however, has been given of the statistics of this trade to form some comparative estimates, so far as exports by rail exhibit its proportions. There are 24 machine shops in all—14 of magnitude, and 8 of them specially adapted to the manufacture of the largest size of engines. There are also twelve boiler yards capable of manufacturing any description of boilers. There are also 10 establishments locally known as river-blacksmiths and forge shops at which all the heavy iron work of steamboats is wrought—from the largest shaft, chain cables and anchors to the smallest iron work required. Also, three very heavy establishments manufacturing nuts and washers and similar articles.

We now come to another and important staple of Pittsburg—

COPPER.

of which 1,700 tons from Lake Superior are annually refined, being one-seventh of the copper produced in the United States. About 1,000 tons of this amount are manufactured into the various sized sheets required by braziers by two large mills. The remainder is sent to New York and there sold for home consumption or export principally to France, where it is considered the best copper in the known world. The total distribution of copper (pounds,) for the last two commercial years was as follows:

	1862–'63.	1863–'64.
Sent east by railroad.....	300,052	361,940
Sent west by railroad	726,627	1,322,074
Total	1,106,679	1,684,014

In all there are eight coppersmiths establishments manufacturing all descriptions of copper work for machinery. The average number of hands employed in these works is about 1,800.

The—

GLASS TRADE.

of Pittsburg is scarcely less important than those great branches of manufacturing industry for which the city has so wide a renown. Pittsburg indeed is the largest producer of this merchandize in the Union.

The first glass factory is said to have been in operation in 1795, located at what is now called Glass House Ripple and known in those early times as Scott's Glass Works.

In 1796, Gen. James O'Hara and Major Isaac Craig commenced the erection of works for the manufacture of window glass.

In 1807 Robinson & Ensell commenced the manufacture of flint glass.

Such were the small beginnings of a branch of Pittsburg manufactures, the scope of which at the present day is equal to nearly double all the flint glass manufactured elsewhere in the United States, and one-third more window glass than is produced at all other points.

A number of the workmen of these earlier factories came from Frederick, Md., on the discontinuance of the works at that point in 1802 or 1803.

The manufacture of glass west of the mountains is due, however, to Albert Gallatin who in 1787 began the manufacture at New Geneva.

Glass cutting was established in 1810 by an ingenious German, (Eichbaum,) formerly glass-cutter to Louis XVI of France.

In 1813 the number of glass factories had increased to five producing glass to the value of $160,000. In 1831 there were eight glass works, four producing flint and four producing window and green glass to the value of $500,000. In 1837 there were 13 factories, producing to the value of $700,000. Twenty years after (1857,) there were thirty-three factories, of which nine produced flint glass, and the value of their total product was $2,631,900 a year.

At the present time the trade has attained to magnificent proportions. There are now in the city 15 bottle and vial factories, 15 window glass factories and 15 flint glass factories—45 works in all.

The bottle and vial works produce annually about 420,000 gross, or 60,480,000 bottles and vials, worth at present rates $2,100,000.

The window glass works have a capacity to make 520,000 boxes of glass a year, and yield now about 400,000 boxes, valued at $2,600,000.

The flint glass works produce about 4,200 tons of glassware, worth about $2,000,000. Their capacity, however, is double the amount they produce, or about 8,000 tons.

The trade collectively gives employment to some 3,000 hands whose wages amount monthly to about $150,000. The country over which the large amount of glass produced by these workmen is distributed, is co-extensive with the northern States, large amounts finding the way to Pennsylvania, New York, Massachusetts, etc., and also to Canada. The great bulk of the trade, however, is with the Northwestern States.

The total export of glass and glassware from Pittsburg by railroad for the two years ending Sept. 30, 1864, was as follows:

	1862–'63.	1863–'64.
Window glass, boxes, east....	5,128	6,407
" " west ...	90,422	142,615
Total	95,550	149,022
Glass ware, pkgs., east.....	41,415	100,049
" " west.....	164,690	153,199
Total	196,105	253,248

The amounts by river transportation as with all other heavy articles, was probably much greater.

The other glass works west of the mountains are—three flint glass factories at Wheeling, W. Va., and one at Steubenville. Also three window glass works on the neighborhood of Brownsville, 60 miles from Pittsburg. To the east of the Alleghanies there are window glass works: twelve in New York, and nine in New Jersey; flint glass works: six in Massachusetts, two in Brooklyn, N. Y., one in Jersey City, N. J., and two in Philadelphia, being 11 in all making flint glass, and 21 making window and other glass.

We shall now take a view of the trade in

PETROLEUM.

a staple with which Pittsburg from its proximity to the producing region is intimately connected. This of course is a recent interest, but its value by no means insignificant. The number of refineries within the city limits is fifty-eight, with a total weekly capacity of 26,000 barrels.

The distribution of this material in its several forms of crude and refined, and of benzine by railroad, given in the following tables:

Crude Petroleum:

	1862–'63.	1863–'64.
Barrels sent east by railroad..	288,059	214,819
" west by railroad.	12,418	5,571
Total	300,477	220,390
Refined Petroleum:		
Barrels sent east by railroad .	246,484	279,094
" west by railroad.	17,583	29,188
Total	268,917	298,221
Benzine:		
Barrels sent east by railroad .	28,439	25,165
" west by railroad.	2,894	1,190
Total	31,333	26,355
Grand Total all kinds.....	595,727	544,966
Decrease 1863–'64		50,761

These tables show a falling off of upwards of 50,000 barrels in 1863–'64 as compared with the preceding year. To what extent the decrease in distribution by railroad has been made up by the amount exported by water carriage there is no possibility of estimating. It is not probable, however, that the trade has increased, as new avenues of transportation have been furnished to eastern markets, and the routes by river and rail to Pittsburg are not the most convenient. If Pittsburg indeed intends to retain this branch of business even to its present amount it will have to extend its railroads directly to the producing region, which is now only reached indirectly.

The value of the petroleum trade of Pittsburg for the year from Sept. 1863 to Sept. 1864, for which period this article gives figures, so far as exports by one channel are considered, would probably be close upon twelve millions of dollars. An article in the August, 1864, number of the *Circular*, illustrative of the refining business, gives the total number of barrels refined as returned, by the various refineries to a reporter for the *Circular*, at 537,389 barrels for the one year previous, which would be worth $8,599,224 at a valuation of only forty cents per gallon. The valuation for the year 1864–'65, would of course place the sum total much above those figures. In addition to this valuation of the refined petroleum must be taken that of the crude, giving data that shows the sum of $12,000,000 to be a moderate estimate of the yearly amount of the petroleum trade of Pittsburg.

Woodstock Branch Railway.

The St. John (N. B.) *News*, says that $40,000, the sum required by law, having been subscribed, a meeting of the shareholders in the Woodstock Railway Company has been called for the 8th of May, for the purpose of organizing this company, and proceeding with the work.

Michigan Peninsular Railroad.

The Peninsular or Bay de Noquet Railroad from Escanaba to Marquette, is expected to be completed and opened in about four weeks. This road opens the Lake Superior regions to Chicago, bringing Marquette, Wisconsin, within a day's ride of the latter, by boat from Escanaba, and thence by the Northwestern Railroad.—*Western Railroad Gazette.*
